

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE Commercial AND Financial Chronicle

Hunt's Merchants' Magazine,

A WEEKLY NEWSPAPER,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, JANUARY 7, 1871. NO. 289

LIBRARY OF THE UNIVERSITY OF CALIFORNIA

Advertisements.

Advertisements will be inserted at the following prices per line for each insertion:

If ordered less than 4 times			20 cents per line.
	4 times or more		16 "
"	9 "		14 "
"	13 "		12 "
"	26 "		10 "
"	52 "		8 "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

WM. B. DANA & CO.,
PUBLISHERS,
79 & 81 William St., N. Y.

Safe! Profitable!! Permanent!!!

JAY COOKE & Co.

Offer for Sale at Par and Accrued Interest the

FIRST MORTGAGE LAND GRANT

Gold Bonds

OF THE

NORTHERN PACIFIC R.R. CO.

These bonds are secured, FIRST, by a First Mortgage on the Railroad itself, its rolling stock, and all equipments; SECOND, by a First Mortgage on its entire Land Grant, being more than Twenty-two Thousand Acres of Land to each mile of Road.
The Bonds are free from United States Tax; the Principal and Interest are payable in Gold—the Principal at the end of Thirty years, and the Interest semi-annually, at the rate of SEVEN AND THREE-TENTHS PER CENT per annum.
They are issued in denominations of $100, $500, $1 000 $5,000 and $10,000.
The Trustees under the Mortgage are Messrs. Jay Cooke, of Philadelphia, and J. Edgar Thomson, President of the Pennsylvania Central Railroad Company.
These Northern Pacific 7-30 Bonds will at all times before maturity, be receivable at TEN PER CENT PREMIUM (or, 1.10), in exchange for the Company's lands at their lowest cash price.
In addition to their absolute safety, these Bonds yield an income larger, we believe, than any other first-class security. Persons holding United States 5-20's can, by converting them into Northern Pacifics, increase their yearly income ONE-THIRD, and still have a perfectly reliable investment.
HOW TO GET THEM.—Your nearest Bank or Banker will supply these Bonds in any desired amount and of any needed denomination. Persons wishing to exchange stocks or other bonds for these, can do so with any of our Agents, who will allow the highest current price for ALL MARKETABLE SECURITIES.
Those living in localities remote from Banks, may send money, or other bonds, directly to us by express, and we will send back Northern Pacific Bonds at our own risk, and without cost to the investor. For further information, pamphlets, maps, &c., call on or address the undersigned, or any of the Banks or Bankers employed to sell this Loan. For sale by

JAY COOKE & CO.,

Philadelphia, New York and Washington,
Fiscal Agents Northern Pacific Railroad Company.
By most National Banks, and by Brokers generally throughout the country.

JAY COOKE & CO.

CITY OF BALTIMORE.

$1,200,000 SIX PER CENT BONDS

OF THE

Western Maryland Railroad Company,

ENDORSED BY THE

CITY OF BALTIMORE.

The undersigned Finance Committee of the WESTERN MARYLAND RAILROAD COMPANY offer through the American Exchange National Bank

$1,200,000

of the Bonds of the WESTERN MARYLAND RAILROAD COMPANY having 30 years to run, principal and interest guaranteed by the City of Baltimore. This endorsement having been authorized by an act of the Legislature, and by ordinance of the City Council, was submitted to and ratified by an almost unanimous vote of the people. As an additional security the city has provided a Sinking Fund of $20,000 for the liquidation of this debt at maturity. An exhibit of the financial condition of the city shows that she has available and convertible assets more than sufficient to pay her entire indebtedness. To investors looking for absolute security, no loan offered in this market presents greater inducements. These Bonds are offered at 87½ and accrued interest. Coupons payable January and July.

WILLIAM KEYSER,
JOHN K. LONGWELL,
MOSES WIESENFELD,
Finance Committee.

Financial.

MIDLAND BONDS

IN DENOMINATIONS OF

$100, $500 & $1,000.

THESE FAVORITE

SEVEN PER CENT GOLD BONDS

are secured by a first mortgage on the great Midland Railroad of New York, and their issue is strictly limited to $20,000 per mile of finished road, costing about $40,000 per mile. Entire length of road, 345 miles, of which 220 have been completed, and much progress made in grading the remainder.

RESOURCES OF THE COMPANY.

Full-paid stock subscriptions, about - - -	$6,500,000
Subscriptions to convertible Bonds, - - - -	600,000
Mortgage Bonds, $20,000 per mile on 345 miles -	6,900,000
Total - - - -	$14,000,000

Equal to $40,000 per mile.

The road is built in the most thorough manner, and at the lowest attainable cost for cash.
The liberal subscriptions to the Convertible Bonds of the Company, added to its other resources, give the most encouraging assurance of the early completion of the road. The portion already finished, as will be seen by the following letter of the President of the Company, is doing a profitable local business:

NEW YORK, Dec. 2, 1870.

Messrs. George Opdyke & Co., New York:

Gentlemen: Your favor of the 1st inst., asking for a statement of the last month's earnings of the New York and Oswego Midland Railroad, is at hand. I have not as yet received a report of the earnings for November.

The earnings for the month of October from all sources were $43,709 17, equal to $524,510 04 per annum on the 147 miles of road, viz.: Main Line from Sidney to Oswego, 125 miles; New Berlin Branch, 22 miles.

The road commenced to transport coal from Sidney, under a contract with the Delaware and Hudson Canal Company, in the latter part of November. The best informed on the subject estimate the quantity to be transported the first year at not less than 250,000 tons, while some estimate the quantity at 300,000 tons. This will yield an income of from $375,000 to $450,000 from coal alone on that part of the road.

Taking the lowest of these estimates, it gives for the 147 miles a total annual earnings of $899,510 04. The total operating expenses will not exceed fifty per cent., which leaves the net annual earnings $449,755 02, which is $214,555 02 in excess of interest of the bonds issued thereon.

I should add that the earnings from passengers and freight are steadily increasing, and that, too, without any through business to New York. Yours truly,

D. C. LITTLEJOHN, President
N. Y. and O. Midland Railroad Co.

The very favorable exhibit presented in the foregoing letter shows that this road, when finished, with its unequaled advantages for both local and through business, must prove to be one of the most profitable railroad enterprises in the United States, and that its First Mortgage Bonds constitute one of the safest and most inviting railroad securities ever offered to investors.

For sale, or exchanged for Governments and other current securities, by

THE COMMERCIAL AND FINANCIAL CHRONICLE *is issued every Saturday morning, with the latest news up to midnight of Friday.*

TERMS OF SUBSCRIPTION—PAYABLE IN ADVANCE.

For THE COMMERCIAL AND FINANCIAL CHRONICLE, delivered by carrier to city subscribers, and mailed to all others, (exclusive of postage,)

For One Year $10 00
For Six Months 6 00

The CHRONICLE *will be sent to subscribers until ordered discontinued by letter. Postage is 20 cents per year, and is paid by the subscriber at his own post-office.*

WILLIAM B. DANA, JOHN G. FLOYD, JR. } WILLIAM B. DANA & CO., Publishers, 79 and 81 William Street, NEW YORK. POST OFFICE BOX 4,592.

Mr. Alex. Holmes is our only travelling agent.

☞ *The Publishers cannot be responsible for Remittances unless made by drafts or Post Office Money Orders.*

☞ *A neat file for holding current numbers of the* CHRONICLE *is sold at the office for* $1 00. *Volumes are bound for subscribers at* $1 25. *The first and second volumes of the* CHRONICLE *will be purchased by the publishers at a fair price.*

THE CHRONICLE FOR 1871.

In accordance with the notice taken from the December number of *Hunt's Merchants' Magazine*, and which we published last week, the publication of the *Magazine* as a montly will be suspended from this time, and the *Magazine* will be incorporated with THE CHRONICLE. To the entire list of subscribers to the *Magazine* THE CHRONICLE will be delivered, or mailed, weekly, for the month of January, without charge to any who at the end of that time desire its discontinuance. Where the time paid for the *Magazine* has not expired, THE CHRONICLE will be sent in its place until the end of the term for which payment has been made.

It is scarcely necessary for us to add that there will be no change in THE CHRONICLE, either editorially or otherwise, except such as may be involved in continual progress. In the past we have been succesful beyond our most sanguine anticipations. Like efforts in the future will, we have no doubt, meet with like results.

OUR ANNUAL TABLES.

We give in this number our yearly tables of the daily prices of gold and fluctuations in stocks, exchange, &c. To make room for so much additional matter we are compelled to omit our usual monthly review. It will appear, however, next week.

THE DEBT STATEMENT.

The semi-official explanation from Mr. Boutwell defending his contraction policy, the passage of the funding bill by the Senate, the vigorous message of Governor Hoffman, and the monetary ease consequent on the payment of the January dividends, have attracted much attention this week, but have not prevented the usual discussion of the debt statement, which offers several points of suggestive interest. In the first place, the decrease of the debt is smaller than in any previous month since Mr. Boutwell took office. This is a concession to the popular demand that our tax-paying citizens should not be weighed down by the pressure of needless fiscal burdens, but that the policy should cease of taking active money out of the pockets of the people, with the view to pay a government debt which will not mature for many years to come, and which the creditors do not want paid. The old argument is exploded that we are to cripple ourselves now to pre-pay the principal because hereafter we may find it hard to pay the interest. Such a course of reasoning applied to a farmer would urge him to sell part of his seed corn, his farm implements and his needful stock, in order to pay off a mortgage which is not due, and which the mortgagee is reluctant to have paid. Men of plain understanding are asking themselves why the same rule will not work in both cases, and why this country should attempt a financial exploit and cripple itself in the effort, while no private person could try it without the greatest folly and loss. The cry of the people is to lighten the taxes and let the debt alone. It is in deference to this popular demand that there was last month a decrease of little over two millions in the public debt, and hereafter the monthly reduction will probably be much less.

Another mistaken opinion which is fast losing favor is that the credit of the government cannot be sustained except we pay off our national debt more rapidly than we agreed to redeem it by the operation of the sinking fund. A very little knowledge of the principles of finance and of the practice of monetary statesmanship suffices to show that no such supereogatory redemption is needed to bolster up the credit of a great, rich, commercial nation like the United States. No European nation has ever needed it. Our people are asking why it should be necessary here. The true American idea of paying off future obligations is to grow up to them, just as a child grows up to equal the obligations first of a youth, and lastly by slow, progressive degrees to those of a man. This country is rapidly growing up to its national debt. As one illustration of this growth we have built during the last year over ten thousand miles of completed new railroads, at a cost of over 400 millions of dollars. Now it is computed that every new railroad will create new traffic, develop new business, and give new value to

Digitized by Google

real estate equal in the aggregate to ten times its value. On this principle we have set in motion during the last year wealth-creating machinery which is operating to increase the national riches to the extent of 4,000 millions, or almost double the aggregate of the redeemable public debt. Hereafter we may refer to other methods by which the nation is growing up to its national debt. Enough has been said, however, to show that our people are right in their instincts in this matter, and that if the public credit of no other country requires buttressing up by the contrivance of paying off its bonds faster than it agreed to or can afford, still less does the robust credit of the United States require any such artificial and mischievous aids.

The next point in the debt statement is the cash balance. This consists of 107 millions of coin and 30 millions of currency. The Government gold has apparently been hoarded to the extent of 10 millions, but really it remains at about the same level as last month, inasmuch as 10 millions of gold certificates have been issued, and the increase of 10 millions really belongs to the holders of these notes and not to the Government. Mr. Boutwell has, therefore, been careful to hoard no gold in the Treasury, though at this conjuncture he could have done so with perfect safety. He has, however, locked up two millions of currency which could not so safely be spared from the current of the circulation. And he has of course contracted the currency by calling in one million and a half of the three per cent certificates held by the banks. In defence of this policy of contraction Mr. Boutwell has resort to the old reasons so often pleaded by Mr. McCulloch, when his spasmodic, ill-timed efforts at contraction threw the money market into confusion. Mr. Boutwell says he has heavy claims to meet before long, and must keep his cash locked up ready to pay them. We believe the Treasury had just as heavy claims at this time last year. Every one of these claims was paid. And yet the currency balance then in the Treasury was but 12 millions, while now it has just been swelled, mischievously and without reason, to 30 millions. Three weeks ago Mr. Boutwell could have safely let out 20 millions of this currency. We explained on a recent occasion some of the ways in which this could have been done. He has not wanted the currency, for it is still locked up, and it has all along been hidden away in the Treasury vaults. The country did need it. Its business, its wealth-producing efficiency, its tax-paying power, its industrial growth—all were suffering from the ill-timed contraction. Had this dearth of currency been met the financial troubles, business losses, numerous failures, and ruinous monetary derangements of the past month would probably have been averted.

CAPITALIZING EARNINGS.

A very suggestive paper has been this week put in circulation in Wall street, exposing the practice which has been of late abused by some of our railroad corporations, of capitalizing their earnings, or adding to their share capital in proportion to the growing business of the road and its consequent enlargement of income. The New York Central and Hudson River Railroad is the one selected as an illustration; and the writer shows that since 1867 an increase has been made to the capital of these two railroads amounting to no less a sum than $48,684,200. On this watered stock, dividends are paid; and the point is whether these dividends have been honestly earned. Into this question the pamphlet does not enter, although it tells us that the dividends on the new shares wring from the public, in addition to the proper charges of transportation, a tribute of nearly four millions a year, and that this tribute is levied upon food—upon the necessaries rather than the luxuries of life—and that its pressure falls chiefly on those citizens who are least able to pay.

Mr. Vanderbilt, in reply, says that the earnings of the road fully justify the addition to the stock, and he challenges the most rigid inspection of the accounts of the road, declaring that the net earnings are fully equal to eight per cent on the whole capital as it now stands, and denying that at any time during his management recourse has been had to the disreputable and dishonest financial expedient of paying dividends out of capital. We have carefully examined at various times the sworn statements of the financial condition of the New York Central and Hudson River corporation, and we are bound to say that the Commodore's assertions appear to be sustained. Experienced railroad financiers, who are above suspicion of dishonest bias, have assured us that they have arrived at the same conclusion. Still it must be regretted that the "construction account" is so large; and if Commodore Vanderbilt is sincere he ought to have this account closed forthwith.

As to the other charge of "wringing excessive charges" from the public, we are pointed to the fact that the passenger rates are fixed by law, and cannot be increased; while the rate on freight is fixed by the severe competition between various railroads. This competion is, in fact, the great bulwark of the public against the rapacity of the railroads; and Commodore Vanderbilt will not, we suppose, deny that he has done his best to end that competition; and that several times he has seemed to be at the very point of amalgamating the various roads leading from the great lakes to the sea-board. It is, indeed, one of the redeeming features of the erratic manœuvres the "Erie men," that they checkmated the Commodore in 1868, when he seemed surest of success in his scheme of amalgamating the Erie and Central roads, and that these victorious Erie champions have ever since kept the baffled Commodore at bay. Much of the popularity, which, in spite of their misdoings, the Erie clique have undoubtedly enjoyed, was founded on this fact, that the public regarded their fight as made for the destruction of a scheme by which Mr. Vanderbilt would have stopped healthy competition in transportation, and raised up a gigantic railroad monopoly, hostile to the public, destructive to commerce, and interested only in getting the greatest possible gains and rendering the least possible service in return.

The pamphlet before us gives the history of the several "waterings" by which the stock of the Central and Hudson corporation was raised from thirty-three millions in 1854 to its present magnificent proportions of ninety millions. We suppose all choice real estate in this State has risen in a similar degree in its valuation; and we do not see why Congress should interfere, as is here recommended; or why a railroad company, if it keep within the limits of law and equity, should not be as free to put its own nominal valuation on its road as is the owner of a house to set upon it his own valuation without let or hinderance. If a railroad company water its stock beyond its power to pay dividends then the price will fall in the market, and like the Erie shares three years ago, it may sink to an almost nominal price. The fear of such a catastrophe is one of the best preventives which is possible in a free country like our own. Another check on this over-abundant enlargement of the stock is given by the press. In this journal, for example, we take special pains to make public all the changes of this sort which affect the value of the one thousand millions of railroad shares which are afloat in this country. The facts about the Vanderbilt roads, as they are called, have been repeatedly exposed in our columns, and in 1867 we warned the public against supposing that the Hudson stock,

Digitized by Google

when doubled, was increased in its real aggregate value by one dollar more than the fifty per cent. subscription which was called up on the new shares. Similarly in 1868 we exposed the true nature of Mr. Vanderbilt's much lauded scrip dividend of eighty per cent. on the share capital of the New York Central road, then $28,730,000; but raised by this financial manœuvre to nearly $52,000,000. Again at the consolidation of the two roads, when the aggregate capital was raised to ninety millions, we enlightened the public as to the true nature of the transaction. Multitudes of other journals did the same, and with the real facts before him, it is the investor's own misfortune, if not his fault, if he is misled into a wrong estimate of the value of this property.

We repeat, then, that we cannot approve of an appeal to Congress to stop this sort of bad financiering on the part of railroad corporations. All that is wanted is to throw the keen illuminating force of publicity upon all the dark doings of railroad magnates, and caution the investing public to guard themselves from this as from any other public nuisance or personal danger. It is also untrue that this excessive watering of stock of which other railroads besides those of Mr. Vanderbilt have been conspicuously guilty, prove that our financial system is rotten and dangerous, and that it is liable at any time to produce a panic. Such statements can have no force except with credulous and timid ignorance. Our railroads now extend their network of 50,000 miles throughout every part of this continent. They traverse its rich valleys, climb its steepest mountains, reach across its broadest rivers, and bind the vast territory of the United States in one grand organism, which is increasing more rapidly in wealth and productive force than any other country in the world. Every mile of new railroad adds four times its cost to the value of the surrounding property, and by a compensative and sure reaction the growing value of the real estate bordering a railroad, gives new and enhanced value to the railroad itself. What if a few of the corporations, tempted by their rapid progress, are found traveling faster than they should! Let us deal severely and justly with each case as it arises, and recognise in all these waterings of stock an exaggerated, and, in some respects, a mischievous illustration of the fact that our railroad property is growing in annual value with a rapidity unknown in any other age and country than our own.

THE INCOME TAX ONCE MORE.

The present Congress has work enough before it to fill up the two short months which remain to it. But most of this work, however important it may be in itself, or to the particular interests which call for legislation, has little relation to the thoughts and life of the country at large.

One point there is however on which the whole people are agreed, and, in which they desire definite and immediate action from Congress, with a unanimity and earnestness such as our representatives ought not to overlook. They are burdened with taxation to an extent which patriotism enabled them cheerfully to bear, so long as it seemed to be essential to the existence, or to the credit of the nation; but which, when it ceases to be an absolute necessity, becomes mere oppression. It has ceased to be necessary; the official reports of the Treasury prove that the taxes are collecting from the people, in these times of unsatisfactory trade and languishing enterprise, a third of a million of dollars for every business day, more than is needed to meet all the real wants of the government. Upon no point has there ever been a more general agreement, than there now is, that this superfluous taxation should be stopped, and that without much delay.

It may be said with some truth that there is not the same agreement as to the particular taxes which ought to be dispensed with. Some are most deeply impressed with the offensive nature of several of the customs duties; and urge that the taxes on iron, steel, wool, copper, lumber and salt are burdensome to the whole industry of the country, and that the treasury itself could better do without them than continue to hamper all its other sources of revenue by collecting them; others see more clearly the evils of some of the internal taxes, and remember that indirect taxation is always felt less by the people, being paid in the price of the commodities they consume, than when the tax-collector comes directly in contact with them, and makes his exactions at their houses; and they ask that the whole internal revenue system shall be abolished before any reduction is made in the duties upon imports. But while this is true, and there is a serious divergence in the views of those who wish a reduction of taxes as to the particular ones which may safely and most advantageously be remitted at once, there is one tax concerning which there is a more general accord, and that is the Income tax—upon this the people at large have made up their minds. The subject has been discussed at great length; weighty arguments have been presented on both sides; but the nation as a whole is most influenced by the objections to the tax, feels the burden and annoyance of it, sees the corruption caused by it, the injustice of its distribution, the irregularity of its collection, the inquisitorial nature of the proceedings it makes necessary, and wants to be freed from them. It unmistakeably, we think, demands that this tax shall not be collected another year.

Besides all this, the law of the last session was drawn up so carelessly that it accidentally omitted to levy any tax at all on the profits of corporations and the interest on their bonds, paid during the latter months of 1870; so that a very large part of all the active and profitable business capital of the country, in the hands of these associations, has taken advantage of the opportunity to make its distributions of profits now, and to escape taxation altogether. And this fact brings into stronger relief the injustice of beginning to levy the tax anew, with the coming year, upon that capital which has not been able thus to evade the law. For all these reasons, a great number who last session urged its retention have abandoned their opposition to the repeal of the Income Tax; journals which earnestly sustained the tax a year ago are now against it; and, out of Congress, very few voices are raised for its continuance.

Under these circumstances it is not now necessary to discuss the merits or demerits of the tax again. The question need not be complicated with any other; the bill which decides it need not refer to any other subject whatever. Let Congress simply enact, at the beginning of the session, that no tax whatever shall hereafter be levied or collected on the gains, profits or income of any citizen, person or corporation in the United States, under any previous tax law. Such a law will at once enable the Internal Revenue Bureau to dismiss a large part of its official force; it will remove one of the most serious sources of disaffection towards the government among the people; it will simplify all future questions of improving the revenue laws; and it will do away with the embarrassing and difficult question, never yet finally set at rest by the highest Court of Appeal, whether or not a tax on incomes is, under the Constitution, such a "direct tax" as Congress is forbidden to levy, except by apportionment among the several States, according to their representative population.

[From our own Correspondent.]

LONDON, Saturday, December 24, 1870.

In spite of the war, the accounts from the leading centres of industry in the United Kingdom are by no means of a discouraging nature. On the contrary, trade, although quiet, owing to its freedom from undue speculation, is in a healthy state, and a steady, legitimate business is in progress. To some extent, the buoyancy of our commerce is due to the large purchases of war material which have been made by the belligerent powers, and to the purchases of clothing for the troops; but other causes have been in operation that are calculated to have a more lasting influence on the country, provided that we are enabled to keep ourselves free from Continental complications. It would seem to be an evident conclusion that when two manufacturing countries like France and Germany have engaged in so deadly a struggle as that which is now raging in France, and when the larger portion of the population is withdrawn from industry, the country whose productive power in manufactured goods is the greatest, and which, besides enjoying peace, has an unprecedented abundance of unemployed money, should derive very considerable benefit. The nts of France and Germany, sitting aside those for war material, required, in many cases, to be supplied immediately, and consequently the moment a deficiency of manufactured goo , such as blankets, and material for tents, &c., is experienced, our market is resorted to supply it. But this is the least important part, for if France and Germany are unable to supply all their own wants, it is obvious that their export trade in manufactures must leak, and that the portion of foreign trade which could in times of peace be undertaken by them would be diverted to this country. Hence, buyers from many foreign countries, such as the United States, India, China and other countries, have been more numerous of late, and a somewhat rapid demunition of stocks has, in several instances, taken place. It is, perhaps, difficult to form an opinion about the future, for dear food, which is almost a moral certainty, must tend to diminish the inquiry for manufactured goods; but at the same time, the wants of the belligerent powers, after peace is concluded, will be so great that those who will be able to meet them must be largely engaged. Then there is the uncertainty about the future of France, and, in the event of a Republic being successfully established, about the future of Europe, for it is not improbable that a successful Republic in France could lead, ultimately, to a more Constitutional Government in Germany. This, when accomplished, would be a gain, and very probably would tend to promote peace in Europe for the destinies of great nations would not then be in the hands of a Napoleon and a Grammonte, or a William and a Bismarck, but would be more within the reach and under the control of the people themselves. When this shall happen, war will probably be entered into less hastily, and for a more important cause than that brought forward

Digitized by Google

by Napoleon the Third and his Foreign Minister. But the war is not yet over, and the sorest trouble has yet to come, for it would appear, that France considers the war of desolation not yet complete.

The Germans have appeared in our market as a borrower last week. Out of the loan of £7,500,000 for the North German Confederation £3,000,000 has been reserved for this country, and has been offered at the price of 96½ per £100. The loan bears 5 per cent. interest per annum, and will be redeemed at par not later than November, 1875. The Luxembourg affair has induced many capitalists to withhold their applications, but with such a mass of Germans in this country it is quite certain that the whole amount will be rapidly subscribed. The security is unquestionably good, but the price is high, and consequently no very great temptation is offered to speculate in the stock. The loan is quoted at about ½ premium.

Money has been in rather better demand, and a fair degree of animation may now be expected until the year has been fairly passed. The supply of money seeking employment, however, is very large, and consequently the rates of discount show but a trifling increase of firmness. Should the war continue the money market is almost certain to resume a condition of extreme langour as soon as the mercantile payments of the fourth of January have been arranged. The prices of money are as follows:

	1869.	1870.		1869.	1870.
	Per cent.	Per cent.		Per cent.	Per cent.
Bank minimum	3 @..	2½@..	4 months' ba'k bills	3⅛@3½	2½@2⅝
Open-market rates:			6 months' ba'k bills	3⅛@3½	3 @3⅛
30 and 60 days' bills	2½@2⅝	2½@2⅜	4 and 6 trade bills	3⅛@4¼	3⅛@4
3 months bills	3 @..	2½@..			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1869.	1870.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2½	1½
Discount houses with 14 days' notice	2½	1½

During the week there has been an advance in the rate for money at St. Petersburg, but at the other Continental cities there is no alteration. The following are the quotations:

	B'k rate 1869.	B'k rate 1870.	Op. m'kt 1869.	Op. m'kt 1870.
At Paris	2½	6	2¼	—
Vienna	5	6	5	5
Berlin	5	5	4¼	4
Frankfort	4	4	3⅝	3½
Amst'rd'm	5	4	5	3½
Turin	5	6	5	6
Brussels	2½	3½	2½	3¼
Madrid	5	5	5	5
Hamburg	—	—	3½	4¼
St. Petersburg	6½	8	7	7

Annexed is a return showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation of English Wheat, the price of Middling Upland Cotton, and of No. 40 mule Yarn, fair second quality, compared with the four previous years:

	1866.	1867.	1868.	1869.	1870.

Quicksilver, £9 9s. per bottle; discount 3 per cent.

The Stock Exchange continues to show signs of the approaching close of the year. The amount of business doing is daily diminishing, but apart from a little panic on the announcement of Prussia's intentions with regard to Luxembourg, prices have ruled firm. To-day the tone is very satisfactory, and the quotations have improved. The following are the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'sy.	Thu'sy	Friday.	Sat'day.
Consols	91⅞-92⅛	91⅝-91⅞	91⅝-91⅞	91⅝-91⅞	91⅝-91⅞	91⅞-91⅞
U. S. 5-20's, 1862	88⅜-88⅝	88 -88¼	88⅛-88⅜	88⅛-88⅜	88⅜ 88⅝	88⅜-88⅝

*Ex-dividend.

Business in the manufacturing districts has been fairly active. Some anxiety is felt with regard to the actual condition of the cotton trade, but apart from this circumstance, the tone is considered to be healthly. The following relates to the trade of Manchester:

A very quiet feeling, but without depression, has prevailed in this market since Tuesday. Quotations remain without material change, still prices have gradually given way, and in most departments buyers can do better than they could a week since. The large receipts of cotton at the American ports last week, and the prospect of a continuance on the same, if not on a larger scale this week, have induced producers to lose no opportunity of selling whenever they had a chance. Those spinners and manufacturers who have been in a position to sell and deliver tolerably early have taken advantage of any offers which have come before them, and prices to-day have lost some of the irregularity which prevailed since Tuesday. The tendency, compared with the prices current last Friday, is still in favor of buyers, but compared with the rates of Wednesday and yesterday prices are no lower. Producers, upon the whole, are very well sold, having anticipated a decline in the value of cotton, and contracted for both yarn and cloth for delivery well into January. Hitherto anticipations of peace have induced them to go on buying cotton freely in Liverpool, but the cotton market is so freely supplied that prices are barely maintained in the face of a large business going on daily. The prevailing impression is that cotton must inevitably decline, but that the demand for yarn and cloth is sufficiently good to prevent a decline in manufactures in the same proportion. In fact, to give producers any chance of doing good yarn and cloth ought to maintain their present prices, and the raw material go down ⅛d. to 1d. per pound.

There has been a fair demand for export yarns during the week, and spinners have had no difficulty in selling at a slight decline when they could deliver within a short period.

The following statement shows the imports and exports of cotton into and from the United Kingdom, from September 1 to December 15, compared with the corresponding period last year:

	1870. Imports.	1870. Exports.	1869. Imports.	1869. Exports.
American bales	203,463	54,238	196,912	35,164
Brazilian	105 879	14,724	144,009	20,192
East Indian	468,634	185,551	655,056	202,841
Egyptian	67,635	2,125	46,203	1,636
Miscellaneous	128,068	2,621	88,116	5,606
Total	1,053,679	259,259	1,070,425	265,439

Owing to the approaching close of the year, the continuance of the war, and the superabundance of wet, which has naturally affected the samples, combined with the circumstances that foreign produce is coming freely to market, the trade in wheat has been very slow, and even for dry samples prices have slightly receded. Feeding stuffs, however, continue firm in value, and the recent rise in the value of meat and provisions has been fully maintained.

The following statement shows the imports and exports of cereal produce into and from the United Kingdom during last week and since the commencement of the season, compared with the corresponding periods last year:

FOR THE WEEK ENDING DEC. 17.

	1870. Imports.	1870. Exports.	1869. Imports.	1869. Exports.
Wheat cwt.	761,540	149,849	1,060,661	1,768

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a considerable increase in dry goods, but there is a large decrease in general merchandise. The total imports amount to $5,124,396 against $4,874,656 last week and $6,818,552 the previous week. The exports are $4,187,789 this week against $4,468,815 last week and $5,903,096 the previous week. The exports of cotton the past week were 18,718 bales against 16,914 bales last week. The following are the imports at New York for week ending (for dry goods) Dec. 30 and for the week ending (for general merchandise) Dec. 31:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1867.	1868.	1869.	1870.
Dry goods	$753,265	$1,054,593	$648,938	$2,222,063
General merchandise..	2,342,877	2,130,366	2,098,495	2,902,333
Total for the week...	$3,096,377	$3,184,959	$2,747,433	$5,124,396
Previously reported...	235,489,840	241,676,904	286,563,970	299,314,392
Since Jan 1	$235,585,483	$244,861,863	$289,311,403	$304,438,788

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending Jan. 3.

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,500,234	$1,926,240	$2,174,516	$4,187,789

The value of exports from this port to different countries (exclusive of specie) since January 1, compared with the corresponding time of last year, is shown in the following table:

To	Since Jan. 1, 1871.	Same time 1870.
Great Britain	$2,989,019	$1,311,584
France	34,562	.....

Alabama State Interest.—The following is from the money article of the New York *Times*:

We regret to hear that default was yesterday made in the gold interest due January 1st on the 8 per cent. Bonds of the State of Alabama, advanced a year or two since to the Chattanooga and Alabama Railroad Company, $2,000,000 in amount, and also in the gold interest on 8 per cent. bonds of the Company indorsed by the State of Alabama, about $4,000,000 in amount. The Railway Company were to have provided, promptly, for the State interest on this particular Loan, as well as for their own interest, but for some cause, not yet explained, have failed to do so, and as the State has not provided the gold in New York for the contingency of default in either case, its direct as well as indorsed bonds are in discredit until the Legislature, to meet on the 20th of January, shall provide the remedy. The new Governor, in a telegram to-day, speaks confidently of the prompt action of that body. Meanwhile the suspense is not a pleasant one for the holders of such securities.

The Alabama loan in default was largely negotiated abroad by Erlanger & Co. and John Henry Schroeder & Co., of Paris and London, the godfathers of the famous Reble cotton loan of 1863. It is rumored that the New York correspondents of Messrs. Erlanger offered the President of the Railway Company a loan of the money to pay the January interest, but on terms and guarantees which he was not prepared to yield to.

It is but proper to say that the Alabama State interest, other than on the 8 per cents loaned to the Alabama and Chattanooga Road, has been paid, as far as presented. It is fortunate for the New York market that the bonds in default, which we find amount to $6,700,000 (direct and indorsed), are not all owned or advanced upon this side the Atlantic.

New York Central Scrip Dividends—Report to the Senate.—The New York *Times*, of Thursday, has the following:

WASHINGTON, January 4.—In response to the resolution offered by Senator Nye, and agreed to December 14th, requesting the Secretary of the Treasury to "communicate to the Senate the proceedings that have been had relative to the collection of the tax on $15,000,000 scrip dividend of the New York Central Railroad Company, and whether the said tax has been paid into the Treasury of the United States," Secretary Boutwell to-day sent to the Senate a copy of a communication addressed to him by the acting Commissioner of Internal Revenue, under date of December 17th, in which the latter says:

"I have to state that the only instance in which the liability of the New York Central Railroad Company to a tax on scrip dividend has been referred to this office for consideration and decision, relates to the question of taxing as a scrip dividend the sum of $23,036 000, representing the issue by the Company on December 19th, 1868, of interest certificates to the amount of eighty per cent. of its capital stock. The proceedings of this office with reference to assessing and collecting a tax of five per cent. upon said eighty per cent. scrip issue have been as follows:

On the 17th of June, this office directed Supervisor Smythe, of the Northern District of New York, to investigate the affairs of the New York Railroad Company with special reference to its liability to tax upon the aforesaid issue of scrip. On the 16th of February, 1870, in view of the evidence presented by Mr. Smyth, Supervisor O'Donnell, his successor, was instructed to cause an immediate assessment of tax of five per cent. on said scrip. March 5, 1870, an assessment of $1,151,800, the same representing a tax of five per cent. on $23,036,000, was made against this Company, and a list containing said assessment passed to Collector Bailey, of the Fourteenth District of New York. This assessment was ordered at the time in order to save the Government from being barred from the assessment of a tax under the fifteen months' limitation contained in section 20 of act June 30, 1868, as amended by section 9 of act July 13, 1866, and to enable the question of liability to be determined upon the claim for abatement or refunding, as the case may be. The tax has not yet been collected. The collection has been suspended at three different times—once by a telegram dated March 26, 1870: again by a letter dated April 9, 1870, and the last on the 22d of November, when the collection was stayed until January 2, 1871. These suspensions had been ordered at the urgent request of the President, C. Vanderbilt, Esq., and others, in behalf of the Company, in order that they might, as they claimed, have ample opportunity to collect and forward evidence in behalf of the Company. It is proper to add that the seeming delay on the part of this office in deciding to collect the tax, has arisen from what it conceived to be, not only the desirableness, but the necessity of having all the statements of the Company on its own behalf, before determining so important a question, and from the repeated delays of the Company in furnishing such statements. The resolution is herewith returned in accordance with your request.

Very respectfully,
[Signed] J. W. DOUGLAS, Acting Commissioner.

JANUARY 5.—The counsel for the New York Central Railroad Company appeared at the Internal Revenue Bureau to-day, and stated that the Company were not ready to present their case, and asked for a further extention of time, to enable them to prepare their papers for presentation, which is represented to be a very laborious work. Commissioner Pleasonton, in view of the magnitude of the case, and of the necessity that the claims of the Company be fully set forth before the decision is given, consented to a postponement of the hearing until February 10th, when it will proceed without further delay.

PACIFIC RAILROAD BONDS.

Representative Sargent, to-day, made a report on the House resolution to secure indemnity to the United States in certain cases. He stated the report had been drawn by Judge Lawrence, of the Sub-Committee.

The report gives the history of the Pacific Railroad, terms upon which it was authorized to be constructed, quoting the acts of Congress, amount of bonds issued, and the recent opinion of the Attorney-General of the United States. The Committee say the Union Pacific, Sioux City, and Pacific Companies have responded that the law does not require them to pay either principal or interest of the bonds until their maturity. The other companies made no answer, and none of them have made any payment. They deny the right of the United States to retain an interest account. More than half the amount of their earnings for the transportation of the government mails, freights, troops, &c. On the 6th December, a bill was introduced in the House of Representatives, and referred to the Committee on Appropriations, which provides that the said bonds and all sums due or to become due for interest on the principal paid, or which may be paid, shall constitute a lien on all lands which have been or may be so granted, and which remain undisposed of by the companies. It also provides that lands shall only be sold with the approval of the Secretary of the Treasury, and on conditions which shall secure the proceeds to be applied as far as necessary to reimburse the United States for all sums that have been or may be advanced to pay the interest on the principal of bonds, and to finally pay the bonds; and the United Shall not pay any money to any company while it may be indebted to the Government, but shall make a set off. As to the right of set off between individuals, it does not exist at common law; but as it is required in equity, and made available by Courts of Chancery, and has been introduced judicially at law by statutes, it would seem proper to give the sanction of an act of Congress to a right so manifestly equitable and just. The bill in effect provides that, for all sums due, or which shall become due the United States, for interest paid for any company, the government shall have a lien on the lands of the company. This will simply give the United States, practically, a mortgage for the debt due from their debtors. The only purpose then to which lands, or their proceeds in the first instance can be applied, is the payment of debts contracted in constructing the road, unless these debts be otherwise adequately secured. These debts are either to the holder of first mortgage bonds, subsidy bonds, or to the general creditors of the companies, with or without the specific security. To some or all of these the lands should be applied, at least so far as necessary to their payment. The claim of the Government is paramount. There is no reason why such vast interests should be left to the exclusive decision of companies, as they are not alone interested. It is only the dictate of justice that property granted on conditions should be made to execute the conditions, and especially when no longer required for any other purpose of grant. This will only give to the government performance of a condition created for its benefit regardless of all others. The Committee conclude by saying:

"No reasons exist for conceding more than the law has already conceded. The concessions have already been on a grand scale by them, subject to rights reserved. The government should abide. To secure the performance of the obligations imposed by the law this bill is submitted, with a recommendation that it be passed."

PACIFIC RAILROAD INTEREST.

The Committee on Appropriations to-day, made a report in favor of the bill providing as to the Pacific Railroad bonds, that all sums due or to become due for interest shall constitute a lien on all bonds which have been or may be so granted, and which remain undisposed of by the Company. This, the Committee say, simply gives the United States a mortgage for the debt due from their debtor.

WASHINGTON, January 5.—The House Committee on appropriations have not yet acted on the subject recently presented for the payment of the interest and principal of bonds of the Pacific Railroads. The abstract of the report printed this morning, contained the views of only Judge Lawrence in explanation of the bill introduced by him in December. It was merely reported, yesterday, by Representative Sargent, in order that it might be printed so that all the members of the Committee might have a better opportunity of reading it in print than in manuscript. In a few days all the Committee will be enabled to learn its contents, to which they are now uncommitted.

—In the last number of THE CHRONICLE attention was called to the removal of Messrs. Tanner & Co., bankers, to No. 11 Wall street We have frequently had occasion to call attention to the large financial operations of this house in negotiating railroad loans, &c., and we presume that their removal to more commodious offices will be marked by an increase in their business, both as railway agents and in the line of general banking.

—Attention is directed to the card of the agency of the Bank of British North America, which will be found on another page. This bank is an important dealer in foreign exchange, and issues Commercial credits for use in Europe, China, Japan, the East and West Indies, and South America. Also buys and sells demand and time bills of exchange, payable in London and elsewhere, and cable transferes. Demand drafts on Scotland, Ireland, Canada, British Columbia and San Francisco, are also issued by this agency, and the collection of bills and other banking business is attended to.

—The new stock firm of E. Judson Hawley & Co., whose card appears elsewhere, is comprised of Mr. Hawley and Mr. A. W. Bartlett, both of whom had been out of business for several years, and now return to the street to profit for themselves and their customers by their long experience and ample means for doing business at the Stock Exchange.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & Co., 32 WALL ST., N. Y.—Deposit accounts can be opened with us in either currency or coin subject to check without notice. Five per cent interest allowed upon all daily balances. Checks upon us pass through the Clearing House as if drawn upon any city bank.

We issue Circular Letters of Credit for travellers, available in all parts of the world; also, Commercial Credits. We draw Bills of Exchange and make telegraphic transfers of money to any desired point and transact every description of foreign banking business.

We issue Certificates of Deposit payable on demand or at fixed date bearing interest and available at all money centers.

Collections made in any part of the world.

CLEWS, HABICHT & Co., 5 Lothbury, London.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,
Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Jan. 2, 1871.

The subjoined table will show the gross earnings and operating expenses of the main line of the Central Pacific Railroad (Salt Lake to San Francisco), and the number of miles operated in each year, from the commencement to the present time:

	Miles Operated.	Gross Earnings.	Op. Expenses
1865	31 to 56	$401,941 92	$121,669 58
1866	56 to 94	864,917 57	200,710 61
1867	94 to 127	1,470,653 50	380,913 33
1868	127 to 466	2,300,767 17	843,166 54
1869	466 to 742	5,670,822 25	2,093,523 19
1870	742 to 900	7,930,710 98	4,060,864 95
Total		$18,669,813 39	$8,850,848 15

Digitized by Google

The following will show the net earnings, interest liabilities, and surplus earnings of each year for the same period:

	Net Earnings.	Interest on Outstanding Bonded Debt.	Surplus of Net Earnings Over Interest.
1865	$380,273	$102,111	$178,161
1866	664,206	125,380	538 826
1867	1,139,740	277,140	862,600
1868	1,457,600	995,010	462,590
1869	2,677,299	1,084,350	1,592,949
1870	3,860,146	1,600,230	2,259,916
Total	$10,079,265	$4,184,221	$5,895,042

From the foregoing tables it will be seen that the Central Pacific Railroad has earned, in six years, more than $10,000,000 net over operating expenses and nearly $6,000,000 over operating expenses and interest on its bonds; while, during four years and a half of that time, the road was under construction, without through business, and, for the first three years, with less than 100 miles in operation.

Of the earnings for 1870, at least 65 per cent. was from local business, a fact which demonstrates that the Central Pacific Railroad is independent of the through connection for its character as a self sustaining and profitable road, and that its net earnings from local traffic alone would more than pay the interest upon its bonds, independently of its large and increasing business.

The security of the principal, and the assurance of regular and prompt payment of interest, which are afforded in the valuable property and immense revenue of the road render the Central Pacific bonds as safe and reliable an investment as can be made. They are daily quoted on the regular call of the New York Stock Exchange, and of several of the most important Stock Exchanges of Europe, and can be as readily sold at quoted market price as the bonds of the United States Government.

FRIDAY EVENING, January 6, 1871.

The Money Market.—The week opened with a slight relief from the excessive stringency of last week, and under apprehension of a renewal of the late "locking up" operations, rates were paid on call loans much beyond the legal limit. Later, however, there being no symptoms of artificial manipulation, and the money disbursed in the payment of dividends having begun to return into the banks, and there has been an easier feeling. To-day, at the close of business, there was no difficulty in borrowing on good collaterals at 6@7 per cent; from which it is concluded that the pressure has passed its climax. The Treasury has partially contributed to this improved feeling by purchasing this week $2,000,000 of Five Twenties, in lieu of $1,000,000, the late weekly amount, and by making its purchase of bonds before selling its gold; the reverse course, hitherto adopted, having had the inconvenience of depriving the banks of so much currency for one day, which this order of the operations obviates. It is ascertained that the money lately locked up by street operators has been again put in circulation, from which it is inferred that their interference with the money market has been permanently abandoned.

There has been less demand for currency from the West and the South, and although the Western receipts of hogs are large, yet there is little probability that any further important amounts of currency will be called for in connection with that movement. After the extreme stringency of the last two or three weeks, it is to be expected that we shall have a sharp reaction, and an easy market is favorably expected by the 15th or 20th of the month. The failure of Messrs. Gardner, Bacon & Co. in the Southern trade, was announced on Wednesday. The suspension was due to the failure of Oakes Ames, who had accepted G, B. & Co's paper to a considerable amount. Some other minor failures have occurred in different places, as the result of the Ames' suspension. This has produced an uneasy feeling respecting a certain class of loans, and has affected the paper of commercial firms supposed to be engaged in operations outside their legitimate business.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Dec. 31, 1870.	Dec. 31, 1869.	Jan. 2, 1869
Loans and discounts	$263,417,418	$250,406,887	$259,090,057
Specie	20,828,846	31,166,908	20,736,122
Circulation	32,153,514	34,150,887	34,879,609
Net deposits	183,223,995	179,129,394	180,460,445
Legal Tenders	45,245,858	45,034,603	48,896,421

In discounts there has been a freer movement within the last two days. The banks appear to have concluded that the pressure from call borrowers is past, and are consequently buying paper freely at the current full rates, on the supposition that quotations may early decline. The following are the current rates for prime paper:

		per cent
Commercial, first class endorsed	60 days.	7 @ 7½
" " "	4 months.	7½@ 8½
" " "	6 months.	7½@10
" " single names	60 days.	8 @12
Bankers', first class foreign	4 to 6 months.	9 @15
" " domestic	60 days.	7 @ 7½
" " "	3 to 4 months.	7 @ 8½

There were reports on the street this afternoon of further mercantile failures in Boston. The only two Boston suspensions that we feel justified in publishing are Hall, Dame & Bulloch and Horswell, Kingsley & French, both of which, it is said, are traceable to the Ames failures. The name of a Boston house having a branch at Kansas City, is also reported among the suspensions. In this city the failure of Buckley, Murfey & Cecil, a small but very respectable house, dealing in Yankee notions, was made known on the street to-day. There are also rumors of the suspension of a Philadelphia dry goods house.

U. S. Bonds.—The Bond market has not maintained the firmer feeling noted last week. The Treasury purchases of bonds for the month of January, although $6,000,000 against $4,000,000 in December, are not so large as some recent speculative buyers had expected, and this disappointment has caused the sale of some round amounts. There has been a good counter demand, and the amounts coming from investors have not been large; nor was the amount offered at the Treasury purchases, being only $3,237,850 against proposals to purchase $2,000,000, so that it is difficult to explain the workings except from the disappointment as to the months' purchases by the Government. The highest quotations were made on Tuesday, from which there has been a decline subsequently of ¼@⅜ per cent. This afternoon the market was firmer, and at the close prices showed an upward tendency.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Dec. 31.	Monday, Jan. 2.	Tuesday, Jan. 3.	Wednesd'y Jan. 4.	Thursday, Jan. 5.	Friday, Jan. 6.

Illinois Central Railway shares	110½	112	111¼	114½ 113¼	119
Erie Railway shares	19¾	19¾	21	19¼ 19¼	22¾

State and Railroad Bonds.—In State Bonds the market has been dull and prices unsteady and rather lower. Tennessee 6's have declined about 1 per cent.; North Carolina's have been neglected and weak; South Carolina's have been more active and firmer, until yesterday and to-day, the price touching 60½ to-day against 63¾ on Tuesday. The decline appears to be due mainly to the introduction of a bill into the Legislature proposing that the State shall assume the railroad debt of the City of Charleston.

The State of Ohio still maintains its refusal to pay gold interest on its old bonds.

We learn that $2,000,000 more of Tennessee Bonds have been, or will be soon paid by the Nashville and Decatur Road.

In railroad bonds the chief feature is still the Union Pacifics, which have been irregular in sympathy with the various reports respecting the financial position of parties holding large amounts of the securities. The fact that the Company is paying interest on its bonds, as advertised, has, however, strengthened the prices both of bonds and stock: but this evening, in consequence of further failures at Boston, growing out of the Ames suspension, prices fell off materially. At 3:45 the following were the quotations in the Long Room: First Mortgages, 71½@72; Land Grants, 55@56; Incomes, 34½@35; and stock, 11⅝@11¾. These prices are 2@3 per cent below the best quotations of the week. Central Pacifics remain active and very firm, closing to-day at 90½ ex int. bid, which is an advance of about 1 per cent on our last quotations. The House of Representatives Committee has not yet reported upon the subject of the Pacific Railroad bonds and their interest, and the Washington dispatches of yesterday to that effect were so far erroneous. The report will not be made for several days yet.

Some demoralization in Alabama securities, and in new railroad bonds by the failure of the Alabama and Chattanooga Railroad to pay its January interest on about $4,000,000 of bonds, guaranteed by the State. This default appears to have arisen from a disagreement among the directors, and a failure to notify the State of the default on the part of the company. The following dispatch has been received from the Governor of Alabama by the Financial Agent of the State in this city: "Say to the holders of

Digitized by Google

these securities that I will invite the immediate attention of the Legislature on its reassembling on the 18th instant, to this grave and important subject. In the meantime, in my name you may pledge to the creditors of the State of Alabama that she will be true and faithful to her obligations in the future, as she has been in the past."

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Dec. 31.	Monday, Jan. 2.	Tuesday, Jan. 3.	Wednesd'y, Jan. 4.	Thursday, Jan. 5.	Friday Jan. 6.

* This is the price bid and asked, no *sale* was made at the Board.

Railroad and Miscellaneous Stocks.—The stock market opened strong, but subsequently fell off and closed weak. The demoralized feeling caused by the failures previously alluded to, has postponed the expectations of a January rise, and the "bull" operators appear to have adopted the policy of encouraging a "short" sales. The consequence has been a decline of 1@3 per cent in the speculative list.

The following are the prices of the leading railroad stocks at the close of 1869 and 1870.

	1870.	1869.

The Gold Market.—The transactions in the Gold Room have been quite limited and the premium steady, as will be seen from the subjoined quotations. There is little disposition at present to either buy or sell, as the prospects of the market and [illegible] differs considerably as to the future course of the premium, though perhaps the feeing predominates in favor of [illegible] opinion hear of some considerable transaction[illegible] an ultimate rise. We "calls," which will lay the ba[illegible] in the way of "puts" and the market. The paym[illegible] for an ultimate active state of perceptible effect o[illegible] of interest by the Treasury have no lated upon. [illegible] the premium, having been previously calcu- sales o[illegible] the Treasury programme for the month includes in[illegible] $4,000,000 of coin, same as in December. For carrying gold, the rates to-day have been 6@7 per cent.

The following table will show the course of the gold premium each day of the past week:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, Dec 31	110¾	110¾	110¾	110¾	$43,636,000	$2,770,509	$3,334,452
Monday, Jan. 2				Holiday

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra*; *s=stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

Indianapolis, Cincinnati and Lafayette.—The first report of the receivers of this road, submitted on the last day of December, and covering a period of thirty-five days, shows that the receipts of the main branch for that time were $173,061.34; expenditures, $78,006.83, thus showing a net gain of $95,004.51, while the Water Valley branch gains $2,621.32; Martinville branch loses $97.16. Various expenses and the salaries of the executive officers of foreign agents are not included. The gross earnings have been beyond the average of the whole year of the branch roads. The Whitewater Valley branch has proportionate rental liability not included above for the period, of $13,611, showing a net loss of $12,311.85; Martinville branch $5,250, showing a net loss to that branch of $6,879.34; Harrison branch, after the rent is deducted, will leave the sum of $282.05; Hagerstown branch will show a loss of $1,187.32. The receivers state that it is their conviction, based on actual experiment and observation, that no one branch can be operated under the existing contracts without a serious loss. The report asks for authority to pay the rent of the ground in Cincinnati; also, judgments against the company for stock killed, &c., the latter amounting to $3,000. They further represent that portions of the floating debt of the company are secured by a pledge of stocks, bonds and other property of the company, and other portions are secured by mortgages on its real estate, and that in some cases debts thus secured by pledges and mortgage—especially some secured by pledge of bonds and stocks—are past due, and that the creditors holding the same threaten to sell the pledge for the satisfaction of debts. They say that by permitting such sales it will partially sacrifice the securities pledged, and cause a serious loss to the trustees. The aggregate amount of indebtedness was secured, as aforesaid, by a pledge and mortgage of about two hundred thousand dollars. They now ask authority to borrow on their notes and bonds as receivers two hundred thousand dollars for the liquidation of their indebtedness, the loans to be charged on the net earnings as a preferred claim. They conclude by saying that on or before the 25th of January they will file an inventory of the property of the road and a schedule of its indebtedness, which they have not yet had time to prepare, especially as a good part of the debt is not on the company's books, but consists of unliquidated demands not yet reported to the company, or entered on its records.—*New York Daily Bulletin.*

Debts of Southern Railroads to the United States Government.—From the report of the Quartermaster General for the past year, a few facts of interest regarding the indebtedness of sourthern railroad companies to the Government may be taken. On the opening of the last fiscal year, July 1, 1869, there was due the United States from railroad companies which purchased railway material and rolling stock under the provisions of Executive orders of August and October, 1865, $4,704,650.72. During the fiscal year ending June 30, 1870, interest accrued and expenses incurred in prosecution of suits amount to $397,692.41. Payments have been made of $365,820.45; leaving unpaid June 30, 1870, $4,646,522.68 which reduces the debt during the year $58,128.04. The unpaid indebtedness of the several railroads to the Government may be thus stated:

	Amount of principal and interest on July 1, 1870.		Amount of principal and interest on July 1, 1870.
Alexandria, Loudon & Hampshire	$16,762	Memphis, Clarksville & Louisville	$430,599
Atlantic & North Carolina	4,693	Memphis & Ohio	12,738
Alabama & Florida	12,183	Memphis & Little Rock	81,840
Alabama & Chattanooga	19,499	Nashville and Chattanooga	1,764,171
East Tennessee & Georgia	371,740	Nashville & Northwestern	663 648
East Tennessee & Virginia	256,497	Nashville & Decatur	30 ,840
Edgefield & Kentucky	152,502	New Orleans & Ohio	32,966
Indianola	15,000	Pacific Railroad of Missouri	20.774
Knoxville & Kentucky	9,805	Southwestern Branch do	57,115
McMinnville & Manchester	62,342	Selma & Meriden	24,031
Mississippi, Gainsville & Tuscaloosa	87,406	Selma, Rome & Dalton	149,039
Macon & Brunswick	3,960	San Antonia & Mexican Gulf	50,504
Mobile & Ohio	76 214	Washington, Alexandria & Georgetown	217
Mississippi & Tennessee	29,326		

The following named companies have discharged their entire indebtedness to the Government: Richmond, Fredericksburg and Potomac; Georgia Railroad and Banking Company; Southwestern; Macon and Western; South Carolina, Muscogee, Petersburg, Memphis and Charleston; Mobile and Great Northern; New Orleans, Jackson and Great Northern; Mississippi Central; Virginia and Tennessee; Montgomery and West Point; Virginia Central; Rome, Western and Atlantic; Orange and Alexandria; Manassas Gap; Wilmington and Weldon; Alabama and Florida; New Orleans, Opelousas and Great Western; Norfolk and Petersburg; Vicksburg and Meridan.—*New York Daily Bulletin.*

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, January 6, 1871.

The opening week of a New Year is usually a quiet one, and the past has been no exception to the rule. Trade has been only fair, and yet for many leading staples we notice an advance in prices. A return of ease in the money market seems to be anticipated, and stocks on hand are not of any article so large as to be oppressive.

The following is a statement of the stocks of leading articles of foreign and domestic merchandise at dates given:

	1870		1871.
	Jan. 1.	Dec. 1.	Jan. 1.
Beef, tierces and barrels	56,5 9	26,756	3?,995
Pork, barrels	34,169	15,831	30 J42
Tobacco, foreign, bales	15,600	18,637	18,951
Tobacco, domestic, hogsheads	14,630	19,788	16,488
Coffee, Rio, bags	71,620	42,013	24,347
Coffee, other, bags	15,798	49,203	72 371
Coffee, Java, mats	26,857	32,326	
Sugar, hogsheads	55,967	30,03?	27,531
Sugar, boxes	95,140	89,023	6,790
Sugar, bags	215,790	363,060	307,300
Melado, hhds	814	742	744
Molasses, hogsheads	16,276	10,4?8	9,668
Molasses, bbls	2,115	2,000	1,500
Hides, No	81,100	34,000	76,000
Cotton, bales	33 000	65,000	79,500
Rosin, barrels	51,070	24,440	31,961
Spirits turpentine, barrels	5,630	5,580	6,809
Tar, barrels	9,036	16,700	11,625
Rice, E. I., bags	7,890	8,700	9,200
Rice, Carolina, casks	163	546	875
Gunny Cloth, bales	8,000	8,900	12,100
Gunny Bags, bales	10 400	18,600	12,000
Linseed, bags	143,000	75,200	104,000
Saltpetre, bags	5,100	6,500	12,400
Jute and Jute Butts, bales	12,500	25,400	23,150
Manila Hemp, bales	23,300	24,007	33,300

Cotton has declined to 15c. for Middling Uplands, and even more for future delivery. Breadstuffs have ruled firm, closing rather buoyant; Extra State flour, $6 25; No. 2 new spring wheat, $1 43, and prime new Mixed Corn, 78c. Groceries have been quiet, except a considerable movement in Rio Coffee.

Tobacco has been fairly active, and very firm; Kentucky Leaf has sold to the extent of 400 hhds., almost all for home use, being taken by cutters and dealers, prices ranging from 8c. to 12c. for low to fine leaf; lugs have become comparatively scarce at 7@8c. Seed Leaf Tobacco shows a decidedly improved demand from dealers and manufacturers; the sales include 810 cases Ohio and 300 do. Pennsylvania on private terms; part in the interior or to arrive thence; also 16 cases Pennsylvania, at 16c., 16 do. Ohio, at 19c., and 100 cases Connecticut and Massachusetts wrappers, at 30@60c. Spanish tobacco has been very quiet at 85@105c. for Havana. Manufactured tobacco has been in demand for export, and this accounts in part for the improved tone of crude tobacco but no particulars of business done are reported.

In Provisions we notice a material recovery of tone and prices for hog products. The vastly increased export in December, and the continued large European demand have revived the confidence of holders. New Mess Pork closed at $20 on the spot and for future delivery; prime mess $20 50 Lard 12¼@12⅝c. for prime steam on the spot and for future delivery. Bacon 10½c. for Western long clear. Beef quiet and unchanged. Butter and Cheese dull and rather weak.

Naval Stores have been fairly active, but Rosin closes quiet at $2 30 for strained, but Spirits Turpentine had a pretty brisk sale to-day at 49@49½c. Oils have been quiet. Petroleum has been working upward, especially refined, which has been relatively lower than crude, and closes at 24c.

Whiskey declined to 91c. Hops are dull. Hay scarce and firm. Hides at a slight decline are more active; late sales include dry Buenos Ayres, 25¾c., gold; dry Texas, 21½c., currency and city slaughter 10@10½c., currency. Leather is doing fairly. Tallow has been more active, nearly half a million pounds selling to-day at 8½@9c. Metals and East India Goods are without important feature. Wool has been in fair request and firm. Freights closed dull; many vessels are over due; the speculation in Breadstuffs checks shipments, and export orders for Cotton are reduced.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1.

ARTICLES.	Total this week.	Total since January 1, 1871.	Same time 1870.	Allotb. Ports.	Others.	Brazil.	British Guiana.	Venezuela.	New Granada.	Mexico.	Other W. Indies.	Hayti.	Cuba.	Br. N. A. Colonies.	Australia.	China & Japan.	Others. Europe.	Spain.	Other N. Europe.	Holland & Belg.	Germany.	France.	Great Britain.

COTTON.

FRIDAY, P. M., Jan. 6, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening Januray 6. From the figures thus obtained it appears that the total receipts for the seven days have reached 139,631 bales against 124,450 bales last week, 130,210 bales the previous week, and 155,717 bales three weeks since, making the total receipts since the first of September, 1870, 1,765,026 bales against 1,442,474 bales for the same period of 1869, showing an increase since September 1 this year of 322,552 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	43,847	43,496	Florida bales.	400	174
Mobile	15,880	13,338	North Carolina	3,731	2,466
Charleston	10,435	5,716	Virginia	12,999	5,897
Savannah	27,819	15,056			
Texas	11,603	8,000	Total receipts	139,631	102,286
Tennessee, &c	11,047	8,146	Increase this year	37,345	....

The exports for the week ending this evening reach a total of 88,496 bales, of which 82,858 were to Great Britain, and 5,628 to the Continent, while the stocks at all the ports, as made up this evening, are now 555,868 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night

Week ending Jan. 6.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	28,458	3,587	27,045	14,088	220,867	149,398
Mobile	13,019	....	13,019	3,547	52,111	63,778
Charleston	5,713	....	5,713	500	32,763	24,489
Savannah	13,964	1,407	15,361	5,554	84,879	72,755
Texas	3,716	....	3,716	....	53,067	47,168
New York	17,266	200	17,583	9,854	82,000	56,511
Other ports	615	434	1,019	961	30,000	35,519
Total	82,858	5,628	88,496	34,524	555,686	440,040
Total since Sept. 1	881,369	126,686	968,445	714,611	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 53,962 bales, while the stocks to-night are 115,646 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Dec. 31, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Foreign	Total.	Northern Ports.	Stock.

We have a had a very quiet market the past week, the general demand having proved quite moderate. Holders have, however, offered their stock sparingly, though there are a good many receivers who have been obliged to sell, and this, with the heavy receipts at our ports, the unfavorable advices from Liverpool, and the moderate demand here, have resulted in a gradual decline in prices, the close being ¼c. off from last Friday, Middling Uplands being quoted to-night at 15c., against 15¼c. a week ago. Saturday prices were unchanged and steady. Monday was a holiday. Tuesday quotations were the same as Saturday, but the close was weak. Wednesday prices favored buyers, and were reduced ¼c. Thursday the market was weak and irregular, but there was no change in the quotations. To-day prices are further off ¼c., and the close is weak for the lower grades, but firmer for the better grades. The light demand through the week arises from these two facts—that the decline at Liverpool has shut off to a very great extent export orders, and the continued low condition of the streams throughout the North and East, keep many of our spinners on short time. For forward delivery there has been the same downward tendency, and the close is about 5-16c. off from last Friday, the closing rates being for January, 14 9-16; February, 14 13-16; March, 15 1-16; April, 15⅛. The total sales of this description for the week (including 2,100 bales free on board, but not including bales "Exchanged") have been 47,500 bales. For immediate delivery the total sales foot up this week 17,382 bales, including 3,311 bales to arrive, of which 4,481 bales were taken by spinners, 223 bales on speculation, 11,428 bales for export, and 1,250 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	12½@....	12½@....	13 @....	13½@....
Good Ordinary	14½@....	14½@....	14½@....	15 @....
Low Middling	14⅝@....	14⅝@....	15⅛@....	15⅜@....
Middling	15 @....	15⅛@....	15⅛@....	15⅜@....
Good Middling	15⅜@....	16 @....	16⅛@....	16⅜@....

Below we give the total sales of cotton and price of stands at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling.
Saturday	2,244	12⅜@....	14⅛@....	14⅜@....	15¼@...
Monday (holiday)	...	@....	@....	@....	@ ...
Tuesday	1,8'2	12⅜@....	14⅛@....	14⅜@....	15¼@....
Wednesday	5,361	12½@....	14⅜@....	14⅜@....	15⅜@....
Thursday	2,976	12½@....	14⅜@....	14⅜@....	15⅜@....
Friday	5,489	12½@....	14⅛@....	14⅜@..	15 @....

For forward delivery the sales (including 2,100 free on board,) have reached during the week 47,500 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For December. bales.	cts.	For February. bales.	cts.	bales.	cts.	bales.	cts
200	14¼	2,800	15⅛	2,350	15¼	500	15 9-16

18,900 total January				1,000	15⅜		

The sales during the week of free on board have reached 2,100 bales. The particulars of these sales are as below:

900 f. o. b. Mobile p. t.	400 f. o. b. Charleston p. t.
200 f. o. b. Savannah p. t.	100 f. o. b. Baltimore p. t.
500 f. o. b. Galveston p. t.	

The following exchanges have been made during the week:

3-16c. p'd to exc'g 500 Jan. for 500 Feb.	½c. paid to exch'g 500 Jan. for 500 March
¼c. " " 200 Jan. for 200 April	¼c. " " 100 Jan for 100 Feb.
7-16c. " " 400 Jan. for 400 March	

WEATHER REPORTS BY TELEGRAPH.—The weather throughout the South during the past week appears to have been very pleasant for the season. With one or two exceptions our telegrams report an entire absence of rain, and in most cases that it has been fair and pleasant. It has, however, at some points been quite cold. At Charleston it has been cold and dry, the thermometer averaging 37; Mobile is reported pleasant, thermometer 44; Montgomery, no rain, weather moderate; Selma, no rain, weather fair and pleasant; Columbus, no rain, thermometer 45; Macon, no rain, thermometer 48; Augusta, rain the latter part of the week; Nashville, no rain, and the weather pleasant for the season; Memphis, cold and dry; Savannah, rain early in the week, but since then pleasant; Galveston, no rain.

Digitized by Google

The government Signal Service report has been as follows each day during the week. This is the report which the morning papers publish, and simply gives the condition of the weather each night at 11:35. Being thus confined to a fixed moment of each day, it of course furnishes very little indication of the weather during the week, and yet in the form we give it will be found of use in connection with our own report above :

	Dec. 30.	Jan. 1.	Jan. 2.	Jan. 3.	Jan. 4.	Jan. 5.
New Orleans	Calm; C oudy.	No report.	Brisk; Cloudy.	Gentle; Clear.	Brisk; Fair.	Very gentle; Fair.

Wilmington	No report.	No report.	No report.	No report.	Calm; Clear.	Very gentle; Cloudy.
Norfolk	No report.	No report.	No report.	No report.	No report.	Light rain.

RECEIPTS.—The receipts this week are large again, especially at the Atlantic ports. At New Orleans there is a falling off of about 8,000 bales, compared with last report, but all the other ports show an increase. The arrivals at the interior receiving depots have been less free, and the shipments are 4,822 bales in excess ot the arrivals. Stocks at these points have, however increased by reason of the new count made at Memphis, which has brought to light 6,000 bales in excess of the previous statement.

GUNNY BAGS, BAGGING, &c.—Cloth continues very dull and heavy, and without a bottom to prices. The nominal quotation is 20c., but no sales can be made even at that figure; holders are becoming tired waiting for the long-talked of demand, and we have no doubt but that an order for a round lot at 18c., could be filled. Bags have not sold except in a jobbing way, but they are firmly held at 18½c., currency, d. p., and 11½c., gold, in bond. Hemp has ruled quiet since our last report, the last sales of Manila were at 12c., gold, which is nominally the present price; a lot of 350 bales Italian sold on private terms. Sisol is quoted at 10½@ 11c., gold, and Tampico, 7½c., gold, in bond. Jute is rather quiet, the supply in the hands of manufacturers is said to be small, and holders ask full and firm prices; we quote at 5½@6½c., gold. Jute Butts at the close meet with more inquiry, and 500 bales sold, to arrive in Boston, at 4½c., currency.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1869:

	Week ending Jan. 6, 1871.			Week ending Jan. 6, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta	3,019	7,704	16,165	5,210	5,402	20,199
Columbus	1,709	1,562	12,275	1,339	1,642	15,456
Macon	2,591	2,089	13,696	1,385	1,454	18,646
Montgomery	3,108	3,011	12,690	1,101	1,142	16,978
Selma	2,567	3,511	9,862	1,017	1,375	7,943
Memphis	16,936	17,042	38,908	8,289	9,004	20,258
Nashville	2,356	1,989	5,639	1,385	1,442	3,217
	32,286	36,908	109,235	19,726	21,461	102,697

These totals show that the interior stocks have increased during the week 1,378 bales (being now 6,538 bales more than for the same period of last year), while the aggregate receipts are 12,560 bales more, and the shipments 15,447 bales more than for the corresponding period of 1869. Count has been taken this week of the stock at Memphis and 6,000 bales additional found which were added to the stock, making it 38,908 bales.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons. On account of the irregularity in the cable despatches, we are again without our figures for stock at and afloat for Liverpool, and we therefore for those items return the figures of last week :

	1870.	1869.
Stock in Liverpool.....bales.	379,000	352,000
Stock in London	59,456	112,177
Stock in Glasgow	800	250
Stock in Havre	51,409	68,700
Stock in Marseilles	6,750	3,700
Stock in Bremen	3,600	1,500
Stock rest of Continent	25,000	20,000
Afloat for Great Britain (American)	355,000	186,000
Afloat for France (American and Brazil)	....	56,837
Total Indian Cotton afloat for Europe	103,000	189,000
Stock in United States ports	555,686	440,040
Stock in inland towns	109,235	102,697
Total	1,648,936	1,482,901

These figures indicate an *increase* in the cotton in sight to-night of 166,035 bales compared with the same date of 1869.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 88,298 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night. Below we give a list of the vessels in which these shipments from all ports, both North and South, have been made:

	Total bales.
NEW YORK—To Liverpool, per steamers City of Cork, 243....Russia, 905....Nevada, 2,415....Palmyra, 1,071....Copernicus, 550... City of Brooklyn, 1,078....City of Dublin, 3,960....Caledonia, 88.... Pennsylvania, 2,994....per ship Sahpore, 2,970	17,190
To Bremen—per steamer Hansa, 1,429	1,429
To Hamburg—per steamer Thuringia, 99	99
NEW ORLEANS—To Liverpool, per steamer Chrysolite, 1,676....per ships Missouri, 2,494....Union, 2,942....Delft Haven, 2,750.... Success, 3,654....per barks Bridgewater, 2,145....Eva, 1,955	17,546
To Antwerp—per ship Thos. Harward, 3,031	3,031
To Genoa—per schooner G. Lanata, 1,303	1,303
To Barcelona—per bark Gratitude, 452	452
To Vera Cruz—per schooners A. Godfrey, 250, and 876 small do.... Williston, 450 ...per brig Hope, 420	1,496
*MOBILE—To Liverpool, per ships Bazaar, 2,789...Mary Durkee, 2,310... Bucephalus, 3,129 ...Centaur, 3,210....Helen Angier, 1,617	13,236
To Barcelona, per brigs Juanita, 200....Teresa, 305	505
CHARLESTON—To Liverpool, per ship City of Halifax, 2,378 Upland and 83 Sea Island ....per barks Sarah, 1,858 Upland ...Aurelia, 33 Sea Island and 1,537 Upland	5,897
To Barcelona—per brig Hortensia, 480 Upland	480
SAVANNAH—To Liverpool, per bark Fanny J. McLellan, 1,807 Upland ... per ships Bridgewater, 4,615 Upland....Golconda, 3,157 Upland	9,579
To Barcelona—per barks Crescencia, 610 Upland ...Margurita, 560 Upland	1,170
To Bremen—per ship N. Mosher, 2,628 Upland	2,628
TEXAS—To Liverpool, per bark J. S. Harris, 1,675....per ship Almira, 2,888	4,513
BALTIMORE—To Liverpool, per ship Ottowa, 1,744	1,744
Total	88,298

The particulars of these shipments, arranged in our usual form, are as follows :

	Liverpool.	Bremen.	Hamburg.	Antwerp.	Genoa.	Barcelona.	Vera Cruz.	Total.
New York	17,190	1,429	99	....	....	....	....	18,718

Total	69,705	4 057	99	3,031	1,303	2,607	1,496	88,298

*The ship Scotia, from Mobile to Liverpool with 2,550 bales, was omitted last week. The brig Louisana, which cleared from Charleston, was put in the place of the former by mistake.

The exports of cotton this week from New York show an increase since last week, the total reaching 18,718 bales, against 16,914 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING Dec. 13.	Dec. 17.	Dec. 24.	Dec. 31.	Total to date	Same time prev. year.

Of the present stock of cotton in Liverpool, 21 per cent is American, against 18 per cent last year. Of Indian cotton the proportion is 55.75 per cent, against 69 per cent.

LONDON, Dec. 17.—The cotton trade is dull, and prices are lower. The following are the particulars of imports, deliveries and stocks :

	1868.	1869.	1870
Imports, Jan. 1 to Dec. 15 ....Bales.	307,196	335,623	162,514
Deliveries	257,776	864,908	226,938
Stocks, Dec. 15	153,457	112,177	59,456

BREADSTUFFS.

FRIDAY, P. M., January 6, 1871

The market for breadstuffs the past week has generally shown strength without activity. The receipts of flour are materially reduced, and although re-inforced by the increased production of local millers, are considerably less than the current wants of the market. The stock in store is, however, 122,000 bbls. greater than last year, being reported on the 1st of January at 565,000 bbls., against 443,000 bbls. at the same date in 1870, with the gold price about 30 per cent higher. Still in view of the reduced stocks of wheat (noted below), the speculative firmness with which wheat is held, and the fact that flour is relatively lower than wheat, holders of flour have been disposed to advance prices. For some days, however, accounts from abroad have been dull, and freight room has been scarce; the export demand has consequently been limited, with the local trade purchasing only moderately, and prices show no decided improvement. To-day, with no cable advices, and a steady rain falling, the market was very quiet; good lines of extra State ruling nearly nominal at $6 25-Corn Meal has been more active at $4 50 for Brandywine.

Wheat has been dull; freight room has been scarce, with rates latterly showing a slight advance, and shippers have not been able to operate freely at the prices demanded; while the wants of millers have been filled by broken and irregular parcels. The following is given as an approximate statement of stocks on hand January 1, 1870 and 1871, in four principal markets :

	1870. Bush.	1871. Bush.
Liverpool	6,500,000	2,900,000
New York	4,466,400	3,700,000
Chicago	2,891,600	2,383,100
Milwaukee	1,564,000	1,662,000
Total	15,423.000	10,645,100

A falling off of 4,777,900 bushels, but in opposition to the natural influence of these figures, it is urged that prices are much higher now than then, and that the superior quality of the wheat now in store causes it to yield more flour than the wheat of last season. It is also true, that the quantity of wheat afloat for British markets, is much larger than a year ago. To-day the market was strong at $1 43@1 44 for New No. 2 Spring against $1 45 on Wednesday. The West has been excited over the reduced stocks, and No. 2 Spring advanced in Chicago to $1 13 for the last half of January, but receding to-day to $1 09½.

Corn has met with a slow sale for home use, mainly at 77@78c. for Western Mixed, and it is only at to-day's market that there was a little done for export. Rye has remained quiet. Barley has been less active, but very firm, with a revival of inquiry toward the close. Oats have been variable, but close a shade firmer with sales of prime boat-loads of Western at 60c. in store and 62c. afloat. The stocks of grain in store and afloat at this markets on the 1st of January for three years, are reported as follows :

	1868. Bush.	1869. Bush.	1870. Bush.
Wheat	4,028,065	4,466,369	3,700,008
Corn	2,061,079	640,500	308,033
Rye	236,448	60,050	192,970
Barley	647,459	639,963	1,461,172
Oats	3,213,388	1,796,962	2,289,065
Malt	121,173	94,114	358,330
Peas	74,708	47,671	14,571

The following are the closing quotations :

GROCERIES.

FRIDAY EVENING, January 6, 1871.

As predicted, the market opened under the new tariff in a somewhat unsettled condition, and values have not, as yet, reached a good solid basis, but allowing for the difference in duty the gain in most instances has been in favor of the selling interest, and the feeling generally is firm and confident. Some complications and delays have arisen in withdrawing goods from bond, owing to the anxiety on the part of owners to hurry matters with all possible speed, but the trouble has not proved quite as great as calculated upon. Most of the large buyers were owners of parcels in bond, and the business from first hands was a little slow, but jobbers have been enabled to distribute about all the desirable goods available, and obtain extreme prices. Our duty-paid quotations are revised to conform to the reduced cost of importation, but figures should for the present, be considered as somewhat nominal.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	12,413 pkgs.	Laguayra	270 bags.	Sugar, Brazil	.... bags.
Green	4,195 pkgs.	Other	1,935 bags.	Manila, &c.	.... bags.
Japan	8,416 pkgs.	Sugar, Cuba	6,933 bxes.	M'las's, Cuba	41 hhds.
Various	3,290 pkgs.	Cuba	2,281 hhds.	Porto Rico	.... hhds.
Coffee, Rio	20,901 bags.	Porto Rico	.... hhds.	Demerara	.... hhds.
Java	12,000 mats.	Other	410 hhds.	Other	330 hhds.
Maracaibo	2,945 bags.				

*Hhds. include bbls. and tcs reduced.

Imports this week have included three cargoes tea; 22,591 bags Rio, 19,173 mats Java, and 15,497 bags of other kinds of coffee. Receipts of sugar have been fair, including 7,500 bags of Brazil, and 9,837 bags of Manila sugar. Receipts of molasses have been small.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1870, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

TEA.

The attendance of buyers has continued pretty large, and with a less general feeling of caution shown, business developed into considerable activity, even more, probably, than is known, as many of the transactions are covered with all the secrecy possible. There has also been a first-rate line trade doing, and taken altogether, the position is quite encouraging for holders. The available supply of Oolongs here and to arrive has became pretty well reduced, and better prices can be obtained for all desirable chops, while Japans are now beginning to attract greater attention, and with Greens sell quite readily, prices showing some buoyancy at the close. We note sales of 1,500 packages Green, 6 000 pkgs. old Green, 8,700 do. Oolongs, 2,770 do. Japans, and 19,800 pkgs. do. to arrive.

Imports this week have included the following cargoes: "Chloris," from Yokohama, with 357,531 lbs. Japan; "Ocean Gem," from Amoy, with 288,398 lbs. black, and "Mindet," from Amoy, with 466,860 lbs. black.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1, 1870, to date, in 1870 and 1869:

	Black.	Green.	Japan.	Total.
1870	15,712,800	17,227,526	9,703,625	42,643,951
1869	18,346,192	17,655,045	10,450,047	41,351,284

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 98,095 pkgs. since January 1, against 49,800 last year.

COFFEE.

On Brazils of all grades we continue to note an extremely strong and uniform market, and though there is naturally some irregularity at present on duty paid quotations, prices in bond have advanced, and even at the improvement a great many holders are indifferent operators, owing to the very small stock available. The late reports from the point of production indicate pretty free shipments, but also an advance in price, and importers are confident of their ability to command the position for some time to come. The attention given to getting goods through the Custom House has occupied the time of jobbers to a considerable extent, but still the demand proved fair, and buyers operated quickly when desirable samples were shown. According to a compilation made by one of our leading brokers, the receipts at New York for 1870 were 667,270 bags, including 591,354 bags Rio and 72,916 bags Santos, and the sales for the same period 714,543 bags, including 644,934 bags Rio and 69,609 bags Santos. For Java the demand has been very good, and allowing for the difference in duty, full rates were obtained, the market closing strong. St. Domingo has been more plenty, and some sales made, through receivers, as a rule, seemed inclined to re-ship at once to Europe on their own account. Other West India styles quiet, but steady, in bond. Duty paid prices are a little mixed as yet, and we make no pretension to giving close quotations. Sales of 14,010 bags Rio, 3,068 bags Santos, 500 bags Maracaibo, 300 bags Ceylon, 100 bags Laguayra, 4,700 bags St. Domingo, 6,635 mats Java. Shipments from first hands of 1,600 bags St Domingo. Sales at Boston of 5,000 mats Java. At Baltimore, Brazils have sold freely, and we note about 16,656 bags taken by the trade.

Imports this week have included the following cargoes of Rio: "Eclipse," 6,028 bags; "Johanna," 4,997 bags; "Aabine," 4,600 bags; "Tartar," 3,566 bags; "Union," 3,400 bags. Of other sorts the imports have included 19,173 mats Java, per Sanderson; 4,216 bags St. Domingo, per "Henry and Louise;" 600 bags do. per "V. J. Wallace;" 1,642 bags do. per Alice; 1,635 do. per "Annie;" 3,948 bags Laguayra per "A. B. Paterson;" 3,044 bags do. per "Jenny," and 422 bags of sundries.

The stock of Rio, Jan. 5, and the imports since January 1, 1870, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	14,228	3,550	9,845	4,000	4,000	4,000	38,621

* Includes mats, &c., reduced to bags. † Also, 88,795 mats

SUGAR.

As might naturally be expected the market for Raws has been somewhat unsettled during the current week by the changes in the rate of duty, and even yet values have not become thoroughly adjusted. As indicated by a sale at the close of our last report the opening transactions were on a basis of 9¾c. for good refining, a reduction of ¼c. from previous nominal figures, but allowing for the difference in duty an actual gain to holders of goods in bond of ¼@¾c. per lb. This infused a feeling of considerable confidence, and sellers generally were inclined to display much general strength, and to make no attempt to realize, especially as there appeared to be some indications of a good consumptive demand. The outlet, however, did not develop with the freedom anticipated, owing in part to the fact that quite a number of refiners who had previously purchased in bond to carry over were enabled to withdraw parcels sufficient for urgent wants, and the result was a slight weakening of values. We revise our figures to conform as near as may be to present prices, but they must be looked upon as somewhat nominal until the market is better defined. Refined Sugars have met with a very fair inquiry, and prices ruled comparatively firm, especially on soft white, of which but little was ready for delivery. The general market closes dull and weak. Sales of 629 hhds. Cuba, 297 hhds. Demerara, 371 hhds. New Orleans, and 3,214 boxes Havana.

Imports at New York, and stock in first hands, Jan. 5, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, bags.	Melado hhds.

MOLASSES.

There is but little to report on the market for foreign styles, though, if anything, the position appears to be a trifle more encouraging. Some call has prevailed for distilling qualities, and choice grocery grades could be sold fairly if here, and in view of this and the comparatively small supply generally, holders adhere to about former prices quite steadily, as they were already low enough to about discount the modified cost of withdrawal from bond. Of domestic the supply has been larger than usual and the average of quality poorer, causing a rather slow movement on the part of buyers, and a decline on all except very choice selections. At the concession a fair amount has been disposed of, but a few lots are still available and additional supplies are close at hand. Sales of 150 hhds. Cuba muscovado, 75 hhds. English Islands, 10 hhds. Porto Rico, and 2,706 bbls. New Orleans.

The receipts at New York, and stock in first hands, Jan. 5, were as follows:

* Including tierces and barrels reduced to hhds.

SPICES.

Business has been very good but mostly of the character of a jobbing movement, and the bulk of the sales are not in a shape to report. Sellers in nearly all cases appear satisfied with the turn of the market, and those who have been enabled to get goods out of bond state that they find buyers ready for about all the offerings. A great many dealers, grinders, etc., were among the purchasers last month of parcels to be delivered after the 1st inst., and awaiting these the demand is naturally somewhat slow. A revision of prices is made, though duty paid quotations are not altogether reliable for the present.

Digitized by Google

FRUITS, &c.

In Foreign Dried the demand for many descriptions has been good, but sales are mostly of lots to arrive; prices generally are held with confidence and a healthy trade in the future is anticipated. Layer Raisins are held by stronger parties, and although the trade have been reluctant in paying any advance, holders have raised the price 2½@5c. per box since the date of our last, with moderate sales at the advance. Valencias have shown considerable trade to arrive, but the terms are kept private. Currants continue to move freely and sales this week have been still larger than last; prices are unchanged, however still selling at 8c., gold to arrive. Turkish Prunes have moved more freely and sales are about 150 casks at 5½c. gold and 12c. currency. Citron is quiet, no sales of any moment having taken place, but no further decline in price can be quoted, as holders do not urge sales. Sardines continue dull and no business has been done since our last; prices are nominally steady as before quoted. Nuts have been less active this week, but quotations are quite steady. There has been an arrival of Fire Crackers which are lower; there is no market at present for them; holders ask $3 50 per box.

Green Foreign Fruits.—The supply of Lemons is exceedingly small; there are some vessels due here, but nothing has arrived, jobbers have a few which bring $3 0 per box, most of the sales are by the single box. Oranges are more plenty, but as there are a good many here from the West Indies, box fruit meets with but little demand. At auction, to-day, Valencia Oranges sold at $9 50 per case, and Malaga at $2 75@3 50. West India lots are coming in quite freely and meet with fair sale at $8@10 per bbl. for Porto Rico Oranges, $7@9 for Havana, and $6 for Nassau and Baracoa. Cocoanuts sell at $45@50 Per M, the latter price for clean husks.

Domestic Dried have done rather better in prices and at the close the sales are increasing, but the market may still be called very quiet, most of the transactions have been at 4½@4¾c. for Southern quarters. The stock here is fair but with an improvement in green more attention has naturally been given to dried and this, together with some other causes, gives the market more firmness. There have been none sold as yet that we learn of for export to Europe. There is nothing doing in pared peaches simply because there are none of good quality to be had, and the high prices quoted are nominal although sales could be made at them no doubt if they were here. There are considerable many inferior lots offering, but these are very dull and cheap. Unpeeled are more wanted, and as the quantity here is small, firm prices rule; more attention has been given to quarters and we note several small lots sold at 6¼@6¾c. We learn of no sales of old, but holders of them are quite confident that they will be wanted, and demand full prices. Blackberries are somewhat irregular, quotations range from 8½ to 9c.; there are a good many lots offering at the lowest price called prime which are either "fixed up" or mixed with old, 8¾c. has been offered for 50 bbls. of strictly prime with no sellers, and one receiver reports an offer rejected of 8¾c. on a lot in bags. Pitted Cherries are quiet; we hear of no business of any note since our last; the supply is good. Plums are also in limited demand and prices are about as formerly quoted. Raspberries are in large supply and easier in price. Peanuts are slow of sale with the quotations hardly so firm, the best lots of Virginia bring from $2 to $2 10, and North Carolinas from $2 50@2 75 per bushel. Pecans are without particular features to note.

The Domestic Green Apples sell better, but mostly to the city trade, who buy Greenings, Spits, and Baldwins almost entirely, and for the best of these a further advance of 25c. per bbl. has been established, the finest selections bringing $3 50 per bbl. by the load. There are still a good many decayed lots on the market which sell from $1 to 1 75 per bbl. Cranberries are slow for this season and lots are difficult to sell at former prices. Crates sell at $3 50@3 75 or ordinary and occasionally a very nice lot at $4.

FOREIGN ADVICES.

The following shows the quantity of Tea afloat for the United States at latest dates (not including San Francisco), and which has not yet arrived:

* Not sailed at last dates.

Cuba Sugar.—Havana, Dec. 30.—The *Weekly Report* says: The quietness which has characterized the market the past weeks, has been more remarkable since our last review, owing to the almost total suspension of business during the Christmas holidays. There has thus been no important sale of sugar on the spot, the stock of which in first hands is insignificant. New sugars come in very slowly as yet, and a sufficient supply for the selection of cargoes cannot be looked for until probably the end of January. Holders are still confident of keeping prices high, and as their pretensions are much beyond buyers' views, transactions may from this cause be restricted, although this is entirely dependent upon the future situation of foreign markets.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	3,091	65
Philadelphia	3,600	....
Boston	907	....
Total export of the week to all countries	8,312	65

The general movement at both ports has been as follows:

	Rec'ts this w'k. Boxes.	Rec'ts this w'k. Hhds.	Exports since January 1.—To U. S. Boxes.	To U. S. Hhds.	To all Ports. Boxes.	To all Ports. Hhds.	Stock at date. Boxes.	Stock at date. Hhds.

THE DRY GOODS TRADE.

FRIDAY, P.M., January 6, 1871

Business during the week under review has been confined to the filling of a few small orders from retailers in distant sections, and to supplying the wants of a small number of near-by dealers, who were in the city purchasing small assortments to replenish their stocks. The movements having been confined to such limited quantities as were required to supply the requirements of the current trade, the aggregate is very light, though the market cannot be considered unusually dull for this season of the year. Such seems to be the opinion of dealers generally, for we hear no complaints of unusual dullness. Commission men, importers, and jobbers have completed their annual accounting of stock, though still engaged in making the usual yearly settlements, and balancing accounts. It is, therefore, impossible to learn anything definite relative to the result of the season's business. Although the trade is presumed to have been fairly profitable to jobbers, there is an apparent disposition among them to greatly curtail their expenses during the current year. With this object in view, the number of salesmen was materially reduced on the 1st instant, and in some instances, we understand, salaries have been reduced. There will be many business changes during the month, among both commission men and jobbers. Several firms dissolve, and retire from the trade, while enough new firms are formed to keep the number good. The shrinkage in values during the past year had the effect to lessen profits and rendered it necessary for dealers to reduce their expenses far below the war standard, which has been kept up till the beginning of the present year.

DOMESTIC COTTON GOODS.—There is some animation in the trade from first hands, and a few sales are made. Brown goods are selling relatively well, as buyers apparently have more confidence in the stability of prices on these than on bleached cottons. The latter are in fair demand, however, and quotations are sustained with more firmness than was noted a few weeks since. Denims are beginning to sell from first hands to jobbers, who are getting their stocks in order for the spring trade, and prices are becomming unsettled, as a general revision is likely to be made before the spring season opens. A few makes have already been marked down, and quotations may be considered nominal. The same is also true of other colored cottons. Cambrics are scarce, in consequence of the limited supply of print cloths, and an advance of ¼c. has been made by the agents of several brands, while a general advance is probable. Prints are in comparatively good demand, and the stock of winter work is very small. Transactions are, at the moment, restricted by the absence of any assortment of light work, but agents will doubtless be able to offer more varied stocks by the middle of the current month. Prices tend upward on all standard work, and several prominent brands have already been advanced to 11c.

DOMESTIC WOOLENS.—There is a better tone to the market for light weight cassimeres of all grades, and the demand for fine goods is becoming more active. Clothiers are taking considerable amounts of the lower grades, and the aggregate movements compare very favorably with those at a corresponding period in past seasons. Cloths are in limited request, but the movements are not heavy. Prices are well maintained on all lines, with no probability of a revision of rates prior to the opening of the coming season. Flannels and blankets have not sold to any extent during the week, and the season's trade in these goods is, apparently, about over.

FOREIGN GOODS.—The market for foreign fabrics is entirely unchanged, and continues without animation in any line. There has been a little more call for woolens during the last two or three days, and sales of considerable lots have been effected. Prices are steady and firm, though slight concessions are occasionally offered to help sales. Linens have been in limited request for the spring trade, but the movements aggregate only a small amount. Dress goods are flat, with no demand, excepting for small amounts to replenish retailers assortments. Millinery goods are quiet, and remain without notable change.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table:

	FROM NEW YORK.				FROM BOSTON

East Tennessee, Virginia & Georgia Railroad

1st MORTGAGE 7 PER CENT BONDS,

REDEEMABLE 1900,

Interest Payable 1st of January and 1st of July, in the City of New York.

THE MORTGAGE IS FOR **$3,500,000** ON A ROAD 270 miles long, which has been in successful operation for many years. The lien is about

$13,000

per mile, which makes it, with few exceptions, the smallest issued on any road in the United States. It was created for the sole purpose of paying off the debt due the State of Tennessee, amounting to

$4,117,761 10.

An examination into this security will prove it to be one of the best ever offered in the market.

For terms and further particulars, apply to

GALLATIN NATIONAL BANK
NO. 36 WALL STREET,
Agent for the sale of the Bonds.

STATE OF ARKANSAS

7 PER CENT BONDS, ENDORSED BY THE

MEMPHIS & LITTLE ROCK RR. CO

For Sale at 70 and accrued interest, by

Swenson, Perkins & Co.,

30 BEAVER STREET.

THE STATE OF ARKANSAS issues its Bonds in aid of Railroads—ten thousand dollars per mile, for the payment thereof a special tax is collected annually for interest and sinking fund.

THE MEMPHIS AND LITTLE ROCK RAILROAD 188 miles long, is completed and in running order 120 miles. The unfinished section will be completed in December next.

Miscellaneous.

Seven Per Cent

FIRST MORTGAGE BONDS

OF THE

Nashville & Decatur RR.

This Mortgage is for

$2,100,000,

or only $17,500 per mile on an old and completed road, showing an established business, from local traffic mainly, more than sufficient to pay its interest as it becomes due, with prospects of greatly enlarged receipts from new connections which are now in progress.

The Mortgage was created for the sole purpose of paying a debt due to the state of Tennessee on terms which would reduce the liability of the road about $600,000.

Of the bonds issued under said Mortgage $200,000 are held in Escrow to abide settlement of a claim of the United States; $300,000 have been purchased by the parties in interest, and the balance of $1,600,000 are offered for sale on favorable terms—the security, in judgment of the undersigned, being such as to entitle them to perfect confidence.

Drexel, Winthrop & Co.,

COTTON.

1,000 Tons Arrow Ties for baling Cotton.

For Sale by
SWENSON, PERKINS & CO., AGENTS,
P. O. Box 5,734. 80 Beaver street, N. Y.

These Ties have been used more extensively than any others, and last year for more than one-half of all the cotton baled in the United States, and received the premium at several State fairs.

VIBBARD, FOOTE & CO.,
AND
CHARLES G. JOHNSEN,
PROPRIETORS AND MANUFACTURERS OF
COTTON TIES,
ENGLAND, NEW YORK AND NEW ORLEANS
SELF-FASTENING BUCKLE TIE.

This is for the planter, the compress and the ship; the best and most convenient Tie manufactured. It is recommended by all of the dealers in New Orleans after a thorough investigation as to the merits of the various ties in use. They are made of the best quality of English iron, nicely paluted, put up in bundles of uniform weight and are sold under a guaranty to have entire satisfaction.

WILLIAMS, BIRNIE & CO.,
83 Beaver street, New York.
Sole Agents for the Atlantic States.
For sale by dealers throughout the country.

To Railroad COMPANIES.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices, for all descriptions of both AMERICAN and FOREIGN

Railroad Iron.

We are always in a position to furnish all sizes, patterns and weight of rail for both steam and horse roads, and in any quantities desired either for IMMEDIATE OR REMOTE delivery, at any port in the United States or Canada and always at the very lowest current market prices. Contracts will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for foreign, and when desired, we will contract to supply roads with their monthly or yearly requirements.
Orders for Foreign Rails, will be taken for transmission by Mail or through the cable to our

LONDON HOUSE,
58 OLD BROAD STREET,

for execution at a fixed price in Sterling or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America and at the lowest possible rates of freights. Address

THE Commercial and Financial Chronicle

Hunt's Merchants' Magazine,

A WEEKLY NEWSPAPER,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, JANUARY 14, 1871. NO. 290

Advertisements.

Advertisements will be inserted at the following prices per line for each insertion:

If ordered less than 4 times		20	cents per line.
4 times or more		16	"
" 9	"	14	"
" 13	"	12	"
" 26	"	10	"
" 52	"	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

JAY COOKE & CO.

FIRST MORTGAGE

BONDS

OF THE

Nashville & Decatur RR.

This Mortgage is for

$2,100,000,

or only $17,500 per mile on an old and completed road, showing an established business, from local traffic mainly, more than sufficient to pay its interest as it becomes due, with prospects of greatly enlarged receipts from new connections which are now in progress.

The Mortgage was created for the sole purpose of paying a debt due to the state of Tennesee on terms which would reduce the liability of the road about $600,000.

Of the bonds issued under said Mortgage $200,000 are held in Escrow to abide settlement of a claim of the United States; $300,000 have been purchased by the parties in interest, and the balance of $1,600,000 are offered for sale on favorable terms—the security, in judgment of the undersigned, being such as to entitle them to perfect confidence.

Drexel, Winthrop & Co.,

18 WALL STREET,

N. Y. Guaranty & Indemnity Co.,

STATE OF ARKANSAS

7 PER CENT BONDS, ENDORSED BY THE

MEMPHIS & LITTLE ROCK RR. CO

For Sale at 70 and accrued interest, by

Swenson, Perkins & Co.,

80 BEAVER STREET.

THE STATE OF ARKANSAS issues its Bonds in aid of Railroads—ten thousand dollars per mile, for the payment thereof a special tax is collected annually for interest and sinking fund.

THE MEMPHIS AND LITTLE ROCK RAILROAD 133 miles long, is completed and in running order 120 miles. The unfinished section will be completed in December next.

R. C. BRINKLEY, Pres't.
Memphis and Little Rock RR

Financial.

CITY OF BALTIMORE.

$1,200,000 SIX PER CENT BONDS

OF THE

Western Maryland Railroad Company,

ENDORSED BY THE

CITY OF BALTIMORE.

The undersigned Finance Committee of the WESTERN MARYLAND RAILROAD COMPANY offer through the American Exchange National Bank

$1,200,000

of the Bonds of the WESTERN MARYLAND RAILROAD COMPANY having 30 years to run, principal and interest guaranteed by the City of Baltimore. This endorsement having been authorized by an act of the Legislature, and by ordinance of the City Council, was submitted to and ratified by an almost unanimous vote of the people. As an additional security the city has provided a Sinking Fund of $200,000 for the liquidation of this debt at maturity. An exhibit of the financial condition of the city shows that she has available and convertible assets more than sufficient to pay her entire indebtedness. To investors looking for absolute security, no loan offered in this market presents greater inducements. These Bonds are offered at 87½ and accrued interest. Coupons payable January and July.

WILLIAM KEYSER,
JOHN K. LONGWELL,
MOSES WIESENFELD,
Finance Committee.

East Tennessee, Virginia & Georgia Railroad

1st MORTGAGE 7 PER CENT BONDS,

REDEEMABLE 1900,

Interest Payable 1st of January and 1st of July, in the City of New York.

THE MORTGAGE IS FOR **$3,500,000** ON A ROAD 270 miles long, which has been in successful operation for many years. The lien is about

$13,000

per mile, which makes it, with few exceptions, the smallest issued on any road in the United States. It was created for the sole purpose of paying off the debt due the State of Tennessee, amounting to

$4,117,761 10.

An examination into this security will prove it to be one of the best ever offered in the market

For terms and further particulars, apply to

GALLATIN NATIONAL BANK

NO. 86 WALL STREET,
Agent for the sale of the Bonds.

Elizabeth & Paducah,

KENTUCKY,

FIRST MORTGAGE

8 Per Cent. Convertible Bonds.

We offer for sale the bonds of the above road, which is being pushed vigorously to completion, and will connect the important cities of Louisville and Paducah, at 87½ and accrued interest. These bonds can be registered at the option of the holder. We recommend the above as a very safe and desirable investment.

Full particulars upon application to

MIDLAND BONDS

IN DENOMINATIONS OF

$100, $500 & $1,000.

THESE FAVORITE

SEVEN PER CENT GOLD BONDS

are secured by a first mortgage on the great Midland Railroad of New York, and their issue is strictly limited to $20,000 per mile of finished road, costing about $40,000 per mile. Entire length of road, 345 miles, of which 220 have been completed, and much progress made in grading the remainder.

RESOURCES OF THE COMPANY.

Full-paid stock subscriptions, about - - -	**$6,500,000**
Subscriptions to convertible Bonds, - - - -	**600,000**
Mortgage Bonds, $20,000 per mile on 345 miles -	**6,900,000**
Total - - - -	**$14,000,000**

Equal to $40,000 per mile.

The road is built in the most thorough manner, and at the lowest attainable cost for cash.

The liberal subscriptions to the Convertible Bonds of the Company, added to its other resources, give the most encouraging assurance of the early completion of the road. The portion already finished, as will be seen by the following letter of the President of the Company, is doing a profitable local business:

NEW YORK, Dec. 2, 1870.

Messrs. George Opdyke & Co., New York:

Gentlemen: Your favor of the 1st inst., asking for a statement of the last month's earnings of the New York and Oswego Midland Railroad, is at hand. I have not as yet received a report of the earnings for November.

The earnings for the month of October from all sources were $43,709 17, equal to $524,510 04 per annum on the 147 miles of road, viz.: Main Line from Sidney to Oswego, 125 miles; New Berlin Branch, 22 miles.

The road commenced to transport coal from Sidney, under a contract with the Delaware and Hudson Canal Company, in the latter part of November. The best informed on the subject estimate the quantity to be transported the first year at not less than 250,000 tons, while some estimate the quantity at 300,000 tons. This will yield an income of from $375,000 to $450,000 from coal alone on that part of the road.

Taking the lowest of these estimates, it gives for the 147 miles a total annual earnings of $899,510 04. The total operating expenses will not exceed fifty per cent., which leaves the net annual earnings $449,755 02, which is $214,555 02 in excess of interest of the bonds issued thereon.

I should add that the earnings from passengers and freight are steadily increasing, and that, too, without any through business to New York. Yours truly,

D. C. LITTLEJOHN, President
N. Y. and O. Midland Railroad Co.

The very favorable exhibit presented in the foregoing letter shows that this road, when finished, with its unequaled advantages for both local and through business, must prove to be one of the most profitable railroad enterprises in the United States, and that its First Mortgage Bonds constitute one of the safest and most inviting railroad securities ever offered to investors.

For sale, or exchanged for Governments and other current securities, by

GEORGE OPDYKE & Co.,

PLETHORA OF CAPITAL.

Some persons, who are perhaps rather premature, are troubling themselves about the probable accumulation of capital in this city as indicated, both by the bank statements of the last two weeks and by the reports as to the probable exhibit of to-day. What is really to be regretted is not so much the accumulation of capital as the rapid flow of currency to the banks of this city from their correspondents in the interior. This influx has started sooner than usual this year for several reasons, to which we need not specially refer; and it has already begun to show its influence in the speculative activity for which the cliques tried to prepare the way by the recent bear raid at the Stock Exchange. There is hope that some of the inequalities may be corrected in the working of the money market, and that the spasmodic irregularities which have been complained of may cease to perturb business. The chief of these complaints is directed against the sudden and violent changes in the rate of interest. A bill is pending at Albany to prevent such usury and to modify the laws which so stringently forbid it. Of course usury should be discriminated from insurance, and high rates for loans sometimes indicate unusual risks. Still the normal rates of interest fluctuate more in New York than in any other city in the world. And there is no doubt that the usurious rates of interest prevalent in Wall street are often manipulated by a small clique of the money lenders who combine their efforts and manoeuvre the money market so as to be ever ready to seize the opportunity of favoring crises, and compel the necessities of the borrowers to pay tribute to their avarice. It is now about five years since this evil became so troublesome as at present is. About that time the money-lenders seem to have organized their existing combination for the sake of controlling the money market. Previously there had been too much jealousy and too little conference between the banks which were the chief money-lenders to allow of any definite concert of action. At that time, however, the private bankers found themselves growing in power, and one or two propounded the opinions that a bold, spirited attempt at certain times when the money market was sensitive would certainly succeed in marking their loans up to double or triple rates. He founded his argument on the fact that the banks are extremely timid at such times; and that from fear, or for gain, the example once set would be soon followed, and the custom might thus be established of charging higher rates for money than had been known in this market, unless in exceptional times of pressure and panic. This scheme has succeeded, and the private bankers have thus been acquiring, in times of monetary excitement, large gains, that enable them to pay the high rate of interest by which they attract their large deposits from the country.

It is because of these high rates of interest which average 4 per cent. on monies deposited by country banks that such large amounts of currency are now attracted into the banks of this city. Our larger national banks as well as our private bankers are almost all resorting to this expedient for attracting deposits. And as just now business is stagnant in the country, the banks there find that they cannot employ their funds to better purpose than to send it to New York, where it contributes to swell the plethoric resources of our already overstocked banks. Now the question is how these funds shall be employed here while legitimate business is so dull. There seems to be no other outlet for these funds than the lending them in Wall street where they cannot but foster speculation at the Stock Exchange, in the Gold Room and elsewhere.

Of course so long as these excessive supplies of currency are here we shall have no spasms in the money market, but the anticipation of the influx being so excessive may be disappointed, and as yet the tidal movement is only in its early stages, and it may not produce its effects for some time to come. Still it is well to foresee the probable rising of the

Digitized by Google

hoard of currency in bank, and to note the fact that it is not a sign of commercial health, but rather shows that languor paralyses the interior traffic and industry of the country, and that the banks there being unable to make use of their funds so as to command four per cent interest, are glad to lend these funds at that rate to New York.

There is another conspicuous evil arising out of the heavy deposits of funds from the interior banks. When business begins to be brisk in the country, these country deposits are suddenly withdrawn, depleting the reservois of the money market here, and aiding in the production of monetary trouble. For some disturbance can seldom be avoided if, as often happens, the drain of currency to the interior occurs at a time when business here is also becoming more active. The effect of this new device which has been engrafted upon our financial system, is to increase the opportunities for creating spasms and monetary irregularities, and thus to afford to the money-lenders the means of making larger profits. It is only fair to say, however, that for a year past the method seems to have been falling into decripitude. Since the Grand Jury took up the question of usury some months ago, when some of the leading bankers of Wall street were prosecuted and received precautionary treatment under the law, there have been fewer abuses from a cause which had become an intolerable nuisance. This, as well as most of the numerous brood of evils in the working of our financial system, would be alleviated, if not cured, had our currency more elasticity, and if, in consequence, there were more freedom in the movements of capital, between the borrower and the lender, and between the metropolis and the interior.

LOSSES BY THE PACIFIC RAID.

Sixteen millions of dollars is computed to be the loss inflicted on the public by the recent raid on the Pacific Railroad Company. This calculation is founded on the quoted prices at the Stock Exchange before and since Mr. Boutwell's controversy relative to the payment of the interest on the subsidy bonds. Such a prodigious shrinkage in values might well develop monetary trouble in various quarters where it is least suspected. But it is one of the newest proofs of the great solidity and strength of our financial machinery, as well as of the vast capital of our leading money kings that so few failures have followed, and that when Mr. Oakes Ames succumbed under the burden of his eight millions of obligations multitudes of others were not crushed in the ruins of his fall. Instead of this we find that with a few exceptional instances, that of Messrs. Gardner & Bacon being the chief, the general current of financial affairs has been perturbed far less than had been anticipated by the bear speculators, who must have found their gains much curtailed by the limited extent and speedy extinction of the conflagration they sought to raise.

Some undeserved aspersions have been made on Mr. Boutwell in consequence of his alleged connection with this attack on the Union Pacific. It is argued that he waited for the most perilous crisis which has ever assailed the credit of the company, and chose this inopportune moment for making his demand for back interest. The loan market being tight and the company pressed for money, Mr. Boutwell, they say, might have remained quiescent for another month or two, especially as he has waited so long before urging the claims of the government. Had he done this and deferred his new movement until the tide of easy money set in, neither the company, it is said, nor its friends would have found the getting of monetary accommodation prevented by the insuperable barriers before which their troubles were launched upon them. Again it is pretended that Mr. Boutwell in pressing his demand when he did had been listening to advisers who told him plausible stories and influenced his policy with a view to make speculative profits for themselves and to promote their own gain rather than that of the Government or the people. Some of these disinterested persons, it is said, held Union Pacific Railroad shares and other securities. These they sold out at the highest rates. When the Treasury demand was made for back interest, these adroit speculators are declared to have made further short sales to large amounts, with a view to depress the market and cause a panic, which should spread to other securities and create a general downward rush in all kinds of values. Such is reported to have been the policy of some of Mr. Boutwell's advisers, and such the reasons which prompted the hints and information with which he was assiduously supplied by persons whose integrity and good faith ought to have been beyond suspicion. We do not hear that Mr. Boutwell is actually accused of having had the least suspicion of the unworthy schemes which he is declared to have subserved; but one can scarcely wonder that these reports having been started, considerable excitement has been the result. Sixteen millions is a vast tax to be levied on so small a community as the investors in these securities. It is almost half as much as the whole internal revenue of the Government for the current year from all the States except New York, Ohio, Illinois, Pennsylvania and Kentucky. And this tax of sixteen millions is not only levied on a few individual capitalists and rich firms, but on widows and orphans and a multitude of frugal persons of small means who have regarded the Pacific Railroad as a National work, a great public benefit, and wished to have a pecuniary interest in its ownership, just as they have wished for patriotic purposes to own some of the Government bonds. If ever it could be generally believed that a set of speculators could control the National Treasury, outrage its sacred functions, and convert it into an instrument for striking at a critical moment a deadly blow at the vitals of public and private enterprise, or for inflicting losses on unconscious victims for the gain of a few greedy speculators, some other Secretary of the Treasury will be in office, and not Mr. Boutwell. He has made fewer mistakes in his administration than almost any of his predecessors, and has surpassed them all in the judicious readiness with which he has changed his policy to meet the changing conditions with which he has had to deal. He is incapable of being bought, and if any schemers have made gains by misleading him, those persons had better give the Secretary a wide berth hereafter.

But if it be admitted that Mr. Boutwell, when he thought it his duty to the government to press his claim for back interest, ought to have chosen a more opportune moment; that he might have foreseen the disastrous effects of his doing otherwise; and that he could easily have discerned that his advisers were corrupt; still we must remember that the greatest responsibility for the catastrophe must be charged on those managers of the road who have so conducted its finances as to involve it in embarrassments. The precise amount of this responsibility and where it belongs will probably be more fully known before long, if, as is reported, some of the parties concerned intend to ventilate their grievances in the law courts. We trust they will take a less costly and less vexatious method of settling their troubles and informing the public as to where the wrong lies. Without entering on this disputed subject we are content, as are the public also, with the broad statement that the road has

Digitized by Google

has been mismanaged long enough, and that the sooner its present managers reform their policy, or give place to new men able and willing to do so the better will the prospects be for the road and for the development of its vast growing business. Now is the time to put the finances of the road on sound, adequate, permanent foundations. We do not overlook the difficulties with which the Company have had to deal. Their road was constructed with a rapidity which necessitated a vast increase in the outlay for construction. The engineering difficulties were appalling and surpass anything ever surmounted before. The enterprise was begun amidst the darkest financial troubles of the war. Money was hard to get and the road while building was liable to be wanted for military purposes, and if delayed by the Company it might be hurried to completion by the government under the 17th section of the act of 1862. These and other circumstances caused capital to shrink from investing itself in a Pioneer railroad with such heavy certain outlay and such light and uncertain dividends. With these facts in view, we do not think it a case for the investigation of Congress that the Union Pacific Railroad Company has run up its cost to 115 millions, that its shares represent $36,745,000, and that it has issued 10 millions of Income Bonds, besides Land Grant Bonds to the amount of $9,856,000, and a floating debt variously estimated from 3 to 5 millions. If besides all this the Company had grossly failed in its obligations to the Government, and had not introduced valuable reforms in the mail service, besides carrying the mails and the military stores of the Government with more regularity and speed than was expected, then on these last-named grounds Congress might interpose and appoint a rigid investigation by a special committee. We do not believe in the policy of Government interference in private enterprises. What is needful is for the company to regenerate and disenthrall itself, to take its business in its own hands, and withdraw it from the hands of incompetency, extravagance and shiftlessness. The Union Pacific people complain of the stupendous obstacles they had to overcome in building their road, but they will not tell us that these difficulties were greater than those of the Central Pacific road, which was built at the same time, and crosses the formidable Sierra Nevada. With the same sagacity and financial skill which have signalized the conservative management of the sister road, the Union Pacific may soon win similar prosperity and high repute.

INTERNAL REVENUE RECEIPTS.

Mr. Douglass, the acting Commissioner at Washington, has kindly furnished us with advanced sheets of the Commissioners' Report for 1870. We are thus enabled at so early a period to publish the tables which we give below. The first table is a detailed statement of the receipts of internal revenue during the last three years, with the per centage in 1870 from each specific source, in proportion to the total receipts of that year. The returns for previous years will be found in the CHRONICLE of January 15, 1870, pages 70, &c.

* The articles and occupations marked with a *, against which no collections, or comparatively small collections appear prior to 1865, were taxed in 1863 and 1864, but were reported under more general heads.

‡ Including $51,695 27 additional tax of one cent per gallon on spirits in bond July 20, 1868, not withdrawn prior to April 20, 1869.

¶ Act of July 1, 1862. † Act of March 8, 1865. § Act of March 2, 1867.

** Act of March 7, 1864. †† Now subject to stamp tax.

‡‡ Miscellaneous collections on manufactures and products.

§§ Collected from all sources exempt from tax under laws enacted prior to July 14, 1870.

REVIEW OF THE MONTH.

December was marked by the monetary irregularities which have now become a regular occurrence in that month. The usual outflow of money to Chicago, Cincinnati and the South, coming upon a comparatively low condition of the lawful money reserves of the banks, placed the loan market in a situation to be readily affected by artificial expedients for making a severe stringency, and resort was, therefore, taken to locking up currency, with the result of rates on call loans much above the legal limit, and a severe interruption of discounting operations. Concurrently an occasion of general disturbance of confidence in speculative loans arose out of embarrassments in the affairs of some of the leading directors of the Union Pacific Railroad. The demand of the Secretary of the Treasury for the payment of the back interest on the subsidy bonds of the company was accompanied by a severe speculative attack upon its stocks and bonds, and some of the wealthiest directors, having hypothecated their securities, were compelled either to make special arrangements with their creditors or to suspend payment. Mr. Oakes Ames suspended with liabilities amounting to nearly eight millions; and this failure caused several others, including the firm of Oliver Ames & Sons. These occurrences produced an uneasy feeling and especial caution toward all credits connected with speculative undertakings. These events gave occasion for a free indulgence of the croaking which appears to be germane to the last month of the year; nevertheless, the condition of affairs, otherwise, was satisfactory. The number of mercantile failures at the close of the year were fewer than usual, and the closing symptoms in general business were healthy. In the produce trade, there was more activity, and the exports of the month showed a very large increase upon those of preceeding months. Considerable disappointment was felt at the Secretary of the Treasury not having placed on the market a portion of his large currency balance, in accordance with his usual policy of regulating his balance with a liberal consideration of the requirements of business, and this feeling helped to aggravate the stringency in money. The Secretary, however, appears to have considered that the late curtailment of the taxes, coming concurrently with the redemption of the three per cent certificates, required the precaution of holding an unusually liberal balance. At the close of the month some consideration was shown for the condition of the market by increasing the January purchases of Five-Twenties $2,000,000 over those of December, while the gold sales were retained at the same amount. The intended relief from this source, however, came too late to be of service, as the market just then began to recover from ordinary causes.

United States bonds were, on the whole, decidedly buoyant, prices steadily advancing through a stringency in money which depressed all other securities. This firmness appears to have been simply a natural reaction from the exceptionally low prices late ruling, and a growing conviction that the market is not likely to be early affected by any early effort at refunding the debt. It has become quite common for large purchases to be made in December, in order to avoid assessment for personal property, the bonds being sold out at the opening of the year. The purchases of the New England cities on this account are quite important. These operations materially helped to strengthen the market, and the subsequent sale of the bonds has depressed it.

In the stock market there has been the depression, and the speculative excitement, usual in December. The locking up of currency, resorted to about the middle of the month, caused a considerable amount of stock to be thrown upon the market, with a general break down in prices, even upon stocks known to be held largely by strong cliques. New York Central declined 2¼; Lake Shore, 8; Rock Island, 8¼; North Western, 8½; Ohio and Mississippi, 5¼; Pacific Mail, 4¼; and Erie, 2¼.

Digitized by Google

The chief interest was in Union Pacific, which declined from 18¼ to 9.

The following table will show the opening, highest, lowest and closing prices of all the railway and miscellaneous securities sold at the New York Stock Exchange during the months of November and December, 1870:

The gold market has been remarkably steady, the price having ranged between 111¼ and 110¼. The excitement in the stock market diverted speculation from the Gold Room, which was probably a chief cause of the steadiness of the premium; the absence of any determining events in the war in France, and the regularity in United States bonds at London also helped to keep the market free from fluctuations. The Treasury sold during the month $4,000,000 of coin, and paid out $9,100,000 in interest, and received through custom duties about $7,992,000. The exports of specie for the five week ending Dec. 31, amounted to $2,920,000.

New Railroads.—The Chicago *Railway Review* furnishes the following interesting tables of the progress of each new Railway in 1870. The total is 4,933 miles, which proper corrections in New-York, and additions in the other Middle and New England States, the editor says, would make a grand total of 5,500 miles :

Railroads of the United States. — The *American Railroad Journal* gives the following figures showing the condition of Railroad progress in the United States, after premising that they have always told their readers that these summaries are only approximate.

The following tabulation shows the distribution of mileage and cost of railroads in the several States and Territories:

States and Territories.	Length in Miles—Total.	Length in Miles—Open.	Cost of road and equipment.
Maine	972.01	810.31	$36,341 901
New Hampshire	987.29	734.75	23,647,935
Vermont	658.41	618 41	32,466,594
Massachusetts	1,739.03	1,473.47	77,496,830
Rhode Island	135.80	135 80	4,805,996
Connecticut	977 57	728.75	34,976,334
	5,470 40	4,506.49	$199,658,090
New York	5,453 74	3 892.38	$334,049,545
New Jersey	1,241.30	1 091.80	74,525,196
Pennsylvania	6,312.96	5,056.06	296,732,037
Delaware & P. Maryland	588.54	390.14	10,059,092
Maryland (west)	840.34	495.49	34,732,367
West Virginia	711.75	374.15	30,493,730
	15,078.73	11,300.62	$680,589,976
Virginia	2,253.31	1,465.96	$53,386,658
North Carolina	1,574.17	1,178.17	33,164,293
South Carolina	1,488.17	1,188.67	32,663,588
Georgia	2,313.70	1,933.70	44,332,919
Florida	607.20	440.20	11,781,919
	8,186.55	6,155.70	$174,519,583
Alabama	2,120 00	1,396.00	$46 596,605
Mississippi	1,117.50	977.50	33,208,839

Arkansas	1,054.00	296.00	8,798,000
Tennessee	2,016.08	1,490.68	51,538,745
Kentucky	1,375.41	907.37	35,640,699
	12,699.29	6,201.35	$217,349,686
Ohio	4,800.97	3,688.09	$199,538,214
Michigan	2,992.36	1,788 36	75,817,748
Indiana	4,865 20	3,277.60	135,967,186
Illinois	8,818.35	5,423.10	237,553,000
Wisconsin	3,142.90	1,475.20	59,233,881
	24,614.08	15,547.35	$701,700,029
Missouri	4,573.42	2,140.13	$106,663,464
Kansas	3,698 00	1,501.09	56.723,700
Colorado	1,2 8 00	368.00	17,400,000
Iowa	4,472.25	2,550.25	111,978,000
Nebraska	1,505 00	588.00	39,200,000
Wyoming Territory	492.00	492.00	46,700,000
Minnesota	2,664.00	972.00	34,720,000
Dakota Territory	700 00	.....	300,000
Montana and Idaho Territories	600.00	.....	.....
	19,662 67	8,611.38	$413,785,164
California	3,293.60	996.60	$76,694,532
Nevada	1,493.60	593.00	60,000,000
Utah Territory	404 00	364.00	49,000,000
Oregon	2,648 50	159.50	6,100,000
Washington Territory	430.00	.....	.....
	8,259.10	2,113.10	$1 5,794,532
Grand Total	93,970.82	54,485.49	$2,675,536,102

Though this increase is less than in 1869 by 1,013.57 miles the results of this year, considering the drawbacks in consequence of the Franco-Prussian war, are eminently satisfactory, being an increase in mileage of 11.41 per cent, and in cost of 9.58 per cent. The average cost per mile of new road is $40,345. This is by no means an extravagant estimate, and is probably as nearly correct as can be ascertained. The largest increase has been in the States of Illinois, Iowa, Missouri and Kansas, where railroad construction has been stimulated to the utmost by town and county subscriptions in the form of bonds. In Alabama and Georgia the companies building railroads have been encouraged by State subsidies. The same encouragement has been granted in North Carolina, but in that State with little advantage. And yet with all the rapid development, especially in the great interior States, we are somewhat disappointed in the results exhibited in our survey. So much work had been planned, commenced and carried on, that a larger increase of mileage might reasonably have been anticipated. The difficulties in Europe, however, breaking out suddenly in the middle of the year, closed foreign markets against American bonds, and made it impossible for companies in general to negotiate their paper, or to carry forward intended or progressing works. Had peace been maintained we doubt not but that at least 10,000 miles of road would have been the compliment of the year 1870. The average cost of railroads in the United States, including the great overland lines, which cost more than $100,000 per mile or about 10 per cent of the total cost of railroads is $47,277 per mile. But few of the great trunk roads have cost less than $80,000 to $100,000 per mile; while in the South the cost of railroad build-

Digitized by Google

ing, notably in the Atlantic States, has not exceeded $20,000 to $25,000 per mile.

The progress of railroad construction in the United States since 1827, in which year the Granite Railroad at Quincy, Mass., was inaugurated to the present time is shown in the following table:

Year.	Miles open.	Yearly Increase.	Year.	Miles open.	Yearly Increase.
1827	3	....	1849	6,350	668
1828	3	....	1850	7,475	1,125

Milwaukee and St. Paul Railroad—Stock Increase.—The Company has notified the Stock Exchange that they intend to issue, about February 10, 4,000 shares of common stock, and the same amount of preferred, for the purpose of purchasing the Mason City & Minnesota Railroad, extending from Mason City on the main line of the Milwaukee & St. Paul, northerly to the Minnesota State line, a distance of about 29 miles, there connecting with the St. Paul line, formerly known as the Minnesota Central Railroad. This connection gives the company by the way of the Iowa Central Railroad and the North Missouri a complete connection by rail from St. Paul to St. Louis. In their notice to the Stock Exchange the Company say that after this issue has been made no more stock will be issued during the current year.

Completion of the Balt. & Ohio Railroad Bridge.—BALTIMORE, Md., Jan. 9.—The great iron railroad bridge over the Ohio River, at Parkersburg, West Va., connecting the Baltimore and Ohio, and Marietta and Cincinnati Railroads, was completed on Saturday last, and the first train passed over it. The bridge is ninety feet above low water mark, is over 4,000 feet long, and was built by the Baltimore and Ohio Railroad Company, at a cost of over a million of dollars. Since Saturday the regular freight and passenger trains, between Baltimore and Cincinnati and the West, have used the bridge, making the time from this city to Cincinnati about twenty-two hours.

Hannibal and St. Joseph Railroad.—A pamphlet of some seventy pages, in the form of a letter addressed to the Stockholders of this Company, has recently been issued by Mr. John Bailey of No. 3 Broad street in this city. Mr. Bailey criticises most severely the management of the road by its present officers and directors, and adduces figures in detail to prove his several statements. Whether or not the allegations may be correct in all particulars, they seem to be entitled to belief until contradicted or explained by some official statement, which it is fair to presume will soon be issued, if there is any satisfactory explanation to be given of the remarkable transactions to which Mr. Bailey's pamphlet calls attention.

The New York Midland Railroad.—[From the New York Standard.]—A recent article in these columns has maintained, against the volume of unwise and interested croaking, that the general condition of the railroads now building and in operation in this country, is noticeably promising and sound. It may be pertinent to particularize somewhat. The New York and Oswego Midland Railroad, by reason of its constitution, history and prospects, is calculated to defy the scrutiny and command the respect of the gentlemen who make it their business to misrepresent and depreciate American railroad stocks. The practical value of this railroad to the magnificent section of country which it traverses, and to the Metropolis in which it terminates, is very great, and could not easily be overstated. It brings New York City forty-five miles nearer Oswego and the great cities of the British Provinces, which are destined, at no long interval to be named among the United States. It shortens the distance from the Metropolis to Buffalo and the West by seventy miles. It taps the productive coal fields of the Delaware and Hudson Canal Company. It provides the great and fertile Midland counties with means of occupation and development never possessed before. By means of the Montclair Railroad, which, although closely joined in interest with the Midland, is itself an enterprise deserving special mention, a large section of the most picturesque and eligible portion of New Jersey is actually placed in more immediate and intimate relations with this city than the avennes in Brooklyn now occupied with the residences of New York merchants. These are some of the more obvious natural advantages of the New York and Oswego Midland road.

In the simplicity, economy and security of its financial basis we believe the Midland is unsurpassed by any railroad enterprise that can be named. The name of its President, Dewitt C. Littlejohn, is of itself a tower of strenght in the region of the Midland Counties, where he is best known for his shrewdness, pluck, public spirit, indomitable resolution and incorruptible personal integrity. The bonds are in the hands of Messrs. George Opdyke & Co., than which no financial house stands higher in reputation for substance, weight and honorable dealing. The bonds are issued in a definite proportion to the road actually completed, and certified thereto by the President and the Superintendent. The towns and cities which have lent their aid to this enterprise by subscribing, in their corporate capacity, $6,500,000 capital stock, are restrained by a legal enactment from disposing of the stock without the consent of a majority of the individual tax-payers. The trustees of the mortgage are Messrs. A. A. Low, George Opdyke, and Delos De Wolfe. Two hundred and twenty miles of the road are now completed and in operation, and making actual earnings more than enough to meet the current mortgage indebtedness. The grading for the entire road is nearly finished.

Here are assurances of the most tangible character that the year 1871 will witness the triumphant completion, upon a basis of the utmost financial security, of another great through route from the metropolis to the West. It is a road which will win from the start its share of the through traffic, which, vast as it now is, must inevitably increase immensely with the general prosperity and development of the country. It creates a lucrative way traffic, according to the evidence already furnished, as fast as it can be built. With these resources it will have to pay dividends on a capital stock of only $6,500,000, which is secured effectually from getting into the hands of speculators, or undergoing the processes of indefinite depletion which sometimes unsettles the values of railway securities.

These are the facts which authorize the assertion that no railroad proje similar magnitude could have been achieved with greater economy, discre tion or dispatch, or with more satisfactory guarantees of a large success.

We understand that $300,000 Midland Bonds have been sold since January 1.

—Attention is invited to the advertisement in another column of the Elizabethtown and Paducah Railroad first mortgage convertible 8 per cent. bonds. The Company have 53 miles of completed road in successful operation, and they are now receiving 4,000 tons of iron, which will complete the road to Greenville, 98 miles. The work on the western division is going forward vigorously, and it is confidently expected that the entire line will be nearly completed during the present year. The capital of the Company amounts to $3,095,000 ($320,000 cash stock and $2,775,000 city and county 7 per cent. bonds). Of this amount the city of Louisville subscribed $1,000,000, which had all been sold, netting the Company over $920,000 cash. Over $4,000,000 of the county bonds have been sold and used at good prices with the contractors. The proceeds of the first mortgage bonds of the Company are deposited in the United States Trust Company and paid out to the road on each mile as completed. The managers and directors of the road are among the best business men of Louisville.

—Attention is directed to the statement upon another page of Great Western (Marine) Insurance Company. This company has just declared a semi-annual dividend of six per cent in gold, and shows in its annual report assets amounting to $2,510,628 23, and a paid up capital of $1,651,400. The Great Western is well known among all shipping men as one of our leading underwriters, and counts among its directors a number of the most substantial men of New York.

—The Home Insurance Company shows on the first of January, 1871, a cash capital of $2,500,000, and assets of $4,578,008, against liabilities of $199,668. A dividend of five per cent (semi-annual) is paid.

—The friends of the Hope Fire Insurance Company will be happy to notice that it now declares a semi-annual dividend of five per cent. The Hope has an excellent list of directors and officers, and anticipates now an era of new prosperity.

—The Globe Fire Insurance Company, No. 176 Broadway, has declared a semi-annual dividend of six per cent.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank, Messrs. Clews, Habicht & Co., } London.
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Jan. 12, 1871.

The First Mortgage Bonds of the Central Pacific Railroad Company, at current market price, pay nearly Seven Per Cent. in Gold on their cost.

They can be purchased at from 15 to 20 per cent. less than Government Bonds.

They are secured upon a completed road worth four times their entire amount, thoroughly and honestly built, ably and wisely managed, and experiencing an almost unexampled success in its business and earnings.

The immense value of the property upon which they are a first lien, and the large and increasing revenues of the Company, render the security of the principal and the prompt and regular payment of the interest certain.

They are recognized in this country and Europe as among the standard securities of the world, whose safety and value are in no degree matters of conjecture or speculation, but are as well established as the Bonds of the United States Government. Having originally negotiated them, and knowing their superior character for safe investment, we have connected dealings in them

Digitized by Google

with our regular business in Government Securities, and are prepared to furnish them for new investment, or in exchange for 5-20 Bonds at current market rates.

We buy and sell Government Securities, Gold and Coupons, execute orders in miscellaneous Stocks and Bonds at the New York Stock Exchange, for cash, receive deposits subject to check at sight, and allow interest on balances, make collections and do a general Banking business.

FISK & HATCH.

The Bankers' Gazette.

FRIDAY EVENING, January 13, 1871.

The Money Market.—With the heavy disbursements on account of interest and dividends which have been made since the first of January, and with the cessation of artificial measures for making money stringent, the market has shown a steady tendency towards easier rates, and to-day the supply of loanable funds was abundant at 6 and 7 per cent. with exceptions at 5 per cent. on Government collaterals. Six per cent., however, has now been a fair quotable rate for several days, and renewals of contracts have generally been at this rate.

The last statement of the associated banks, issued on Saturday, January 7th, showed the following changes from the previous week, viz.: an increase of $2,160,609 in loans; an increase of $5,529,345 in specie; a decrease of $38,796 in circulation; an increase of $13,814,830 in deposits, and an increase of $3,786,052 in legal tenders. This statement showed very fully the disbursements and release of "locked up" funds above refered to, and as a result, that the banks were $5,871,389 stronger in their legal reserves, holding altogether $16,851,216 above the 25 per cent. required by law. The banks are now complaining of a glut of National bank notes.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Jan. 7, 1871.	Jan. 8. 1870.	Jan. 9, 1869.
Loans and discounts	$265,578,027	$253,475,453	$238,792,562
Specie	26,836,191	35,664,830	27,884,730
Circulation	32,114,718	34,132,280	34,34 ,156
Net deposits	202 089,825	190,169,262	187,908,539
Legal Tenders	49,031,410	48,537,734	51,141,128

For commercial paper there has been a much better demand in consequence of the prospects of an easier money market, the banks as well as private parties having been purchasers to some extent, but only of the best names. Paper is still very closely scrutinized, but on the best double names rates are decidedly better than for several previous weeks, and these have been sold as low as 7 per cent for 60 days' paper. Several failures have occurred both in Boston and New York, but they have not been of sufficient importance to disturb materially the market, and the report upon Mr. Oakes Ames' affairs, stating his assets at $3,395,807 over and above all liabilities, together with the consent of his creditors to a liberal extention of time has allayed the excitement arising from that quarter.

United States Bonds.—The course of the market has been steadily upward, with the exception of a slightly depressed feeling after the Government purchase of $1,000.000 on Wednesday, at which the offerings amounted to $3,234,000; since then, however, there has been a buoyant feeling, with more business done, and the dealings to-day, including some speculation, were probably larger than in any single day for some time past. This demand has been chiefly from investors, both corporations and individuals, who have been attracted by the comparatively low prices of governments to place their funds in these securities in preference to others of less safety, though paying a higher rate of interest. The recent steadiness in gold and the more remote prospect of re funding the five-twenties, have also had a certain effect in stimulating the demand. Beyond the re-investment of coupons, there seems to have been very little buying on foreign account. The advance during the week amounts to about 1 per cent.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Jan. 7.		Monday, Jan. 9.		Tuesday, Jan. 10.		Wednesd'y Jan. 11.		Thursday, Jan. 12.		Friday, Jan. 13.

* This is the price bid and asked, no *sale* was made at the Board.

State and Railroad Bonds.—The Southern State securities have generally been firmer and more active, with the principal dealings in Tennessees, South Carolinas, Virginias and Missouris. The bonds of Alabama will be favorably affected if the Legislature takes immediate action towards paying the interest upon the endorsed railroad bonds recently defaulted on their January interest. Quotations, as will be seen below, have been advanced materially on several of the bonds named above. For railroad bonds there has been a good demand, and considerable purchases of the old and well known bonds have been made at the board. Pacific railroad securities, however, have been the leading feature of the market. Central Pacifics have been strong and close at 90½. Union Pacifics have been feverish and excited with frequent fluctuations, closing this afternoon at 74½ for the firsts, 56¾ for the land grants, and 37½ @ 38½ for the incomes, showing a advance of from 2 to 3 per cent. on prices of last week. The chief question in regard to these bonds now seems to be as to the management of the property, and a meeting of the directors and large holders is to be held in Boston next week, when it is supposed some plan will be adopted for the better protection of the interests of stock and bond owners,—the public certainly has much confidence in the Union Pacific railroad under a good management.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Jan. 7.		Monday, Jan. 9.		Tuesday, Jan. 10.		Wednesd'y, Jan. 11.		Thursday, Jan. 12.		Friday, Jan. 13.

* This is the price bid and asked, no *sale* was made at the Board.

Railroad and Miscellaneous Stocks.—The stock market has been more active and buoyant than in any week for several months past. The prospects of an easy money market; the declaration of good semi-annual dividends on most of the leading lines, and the exhibition of a large traffic for the year 1870 have conspired to induce purchases both for investment and speculation. There has been little opposition to the upward tendency of the market, the operators for a decline in the latter part of December appearing now to be on the other side, though the advance in prices has caused the failure of several small houses who had sold stocks "short."

The earnings of leading lines, so far as reported for December, have been as follows:

	1870.	1869.	Inc.	Dec.
Central Pacific	$512,805	$467,659	$145,146	....
Chicago & Alton	881,598	840,850	48,747	....
Cleveland, Columbus, Cincinnati & Ind'p's.	284,156	256,272	27,884	....

Union Pacific	*482,838	716,828	....	233,990

* Approximate statements.

Lake Shore has declared a four per cent. dividend payable February 1, the books closing to-morrow; yesterday the stock was in active borrowing demand at high rates. The Milwaukee and St. Paul Company has notified the Stock Exchange that they will issue in thirty days 4,000 shares of Common and 4,000 of preferred stock; for the purpose of purchasing the Mason City and Minnesota Railroad. A connection which gives the Company by the way of the Iowa Central Railroad and the North Missouri a complete connection by rail from St. Paul to St. Louis. In their notice to the Stock Exchange the Company say that after this issue has been made no more stock will be issued during the current year.

Hannibal and St. Joseph stock has declined materially on the litigation which has been commenced against the company by a stockholder to compel the payment of cumulative dividends on the preferred stock. A pamphlet has also been issued by the same stockholder making statements derogatory to the management of the company and against the value of the common stock; the report just issued from the company's office refutes these allegations to some extent, but both the pamphlet and report are worth the examination of parties interested.

The Chicago and Northwestern Company has issued an exhibit of earnings and expenses for the six months from June 1 to November 30, showing a decrease in gross earnings of about $260,000, a decrease in expenses of $830,868, a consequent increase in *net earnings* of $571,063, and a surplus December 1, after payment of dividends, of $1,205,027. The chief decrease in expenses

Digitized by Google

as shown by this remarkable statement was made on engines, cars, building, track, fuel, and laborers and agents.

The Gold Market.—Firmness has been the most noticeable feature of the gold market, produced apparently by a legitimate mercantile demand, as there does not appear to have been anything of consequence done on speculation. The short interest in the market which was a supporting influence has been mostly covered. Rates for carrying have been various, ranging from 5, 6 and 7 early in the week, down as low as 3 yesterday and higher again to-day. On Thursday the Treasury sold $1,000,000, receiving bids for $3,091,000.

The following table will show the course of the gold premium each day of the past week:

	Quotations. Open-ing.	Low-est.	High-est.	Clos-ing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, Jan. 7	110¼	110¼	110¼	110¼	$27,528,000	$1,525,499	$1,725,020

		South American dollars	...par.

Foreign Exchange.—There has been a decided firmness in the market since our last report, and rates at the close to day are the highest of the week. This firmness has been produced rather by a scarcity of bills offering than by an unusually large demand, and the effect has been to bring up the prices of commercial and other bills within a small fraction of the best bankers' names. The exports of cotton for the week have been 96,700 bales, producing $5,967,000 in gold, against 38,589 bales in the some week last year, producing then $3,783,000 in gold, with cotton at 26c., and gold at 122.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.= March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

The Union Pacific Railroad.—The *N. Y. Daily Bulletin* in an article upon the affairs of this Company gives substantially the following: The total cost charged to the road is $106,245,000. Toward this amount, the United States Government contributed $26,915,000; next, the Company sold by subscription about $17,000,000 of First-Mortgage bonds, at prices ranging from 90 to par; realizing from these joint sources about $44,500,000, less discounts and the costs of marketing the loans. After this, came the resort to "pooling," for carrying on the construction. In the first operation of this character, the directors took from the Company $10,000,000 of first mortgage bonds, and $10,000,000 of Land Grant bonds, the former at 85 and the latter at 55. In a second pool, the directors took $10,000,000 of Income bonds receiving therewith an amount of stock stated by some to be equal to the amount of bonds, and by others said to have been double the amount—we think it almost certain that the latter version is the true one—the price for these bonds with stock attached being 80. In this way the Company disposed of $30,000,000 of bonds and $10,000,000 or $20,000,000 of stock, receiving therefor from the directors $22,000,000. The bonds thus taken were marketed as rapidly as possible, and at prices which, from the market quotations, show a large average profit.

It thus appears that for $84,000,000, or more probably $94,000,000 of securities issued by the road, the Company only received $66,000,000; and this was paid out for construction done at notoriously high prices. What became of the balance of $13,000,000 or $23,000,000 of stock we are not informed; nor does it in any way appear that any adequate value was rendered for it to the road. * * * In order to build other roads by a similar process, the larger holders of the securities have pledged their bonds and stocks, and upon margins which held out a strong temptation for other parties to attack the market for the securieties, either as a speculation, or for the purpose of getting control of the road. * * * The depreciation of the securities has exhausted the margins on the directors' loans, and they retain their stock and bonds only by the sufferance of their creditors. With their securities thus placed beyond their power, and with what other means they possess locked up in other speculations, they are unable to protect themselves. One who holds $6,000,000 of stock, has suspended, carrying with him several firms implicated in his speculations; and another who owns $5,400,000 stock, has suffered serious inconvenience through the price falling much below the figures at which he had hypothecated it; while three other directors, holding each $2,000,000, have been similar inconvenienced. These are the facts as to the operations and position of the directors, so far as we are able to learn from the best sources outside the "ring." * * * They have piled up a floating debt of about five millions of dollars, all of which matures within the next three months. A large proportion of this has been borrowed in the form of foreign exchange; but the whole is protected by collaterales. Among the securities hypothecated against this debt are $2,000,000 of Land Grant bonds; $2,000,000 of Income bonds; $300,000 of Colorado Central Railroad bonds, and $700,000 Omaha Bridge bonds. At the present market value of these securities, they fail to cover the loans by about one third of the principal. It is evident, therefore, that the worst crisis both for the directors and the Company has yet to come. The $1,358,000 bonds received from the Central Pacific Road have been already sold; and we are credibly informed that the Company has no available securities with which to strengthen its collaterals on floating loans, even if the lenders were disposed to extend them. It has, moreover, to provide for the maturing of $10,000,000 of Income bonds between 1872 and 1874.

Vermont Central.—The lease of the Rutland Railroad and its dependencies, for twenty years, by the Vermont Central Railroad, not only gives the latter Company substantial control of the entire railroad system of the State, but is an illustration of the modern tendency to concentration and consolidation in the management of our great corporations. The terms of the lease have not transpired, but whatever they are we have no doubt it will prove an advantage to both roads to be run in accord by one management, rather than in competition. The public, too, ought to be better served by the new arrangement, and we presume it will be.

—A special meeting of the stockholders of the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company, will be held in Cleveland, Ohio, on January 25, to vote upon a proposition to aid in the construction of and leasing a line of railroad between Springfield and Cincinnati, Ohio, and upon a contract with the Cincinnati, Sandusky and Cleveland Railroad Company for running and business arrangements.

☞ For other Railroad Items, see COMMERCIAL AND MISCELLANEOUS NEWS, on a previous page.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, January 13, 1871.

There has been a very considerable volume of business done during the past week, in leading staples, but the tone of the various markets, and the course of prices, have been unusually variable. Trade seems to have been freed to a great extent from general influences, and each article seems to be subject only to such considerations as have a direct bearing upon it. The weather has been quite severe, and the harbor obstructed with ice, but without producing much effect.

Cotton opened the week buoyant, but for some days has been depressed, closing strong at 15¼c. for Middling Upland. Breadstuffs have shown some strength on an export demand, and close firmer. Shipping extra State, $6 25@$6 50; new spring wheat, $1 45@$1 49; prime new mixed corn, 79c. Groceries have been drooping, except coffee, which has been in demand at full prices; sugars are ¼c. lower.

Fruits of all kinds have been doing rather better. Hay has advanced to $1 25 per 100 lbs. Hops have had a slow sale, and prices are weak.

The chief item of interest relating to East India goods is the sale at Boston, by auction, of 2,000 bales Manilla hemp at 9¾@10c., gold, sixty days, being a decided decline from previous nominal quotations.

Tobacco shows no new feature. The demand for Kentucky leaf continues good from cutters and dealers, and the sales of the week reach 700 hhds., of which but a small portion is for export. Prices are still reported as ranging from 8c. to 12c. for common to fine leaf, with lugs scarce and nominal at 7@8c. In seed leaf there is scarcely any stock to work upon, and the sales are limited to 124 cases Ohio at 17½@22c., for average lots, and 100 cases Connecticut wrappers, good to choice, 45@70c. Spanish tobacco shows more movemement, but at prices a shade easier; sales of 200 bales Havana at 85c.@$1, currency, duty paid; 75 bales Havana at 30c., gold, in bond, and 40 bales Yara, three cut, at $1 10@$1 12.

Petroleum has shown an upward tendency, which has restricted business. The product of the petroleum region of Pennsylvania for December was 15,214 bbls. per day, and the stock January 1 was 537,751 bbls. Oils have been fairly active, the business embracing a contract with the United States Government for 97,000 gallons lard oil, for May, June and July, at $1 25 per gallon. Naval stores have not been active, and rosins are weaker.

Provisions have improved pretty generally. There has been a speculative movement in pork, culminating in an advance of $1 a barrel, mess closing to day at $21@$21 25, at which sales of some 6,000 bbls. were made, on the spot, and for future delivery. The speculation is based on the belief that the increase in export and consumption is equal to the increased production, and that therefore the price must advance to $25 at least. Lard has also advanced, prime Western steam closing at 12½c., on the spot, and 12¾@12⅞c. for February and March, with large sales. Bacon is scarce and firmer at 10½c. for Western Cumberland, but the demand appears to be less pressing. The transactions in beef embrace 2,000 tcs. for Great Britain, at private prices. Dairy products are more steady, in view of the ravages of the cattle disease, and the finer qualities of butter and cheese are held for an advance.

Hides have continued to decline, and prime dry Buenos Ayres have sold at 25c., gold. Leather and skins quiet. Tallow has been active for export; 8¾@9c. for prime Texas and city. Whisky has been unsettled.

Wool has met with rather more inquiry.

Freights have declined; the speculation in breadstuffs and provisions limited the exports of those staples, and this with increasing room on the berth caused lower rates to be accepted. The close, however, is stronger, on the increased shipments, which various causes have produced. The engagements to Liverpool to day embraced wheat at 6¼d. (against 6d. yesterday,) flour 3s., and cotton at 5-16d.@5¼d., all by steam, with cotton by sail at 9-32d.@11-32d. Petroleum charters have been dull. Metals without feature of moment, except some large transactions in tin plates, early in the week.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, show the exports of leading articles of commerce from the port of New York since January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1.

COTTON.

FRIDAY, P. M., Jan. 13, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening Januray 13. From the figures thus obtained it appears that the total receipts for the seven days have reached 132,585 bales against 139,631 bales last week, 124,450 bales the previous week, and 130,210 bales three weeks since, making the total receipts since the first of September, 1870, 1,900,552 bales against 1,538,919 bales for the same period of 1869, showing an increase since September 1 this year of 361,633 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	44,593	38,715	Florida bales.	897	598
Mobile	15 546	11,347	North Carolina	1,634	808
Charleston	9,550	8,290	Virginia	11,879	6,109
Savannah	37,137	15,057			
Texas* (estimated)	10,000	5,636	Total receipts	132,585	86,947
Tennessee, &c	11,249	8,393	Increase this year	45,638	....

* The Galveston wires are down, so that we are compelled to estimate the Galveston movement.

The exports for the week ending this evening reach a total of 98,699 bales, of which 74,624 were to Great Britain, and 24,075 to the Continent, while the stocks at all the ports, as made up this evening, are now 549,615 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night

Week ending Jan. 13.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	32,726	12,578	45,304	17,392	206,398	160,892
Mobile	4,814	4,814	4,328	56,827	67,530
Charleston	1,214	2,295	3,509	245	25,675	26,110
Savannah	18,331	5,780	24,111	6,639	79,720	70,462
Texas* (estimated)	2,000		2,000		68,000	47,247
New York	15,699	1,792	17,491	7,225	88,000	65,187
Other ports	....	1,980	1,680	2,760	30,000	28,249
Total	74,624	24,075	98,699	88,589	549,615	461,677
Total since Sept. 1	927,178	160,904	1,088,083	787,409	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 36,035 bales, while the stocks to-night are 87,938 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Jan. 6, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Forign	Total.	North-ern Ports.	Stock.

Our market exhibited a somewhat better feeling the early part of the past week, with more doing. This was due to a favorable turn at Liverpool, and less free receipts at our ports during that period. As a result, on Saturday, the quotations remained unchanged, but the close was steady. Monday prices opened strong, with ⅛c. advance, but the movement through the day was small. Tuesday the market was strong at ⅛c. advance, with sales of 5,027 bales. Wednesday the receipts at the ports being more free, and Liverpool showing no tendency to advance further, there was less doing at ⅛c. decline, Thursday the quotations were unchanged, but the market was dull and heavy. And to-day, with the total receipts at the ports somewhat less than the estimates of two days since, the feeling is better again, and although there is no change in the quotations the close was firm 15¼c. for Middling Uplands, or an improvement of ¼c. since last Friday. There has been a marked scarcity during the week of good lots, suitable for American spinners' use, and they have been held rather above the market, not obtainable, except at full quotations. For future delivery the fluctuations during the week have been about ⅛c., and the close to-night shows an improvement since our last report of about ⅛@¼c., the closing rates being for January, 14¾; February, 15; March, 15 3-16; April, 15⅛. The total sales of this description for the week (including 3,900 bales free on board, but not including bales "Exchanged") have been 56,150 bales. For immediate delivery the total sales foot up this week 23,953 bales, including 2,127 bales to arrive, of which 5,718 bales were taken by spinners, 202 bales on speculation, 14,936 bales for export, and 3,097 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	13 @....	13¼@....	13⅛@....	13⅛@....
Good Ordinary	14¼@....	14⅜@....	14⅜@....	15 @....
Low Middling	14⅜@....	15 @....	15⅛@....	15½@....
Middling	15¼@....	15½@....	15⅝@....	16 @....
Good Middling	16 @....	16½@....	16⅛@....	16⅜@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling.
Saturday	2,641	12½@....	14¼@....	14⅝@....	15 @...
Monday	4,662	13 @....	14⅛@....	14⅜@....	15¼@ ...
Tuesday	5,027	13⅛@....	14⅜@....	14⅛@....	15⅜@. ..
Wednesday	3,514	13 @....	14¼@....	14⅜@....	15¼@....
Thursday	2,907	13 @....	14⅛@....	14⅜@....	15¼@....
Friday	4,202	13 @....	14¼@....	14⅜@..	15¼@....

For forward delivery the sales (including 3,900 free on board,) have reached during the week 56,150 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For January. bales.	cts.	For February. bales.	cts	bales	cts.	bales.	cts.
3,000	14 11-16	2,200	14¼	400 av. l. m. two days notice	15¼	800	15⅝

⅜c. " "	300 Jan. for 300 March	¼c. " "	200 Jan. for 200 Feb.

WEATHER REPORTS BY TELEGRAPH.—Our reports by telegraph to-night all show that for the season the weather has been unusually pleasant. From Augusta, Macon, Columbus, Ga., and Mobile, Selma, and Montgomery, Ala., it is stated to have been warm and dry all the week, the thermometer averaging 48 to 50 deg. At Memphis and Mobile it has been cloudy, but free from rain, while at Nashville it is reported as unusually pleasant.

Digitized by Google

VICKSBURG TO LIVERPOOL—NEW THROUGH ROUTE.—The steamer "Leo," of Murray's line, arrived on Friday morning from Savannah, with 55 bales of cotton, from Vicksburg direct—the connecting link between Montgomery and Selma being now completed, giving a through line of railroad from Vicksburg to Savannah. This cotton was shipped on board the steamship "Queen," of the National line, which sailed for Liverpool on Saturday, and will probably be landed in Liverpool inside of twenty days from the Mississippi river.

CONSUMPTIVE POWER OF GREAT BRITAIN.—Considerable discussion has arisen as to the extent of the consumptive power of Great Britain if every available spindle were employed. Of course the answer to this will, in a great measure, depend upon the relative fineness of the goods manufactured. For instance, England is doing a good portion of the spinning for the Continent, and much of it is of a coarse material. Former estimates of 35.2 lbs. per spindle may not, therefore, meet the present case. Nor can any exact figures be given of the present consumption; but a statement of the spindles employed in past years may furnish a basis for estimates. We therefore give the the following, showing the cotton factories of Great Britain in the years 1856, 1861 and 1868.

Cotton Factories of	No. of Factories 1856.	1861.	1868.	No. of Spinning Spindles— 1856.	1861.	1868.
England and Wales	2,046	2,715	2,405	25,819,000	28,352,100	30,478,000
Scotland	152	163	131	2,041,000	1,915,000	1,398,000
Ireland	12	9	13	151,000	120,000	124,000
Total	2,210	2,887	2,549	27,011,000	30,387,000	32,000,000

As it is calculated that heretofore it has taken 35.2 lbs. of cotton to keep the machinery at work, the total consumptive power of Great Britain in 1861 was equal to 1,069,628,823 lbs., which would be equal to 51,400 bales, of 400 lbs., weekly. The actual consumption of 1860 was 1,068,727,600 lbs.; thus the consumption of cotton in 1860 apparently employed every available spindle. In 1868 the spindles, as will be seen above, had increased to 32,000,000, which, on the same basis would be equal to a consumptive power of 54,000 bales per week, of 400 lbs. each. If we estimate that since 1868 there has been a further addition to the spindles of 10 per cent probably a fair estimate) the spinning capacity now (on goods of equal fineness) would reach about 59,000 bales per week, of the same weight.

GUNNY BAGS, BAGGING, &c.—The market for cloth still continues heavy and nominal; no lots are selling at any price. A small business is going on between jobbers and consumers, at 20@21c., currency. Bags have shown no movement since our last report, and remain nominally steady at 18¼c., currency. Hemp has declined under a forced sale of a lot arrived in Boston by the Mutlah. It was sold at auction: 500 bales brought 9¾c., and 1,500 bales, 10c., gold. Jute has at the close shown a fair trade, sales are 500 bales, to arrive, at 5c., 250 bales, on spot, at 5¼c, and 150 bales on private terms. Jute Butts are wanted and held firm, as the stock in the hands of manufacturers is said to be quite small; 1,000 bales sold, to arrive in Boston, at 3⅞c., gold.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1869:

	Week ending Jan. 13, 1871. Receipts.	Shipments.	Stock.	Week ending Jan 13, 1870. Receipts.	Shipments.	Stock.
Augusta	5,753	3,279	18,639	4,405	3,681	20,923
Columbus	3,054	2,459	12,870	1,867	1,189	16,134
Macon	3,710	2,491	14,915	1,762	2,331	18,077
Montgomery	3,418	4,025	12,083	1,122	2,072	16,328
Selma*	3,000	2,862	10,000	1,560	1,379	8,124
Memphis	16,106	16,863	38,151	10,581	9,696	21,143
Nashville	3,590	2,909	6,320	2,231	2,064	3,384
	38,631	34,888	112,978	23,828	22,412	104,113

* Our telegram from Selma states that the warehouses are overcrowded, and no report made of receipts and stock—we therefore estimate the movement at that point.

These totals show that the interior stocks have increased during the week 3,743 bales (being now 8,865 bales more than for the same period of last year), while the aggregate receipts are 14,803 bales more, and the shipments 12,476 bales more than for the corresponding period of 1869.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons. On account of the irregularity in the cable despatches, we are again without our figures for stock at and afloat for Liverpool, and we therefore for those items give the figures of last week:

	1871.	1870.
Stock in Liverpool.....bales.	520,000	366,000
Stock in London	63,000	122,240
Stock in Glasgow	800	250
Stock in Havre	51,409	68,700
Stock in Marseilles	6,750	3,700
Stock in Bremen	3,000	1,500
Stock rest of Continent	25,000	20,000
Afloat for Great Britain (American)	280,000	171,000
Afloat for France (American and Brazil)	....	68,500
Total Indian Cotton afloat for Europe	97,000	121,000
Stock in United States ports	549,615	461,677
Stock in inland towns	112,978	104,113
Total	1,709,552	1,508,680

These figures indicate an *increase* in the cotton in sight to-night of 200,872 bales compared with the same date of 1869.

The exports of cotton this week from New York show a decrease since last week, the total reaching 17,443 bales, against 18,718 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING Dec. 17.	Dec. 24.	Dec 31.	Jan. 7.	Total to date	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 85,057 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night. Below we give a list of the vessels in which these shipments from all ports, both North and South, have been made:

	Total bales.
NEW YORK—To Liverpool, per steamers Parthia, 2,254....Colorado, 3,210....Samaria, 1,248....City of Brussels, 1,167 .The Queen, 3,926....per ships Roselle, 1,479....Annie Fish, 2,489....N. F. Storer, 1,500	17,943
To Antwerp, per ship Elsinore, 200	200
NEW ORLEANS—To Liverpool, per ships Alex. McNeil, 3,153....Nunquam Dormio, 3,405 and 3 bags....Canada, 3,370....Melicete, 3,015....Augusta, 3,716....Royal Charlie, 2,853... per barks Woodside, 1,708....Avondale, 1,973	22,457
To Genoa, per bark F. Paraniello, 1,220	1,220
To Barcelona, per barks Maipo, 1,150....Maria, 1,217	2,367
MOBILE—To Liverpool, per steamship Australian, 3,509... per ships Wm. A Campbell, 4,262....British Lion, 2,951....per barks Eblana, 1,618....Sea Gem, 1, 538 ...per brig Giles Loring, 901....per schooner Lucy H. Gibson, 1,340	18,019
CHARLESTON—To Liverpool, per barks Virginia Dare, 140 Sea Island and 2,253 Upland....Blomidon, 21 Sea Island and 1,730 Upland ....per brig R B. Gove, 1,569 Upland	5,713
SAVANNAH—To Liverpool, per ships Merom, 3,563 Upland.... Lilla W., 1,452 Upland....Francis B. Cutting, 3,920 Upland and 6 Sea Island ....Belvidere, 4,003 Upland....per barks Douglas Castle, 2,011 Upland	15,954
To Amsterdam, per bark James Muir, 1,407	1,407
TEXAS—To Liverpool, per brig Clifton, 430	430
BALTIMORE—To Liverpool, per ship Araminta, 613	613
To Rotterdam, per ship Bavaria, 330....per brig J. Steele, 104	434
Total	85,057

The particulars of these shipments, arranged in our usual form, are as follows:

* The steamer Rita cleared from Charleston, Dec. 30, for Liverpool with 349 bags Sea Island and 2,311 bales Upland, which are not included in the above totals.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, Jan. 12—4:30 P. M.—The market has ruled dull to-day, with sales footing up 12,000 bales including 2,000 bales for export and speculation. The sales of the week, ending Jan. 6, were 50,000 bales, of which 7,000 bales were taken for export and 1,000 bales on speculation. The stock in port was 530,000 bales, of which 212,000 bales are American. The stock of cotton at sea bound to this port is estimated at 364,000 bales, of which 280,000 bales are American.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 110¾ and 111¼, and the close was 110¾. Foreign Exchange market continues dull and firm. The following were the last quotations: London bankers', long, 109¼@109½; short, 110, and Commercial, 108¾@109. Freights closed at ⅜d. by steam and ¼@5-16d. by sail to Liverpool.

EUROPEAN AND INDIAN COTTON MARKETS.—In reference to these markets, our correspondent in London, writing under the date of Dec. 24, states:

LIVERPOOL, Dec. 24.—The following are the prices of American Cotton:

Description.	Ord. & Mid	Fair & g'd fair	G'd & fair.	Same date 1869 Mid.	Fair.	Good.
Sea Island	12 15	17 -20	26 -45	21	23	30

BREADSTUFFS.

FRIDAY, P. M., January 13, 1871

The market the past week has shown considerable excitement, especially in flour and wheat, and prices have advanced, closing in fact at the highest figure yet paid for the new crop.

The receipts of flour have been quite moderate and there has been rather more export demand, notwithstanding the quotation from Liverpool was reduced to 26s. The demand was not only for Great Britain but the Continent, and was evidently caused by the requirements of the armies of the European belligerents. The improved export demand stimulated some speculation, and the home trade bought more freely; the lower grades of Western Extras and prime Winter Wheat experienced a decided improvement; in fact, good lines of baker's brands have sold at $6 60@6 75, which were recently a drug in the market at $6 10@6 25. Prices for favorite brands of Extra State are scarcely offered at all. To-day the market was stronger but somewhat unsettled; shippers would buy good lines of extra State at $6 25@6 35, but found no sellers to any extent under $6 40@6 50.

Wheat, notwithstanding the decline reported by cable, has been in good export demand at steadily advancing prices, buyers being favored by a decline of 1@2d. in ocean freights, and by firmer gold. Millers have also bought more freely, and there has been some speculation. To-day, with some improvement reported from Liverpool, and stocks here in process of rapid reduction, there was a fair degree of activity; seven boat loads, or about 54,000 bush., No. 2 Spring, sold for export at $1 45, in store, and $1 47@$1 48, delivered, mostly at $1 47; other descriptions of wheat very nearly nominal.

Corn has been very scarce, but the demand appears to be very limited. The Eastern States are being supplied, either from Baltimore or by direct shipments from the West; new mixed closed firm at 78@80c., delivered. Rye is held higher. Barley continues in demand and firm. Oats have ruled very dull, and prices close 2c. lower than quotations early in the week.

The following are the closing quotations:

Flour—			Wheat, Spring, bush	$1 45@ 1 49

GROCERIES.

FRIDAY EVENING, January 13, 1871.

As business adapts itself gradually to the new order of values under the modified import duties, the expectations of an increased volume of trade begin to be realized, and on all the leading articles embraced in this review, except Sugars, we find considerable animation for the week. The sales from first hands have in some instances been restricted by the very small amounts available, but jobbers have been unusually busy and in the majority of cases distributed their supplies as rapidly as they could be withdrawn from bond. Prices generally share greater uniformity and here and there much strength with an occasional advance. The withdrawals from bond have been accomplished in a comparatively easy manner, but some vexatious delays occurred in obtaining access to goods unfavorably stored in the over-crowded warehouses, and subsequently some difficulties were experienced in obtaining transportation to the interior owing to the large offerings.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	36,730 pkgs.	Laguayra	3,163 bags.	Sugar, Brazil	3,500 bags.
Green	22,410 pkgs.	Other	7,161 bags.	Manila, &c.	27,282 bags.
Japan	11,280 pkgs.	Sugar, Cuba	1,805 bxes.	M'las's, Cuba	257 hhds.
Various	15,963 pkgs.	Cuba	5,715*hhds.	Port o Rico	355*hhds.
Coffee, Rio	29,334 bags.	Porto Rico	*hhds.	Demerara	172*hhds.
Java	13,498 mats.	Other	1,086 hhds.	Other	40*hhds.
Maracaibo	8,963 bags.				

*Hhds. include bbls. and tcs. reduced.

Imports this week have included 1 cargo of tea, 12,587 bags Rio, and 3,584 bags of other sorts of coffee. Good receipts of sugar, including 17,744 bags of Manila, 4,500 bags Brazil, and 2,725 bags Java sugar, but the receipts of molasses have been small.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870.

TEA.

The volume of business is somewhat smaller than last week, not from any falling off in the demand, but simply because stock was not available; about all the available lots here or offered to arrive having been sold out, and many parcels over due failing to come to hand. Buyers are constantly to be found in the market and exhibit a gratifying amount of anxiety, some to such an extent as to put up with old stock after failing in their endeavors to secure new crops. All kinds are wanted and prices rule very strong and buoyant, though any distinction made should probably be in favor of Greens, some qualities of which show an actual advance. The call for lines has been good, but business somewhat restricted by the delay in getting parcels out of bonded warehouse. Sales of 14,550 packages Green; 1,525 pckgs. Souchong; 19,700 pckgs. Oolong; 3 900 pckgs. Japans.

Imports this week have included 281,135 lbs. Black, per "Ceres," from Amoy; and 748,585 do., per "Yangtsze," from Foo Chow.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	281,135	....	....	281,135

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been —— pkgs. since January 1, against —— last year.

COFFEE.

The market for Brazils has gained strength if anything, and the position is most encouraging for the selling interest. The stock not only here but at all the outposts is contracted to a remarkably small aggregate, with comparatively few cargoes immediately due; buyers are in constant attendance looking for desirable parcels, and everything seems to indicate that it merely requires a larger and better assorted offering to at once increase the volume of business. The demand is entirely from the regular trade, no speculative movements thus far being reported, and it is quite certain that current sales are going into actual consumption. Since our last further advices have been received from Rio Janeiro, reporting continued very fair movements on United States account, but the cost was further slightly increased, and this has helped stimulate our markets, values improving ¼c. gold, and closing firm at the advance. At the other leading coffee ports business has ruled dull for want of supplies, but markets in all cases reported firm. From first hands Java has not been sold with much freedom, but continues to be firmly held and jobbers are distributing freely with rather better rates obtained on choice selections. The leading styles of West India have met with an improved demand from the trade in view of their relative cheapness, and some pretty large movements have concentrated the bulk of the desirable supplies, on which an advance of ¼@1c. is now asked. There does not appear to be quite so many exporters looking for St. Domingo stock, but full former figures are as a rule asked. Jobbers in all cases are busy and in small lots a goodly amount of coffee is going out. The wholesale transactions embrace 15,401 bags Rio; 300 bags Bahia; 7,500 bags Maracaibo; 5,850 bags Laguayra; 150 bags Jamaica; 3,500 bags St. Domingo; 5,000 mats Java on Boston account. Sales at Baltimore of 1,570 bags Rio.

Imports of Rio this week have included the following cargoes: "St. Devenick," 5,000 bags; "Ida," 3,707 bags; and "Mars," 3,880 bags. Of other sorts the imports have included 3,218 bags St. Domingo, per steamer "City of Port au Prince," and 366 bags of sundries.

The stock of Rio Jan. 12, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.

* Includes mats, &c., reduced to bags. † Also, 38,795 mats

SUGAR.

The market for Raw Sugars is about the only one on which the expectations of an improving business with the opening of the new year have not been realized, the record of the past week obtaining a very slow condition of affairs and a further shrinkage in prices. The trade have been the principal buyers in attendance and taking merely such small lots as were required for momentary necessities though occasionally a refiner was forced to operate in order to keep machinery in motion. The greater number of our refiners, however, have found it unnecessary to appear, in view of their ability to withdraw goods from bond on December purchases about as fast as wanted, especially as their product sold slower and slower each day. Importers have in their possession a pretty dull stock for the season, and though refraining from urging business too persistently on a dull, weak market, were free sellers and gradually worked the cost down about ¼c. per lb. and evident desire gaining ground to get as many goods out of the way as possible before the appearance of the new crop which is now about due in quantities sufficient to have a decided influence, and recent advices indicate the probability of an ample supply for the season. Refined goods have been in fair demand, but void of any activity and prices slowly fell off on all grades in view of an increasing aggregate supply and a better assortment, and the attention given by buyers to the cheaper and in some instances fully as good lots of clarified Demerara. The general market closes without much life and unsettled. Sales of 1,940 hhds. Cuba; 150 hhds. Martinique; 601 hhds. Demerara; 419 hhds. New Orleans; and 6,473 boxes Havana.

Imports at New York, and stock in first hands, Jan. 12, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, bags.	Melado hhds.

MOLASSES.

We find no great change on the markets for foreign qualities and no fresh or interesting points to advise. Holders generally have opposed any further reduction in cost considering that the lower duties were fully discounted weeks ago, and to a certain extent the position is steady but in reality quotations can be little better than nominal at present in view of the small volume of trade. There has been a little call but only for small, unimportant lots, as a rule, and buyers do not show any inclination to depart from this system of operations; for the present. In domestic the arrivals have again been free, and the sale so slow that a great many parcels have been forced into store to await a market. Really nice prime and fancy stock did very well, but buyers appear to have become quite fastidious as to quality and force a lower range on any thing not first-class. Sales of 400 hhds. Cuba Muscovado; 100 hhds. Porto Rico: 100 hhds. Guadaloupe; 150 hhds. English Island, etc.; and 3,535 bbls. New Orleans,

SPICES.

In a wholesale way there is scarcely any regular market at present, not so much from want of a demand as from the absence of supplies, nearly everything worth handling having been previously secured by the trade. These lots, however, are not being distributed with great freedom by jobbers on sales made for delivery after January 1st, and whenever any odd parcels may be left over a fresh demand is ready to make a place for it. Under these circumstances but one position on prices is to be expected and a firm tone with here and there some buoyancy is general. Our quotations are again revised somewhat and may now be considered as approximating very closely to actual values.

FRUITS, &c.

The demand the past week has been rather lighter than for the two preceding. Still a very good trade has been done and the tone of the market generally is firm. The low prices current for most articles has led to increased consumption, and stocks have decreased rapidly. Raisins have met with a steady fair trade demand, but no especial activity or excitement can be noted, holders are firm, demanding $2 67½ for Layers. Currants on the spot are scarce and higher; to arrive, the movement continues fairly active, and a slight improvement in prices is quoted. Sales for the week foot up fully 3,000 bbls., to arrive, at 5c. gold and 8@8¼c. gold duty paid. Turkish Prunes have sold quite freely, those coming under our notice amount to about 400 casks at 9¾@9¾c., currency. Sardines have apparently awakened from their long continued inactivity and a considerable trade has been done in them at 17@17½c. gold for quarters, and 28@28½c. for halves. Nuts have been in only fair demand. Figs are rather quiet. Citron sells slowly, but is held firm at 89c.

Foreign Green meet with fair demand; the supply of lemons is still limited, and former high prices rule; one or two cargoes of Malagas have arrived since our last, most of which sold at private sale at $9 per box. The market is well supplied with Oranges, both in boxes and barrels, the demand is pretty good, however, and prices rule about as before. We quote box Oranges from store repacked or in good order at $2 75@3 25 per box; Valencia, $8 50@9 25 per case; Porto Rico per bbl, $7@8, and Havana, $6@7 per bbl. Baracoa Cocoanuts are in fair request at $40@45 per M. A cargo of Aspinwall Bananas has arrived since our last, and sell in lots at $2@2 50 per bunch for average lots, and $3 per bunch for large bunches.

Domestic Dried are firm for Apples, with a fair amount of trade doing in a small way. Receipts are quite moderate, and as the stock held here is not very large, holders have increased in firmness. A few small lots of Western have come to market, but are held above the views of buyers. The bulk of Southern common is held by one party here. Blackberries are again reported quiet, but still holders are firm and will not accept lower bids. Pared Peaches of prime quality still continue scarce; a few lots occasionally arrive here from Baltimore, most of which are sold by sample before they are shipped here. Unpeeled have met with a fair demand and remain very firm in price for both halves and quarters. Prime Dry Pitted Cherries are meeting with ready sale at good prices, but wet are 2@3c lower, and dull. Plums and Raspberries are in better supply. Peanuts have moved freely since the date of our last, and any decline that may have been at that time has been fully recovered, the market at the close being firm. Pecans also show a fair movement at steady prices.

Domestic Green have been active for Apples, especially Greenings, for the city trade. Baldwins and Spits have also met with a good demand, and at the advance noted in our last are very firm. Greenings and best red fruits bringing $3 50 per bbl. for wholesale lots, single bbls. $3 75@4; for poor lots, decayed, $1 50@2 50 per bbl. Cranberries continue in light demand, the trade do not seem to buy with any freedom, taking only such lots as they need for present demands. Canned goods meet with a fair demand, but as stocks are not unusually large, as was reported at the beginning of the season, prices rule comparatively steady at an advance from the opening of last fall. We give quotations for some of the most important articles; a small discount is usually made to the trade. Tomatoes, 2 lbs, $1 75@1 80 per dozen; 3 lbs, $2 25@2 40. Peaches, 2 lbs, $2 25@2 30; do. 3 lbs, $3 90@4 00. Corn, Eastern, $2 75; Baltimore, $3 50. Lobster, 1 lb., $2; 2 lbs., $3. Borden's Condensed Milk, 16 oz $3 90. Pineapple, 2 lb, $2 75; 3 lbs, $3 25 per dozen; and Peas, 2 lbs, $3 50@$4 per dozen.

THE DRY GOODS TRADE.

FRIDAY, P.M., January 13, 1871

The trade from first hands during the week has been active for this season of the year. The demand is almost wholly for domestic goods, and the bulk of the movements, exclusive of the woolen trade, are confined to staple and colored cottons. There are several Western jobbers in town who are purchasing these goods for their spring stocks, and the movements in this direction, as well as to the resident buyers for houses in the interior and to the city trade, aggregate a very satisfactory amount. There has been no great activity in the general trade as yet, but the movements are as great as is usual so early in the season, and the prospects for a good business during the Spring are thought to be very encouraging. Jobbers have had no trade as yet, but are receiving a few orders for small amounts of seasonable goods suited to the requirements of the current trade. It is thought that the ensuing season will open rather later than has been usual in former years, as the facilities for the rapid transportation of goods have increased to such an extent that retailers are likely to defer their purchases with a view to saving interest.

Reports from other cities are to the effect that there is but little wholesale trade doing, while retailers are fairly active for this season. Collections have been coming in freely from all points since the first of the month. Cincinnati advices state that the stoppage of navigation has delayed collections from the river towns somewhat, but on the whole there is still a decided improvement over the previous month. The few failures occuring here, in Boston and in Chicago, do not appear to have caused any excitement in the trade, nor to have affected the standing of first-class dry goods' paper in the discount market.

DOMESTIC COTTON GOODS.—There has been a comparitively good demand for brown and bleached cottons of all grades and especially for fine goods. The present production is so small in consequence of the limited supply of water in the manufacturing streams, that the stock of standard goods is very much reduced, while lower grades are in unusually small supply. Speedy relief, in an increased flow of water, is necessary to prevent a scarcity of goods during the coming season, and unless it be afforded general advance in prices is not improbable. This is already apparent in an advance of ¼c. per yard on some low grade brown cottons, and one or two brands of fine bleached goods, which has occurred during the week. Prints, too, have been advanced ¼c., and all brands of standard fancies are now selling at 11 cents. Lower grades will probably be advanced during the coming week. This advance is fully warranted by the present prices for cloths, which are very scarce, and still maintain an upward tendency. There are no changes of importance to note on colored cottons, beyond a a trifling decline on a few brands of denims and stripes, but prices are unsettled, and a more general revision is likely to be made.

DOMESTIC WOOLEN GOODS.—There is a moderate démand for light weight cloths and cassimeres, from first hands, but the trade is confined almost exclusively to medium and low grades, and the aggregate is a little greater than that of the previous week. Clothiers are the principal purchasers, thus far, though jobbers are purchasing fair amounts of the best goods offering. The commission houses offering desirable assortments of fine grades find ready sale for their goods, but as a majority of them are not prepared to show extensive stocks of this class of goods, the transactions are necessarily limited. Prices open about the same as at the beginning of the spring season last year.

FOREIGN GOODS.—This department of the market remains thoroughly quiet in all its branches. Dealers are busily preparing for the spring trade, though jobbers have not begun purchasing as yet. Importers are receiving moderate amounts of goods, and have large stocks in transit, which will arrive during the next two weeks. There has been a little inquiry for housekeeping linens, but the bulk of the business at the moment is in alpacas and Italians, for clothier's uses, and medium grades of light-weight woolens.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table:

	FROM NEW YORK.				FROM BOSTON
	Domestics.		Dry Goods.		Domestics.
	pkgs.	Val.	packages.	Val.	pkgs.

To Railroad COMPANIES.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices, for all descriptions of both AMERICAN and FOREIGN

Railroad Iron.

We are always in a position to furnish all sizes, patterns and weight of rail for both steam and horse roads, and in any quantities desired either for IMMEDIATE OR REMOTE delivery, at any port in the United States or Canada and always at the very lowest current market prices. Contracts will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign, and when desired, we will contract to supply roads with their monthly or yearly requirements.

Orders for Foreign Rails, will be taken for transmission by Mail or through the cable to our

LONDON HOUSE,

58 OLD BROAD STREET,

for execution at a fixed price in Sterling or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America and at the lowest possible rates of freights. Address

The Commercial and Financial Chronicle

Hunt's Merchants' Magazine,

A WEEKLY NEWSPAPER,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, JANUARY 21, 1871. NO. 291.

Advertisements.

Advertisements will be inserted at the following prices per line for each insertion:

If ordered less than 4 times			20 cents per line.
4 times or more			16 "
9	"		14 "
13	"		12 "
26	"		10 "
52	"		8 "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

The Trustees, in conformity to the charter of the Company, submit the following Statement of its affairs on the 31st December, 1869:

Premiums received on Marine Risks, from 1st January, 1869, to 31st December, 1869	**$6,080,897 89**
Premiums on Policies not marked off 1st January, 1869	**2,583,001 26**
Total amount of Marine Premiums	**$8,628,699 05**
No Policies have been issued upon Life Risks, nor upon Fire Risks disconnected with Marine Risks,	
Premiums marked off from 1st January, 1869, to 31st December, 1869	**$6,472,925 61**
Losses paid during the same period	**$3,303,345 46**
Returns of Premiums and Expenses	**$1,287,580 49**
The Company has the following Assets, viz:	
United States and State of New York Stock, City, Bank and other Stock	**$7,896,399 00**
Loans secured by Stocks and otherwise	**2,163,400 00**
Real Estate and Bonds and Mortgages	**210,000 00**
Interest and sundry Notes and Claims due the Company, estimated at	**207,598 81**
Premium Notes and Bills Receivable	**2,513,453 00**
Cash in Bank	**603,797 00**
Total amount of Assets	**$14,499,808 94**

Six per cent interest on the outstanding certificates of profits will be paid to the holders thereof, or their legal representatives, on and after Tuesday, the First of February next.

The outstanding certificates of the issue of 1866 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the First of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment and cancelled. Upon certificates which were issued (in red scrip) for gold premiums, such payment of interest and redemption will be in gold.

A dividend of FORTY Per Cent is declared on the net earned premiums of the Company, for the year ending 31st December, 1869, for which certificates will be issued on and after Tuesday, the Fifth of April next.

By order of the Board,

J. H. CHAPMAN, Secretary.

IN ANTICIPATION OF

The Re-opening of Paris

19 William Street, New York,

JANUARY 1, 1871.

All persons who have left baggage, personal effects or interrupted business in Paris, are hereby informed that if they will at once address our English house,

Bowles Bros. & Co.,

No. 449 Strand, Charing Cross,

LONDON,

with particulars and instructions, the same shall be forwarded or fulfilled immediately upon the re-establishment of communications.

The public is also notified that we are now prepared to again draw bills upon our Paris house, payable at 75 days from date, in case of delayed presentation, and discountable at bank rates by our house there or in London, at the option of the holders.

We will also charge ourselves with the receipt of money or letters to be conveyed to friends, either in or outside of Paris, in any part of France, which shall be as promptly delivered as circumstances may permit. These services are free to all, and not restricted to the clients of our own house.

As our house in Paris never has been closed during the siege, it is therefore in full practical operation for the recommencement of outside business without loss of time.

CITY OF BALTIMORE.

$1,200,000 SIX PER CENT BONDS

OF THE

Western Maryland Railroad Company,

ENDORSED BY THE

CITY OF BALTIMORE.

The undersigned Finance Committee of the WESTERN MARYLAND RAILROAD COMPANY having 30 years to run, principal and interest guaranteed by the City of Baltimore. This endorsement having been authorized by an act of the Legislature, and by ordinance of the City Council, was submitted to and ratified by an almost unanimous vote of the people. As an additional security the city has provided a Sinking Fund of $200,000 for the liquidation of this debt at maturity. An exhibit of the financial condition of the city shows that she has available and convertible assets more than sufficient to pay her entire indebtedness. To investors looking for absolute security, no loan offered in this market presents greater inducements. These Bonds are offered at 85½ and accrued interest. Coupons payable January and July.

WILLIAM KEYSER,
JOHN K. LONGWELL,
MOSES WIESENFELD,
Finance Committee

East Tennessee, Virginia & Georgia Railroad

1st MORTGAGE 7 PER CENT BONDS,

REDEEMABLE 1900,

Interest Payable 1st of January and 1st of July, in the City of New York.

THE MORTGAGE IS FOR **$3,500,000** ON A ROAD 270 miles long, which has been in successful operation for many years. The lien is about

$13,000

per mile, which makes it, with few exceptions, the smallest issued on any road in the United States. It was created for the sole purpose of paying off the debt due the State of Tennessee, amounting to

$4,117,761 10.

An examination into this security will prove it to be one of the best ever offered in the market.

For terms and further particulars, apply to

GALLATIN NATIONAL BANK

NO. 86 WALL STREET,

Agent for the sale of the Bonds.

FIRST MORTGAGE

BONDS

OF THE

Nashville & Decatur RR.

This Mortgage is for

$2,100,000,

or only $17,500 per mile on an old and completed road, showing an established business, from local traffic mainly, more than sufficient to pay its interest as it becomes due, with prospects of greatly enlarged receipts from new connections which are now in progress.

The Mortgage was created for the sole purpose of paying a debt due to the state of Tennesee on terms which would reduce the liability of the road about $600,000.

Of the bonds issued under said Mortgage $200,000 are held in Escrow to abide settlement of a claim of the United States; $300,000 have been purchased by the parties in interest, and the balance of $1,600,000 are offered for sale on favorable terms—the security, in judgment of the undersigned, being such as to entitle them to perfect confidence.

Drexel, Winthrop & Co.,

18 WALL STREET,

N. Y. Guaranty & Indemnity Co.,

52 BROADWAY & EXCHANGE COURT.

FOR SALE.

TOWN BONDS

Of the State of Illinois, bearing interest a FIVE and TEN per cent, for sale at 85 and interest for 8 per cent, 90 and interest for 10 per cent.

For particulars inquire of

PARKER & LAWRENCE,
BANKERS,
NO. 1 WALL STREET.

Financial.

MIDLAND BONDS

IN DENOMINATIONS OF

$100, $500 & $1,000.

THESE FAVORITE

SEVEN PER CENT GOLD BONDS

are secured by a first mortgage on the great Midland Railroad of New York, and their issue is strictly limited to $20,000 per mile of finished road, costing about $40,000 per mile. Entire length of road, 345 miles, of which 220 have been completed, and much progress made in grading the remainder.

RESOURCES OF THE COMPANY.

Full-paid stock subscriptions, about - - -	**$6,500,000**
Subscriptions to convertible Bonds, - - - -	**600,000**
Mortgage Bonds, $20,000 per mile on 345 miles -	**6,900,000**
Total - - - - -	**$14,000,000**

Equal to $40,000 per mile.

The road is built in the most thorough manner, and at the lowest attainable cost for cash.

The liberal subscriptions to the Convertible Bonds of the Company, added to its other resources, give the most encouraging assurance of the early completion of the road. The portion already finished, as will be seen by the following letter of the President of the Company, is doing a profitable local business

NEW YORK, Dec. 2, 1870.

Messrs. George Opdyke & Co., New York:

Gentlemen: Your favor of the 1st inst., asking for a statement of the last month's earnings of the New York and Oswego Midland Railroad, is at hand. I have not as yet received a report of the earnings for November.

The earnings for the month of October from all sources were $48,709 17, equal to $524 510 04 per annum on the 147 miles of road, viz.: Main Line from Sidney to Oswego, 125 miles; New Berlin Branch, 22 miles.

The road commenced to transport coal from Sidney, under a contract with the Delaware and Hudson Canal Company, in the latter part of November. The best informed on the subject estimate the quantity to be transported the first year at not less than 250,000 tons, while some estimate the quantity at 300,000 tons. This will yield an income of from $375,000 to $450,000 from coal alone on that part of the road.

Taking the lowest of these estimates, it gives for the 147 miles a total annual earnings of $899,510 04. The total operating expenses will not exceed fifty per cent, which leaves the net annual earnings $449,755 02, which is $214,755 02 in excess of interest of the bonds issued thereon.

I should add that the earnings from passengers and freight are steadily increasing, and that, too, without any through business to New York. Yours truly,

D. C. LITTLEJOHN, President
N. Y. and O. Midland Railroad Co.

The very favorable exhibit presented in the foregoing letter shows that this road, when finished, with its unequaled advantages for both local and through business, must prove to be one of the most profitable railroad enterprises in the United States, and that its First Mortgage Bonds constitute one of the safest and most inviting railroad securities ever offered to investors.

For sale, or exchanged for Governments and other current securities, by

GEORGE OPDYKE & Co.,

NO. 25 NASSAU STREET.

STATE OF ARKANSAS

7 PER CENT BONDS, ENDORSED BY THE

MEMPHIS & LITTLE ROCK RR. CO

For Sale at 70 and accrued interest, by

Swenson, Perkins & Co.,

80 BEAVER STREET.

THE STATE OF ARKANSAS issues its Bonds in aid of Railroads—ten thousand dollars per mile, for the payment thereof a special tax is collected annually for interest and sinking fund.

THE MEMPHIS AND LITTLE ROCK RAILROAD 133 miles long, is completed and in running order 120 miles. The unfinished section will be completed in December next.

R. C. BRINKLEY, Pres't.
Memphis and Little Rock RR

THE TREASURY AND THE CLIQUES.

As was suggested in THE CHRONICLE a month ago, the "tight money" men have been attempting further manœuvres notwithstanding the growing ease of the loan market. Some excited discussion has been evoked this week in Wall street by their late effort to lock up several millions of greenbacks, with a view to derange the money market, and thus to further certain ulterior designs in depressing quotations at the Stock Exchange. That these adventurous speculators have been foiled in their project is one of the gratifying results of the recent movement; but that they should have attempted it, and should have been so near to success, offers a significant comment on Mr. Boutwell's policy of locking up greenbacks and hoarding a large idle currency balance. From all that appears, the clique was able to obtain the co-operation of but one of our city banks; and this institution has accordingly been the recipient of warm, and, perhaps, deserved reproof. Several other banks are reported to have been solicited, and to have promptly refused their aid. It is of course to be wished that the Clearing House would positively determine to exclude from its Association any bank found guilty of connivance in operations of this questionable sort. But evidence is not easy to obtain; and if the speculators are debarred from one means of locking up currency, they have ingenuity enough to contrive some adequate substitute.

We regret to learn that this obvious duty is disputed in quarters where one would have least expected unsound views of banking to prevail. It is claimed by bank officers, who ought to know better, that they are justified in aiding their dealers in attempts to derange the money market. Their excuse is that every depositor has a legal right to withdraw greenbacks at will so long as his drafts do not exceed the sums standing to his credit. They also claim that the same depositor has an equal right to withhold these greenbacks from use, or to require the bank to keep them idle, on the plea that he may suddenly want to withdraw them, and that he wishes the bank to be ready to meet his draft if he chooses to make it. But what do these sophistical pleas amount to? It is well understood that in the case before us, they are a mere subterfuge. What these speculative depositors want is not the legitimate use of the greenbacks in paying the ordinary obligations of business. They simply want to avail themselves of the facilities which our banking system offers for deranging the monetary machinery of the country; and for their own gain they seek to disturb the affairs of multitudes of business men on whom monetary perturbations inflict heavy loss. The movement is really a conspiracy, a plot to convulse credit and to embarrass commerce by controling a large amount of the circulating currency by which the industrial machinery of the city is kept in easy movement, and free from mischievous friction. One of the most interesting illustrations of the financial economies secured by our modern monetary methods is found in the banking machinery with which these speculators are accused of tampering. Through the Clearing House six hundred millions of indebtedness has this week been paid by our banks to each other, with the use of less than twenty millions of actual money. It is easy, therefore, to see that if any large part of this twenty millions of currency should suddenly be withdrawn from its proper functions, some serious monetary spasms might result, if its place could not be readily supplied; and even in that case the proverbial timidity of capital would of necessity produce some perturbation which could scarcely fail to give trouble. It is on this principle that the objection is founded to the sudden locking up of currency in the Treasury. When any dealer at a bank, therefore, claims, with his friends' connivance, to draw out of bank a larger proportion of greenbacks than is usual in the ordinary course of business, he claims that which cannot be conceded without question and without danger. But when,

Digitized by Google

as in the case before us, the greenbacks so withdrawn reach to the amount of seven or eight millions, and are seized and locked up for the simple purpose of deranging and perturbing the monetary machinery, the benefits of which this man enjoys, in common with thousands of others, the absurdity of his claim to have a right to do all this is sufficiently apparent. Some of our bankers have found to their cost that they cannot afford to set this judgment of the people at defiance.

The failure of the schemes of the tight money men is due to several circumstances which this year have combined to ease up the loan market at an earlier period in the season than usual. The principal of these is connected with the large accumulation of capital at this centre. Had the tide of deposits and of currency set in from the interior a little later and with less force we should have doubtless had to record one of those short, sharp monetary spasms which were formerly so mischievous, but have of late been less frequent; and the probability of this is the stronger as Mr. Boutwell continues to accumulate currency in the Treasury and the speculators evidently rely on his indisposition to change his policy.

THE JUDICIARY COMMITTEE AND ITS FORTHCOMING REPORT.

Public opinion seems to have undergone some notable changes in regard to the Pacific railroad controversy during the past week or two, as is indicated by the tone of the discussions in the newspapers and of the doings in Congress. In regard to the latter, two announcements made yesterday are not unworthy of notice. First, the House Committee on Appropriations, it is said, are preparing a joint resolution directing Mr. Boutwell to continue, as usual, to pay the companies one-half of their charges for transporting the mails and military supplies of the Government. And secondly, an influential party in Congress are urging a compromise by which the companies shall agree to pay one-half of the interest as it accrues on the subsidy bonds, while the Government, on its part, shall send by railroad its whole supplies to the military posts instead of sending the larger part, as now, by water. These propositions suggest some interesting inquiries, upon which we cannot now enter. The only point of view in which they can here be considered, is as they show that public feeling is more alive to the "grievances," as they have been called, of the Pacific railroad companies. These complaints are under the investigation of the Judiciary Committee of the Senate, whose report on the subject will probably be offered to Congress early in February. Excluding minor matters, two points are specially urged before the Committee.

First, the railroad people complain that Mr. Boutwell has stopped the payment of monies due to them for transportation under their contracts with the Government. The amount withheld is small, amounting altogether, to some half a million of dollars. But the companies urge that it is a breach of contract; and that, so long as they faithfully perform all the conditions that contract imposes on them, the Government, on its part, is equally bound to good faith. One or two of the more zealous of the advocates of the Company have even gone so fer as to urge that the Government, having broken its faith, loses its right to the privileges secured by the contract; and that, while the Company would be justified in refusing to carry the mails, the Government has lost the right to foreclose the mortgage it holds as security for the performance of its stipulations by the railroad. Ignoring this extreme view, however, the Pacific Companies claim that half transportation charges shall be paid to the Companies in cash, the other half being reserved to form, with five per cent. on the net earnings, a fund for the ultimate payment of the principal and interest of the subsidy-bonds. It is in compliance with this demand on the part of the Companies that the House Committee on Appropriations is proposing to offer a joint resolution directing Mr. Boutwell to continue the custom of the department in regard to these payments, which has been in use, both by Mr. Boutwell and his predecessors, for more than six years, and, indeed, ever since the passage of the act of July 2d, 1864.

This resolution is well worthy of consideration, and in the interest, both of the railroads and of the Government, we trust that some satisfactory arrangement of the trouble will speedily be found. Some persons, it is true, object to the interposition of Congress. They think that, as the whole controversy touches the interpretation of a contract, it should be referred to the courts. To avoid, however, the delays and inconveniences of litigation, recourse should be had, if possible, to a more easy solution of the difficulty. We should, at any rate, protect the Government from the risk of placing itself in the wrong, and of surrendering the privileges, by refusing the conditions, of its existing contracts with the Pacific Railroad companies.

The second point referred to suggests a final complete compromise of the whole difficulty. The basis of settlement is two-fold. First, It provides that the companies shall repay promptly into the Government Treasury one-half of the amount paid as interest on the subsidy bonds, and that if the transportation charges do not cover the sum, it shall be made up in cash. Secondly, It provides that the Government shall send all its troops and munitions of war by the railroads, instead of sending part of them by water. This last point, in reality, is the most important in the whole controversy. The companies claim that if they had received, as they were promised, the whole carrying business of the Government across the plains, Mr. Boutwell would have so large a sum in his hands, that he would have made no complaints about the failure of the companies to pay the interest. The half charges for transportation, even at the low rates tariffed by the companies, would have reimbursed and fully paid the interest on the subsidy bonds, and would have left a probable surplus besides. How true this estimate may be we cannot tell. A recent resolution passed by the Senate calls for the facts, and till the reply is received we do not see that any action of Congress can be intelligently taken in the existing controversy.

The railroad companies, on their part, declare that they were promised the whole business of the government; that although they are compelled by law to keep up at large expense an equipment of engines and cars sufficient to do all this vast business, they have as yet been deprived of nine-tenths of it, and have only received one-tenth of the government transportation aside from the mails. They further point to the fact that under these disadvantages they have paid up, by the half charges for transportation, no less than $2,417,493, besides the moiety of their mail earnings. The whole subject will no doubt receive full discussion in the report of the Judiciary Committee, which will move the agitation one step further forward, if it does not, as is hoped, finally set the controversy at rest.

RAILROAD EARNINGS FOR THE MONTH OF DECEMBER AND FOR THE YEAR 1870.

For the month of December the principal roads make returns which compare favorably with the same month of 1869. It is too well known that the business of the country was not particularly brisk in that month, to suppose that the railroads have been doing anything more than the regular transportation work demanded by the mercantile commu-

Digitized by Google

nity, and we conclude that the earnings are but a fair average, uninfluenced by temporary causes. The Central Pacific shows an increase of $145,146; Chicago and Alton, $45,747; Cleveland, Columbus, Cincinnati and Indianapolis, $27,884; Cleveland and Pittsburg, $30,223; Illinois Central, $58,555; Milwaukee and St. Paul, $33,208; North Missouri, $52,131. Ohio and Mississippi shows a slight decrease of $4,425.

EARNINGS IN DECEMBER, 1870.

	1870.	1869.	Inc.	Dec.
Central Pacific	$612,895	$467,699	$145,146	....
Chicago & Alton	393,598	340,850	45,747	....
Cleveland, Columbus, Cincinnati & Ind'p's.	284,156	256,272	27,884	....
Cleveland & Pittsburg	212,979	182,756	30,223	....
Illinois Central	755,232	696,677	58,555	....
Marietta & Cincinnati	141,376	110,837	30,439	....
Michigan Central	423,755	374,542	49,193	....
Milwaukee & St. Paul	329,758	296,550	33,208	....
North Missouri	255,726	203,595	52,131	....
Ohio & Mississippi	260,471	264,896	....	4,425
Pacific of Missouri	271,207	236,108	35,099	....
St. Louis, Alton and Terre Haute	137,794	168,559	....	30,765
Toledo, Wabash & Western	*386,254	434,283	....	48,029
Union Pacific	*482,838	716,828	....	233,990

*Approximate statements.

For the whole year 1870 the earnings are now complete (except in those few instances where the last month has been reported only approximately), and the result of the year's operations may, therefore, be compared with those of its predecessors. Such a comparison shows that, so far as the gross earnings are concerned, the business of the year has been larger than in 1869, and very considerably larger than in 1868. It must be remembered, however, that the mileage of a number of the prominent lines has been increased during the year, and that the amount of earnings *per mile*, which is the better standard by which to estimate railroad earnings, may have been less, while the gross receipts were larger.

The increased number of miles operated by several prominent lines at the close of the year 1870 may be seen in the following table:

	December, 1870.	December, 1869.
Central Pacific	890 miles.	742 miles.
Chicago & Alton	465 "	481 "
Illinois Central	1,107 "	974 "
Milwaukee & St. Paul	1,018 "	936 "
Ohio & Missis ppi	393 "	340 "
St. Louis, Alton & Terre Haute	222 "	210 "

If the expenses of operating newly opened lines, or branches, were always equal to those of the older portion of a road, then the gross earnings should show an increase proportionate to the increased mileage, to place the Company in an equally good condition, but as the operating expenses on branches just opened, with few trains running, are frequently small, a proportionate increase in earnings is not to be expected. The actual results of the year's work on the roads named may be seen in the table following:

EARNINGS FOR THE WHOLE YEAR 1870.

	1870.	1869.	Inc.	Dec.
Central Pacific	$7,983,518	$5,749,595	$3,233,918	....
Chicago & Alton	4,831,739	4,681,562	150,177	....
Cleveland, Columbus, Cincinnati & Ind'ps	3,280,420	3,128,176	152,244	....
Illinois Central	8,851,492	8,821,799	29,693	....
Marietta & Cincinnati	1,418,865	1,292,490	26,375	....
Michigan Central	4,791,895	4,749,163	42,732	....
Milwaukee & St. Paul	8,120,427	7,148,436	971,991	....
North Missouri	2,833,489	2,024,852	808,647	....
Ohio & Mississippi	3,186,137	2,915,548	272,589	....
Pacific of Missouri	3,479,776	3,149,122	330,654	....
Toledo, Wabash & Western	4,426,429	4,252,385	174,094	....
Union Pacific	7,522,112	....	....	....
Total (not including Union Pacific)	$59,206,182	$48,013,188	$6,196,044	....

The prospect for the future would seem to be in favor of a steady increase in earnings upon all well located routes. The business of the country is increasing rapidly, particularly that trade between the interior and the seaboard, which necessitates a large increase in the demand for transportation. Should the growth of railroad traffic in the next ten years equal that of the past decade the most sanguine expectations may be entertained in regard to the prosperity of well managed lines.

Much has been said of late about the frequent increase of the capital stock of railroad companies in the shape of dividends to stockholders, sometimes to the extent of more than double the original capital and debt which represent the cost of construction. Mr. Rufus Hatch, a prominent stock broker in this city, has recently issued two circulars upon this subject, referring particularly to the route between New York and Chicago, embracing the New York Central and Hudson River, and Lake Shore and Michigan Southern roads.

Without endorsing the comments or conclusions contained in these circulars, we quote some of the figures, which may be of interest in this condensed form. In regard to New York Central and Hudson River, the following statement is made of the several additions or "waterings" made to the capital stocks since 1866, in the shape of distributions to stockholders for which no value was paid:

First Watering of Hudson River	$3,500,000	
First " of New York Central	23,036,000	
		$26,536,000
Second Watering of Hudson Rriver	13,623,800	
Second " of New York Central	8,524,400	22,148,200
Grand Total		$48,684,900

The present share capital of the consolidated roads, including the scrip dividend, is $90,000,000. The waterings of Mr. Vanderbilt, consequently, exceed the capital actually paid in, by $7,368,400!

The waterings in the line from Buffalo to Cleveland, a distance of 203 miles, equalled $13,379,000, or $65,906 per mile. The dividends upon this sum, at 8 per cent., amount to $1,070,320, or at the rate of $5,272, per mile, annually.

The waterings in the Cleveland and Toledo Railroad as already shown, amounted to $1,250,000. In addition to the above *specific* waterings, there was a *general* one, when the consolidation was entered into, to the extent of $5,440,670. The amount of the share capital and debts of the several companies, according to these reports, immediately preceding their consolidation, was as follows:

	Share Capital.	Debts.
Michigan Southern	$12,125,600	$8,876,581
Lake Shore	15,197,700	5,649,000
Buffalo and Erie	6,000,000	4,000,000
Total	$33,323,300	$18,525,581

The total stock and debt of these lines previous to the consolidation was $51,848,881. The consolidated capital was $35,000,000. The funded and floating debt of the company, as stated in its first annual report made after the consolidation, deducting leased roads, was $22,289,551. The two made an aggregate of $57,289,551. The total watering in the whole line, consequently, equalled $20,065,870, as follows:

Waterings in Cleveland, Painesville and Ashtabula	$6,597,000
" Buffalo and Erie	6,778,200
" Cleveland and Toledo	1,250,000
Excess of new capital account over old	5,440,670
	$20,065,870

"This was a year ago. The capital account of this company has since been increased to, probably, $65,000,000, as provision was made, by the terms of consolidation, for a bonded debt of $30,000,000. It is to be presumed that that amount has been wholly issued.

"As shown in the previous circular, the watering in the New York Central and Hudson River Railroad equalled $57,578,900. The watering in the Lake Shore added to this sum makes a total of $77,644,770. The dividends paid on this sum, at 8 per cent, equal $6,211,725 annually. The waterings equal $79,000 per mile, for the whole distance from New York to Chicago. The dividends paid equal $6,325, annually, per mile, for the whole distance.

"The present charge for transporting freight over the line equals, say, two and one-half cents per ton per mile. Of this sum one and one quarter cents per ton per mile represent cost of transportation, and one and one-quarter cents per ton per mile profits on capital. Admitting this rate of charge produces 8 per cent upon $100,000,000—the nominal cost of the road—then, *if dividends were to be declared upon cost only*—upon $85,000,000—the charge for the capital might be reduced very nearly one-half, or five-eighths of a cent, per ton per mile. In such case, the reduction per ton for the whole distance of 962 miles would be $6 14."

It is not necessary, in considering these statements, to concur at all in the purpose or spirit with which they have been issued; but, so far as they concern the all-important subjects of railroad transportation, or the possible value of railroad property, they are worthy of most serious consideration. An examination of the history of other prominent lines would show that a similar increase of the original capital, though to a less extent, has been made in a number of instances.

The New York Central Scrip Dividend.—WASHINGTON, Jan. 18.—The Finance Committee of the Senate had referred to it recently a communication from the Secretary of the Treasury, in answer to a call from the Senate, regarding the revenue assessment on the New York Central Railroad scrip dividend. The Committee to-day reported that the question at issue between the railroad and the Department was one for the courts alone, and asked to be discharged from its further consideration.

Indiana Improvement Bonds.—INDIANAPOLIS, Jan. 17.—The Senate, this afternoon, passed a resolution recognizing the validity of a few outstanding internal improvement bonds, and a resolution condemning the Wabash and Erie Canal claim.

Milwaukee & St. Paul.—The Company are now operating the following completed lines:

	Miles.		Miles.
Milwaukee to Prairie du Chien	193	Milwaukee to La Crosse	196
Milton to Monroe	12	Watertown to Madison	37
N. McGregor to St. Paul	212	Milwaukee to Portage	55
Mendota to Minneapolis	9	Horicon to Berlin & Winneconne	58
Canover to Decorah	10		
Calmar to Algona	126	Total	1,018
Mason City to Austin	40		

Palace sleeping cars are attached to all night trains from Milwaukee. The restaurant accommodations are excellent.—*Chicago Railway Review.*

RAILROADS OF MASSACHUSETTS.

We are indebted to the Railroad Commissioners of Massachusetts for a copy of their annual report upon the railroads of that State, prepared with the usual completeness and excellence of arrangement. The returns are for ten months only, ending September 30, 1870, as the termination of the year for which companies are to make their returns has been changed to that date.

¶ Rent for six months.

† Including interest and taxes. § In Massachusetts.

(1) In process of construction.

(2) The Berkshire Railroad and the Stockbridge and Pittsfield Railroad are leased to and operated by the Housatonic Railroad Company of Connecticut. The West Stockbridge Railroad is operated jointly by the Boston and Albany Railroad Company and the Housatonic Railroad Company.

(3) The assets of the Boston and Albany Railroad Company (omitted in the Report), are: Cash and loans, $1,600,096 49; stocks and bonds, $135,000 00; real estate and lands, $100,465 80; fuel and materials, $783,743 90; balances due from individuals and corporations, $118,082 42. Income expended in construction and equipment, $1,178,873 91.

(4) No statement of the financial condition of the Boston, Hartford and Erie Railroad Company was made in the Report.

(5) The Danvers Railroad and the Newburyport Railroad are leased to and operated by the Boston and Maine Railroad Company, and the details are included in the Report of that Company.

(6) The Dorchester and Milton Railroad and Easton Branch Railroad are operated by the Old Colony and Newport Railway Company.

(7) The Fairhaven Branch is owned and operated by the New Bedford and Taunton Railroad Company.

(8) The "doings during the ten months" of the Hartford and New Haven Railroad Company embrace only that part of the road which is in Massachusetts. The income, expenditures, &c., are for the whole road.

(9) The Horn Pond Branch, Lowell and Lawrence, and Salem and Lowell Railroads are operated by the Boston and Lowell Railroad Company.

(10) The Mansfield and Framingham Railroad is operated by the Boston, Clinton and Fitchburg Railroad Company. The "doings" of this road are for five months.

(11) The Norwich and Worcester Railroad is leased to and operated by the Boston, Hartford and Erie Railroad Company.

(12) The Pittsfield and North Adams Railroad is operated by the Boston and Albany Railroad Company.

(13) The South Reading Branch Railroad is operated by the Eastern R.R. Co.

(14) The Stony Brook Railroad is operated by the Nashua and Lowell Railroad Company.

(15) The Stoughton Branch Railroad is operated by the Boston and Providence Railroad Company.

NOTE.—Wherever the returns are made in conformity with the blank form provided by law (every description of taxes being reported under No. 127, and interest paid under No. 187), the net income and dividends of this abstract will agree with the printed report of the company, and not otherwise.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks for the week ending Jan. 19, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

Location.	Name of Bank.	Redeeming Agent.
Iowa—Ottumwa	The Iowa National Bank (new bank),	The Union National Bank of Chicago, approved.
Ohio—Batavia	The First National Bank	The American National Bank of New York approved in addition to the Fourth Nat. Bank of Cincinnati, O.
Wisconsin—Oshkosh	The Commercial National Bank	The National Park Bank of New York approved in addition to the Second Nat. Bank of Chicago.
Virginia—Charlottsville	The Citizens Nat'l Bank (new Bank),	The Importers' and Traders' National Bank of New York approved.
Massachusetts—Fairhaven	The National Bank of Fairhaven	The Ninth National Bank of New York approved in place of the Fourth Nat. Bank of New York.
North Carolina—Fayetteville	The Fayetteville National Bank (New Bank)	The National Park Bank of New York approved.

New National Banks.

List of National Banks organized during the week:

Official No.

1764—The First National Bank of Mason, Michigan. Authorized capital, $50,000; paid in capital, $40,000. Minos McRobert, President; Henry L. Henderson, Cashier. Authorized to commence business January 13, 1871.

1765—The Central National Bank of Columbia, S. C. Authorized capital, $100,000; paid in capital, $50,000. John B. Palmer, President; A. G. Brenizer, Cashier. Authorized to commence business January 18, 1871.

1766—The Citizens National Bank of Raleigh, N. C. Authorized capital, $100,000; paid in capital, $50,000. Wm. E. Anderson, President; Philip A. Wiley, Cashier. Authorized to commence business January 13, 1871.

1767—The First National Bank of Springfield, Ky. Authorized capital, $150,000; paid in capital, $75,000. E. L. Davison, President; Chas R. McElroy, Cashier. Authorized to commence business January 14, 1871.

1768—The First National Bank of Saginaw, Mich. Authorized capital, $100,000; paid in capital, $50,000; Jos. E. Shaw, President; Smith Palmer, Cashier. Authorized to commence business January 16, 1871.

1769—The Commercial National Bank of Petersburg, Va. Authorized capital, $120,000; paid in capital, $60,000. Reuben Ragland, President; Carter R. Bishop, Cashier. Authorized to commence business January 16, 1871.

1770—The Boone County National Bank of Columbia, Mo. Authorized capital, $100,000; paid in capital, $100,000. R. B. Price, President; J. O. Hockoday, Cashier. Authorized to commence business January 17, 1871.

1771—The First National Bank of Boscobel, Wis. Authorized capital, $50,000; paid in capital, $32,000. Dwight T. Parker, President; Herman A. Meyer, Cashier. Authorized to commence business January 17, 1871.

1773—The First National Bank of Seneca, Ill. Authorized capital, $50,000; paid in capital, $50,000. Samuel Holderman, President; A. Spencer, Cashier. Authorized to commence business January 19, 1871.

Latest Monetary and Commercial English News

[From our own Correspondent.]

LONDON, Saturday, January 6, 1870.

The community seems to be in a state of suspense awaitig further news from Paris. The surrender of Mont Avron was certainly discouraging to those who held sanguine views with regard to the future and ultimate success of the French arms. The severity of the weather has also brought unparalled trials on the besieged Parisians, and the latest accounts from the city mention that the privations have been very severe. But yet it is one of the marvels of a remarkable war, that so populous a city as Paris should have held out for four months, during which time no provisions of any kind have entered it. It is now said that the city cannot hold out beyond the twentieth, or the close of the month at the latest; but such a conjecture, should it prove to be correct, cannot deserve much commendation, for Paris, by the end of the month, will have withstood the investment for nearly five months—a duration of time for which no one could have given the Parisians credit in September last. The French, in their adversity, are unquestionably proving themselves to be a great people. They have met with grave disasters, but these only be attributed to the want of energy and talent amongst the Generals of the Empire, for, since the surrender of the Imperial forces, Republican France has caused more anxiety to the German leaders at Verseilles than did the tactics of Napoleon's Generals on the Rhine. At the present time the German leaders seem to content themselves with covering their forces now besieging Paris, so as to ensure the speedy fall of the capital. All the efforts made by the French to relieve it have been unsuccessful, but there are indications that large forces are again advancing for that purpose. The weather, however, although much less severe, is very adverse to military operations, and, no doubt, the sufferings on both sides are very great. But the French cannot afford to lose time, for, at Paris, time is fighting for the Germans against the French, the supreme objects of the belligerents being in the one case to starve Paris into submission, and, in the other, to force provisions into the place. As matters stand, at present, the prospect is decidedly favorable to German success.

It is too much to be feared that the Prussian leaders, and the king especially, are fighting with the supreme object of humiliating France, and against the republic, which has been temporarily established. It has been foreseen that the effect of a free and popular government in France would be distasteful to conservative Germany, that is to say not to the German people, who certainly deserve, and may some day aspire to greater liberty, but to the sovereigns, who, according to their own notions, rule by Divine Right, and who are incapable, therefore, of doing wrong. There are no countries where liberty is so much prized, and where so much liberty exists, as Great Britain and the United States, and these are the most prosperous in the world, and the least disposed to go to war. It is but natural, therefore, when, by the acts of a few men, almost countless beings, laborers in the field of industry, and who should have added something to the prosperity and happiness of the world, are slaughtered because the failure of some intrigues should have irritated the feelings of a dynasty whose popularity was failing fast, that a change of feeling with regard to the government of nations should result by which ministers may become more responsible to the country, and by which they are quietly removed from office when they are acting contrary to the national wish.

Several branches of trade continue to prosper, and, taken altogether, there is nothing to find fault with with regard to our commercial position. It is asserted by some, however, that the return of peace will not bring about that increase of annimation in mercantile affairs which others anticipate. The war, as has already been remarked, appears to have directed much trade to this country, and it is assumed that at its conclusion trade will resume its old channels. But it may be contended that such a movement would not be immediate. The industries of France would still be paralyzed, the wants of the people would be very great, and every effort would have to be made to supply those which were the most urgent. The French people, in their manufacturing districts, would unquestionably be very active, and the mills and manufactories would be working to their full extent, but it is doubtful if these could supply all that would be immediately necessary. In due time, however, and possibly more rapidly than most persons expect, France will resume her old position as a great mercantile country, unless the terms of peace which she concludes are too humiliating and irritating to her. The following relates to the trade of Manchester:

This market re-opened on Tuesday with a very steady tone, and the quotations of the previous week were adhered to. As the week advanced prices have become gradually easier, and both spinners and manufacturers have shown more desire to sell. This has not arisen from any urgent necessity on the part of producers to make sales, but from the fact of cotton being cheaper, and a desire on their part to extend existing contracts. So far, this disposition to sell has not brought about much business, as buyers had already bought heavily; and, before entering into fresh transactions, they wish to have some inducements in the way of price. The change of wind has brought in large supplies of cotton, the week's imports amounting to 182,000 bales, a large portion of which is American. There is nothing very extraordinary in this import, as many cotton laden vessels have been windbound in the Channel for some time. There is really no more cotton than there was, as it is only shifted from the sea to the port. The arrivals, however, have made one fact very transparent, and that is that cotton is very weakly held, and that it has to be converted into money as soon as it arrives. Probably also a good deal is arriving on spinners' account. This is either forwarded to them direct, and thus stops their buying in Liverpool, or if the quality does not suit it is at once put on the market for sale. There is still a steady inquiry for both yarn and goods, and to all appearances a large business will be done so soon as buyers think the bottom has been reached. Naturally they will desire to average the value of their shipments, but another decline in values is not likely to facilitate the profitable sales of recent exports. The continental buyers still keep very much out of the market, as it will still take several days of consecutive thaw to reopen navigation, and for lack of means of transit goods have accumulated in a confused mass at the few ports which have remained open.

The imports and exports of cotton into and from the United Kingdom, from September to January 5, compared with the corresponding period last season has been as given below:

	1870–1.		1869–70.	
	Imports.	Exports.	Imports.	Exports.
American.....bales	543,098	61,528	255,257	40,489
Brazilian	124 722	17,538	170,431	23,130
East Indian	519,900	206,799	712,561	238,109
Egyptian	90,966	2,437	73,469	1,855
Miscellaneous	189,560	3,168	49,998	5,885
Total	1,418,096	291,470	1,291,718	309,418

The wool trade is firm, and the Belgian and German demand continues to rule moderately active.

A large business is passing in tea, and the sales of the better qualities imported this season have resulted in a very handsome profit to those interested.

Now that the year has been fairly passed, and that the bills maturing on the first "fourth" of the new year have been met, the demand for money has perceptibly declined. At the same time, by the payment of the dividends on several home and foreign stocks, the supply of money seeking employment is increasing, and may, as the year progresses, be expected to be further enlarged. The rates of discount have therefore declined, and in the open market the best short-dated bills are taken at ¼ per cent. beneath the official minimum. Some still expect a reduction in the official minimum to 2 per cent., but in the uncertainty prevailing in reference to the future, and with the possibility of peace, the Bank authorities may probably be disposed to remain content with the present quotation. As our trade is of a quiet, legitimate character, it is not expected that it will exert more than the ordinary influence on the money market. The following are the quotations:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	2½@..	4 months' ba'k bills	3½@3¾	2½@2¾
Open-market rates:			6 months' ba'k bills	3¾@3¾	3 @3¼
30 and 60 days' bills	2¾@2¾	2½@..	4 and 6 trade bills..	4 @4½	3½@4
3 months bills	2¾@2¾	2½@..			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	3	1½
Discount houses at call	3	1½
Discount houses with 7 days' notice	2½	1½
Discount houses with 14 days' notice	2½	1½

Money on the continent has not materially changed in value during the week. The following are the quotations at the leading cities:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2	—	Brussels	2½	3½	2½	3¼
Vienna	5	6	5	5	Madrid	5	5	5	5
Berlin	5	5	5	4	Hamburg	—	—	3½	4¼
Frankfort	4	4	3¼	3½	St. Peters burg	6	8	6	7
Amst'rd'm	5	4	5	3½					
Turin	5	6	5	6					

In the foreign exchanges no material variations have taken place. About an average demand is experienced. French bank notes are sold at 25f. 15c. Gold is in demand for export, and some considerable supplies have been recently sent away. In the silver market there is no fresh feature. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley and Blake

GOLD

			s.	d.		s.	d.
Bar Gold	per oz.	standard.	77	9	@	—	—

Some delay has been experienced in the payment of the coupons on several foreign loans. The most notable case, as might have

Digitized by Google

been expected, is that of the Turkish debt, but it is now known that the interest will be paid as early as possible.

The stock market have been very quiet, but as regards home stocks there has been continued firmness. British railway shares continue to attract attention, and bank shares are firmer, owing to the circumstance that some favorable dividends have been declared for the past half year. Continental Government stocks have been dull, owing to the delay in the payment of the dividends and to the uncertainty of the political affairs in Europe. North and South American Government stocks are, with a few exceptions, firm. The following figures show the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'ay.	Thu'ay	Friday.	Sat'day.
Consols	Holiday.	92 -92¼	92 -92¼	92 -92¼	92 -92¼	....-....

Owing to the continuance of severe weather the corn trade was firm in the early part of the week, and prices were generally somewhat higher. The return of mild weather, however, had led to renewed caution on the part of buyers, and the trade closes very slowly, without change in prices. Annexed is a return showing the imports and exports of cereal produce into and from the United Kingdom during last week, and since the commencement of the season, compared with the corresponding periods in 1869:

FOR THE WEEK ENDING DEC. 31.

	1870. Imports.	1870. Exports.	1869. Imports.	1869. Exports

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase both in dry goods, and in general merchandise. The total imports amount to $5,640,792 this week against $3,927,254 last week and $5,124,396 the previous week. The exports are $4,607,757 this week against $4,774,187 last week and $4,187,739 the previous week. The exports of cotton the past week were 16,825 bales against 17 443 bales last week. The following are the imports at New York for week ending (for dry goods) Jan. 13, and for the week ending (for general merchandise) Jan. 14:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,541,326	$1,369,336	$1,571,194	$1,811,342
General merchandise	2,046,165	4,379,002	2,786,324	3,829,450
Total for the week	$3,587,491	$5,748,338	$4,357,518	$5,640,792
Previously reported	3,456,063	3,537,513	4,5[illegible]2,595	3,927,254
Since Jan 1	$7,043,554	$9,285,851	$9,910,413	$9,568,046

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending Jan. 17.

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$3,678,601	$2,683,096	$3,462,772	$4,607,757
Previously reported	6,412,780	5,302,920	5,693,272	8,961,926
Since Jan. 1	$10,091,381	$7,991,016	$8,156,050	$13,569,683

The value of exports from this port to different countries (exclusive of specie) since January 1, compared with the corresponding time of last year, is shown in the following table:

To	Since Jan. 1, 1871.	Same time 1870.
Great Britain	$8,467,205	$4,158,866
France	631,710	169,481
Holland and Belgium	724,845	320,614
Germany	988,022	780,996
Other Northern Europe	24,318	22,399
Spain	78,578	85,675
Other Southern Europe	418,804	449,715
East Indies	.....	.....
China and Japan	5,710	5,850
Australia	121,980	178,896
British N A Colonies	113,291	57,963
Cuba	581,736	587,013
Hayti	135,627	54,856
Other West Indies	328,932	434,047
Mexico	63,651	149,346
New Granada	126,855	115,036
Venezuela	26,315	90,264
British Guiana	23,987	70,496
Brazil	122,877	2[illegible]6,219
Other S. American ports	286,004	226,319
All other ports	210,610	55,432

The following will show the exports of specie from the port of New York for the week ending Jan. 14, 1871:

Jan. 11.—St. Algeria, Liverpool—		Jan. 14.—St. City of Washington, Liverpool—	
Silver bars	$62,395	Gold bars	$60,470
Jan. 12.—St. Calabria, Liverpool—		Silver bars	311,503
Silver bars	20,000	British gold	5,000
Gold bars	30,000		
Total for the week			$495,373
Previously reported			481,997
Total since Jan. 1, 1871			$977,370
Same time in 1870	$716,593	Same time in 1867	1,682,340
1869	745,628	1866	1,192,530
1868	5,537,400	1865	1,640,604

The following shows the imports of specie at this port during the past week:

Digitized by Google

Jan. 11.—St. Henry Chauncey, Aspinwall—		Cuidad, Bolivar—	
Silver	$12,350	Silver	$394
Gold	500	Jan. 14.—St. Morro Castle, Havana—	
Jan. 11.—Brig Angostura		Gold	3,091
To'al for the week			$46,335
Previously reported			33,610
Total since Jan. 1, 1871			$79,945
Same time in 1870	$263,782	Same time in 1869	58,972
		1868	8 39
		1867	91,773

FOREIGN IMPORTS (OTHER THAN DRY GOODS AND SPECIE) AT THE PORT OF NEW YORK FOR THE YEAR 1870.—Below we give the detailed statement of Imports at New York (other than dry goods and specie) for 1870. The figures for 1869 will be found in THE CHRONICLE of Jan. 15, 1870, page 74. The quantity is given in packages when not otherwise specified.

	Quantity.	Value.

Mobile City Bonds.—In regard to the default in payment of January interest by the city of Mobile, an officer of the Southern Bank of Alabama, where the interest is paid writes, "the city is not paying its coupons now, but the authorities are endeavoring to make loans to meet the coupons due 1st instant. The new city government have just been installed and find the Treasury empty.

NEW LOANS.

The following statement shows briefly the character, terms and circumstances of every new loan now offered in the New York market:

State of Arkansas Bonds.—Seven per cent. bonds, endorsed by the Memphis & Little Rock Railroad Company. The State of Arkansas issues its bonds in aid of Railroads—ten thousand dollars per mile, for the payment thereof a special tax is collected annually for interest and sinking fund. The Memphis and Little Rock Railroad 133 miles long, is completed and in running order 120 miles. The unfinished section completed in December For sale at 70 and accrued interest, by Swenson, Perkins & Co., 80 Beaver street. For further particulars see advertisement.

Burlington, Cedar Rapids and Minnesota Railway Co.—This is a first mortgage of $6,000,000 upon 330 miles of railroad, between Burlington on the Mississippi River and Mankato in the State of Minnesota, at the rate of $20,000 to the mile, the mortgage covering also the Depot grounds, rolling stock, equipment and franchises of the Company. The road is arranged in three divisions—the first extending from Burlington to Cedar Rapids, a distance of 100 miles; the second, from Cedar Rapids to the State line, being 170 miles, and the third from the State line to Mankato, 60 miles. This road will therefore form, with the Minnesota Valley Road, and the Rockford, Rock Island and St. Louis Road, a direct and nearly straight line from St. Paul to St. Louis, a total distance of about 580 miles. The contracts for building are at the price of $15,000 per mile in bonds and $15,000 in stock; the Company reserves $5,000 per mile in bonds and $5,000 in stock for rolling stock, equipment, shops, station houses, &c. The mortgage is made to J. Edgar Thomson of Philadelphia and Charles L. Frost of New York. The bonds run fifty years from 1869; *are payable in gold coin*—are *convertible* at any time into the Capital Stock of the Company—and have the benefit of a sinking fund. They bear interest at the rate of seven per cent., payable on the first of May and November, *in gold coin*, free from Government tax, at the Agency of the Company, in New York, or in London. The officers are, George Greene, Cedar Rapids, Iowa, President: James Putman, Burlington, Iowa, Vice-President; John H. Davey, Burlington, Iowa,

Digitized by Google

Treasurer; R. M. Green, Burlington, Iowa, Secretary. The bonds are offered by Messrs. Henry Clews & Co., 32 Wall street, at the price of 90.

Chesapeake and Ohio Railroad.—A first mortgage of $15,000,000, on a trunk line of railroad between the Atlantic coast in Virginia and the navigable waters of the Ohio River. The road is completed and in operation from Richmond to the celebrated White Sulphur Springs of West Virginia, 227 miles, and there remain but 200 miles (now partially constructed) to be completed, to carry it to the proposed terminus on the Ohio River, at, or near, the mouth of the Big Sandy River, 150 miles above Cincinnati and 350 miles below Pittsburg. A large number of laborers are employed and the work is expected to be completed by July, 1872. The bonds are coupon or registered, in denominations of $100, $500 and $1,000, interest payable January and July in New York, and have 30 years to run. Price 90 and interest. Messrs. Fisk & Hatch are the Financial Agents, No. 5 Nassau street.

East Tennessee, Virginia and Georgia Railroad.—This is a first mortgage seven per cent. bond, redeemable in 1900. The interest is payable Jan. 1 and July 1, in New York. The East Tennessee, Virginia and Georgia Railroad is 270 miles long; it commences at Bristol, on the boundary of Virginia, and runs to Chattanooga, with a branch from Cleveland to Dalton, Georgia, thirty miles long. It forms a link in the shortest line which can be built from New York to New Orleans, and, from the conformation of the country through which it runs, must necessarily remain a Trunk Line. The security of the bonds now offered for sale does not, however, depend upon any future development of the business of the road as the earnings are already sufficiently large to establish the safety of the bonds, and to make them one of the best securities offered in the market. The mortgage is for $3,500,000, being only $13,000 a mile, and has been created for the sole purpose of paying off the debt due to the State of Tennessee, amounting to $4,117,761 10. The proceeds of $2,500,000 of the bonds, together with the money the Company had on hand, will have paid the entire State debt, amounting to $4,117,761 10, and leave the Company without any floating liability, its debt diminished by $617,761 10, and with one million of bonds on hand. These bonds are for sale by the Gallatin National Bank, 36 Wall street, New York, at 90 and interest. For other details see advertisement.

Elizabethtown and Paducah Railroad of Kentucky.—First mortgage eight per cent bonds, to the amount of $3,000,000, upon 185 miles of railroad from Elizabethtown to Paducah, Kentucky. Subscriptions to capital stock by cities, counties and individuals in bonds and cash amount to $3,095,000. Bonds are for $1,000. Coupon or registered, convertible for seven years; interest eight per cent, payable March 1 and September 1 in New York. Principal due in 1890. President, W. H. Dulaney; Secretary, A. A. Gordon, of Louisville. Loan offered at 87½ by Norton, Slaughter & Co., No. 41 Broad street; Wm. Alexander Smith & Co., No. 40 Wall street; Hallgarten & Co., No. 28 Broad street. For further particulars see advertisement next week.

Nashville and Decatur Railroad.—A mortgage for $2,100,100, or $17,500 per mile on an old and completed road. The mortgage is created for the purpose of paying a debt due to the State of Tennessee on terms which will reduce the liability of the road about $600,000. Messrs. Drexel, Winthrop & Co., 18 Wall street, are the Financial Agents. For other particulars see advertisement.

New York and Oswego Midland Railroad.—A first mortgage limited to $20,000 per mile on 345 miles of railroad between New York City and Oswego, forming with its connecting line in New Jersey, the Montclair Railroad a through route between the cities above named of 400 miles. The road traverses the interior counties of Oswego, Oneida, Madison, Cayuga, Onondaga, Cortland, Chenango, Otsego, Delaware, Sullivan, Ulster and Orange, in the State of New York, from which a large local business is expected. The citizens of the Midland counties have made subscriptions to its capital stock to the amount of about *six and a half millions dollars* The larger share of these subscriptions have been made by towns and cities in their corporate capacity, and for which they paid in town and city bonds bearing sever per cent. interest. These bonds are made by law exempt from local and municipal taxation, when held in any county through which the road passes, the Company have sold them at par and interest whenever they had occasion to use the proceeds, thus rendering the subscriptions for which they were given in payment equivalent to cash. The Company, therefore, commenced its undertaking with a paid up capital of about $6,500,000; 225 miles of road are now completed. The bonds are $100, $500 and $1,000, coupon or registered, bear 7 per cent. gold interest payable January and July in New York free of government tax, and run till 1894. Price, par. Messrs. Geo. Opdyke & Co, Financial Agents, 25 Nassau street. For further particulars see advertisement on another page.

Northern Pacific Railroad.—New 7.30 gold loan, secured by first mortgage on railroad and land grant. The road when completed will extend from Lake Superior to Puget's Sound. The road is now building from Lake Superior, across Minnesota, to the Red River of the North, 233 miles, and this section is to be completed by August, 1871. The bonds cannot in any case exceed $50,000 per mile of finished road, are secured by a first mortgage on all the property and rights of the Company, which will embrace on the completion of the work: 1. Over 2,000 miles of road, with rolling stock, buildings, and all other equipments. 2. Over 22,000 acres of land to every mile of finished road. This land, agricultural, timbered and mineral, amounting in all to more than 50,000,000 acres, consists of alternate sections, reaching 20 to 40 miles on each side of the track, and extending from Wisconsin through portions of Minnesota, Dakota, Montana, Idaho, Oregon and Washington to Puget's Sound. By the terms of the mortgage the 7.30 bonds of the Company are always receivable at par and accrued interest in payment for the Company's lands at their lowest graded prices; and in all cash purchases of land from the railroad 10 per cent discount will be made from the purchase price whenever the Company's first mortgage bonds are offered in payment. The registered bonds can be exchanged at any time for coupons, the coupons for registered, and both these can be exchanged for others, payable, principal and interest, at the London and American banking houses of Jay Cooke & Co., or at any of the principal financial centres of Europe. They are free of United States tax, and are issued of the following denominations: Coupons, $100, $500, and $1,000; registered, $100, $500, $1,000, $5,000 and $10,000. Both principal and interest are payable in gold at the office of Jay Cooke & Co., New York City—the principal at the end of 30 years and the interest, at the rate of seven and three-tenths per cent per annum, half yearly, first of January and July. Board of Directors.—J. Gregory Smith, St. Albans, Vt.; R. D. Rice, Augusta, Me.; Thomas H. Canfield, Burlington, Vt.; William B. Ogden, Chicago, Ill.; William G. Moorhead, Philadelphia, Penn.; William G. Fargo, Buffalo, N Y.; B. P. Cheney, Boston, Mass.; George W. Cass, Pittsburg, Penn.; Frederick Billings, Woodstock, Vt.; William Wincom, Winona, Minn.; James Stinson, Chicago, Ill.; Sam'l M. Felton, Philadelphia, Penn.; Charles B Wright, Philadelphia, Penn. Secretary, Samuel Wilkeson, Esq. Price, par. Messrs. Jay Cooke & Co. are the fiscal agents, New York, Philadelphia, Penn., and Washington, D. C. For further particulars see advertisement in CHRONICLE next week.

Western Maryland Railroad Company.—An issue of $1,200,000 six per cent endorsed by the City of Baltimore. The bonds have 30 years to run, coupons payable, and as an additional security the city has provided a Sinking Fund of $200,000 for the liquidation of this debt at maturity. Price 87½ and accrued interest. The American Exchange Bank, New York, Financial Agents. For further particulars see advertisement.

THE CENTRAL RAILROAD OF IOWA.—A first mortgage of $3,280,000 upon a railroad 205 miles in length (including rolling stock, equipment, &c.,) running North and South across the State of Iowa, connecting on the South with the North Missouri Railroad and on the North with Milwaukee & St. Paul road and forming a route from St. Paul to St. Louis 580 miles in length. The bonds are limited to the amount of $16,000 per mile. The mortgage is made to the Farmers' Loan & Trust Company of New York. The bonds are for the respective amounts of $500 and $1,000 each. They bear seven per cent. interest, payable free of government tax, on the 15th of January and July, in New York, have thirty years to run, and both principal and interest are payable in gold. The bonds have semi-annual coupons attached, but may be registered at the option of the purchasers. These bonds are now offered for sale at 90 and accrued interest at the rate of seven per cent., in currency, from the date when the last coupon was paid. Charles C. Gilman, President; Hon. W. H. Seevers, Vice-President; W. B. Shattuck, Treasurer; Charles Collins, Secretary. Messrs. Jay Cooke & Co., New York, Philadelphia and Washington, are the Bankers and Financial Agents.

EVANSVILLE, TERRE HAUTE AND CHICAGO RAILROAD.—A first mortgage of $775,000 on 55 miles of railroad, extending from Terre Haute northerly to Danville, Illinois, forming part of a through route from Chicago to Terre Haute, Evansville, Nashville, and the South. Thirty-one miles are now in use for business. The local subscriptions to the capital stock of the Company are $450,000, payable in cash at par. Of this $300,000 has been paid in. The road is being built by Chauncey Rose, Esq., of Terre Haute, and his associates, who are the chief subscribers to the capital stock. The bonds are of $1,000, bear seven per cent in gold, payable May and November in New York, and run thirty years. They are offered at 90 by Messrs. Winslow, Lanier & Co., No. 27 Pine street, New York, the financial agents of the Company.

LAKE SHORE AND MICHIGAN SOUTHERN RAILROAD.—Consolidated mortgage sinking fund bonds, covering the whole line of road from Buffalo to Chicago. The purpose of the Company is to retire its present funded debt upon maturity into these bonds, leaving them eventually the only mortgage upon its valuable property. These bonds, payable July 1, 1900, are in two classes, viz: seven per cent coupon bonds of $1,000 each, interest in January and July; and registered bonds, interest payable quarterly, in January, April, July and October, both being payable at the Union Trust Company of New York. Price 97½ and accrued interest. Messrs. Robinson, Chase & Co., No. 18 Broad street, financial agents.

LOUISVILLE AND NASHVILLE RAILROAD—Consolidated first mortgage seven per cent. bonds, interest payable April and October in New York. The Louisville and Nashville Railroad connects the two cities from which it takes its name, and, with its branches in the State of Kentucky, is 390 miles long. The Company has an opportunity of purchasing other railroad lines, connecting with Memphis, and other cities in the South, that will extend its business, and add largely to the value of its property. To obtain the funds for these purchases, and to retire the present indebtedness of $1,747,000 at maturity, the Company has executed a mortgage to secure the payment of its bonds for $8,000,000. These bonds are for $1,000 each, payable 1898, and bear seven per cent. interest, and may be registered. Price 90 and accrued interest. Messrs. J. B. Alexander & Co., 19 Nassau street, and Messrs. John J. Cisco & Son, 59 Wall street, Financial Agents.

MEMPHIS CITY BONDS.—An issue of $500,000, thirty years gold bonds of the City of Memphis, known as "funding bonds of 1870," for the purpose of funding a like amount of the due debt of the city, in exchange at par. Interest at six per cent, payable in gold, in New York on the first of May and November. P. M. Meyers & Co., No. 24 Pine street, New York, and Messrs. McKim & Co., Baltimore, Md., are the financial agents.

MONTCLAIR RAILWAY.—A first mortgage, at the rate of $30,000 per mile on 40 miles of road between Jersey City and Greenwood Lake. This road is a continuation of the New York and Oswego Midland and

Digitized by Google

makes with that the through route from New York to Oswego. The road is leased by the New York and Oswego Midland Co., and the bonds also guaranteed by that Co. The bonds are coupon and bear 7 per cent., gold interest, payable semi-annually. Price par. Messrs. Leonard, Sheldon & Foster, 10 Wall street, Financial Agents.

MONTICELLO AND PORT JERVIS RAILWAY.—A first mortgage of $500,000 on 25 miles of road from Port Jervis on the Erie railway to Monticello, Sullivan Co., New York. The capital stock paid up is $500,000. The bonds run 20 years and bear 7 per cent., in gold, coupons being payable quarterly in New York. Price 87 and accrued interest. Messrs. Davidson & Jones, 59 & 61 Wall street, Financial Agents.

NEW HAVEN, MIDDLETOWN AND WILLIMANTIC RAILROAD.—A first mortgage upon 52 miles of road between New Haven and Middletown, Conn., popularly called the Boston "Air Line" route, as it makes the distance between Boston and New York 20 miles shorter than by present routes. The road is in a forward state of completion and is expected to be finished by soon.

The bonds are $500 and $1,000 each; have twenty years to run; bear interest at the rate of seven per cent. free of all taxes, with coupons payable in New York on the first of May and first of November. *and may be registered at the option of the holders.*

Price par, Messrs. Hatch & Foote Financial Agents, No. 12 Wall street, New York.

ST. JOSEPH AND DENVER CITY RAILROAD.—An issue of $1,500,000 first mortgage eight per cent. gold bonds on a Railroad, commencing at St. Joseph, Mo., and extending west to Marysville, Kansas, a distance of 111 miles. This road is entirely completed and open to the public and the mortgage is at the rate of $13,500 per mile. The Company possesses the franchises and right of way from Marysville to the City of Fort Kearney, granted by the United States and the States of Kansas and Nebraska, together with a grant of land within twenty miles on each side of the road. The Company have commenced the construction of this line of Railway, and the whole is under contract. The bonds are $500 and $1,000—and run till 1899—interest being payable Feb. 15 and Aug. 15 at New York, London and Frankfort. Price, 97½. Messrs. W. P. Converse & Co., 54 Pine street, and Messrs. Tanner & Co., 11 Wall street, Financial Agents.

ST. LOUIS AND SOUTHEASTERN RAILROAD.—A first mortgage of $2,250,000, or $16,000 per mile, on 139 miles of road between St. Louis and Shawneetown, on the Ohio River, connecting them with a line to Madisonville, making a through route between St. Louis and Nashville, Tenn. Subscriptions amount to $1,800,000. The road is 200 miles in length, including the Evansville division, all under construction. Ninety-one miles are completed and equipped. The bonds are convertible sinking fund, run till 1894, are payable in gold, and bear seven per cent interest, payable in New York, on the first of May and November, free from Government tax.

SOUTH AND NORTH ALABAMA RAILROAD.—A first mortgage of $22,000 per mile on a railroad between Montgomery, Ala., and Decatur, Ala., on the Tennessee River, 183 miles long; 107 miles are completed. The bonds are endorsed by the State of Alabama, which has a first lien upon the road as security. They bear eight per cent., gold interest, payable in New York in January and July, and mature in 1890. Price 95. V. K. Stevenson & Son, No. 11 Pine street, financial agents.

WEST WISCONSIN RAILWAY.—A first mortgage of $4,000,000 on 154 miles of railroad, of which 120 are built, northwesterly from the Milwaukee and St. Paul Railroad. The mortgage covers road, &c., and 1,000,000 acres of land granted by Government. Bonds are coupons of $500 and $1,000. Land grant, sinking fund, bear seven per cent gold, payable January and July in New York, and mature in 1885. Price 90 and accrued interest. Messrs. Gwynne, Johnson & Day, No. 16 Wall street, and White, Morris & Co., No. 29 Wall street, New York, bankers and financial agents for the Company.

New York & Harlem Railroad—Annual Report.—

Number of miles traveled by passengers, or number of passengers carried one mile:		
Regular	19,808,606	
Commuters	5,739,250	25,532,856
Total tons of freight carried one mile		19,602,827
Expenses of maintaining road were as follows:		
Repairs of road bed and railway, excepting cost of iron		$324,051 22
For depreciation of way		53,205 28
Cost of iron used in repairs		48,001 80
Repairs of old rails		10,203 48
Repairs of buildings		19,987 20
Repairs of fences and gates		5,265 90
Real Estate		80,000 00
Total		$549,659 40
From freight		$1,968,688 50
From other sources		331,501 00
Total		$2,659,074 00
The payments other than for construction were as follows:		
For transportation expenses		$1,685,471 50
For interest		363,505 72
For dividends on stock—amount and rate per cent. (8 per cent.) per annum		631,578 94
United States tax on earnings		26,216 60
Cash on hand		2,304 63
Total		$2,709,077 39
The cost of road and equipment is		$10,224,665 89
This amount ($8,624,058 30) cover only the cost of the road from New York to Dover Plains; the cost of the remaining distance from Dover Plains to Chatham 4 Corners is represented by $2,000,000 Albany Extension Certificates, of which this company holds		$1,948,000 00
Real estate owned by this Company		1,590,616 47
Less bonds and mortgages		629,000 00
Not included in cost of road and equipment		$970,616 47
The stock and debts of the Company are as follows:		
Capital stock, as by charter		$8,000,000
Amount of stock subscribed		8,000,000
Amount paid in		7,000,000
Total amount now paid in of capital stock		8,000,000
Total amount now of funded debt*		8,072,840
Total amount now of funded and floating debt*		5,072,840
Average rate per annum of interest on funded debt		6 2-3 p. c.

* Real estate mortgage not included in above, $629,000.

Hannibal and St. Joseph Railroad.—A report has been issued by the directors of this company for the seven years ending August 31, 1870. We shall endeavor to give an annalysis of this report next week.

—Mr. Joseph G. Martin, of Boston, stock broker, has issued his annual circular of statistics in regard to the stocks, debts, dividends, etc., of all securities dealt in at the Boston Stock Board, and the fluctuation in prices during 1870. Mr. Martin will also issue soon a book under the title of "*Seventy-three years' history of the Boston Stock Market*," which will, we presume, be a very complete and interesting work.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Jan. 14, 1871.

United States Five-twenty Bonds, if allowed to run until 1875, will pay but Four Per Cent. Gold on the investment at present market rates, while they are likely to be funded at a lower rate of interest than they now bear before that time.

The First Mortgage Bonds of the Central Pacific Railroad Company, at present market price, will pay nearly Seven Per Cent. in Gold on the investment, and cannot be called in or the interest reduced under twenty-five years.

A difference of from Fifteen to Twenty Per Cent. may be realized in exchanging Government Bonds for Central Pacifics, or saved in making new investments.

The safety and value of the First Mortgage Bonds of the Central Pacific Railroad Company are thoroughly established and universally recognized.

The value of the property, the immense and increasing revenues of the Company, and its able and honorable management, assure the security of the principal and prompt and regular payment of interest beyond question.

We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold and Coupons, execute orders in miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general Banking business.

FISK & HATCH.

Quincy Mining Co	$4 00	Feb. 6.	Jan. 26 to Feb. 6.
Delaware & Hudson Canal Co	5	Feb. 1	Jan. 19 to Feb. 2.

FRIDAY EVENING, January 20, 1871.

The Money Market.—The growing tendency towards ease in the money market, noticed in our last report, which had made call loans readily obtainable at 6 per cent. on good stock collaterals, has since been checked by another attempt to make money stringent through speculative manipulations.

The amount of $5,750,000 of city revenue bonds fell due on the 15th inst., and the calling in of funds for the payment of these bonds naturally causing a slight, though temporary, disturbance of laws, this period was considered favorable by the operators for a decline in stocks, to make the money market tight by the usual process of locking up currency. One of the associated Banks appeared a creditor at the clearing house in the sum of $4,316,000, and this probably represented but a portion of the funds which were held off the market.

It appears, however, that the revenue bonds above referred to were largely paid on the 14th inst., and the money was called in for the purpose at an earlier period than the clique had calculated upon, so that their attempt was but partially successful for a few days, culminating in the highest rates on Tuesday, when 7 per cent. currency, 7 gold, and in some cases a commission also was paid for money on call. Since that time the market has been relaxing, and 6@7 per cent. currency has been the ordinary rate, with exceptions at 5 per cent., although it does not appear that the amounts taken off the market have yet been returned to the usual channels.

The natural tendency of the market is towards easier, rates as shown by the bank statements, the averages of the associated banks last week showing an income of $3,632,995 in loans, an increase of $2,632,213 in specie, an increase of $11,364,949 in deposits, and an increase of $1,544,501 in legal tenders. The net result of this statement shows a gain of $1,351,705 in the excess over legal reserve, the total excess being $18,202,921 over the 25 per cent, required by law.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Jan. 14, 1871.	Jan. 15, 1870.	Jan. 16, 1869.
Loans and discounts	$261,211,022	$253,101,106	$202,238,831
Specie	28,990,404	37,510,467	29,258,536
Circulation	32,049,804	33,966,823	34,259,153
Net deposits	213,403,774	201,398,331	195,184,843
Legal Tenders	50,515,911	52,248,475	53,927,083

The banks now complain of a glut of national bank notes in their vaults, and considerable amounts have been offered free of interest, for eight, ten or fifteen days, in consideration of the loans being returned in legal tenders. Other banks have sold them at a discount varying from 1-10 to ¼ per cent, according to size, the latter price being for notes of small denomination.

The demand for commercial paper was interrupted to some extent by the disturbance in the money market noticed above; but with the return of easy rates there has been a good demand for first-class paper at 7@8 per cent. There is not much offering, and the leading brokers report that they could sell much more of really first-class paper than they can now obtain; rates are as follows:

	per cent.
Commercial, first class endorsed.....60 days.	7 @...
" " " .....4 months.	7 @ 8
" " " .....6 months.	7 @ 9
" " single names.....60 days.	8 @12
" " " .....4 to 6 months.	9 @15
Bankers', first class foreign.....60 days.	7 @ ...
" " domestic.....3 to 4 months.	7 @ 8½

United States Bonds.—The market has been strong throughout the week, with considerable purchases by investors, and to some extent by the stock houses of the street. In several instances we have heard of large blocks being taken by leading houses in this city on orders from banks and other financial corporations in the Interior, some of which were from new banks. There has been no buying of consequence for shipment abroad. On the contrary, it has been reported that bonds have been bought in London and shipped to this market, though it is not possible to ascertain that any considerable amount has been so shipped. On Wednesday the Government purchased $2,000,000 of 5-20s, the total offerings amounting to $6,842,100, which was apparently larger than had been expected. As the effect was for the moment temporarily depressing to the market. Prices have not varied materially since last week, and close at very nearly the same figures as then quoted. In London quotations have been higher, but the interruption of prompt telegraphic communication by cable has prevented much business being done between that market and our own.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Jan. 14.	Monday, Jan. 16.	Tuesday, Jan. 17.	Wednesd'y Jan. 18.	Thursday, Jan. 19.	Friday Jan. 20.
6's, 1881 coup	110¾	110¾	110¾	110¾	*110⅝ 110¾	*110¾ 111
5 20's, 1862 coup.	109¼ 109½	109¾	109½	109¾	*109¾ 109¾	*109¾ 109¾
5 20's, 1864 "	108¾ 109	108¾	108¾	* 08¾ 108¾	108¾	108¾ ....

Currency 6's	*110¾ 110¾	110¾	110¾	*110 110¾	110	110 ....

* This is the price bid and asked, no *sale* was made at the Board.

State and Railroad Bonds.—Southern State Bonds have been firm throughout most of the week, and tolerably active, with an advance on several of the speculative favorites, as may be seen in the table of prices below.

There have been no recent developments in regard to the credit of the States in default of interest, and the confidence shown seems to be general, rather than based upon special causes.

In Railroad Bonds the interest in Pacifics has absorbed the whole attention of the street, the fluctuations and volume of transactions in the Union Pacific securities having been immense. The immediate cause of the advance is not certainly known, though rumors have been very numerous in regard to it. The better opinion seems to be that sellers "short" have been "cornered," and the sharp rise in prices to-day has been caused by their purchases. In addition to this, telegrams from Washington state that the Government is not going to press its claim for interest against the companies, but will continue the same arrangements heretofore had with them. It is also supposed that the directors, who have recently had a meeting in Boston, have been able to make preparations for taking care of the floating debt of the company without embarrassment. Still another report, with some show of probability, says that several parties heavily interested in the stock have combined to obtain control of the road, and that purchases have been made on their account. There may be truth in some or all of these statements, though in the excitement of the moment the exact facts can not be found out.

Prices close to-night as follows:

First Mortgages	77 @77½	against	@74¼ last week
Income Bonds	57½@59	"	37½@38½ "
Land Grants	67½@	"	56½@

Central Pacifics close firm at 90½@90¾.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Jan. 14.	Monday, Jan. 16.	Tuesday, Jan. 17.	Wednesd'y, Jan. 18.	Thursday, Jan. 19.	Friday, Jan. 20
6s Tenn., old	63¾	64	63¾ 63¾	63¾ 63¾	63¾ 64¾	64½ 64¾

6s S C, n, J & J	62½	61¾ 61¾	58 60¾	58 58¾	60 60¼	59¾ ....
6s Missouri	89¾ 89¾	89¾ 90	*90	89¾ 90¼	90¾	90¼ 90¾

* This is the price bid and asked, no *sale* was made at the Board.

Railroad and Miscellaneous Stocks.—The stock market has been variable, but did not at any time decline materially in consequence of the artificial stringency in money which prevailed early in the week. The impression had gained ground from the first that the purpose of the clique manipulating the money market was simply to buy in stocks which they had recently sold, and there was consequently little disposition shown to sell at any lower prices. The effect, however, of this tampering with the money market always has the effect of destroying the confidence of outside parties, and checks legitimate commission business.

In specialties there has been considerable activity, with large fluctuations, principally in Hannibal and St. Joseph, Union Pacific, and to-day in New York Central. The Hannibal and St. Joseph stocks have been influenced by the controversy and law suit pending between a stockholder and the company in regard to payment of dividends on the preferred stock; the company has just issued a report for the seven years ending Aug. 30, 1870. Union Pacific stock closes to-night at 23½, against 14½ last week, the large advance having been established by the several causes referred to above as affecting the prices of the company's bonds. New York Central advanced to 94½ to-day on large dealings, the real cause of the rise and activity not being clearly ascertained, though attributed as usual to operations of Mr. Vanderbilt.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The earnings of those roads which make reports of their traffic are now complete for the year 1870, and as may be seen by the tables on another page, the returns as a general rule compare very favorably with those of previous years; so far as receipts are concerned there seems to be no reason for any loss of confidence in railroad stocks, where the affairs of the respective roads are well and honestly administered.

The number of through passengers over the Pacific Railroad for the year 1879 were—Eastward, 23,795; Westward, 32,241; showing a gain to the Pacific coast of 8,446.

The Gold Market.—The market has been steady but dull. There is but little short interest in the market now and the high rates which were paid for carrying early in the week were rather the result of the close money market than any other cause; on Tuesday the rates for carrying were as high as 7 gold and even 1-32 and 1-16, but since that time have ranged from 7 gold to 4 currency—the rates to-day being within the latter range. On Thursday at the government sale unusually large bids were made amounting in all to $7,036,500, which had a strengthening effect upon the market; nearly the whole $1,000,000 was taken by a prominent firm of stock brokers. In regard to the future of gold the weight of opinion is on the side of higher prices whenever there is any material change. Whatever the result may prove, it seems difficult for the street to believe in the possibility of a lower price than 110 for some time to come.

The following table will show the course of the gold premium each day of the past week:

	Quotations.				Balances.	
	Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Gold.	Currency.
Saturday, Jan. 14	110¼	110⅜	110⅜	110⅜	$3,116,000	$1,971,975	$2,242,183

The general movement of coin and bullion at New York, in the week ending Saturday, January 14, was as follows:

In banks Jan 31	$26,353,191	Withdrawn for export	$495,373
Foreign imports	46,835	Gold receipts into Sub-Treas..	6,479 248
Gold paid out by Sub-Treas'y.	6,686,500	In banks Jan. 7	28 990,404
Receipts from California (approximate)	317,446	Total withdrawn and in bank.	$35 965,025
		Excess of withdrawals	2,556,553
Total known supply	$33,408,472		

Foreign Exchange.—The market for exchange has been very firm, the bankers asking 109⅝ to-day for prime 60 days sterling. Commercial bills have also been in good demand, and bankers have purchased some of the best names at 109¼. There has been no remarkable demand, but there is not a large supply of bills offering, and the scarcity supports prices. The total exports of cotton for the week amount to 119,349 bales, producing $7,486,400 in gold, against 51,086 bales in same week last year, producing then $5,041,220 in gold, with cotton at 25⅝c. and gold at 120¼.

	60 Days.	8 Days.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

New Loans.—An account of every new loan now offered in the New York market will be found on a previous page, giving the terms, circumstances and security of each, the price asked and the financial agents.

The Vanderbilt Roads—Their Annual Report for 1870.—We are enabled to lay before our readers to-day the reports in detail of the New York Central and Hudson River, and the New York and Harlem Railroad Companies, for the year ending September 30, 1870. These reports are official, and made to the State Engineer at Albany, as required by law. The figures in regard to the New York Central and Hudson River are as follows:

Number of miles traveled by passengers, or number of passengers carried one mile	321,365,953
Total movement of freight, or number of tons carried one mile	769,087,777

The following table shows the rate of fare for passengers per mile, charged for the respective classes:

First-class through passengers	2c
do way passengers	2@2½c
Emigrant, through	1@1 1-5c
do way	1c

The following table shows the expenses of maintaining the road or real estate of the corporation:

Expenses of road bed and railway, excepting cost of iron	$2,366,150 65
Cost of iron used in repairs	46,068 10
Cost of steel rails	1,948,529 41
Repairs of buildings	276,396 30
Repairs of Mohawk Turnpike	6,115 40
Repairs of fences and gates	50,439 68
Taxes on real estate	668,768 69
Total	$4,564,456 18

Of the above total, $1,734,129 63 were allotted to passenger transportation, and $2,830,304 53 were allotted to freight transportation.

Expenses of repairs of machinery	$3,181,515 08

Of the above total, $1,417,077 75 were allotted to passenger transportation, and $1,764,437 33 were allotted to freight transportation.

The following table shows the expenses of operating the road:

Office expenses, stationery, etc	$46,530 13
Agents and clerks	477,715 84
Labor, loading and unloading freight	560,795 02
Porters, watchmen and switch tenders	597,374 65
Wood and water station attendance	103,696 18
Conductors, baggage and brakemen	512,552 29
Enginemen and firemen	751,935 09
Fuel, cost and labor of preparing for use	1,868,929 18
Oil and waste	256,157 81
Loss and damage of goods and baggage	88,796 64
Damage for injuries of persons	33,953 54
Damage to property, including damages by fire and cattle killed on the road	10,646 39
General Superintendence	185,498 95
Contingencies	755,876 23
Total	$6,945,160 74

Of the above total, $1,972,122 79 were allotted to passenger transportation, and $4,273,039 97 were allotted to freight transportation.

The receipts for the year were as follows:

From passengers	$6,738,593 01
" freight	14,489,216 52
" other sources	1,135,511 14
Total	$22,363,319 67

The payments, other than for construction, were as follows:

Transportation expenses	$14,068,079 31
Interest	1,093,840 80
Dividends on stock	6,861,941 29
United States tax on earnings	168,975 89
Rents	60,000 00
Sinking fund	111,133 38
Total	$22,363,319 67

The capital stock and debts of the Company are as follows:

Stock	$45,006,000 00
Consolidated certificates	44,428,330 00
Funded debt	13,661,807 31
Floating debt	1,167 00
Average rates per annum of interest on the funded debt	6 per cent.

The report of the New York and Harlem Railroad will be found on page 77.

☞ For other Railroad Items, see COMMERCIAL AND MISCELLANEOUS NEWS, on a previous page.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, January 13, 1871.

A feverish, unsettled tone has pervaded trade circles during the past week. Business, however, has not been without speculative activity, and for many staples the export demand has been good; but general trade has not been active and prices have fluctuated. There seems to be an abundance of money for business purposes and mercantile confidence is a good deal strengthened, but there is a disposition to anticipate too rapidly the effect of a better state of affairs, and the results are, frequent and sharp reactions.

Hides have become rather dull, even at the late decline; dry Buenos Ayres at 25@25¼c, gold; city slaughters, 9¾@10c., currency. Leather is also weak; heavy Hemlock selling at 29c. Skins quiet, with Tallow dull at 8⅞c. for prime.

Provisions have been excited, mess Pork and Lard taking the lead in a speculative movement. Previous to yesterday (Thursday) some 20,000 bbls. mess Pork were taken on speculation, mainly for future delivery, at $22@22 50 for February, March and April, but yesterday was dull, and to-day there was a decline of $1 per bbl., closing firm, however, at $21@21 50; prime mess advanced to $21, but at the close was not salable over $20 50. Pork packing is now about 400,000 hogs, or 30 per cent. ahead of last year, while the exports have been more than doubled. Prime steam Lard has sold at 12⅞@13¼c. for the next three months, but closes at 12½@12¾c. Cutmeats have been doing better on a home demand, but Bacon has become dull and unsettled; large orders for the continent were filled early in the week, but English buyers do nothing; Western Cumberland, 10⅜@10½c. Beef has been less active, and prices closed weak. Butter dull, but Cheese firm, with rather more inquiry.

Tobacco has shown a good degree of activity. Assortments of old crop Kentucky are becoming poor, and the new crop is still kept back by the severe weather; dealers and cutters continue well represented in the market, and there has been more done for export; the sales for the week foot up 900 hhds., of which 500 hhds., including a line of 342 hhds. to-day, were for export, the balance of the shipping business being in small parcels. Prices remain firm at 8@12c. for common to fine leaf, with lugs scarce and nominal at 7@8c. Seed Leaf continues scarce with a limited demand; sales embrace 300 cases Connecticut and Massachusetts wrappers at 35@70c.; a small lot of common fillers at 12c., and a line of State on private terms. Spanish Tobacco is in fair demand, with sales of 310 bales Havana at 85c.@$1 02½. Manufactured Tobacco steady.

East India Goods are without transactions of moment. Hay is dull at the late advance. Hops are without improvement, notwithstanding some export demand.

Whiskey has declined. The Commissioner of Internal Revenue proposes to Congress that a law shall be passed to permit the export of Highwines from bond. A former provision of law having this object, was repealed because it was made the means of committing great frauds upon the Revenue, which it is now thought can be avoided.

Petroleum has had an upward tendency, favored by small stocks, easier freights, and better advices from abroad. Oils have met with a fair demand. A considerable movement in Linseed Oil was reported early in the week. Naval Stores have been moderately active in the past day or two, with Rosins showing some advance, closing at $2 25 for strained.

Wool shows a considerable demand. Metals have been very firm, in sympathy with stronger reports from Europe. Fruits have yielded a little from the late advance, with a better supply of foreign fresh Fruits, and on arrival of currants upon a bare market. Fish are very dull, but scarce and firm.

Freights have been dull, and rates drooping. The speculation in Breadstuffs and Provisions have checked the export in these staples, and but little other heavy merchandize is going forward. The only transaction of moment today was 3,000 bbls. Flour to London, 2s. 4½d.; nominal rates to Liverpool, by steam, were 3s. 8d. for Cotton, and 6¼@6½d. for Grain.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1.

Articles.	Exports since January 1 to																			Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., Jan. 20, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening January 20. From the figures thus obtained it appears that the total receipts for the seven days have reached 146,887 bales against 132,585 bales last week, 139,631 bales the previous week, and 124,250 bales three weeks since, making the total receipts since the first of September, 1870, 2,048,024 bales against 1,625,139 bales for the same period of 1869, showing an increase since September 1 this year of 422,885 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	50,359	46,449	Florida bales.	482	237
Mobile	13,425	6,457	North Carolina	2,693	1,408
Charleston	11,416	5,925	Virginia	12,509	8,219
Savannah	28,158	15,951			
Texas	10,787	6,822	Total receipts	146,887	98,851
Tennessee, &c	16,078	7,333	Increase this year	48,036	....

The exports for the week ending this evening reach a total of 119,349 bales, of which 88,748 were to Great Britain, and 30,601 to the Continent, while the stocks at all the ports, as made up this evening, are now 546,476 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending Jan. 20.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	43,257	20,815	64,082	28,499	189,214	177,464
Mobile	2,858	2,261	5,119	1,024	65,458	69 282
Charleston	7 147	2,771	9,918	1,333	32,830	24,088
Savannah	10,288	2,021	12,259	10,843	8-,991	69,668
Texas	8,651	1,440	10,091	3,421	58,483	46,807
New York	14,116	1,000	15,116	5,651	73,000	67,325
Other ports	2,471	293	2,764	810	33,500	18,091
Total	88,743	30,601	119,349	51,086	546,476	496,725
Total since Sept. 1	1027,088	192,510	1,219,343	893,415	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 68,263 bales, while the stocks to-night are 59,751 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Jan. 13, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Forign	Total.	Northern Ports.	Stock.

The market the past week has been variable in tone with prices early in the week advancing, but later declining, the close to-day, however being firm at ⅛c. advance on last Friday, Middling Uplands being quoted at 15⅝c., against 15½c. a week ago. The day following, the close of our last report (Saturday) the European advices being better, our market became strong and active at an improvement of ⅛c. The next day, Monday, there was a further advance of ⅛c., but the close was quiet. Tuesday there was less doing and prices yielded ⅛c. Wednesday and Thursday, with the sales small, there was no change in either tone or quotations, although the quotations were almost nominal. And to-day the market has remained in pretty much the same condition. Holders are firm and no large purchases could be made, even at the quotations; but buyers at the same time are unwilling to operate, and to effect any considerable sale a concession would have to be made. The needy purchasers have, however, in the absence of any large offerings, served to stiffen prices, so that the close this afternoon is firmer than yesterday, notwithstanding the large receipts of the week. For future delivery the fluctuations have corresponded very nearly with the fluctuations for spot cotton, but the transactions have been limited and no large movement could take place without changing the ruling rates. To-day, with little doing, the close was, for January, 14⅝; February, 15; March, 15⅛; April, 15⅓; May, 15⅝. The total sales of this description for the week (including 2,950 bales free on board, but not including bales "Exchanged") have been 40,550 bales. For immediate delivery the total sales foot up this week 23,679 bales, including 2,721 bales to arrive, of which 4,355 bales were taken by spinners, 371 bales on speculation, 17,678 bales for export, and 1,275 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	13¼@....	13⅜@....	13⅜@....	13⅜@....
Good Ordinary	14⅜@....	14⅜@....	14⅜@....	14⅜@....
Low Middling	14¾@....	15⅛@....	15⅛@....	15⅛@....
Middling	15⅜@....	15⅜@....	15⅜@....	16⅛@....
Good Middling	16⅛@....	16⅜@....	16⅜@....	16⅛@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling.
Saturday	5,293	13¼@....	14⅜@....	14¾@....	15⅜@...
Monday	5,897	13¼@....	14⅜@....	15 @....	15⅛@ ...
Tuesday	3,715	13⅛@....	14⅜@....	14¾@....	15⅜@....
Wednesday	3,246	13⅛@....	14⅜@....	14¾@....	15⅛@....
Thursday	3 412	13⅛@....	14⅜@....	14¾@....	15⅜@....
Friday	5,400	13⅛@....	14⅜@....	14⅜@..	15⅜@....

For forward delivery the sales (including 2,950 free on board,) have reached during the week 40,550 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For January. bales.	cts	bales.	cts	For April. bales	cts.
200 deliverable the 16th	14¾	3,700	15	500	15⅝
800	14¾	3,500	15 1-16	1,000	15 7-16

1,100	14 15-16	12,600 total Feb'y.		300 total May.	

For March. bales.	cts.	bales.	cts.
900	15⅜	4,400	15⅜
1,250	15 3-16	1,000	15 7-16
4,500	15⅛	500	15⅛
100	15 5-16		
12,650 total March.			

The sales during the week of free on board have reached 2,950 bales. The particulars of these sales are as below:

200 f. o. b. Mobile	14	100 f. o. b. Savannah	p. t.
200 " "	14¼	50 f. o. b. Norfolk	p. t.
1,100 " "	p. t.		
1,300 f. o. b. Galveston	p. t.	2,950	

The following exchanges have been made during the week:
⅜c. paid to exchange 500 Jan. for 500 March.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night indicate that in the main the weather has been quite seasonable during the past week. At Mobile it rained early in the week, and has been unsettled since; but at Montgomery and Selma, of the same State, there has been no rain, our telegram from Montgomery reporting the weather pleasant and dry all the week, and from Selma no rain, but cloudy, the mometer averaging 48. At Savannah, Charleston and Augusta our correspondents telegraph that it has been cold and dry, while at Macon and Columbus it has rained one day, but with that exception has been pleasant, the thermometer at the latter place averaging 48, at Charleston 50, at Mobile 44. From Nashville we learn that it has rained one day, and from Memphis that it has rained two days, with the balance of the week cloudy and the thermometer 37. Our New Orleans telegram furnishes us no information with regard to the weather.

The table which we made up from the Government signal service report we have discontinued, as we find it furnishes no indication of the state of the weather through the twenty-four hours of each day.

CONSUMPTION, &c., OF GREAT BRITAIN.—We have received the Liverpool official yearly tables this week, giving the movement of cotton during 1870. The actual consumption of Great Great Britain was as follows:

Descriptions.	1870. Liverp'l.	London &c	Total.	Av. weight	lbs.	Per week.
American	1,459 680	7,5·0	1,467,240	434	636,626,560	28,220
Brazil	337,980	11,600	349,580	164	57,331,120	6,720
Egyptian	170,010	1,080	171,.90	517	88,437,630	3,290
Turkey, &c	22 760	.....	24,760	384	8,789,840	440
West India, &c	64,700	13,410	78,110	209	16,324,990	1,500
East India, &c	612,190	96,070	708,.60	382	270,555,320	13,630
China and Japan	.....	.....	.....	....	.....	....
Total	2,667,320	129.770	2,797,090	396	1,078,204,510	53,790

The imports during the year and stock Dec. 31 were as follows:

Descriptions.	Imports during 1870 Liverp'l.	London &c	Total.	Av. weight	lbs.	Stock, Dec. 31.
American	1,6 5,990	8,020	1,664,010	434	722,180,840	109,970
Brazil	390,560	12,200	402,760	164	66 052,640	24,500
Egyptian	191,740	1,030	192 790	517	99 672,.80	36,560
Turkey, &c	27,130	....	27,130	384	10,417,920	3, 50
West India, &c	84,720	17,330	112,100	209	23,428,900	30,580
Surat	847,020	20,230	867,250	388	334,758,500	173,190
Madras	2,280	106,260	108,530	300	32,559,000	41,300
Bengal	52,840	34,920	87,760	300	26,328,000	23 640
China and Japan	.....	....	.....	...	.....	....
Total	3,252,280	210,050	3,462,330	380	1,315,397,720	444,990

Exports have been as below for the year. We add the total bales for the two previous years.

Descriptions.	Exports during 1870 from Liverpool.	London, &c.	Total.	Av. weight.	lbs.	Total Exports 1869.	1868.
American	142 500	200	14 ,700	434	61,931,800	133,300	177,970
Brazil	47,800	250	48,050	164	7 880,200	61,800	99 840

East India, &c.	320,200	127,100	447,300	354	158,344,200	574,160	615,570
China & Japan.	....	....	....	....	....	....	....
Total	524,000	134,430	658,430	356	234,529,630	791,350	915,120

GUNNY BAGS, BAGGING, &c.—There is no change to report in cloth. The market continues very quiet without any appearance of the anticipated demand from the South; there have been no sales made and prices are nominally quoted 19@20c. currency, duty paid, for India, and 20@21c. for Domestic Rolls. Bags are also quiet there being no demand from the West at present on account of the close of navigation on the Western Rivers; holders are, however, firm in their views and look for full prices when the rivers are free from ice again. We quote 17@18¼c. currency, duty paid, according to weight. The only sale we learn is 20,000 empty Linseed bags reported at 20c. currency. Hemp in the early part of the week was more active, but at the close there is very little moving; prices are lower than at the date of our last. The sales reported are 3,800 bales remainder of the cargo of the "Mutlah" in Boston at 10@10¼c.; 1,500 bales per "Bunker Hill" at 9¾c.; 500 bales per "Peruvian" at 9¼@10c., all gold. Sisal is dull and nominally 10¼@11c. Jute has ruled dull and without transactions. Jute Butts are in good demand and firm with sales of 2,000 bales (an old sale, but not before reported) to arrive in Boston at 3¼@ 3½c. gold; 500 bales here per ex-"Riversdale" at 4c. currency, and 1,100 bales from store at same price at which price the market closes steady.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Jan. 20, 1871. Receipts.	Shipments.	Stock.	Week ending Jan. 20, 1870. Receipts.	Shipments.	Stock.
Augusta	7,247	6,683	19,203	3,444	2,992	21,875
Columbus	3,259	2,306	13,823	1,552	2,291	15,395
Macon	4,211	3,462	15,664	1,626	1,985	17,718
Montgomery	3,652	4,497	11,238	1,037	1,974	15,391
Selma	4,650	5,072	10,578	1,297	1,146	8,275
Memphis	17,169	11,545	40,572	10,607	12,608	19,142
Nashville	4,680	4,899	6,101	2,763	2,398	3,749
	44,868	38,464	117,179	22,326	25,394	101,045

These totals show that the interior stocks have increased during the week 4,201 bales (being now 16,134 bales more than for the same period of last year), while the aggregate receipts are 22,542 bales more, and the shipments 12,970 bales more than for the corresponding period of 1869.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons. On account of the irregularity in the cable despatches, we are again without our figures for stock at and afloat for Liverpool, and we therefore for those items give the figures of last week:

	1871.	1870.
Stock in Liverpool.....bales.	545,000	341,000
Stock in London	69,077	115,671
Stock in Glasgow	450	250
Stock in Havre	45,150	72,700
Stock in Marseilles	6,500	4,150
Stock in Bremen	3,550	2,700
Stock rest of Continent	25,000	33,000
Afloat for Great Britain (American)	290,000	141,000
Afloat for France (American and Brazil)	....	58,067
Total Indian Cotton afloat for Europe	88,000	87,000
Stock in United States ports	546,476	486,725
Stock in inland towns	117,179	101,045
Total	1,736,882	1,443,808

These figures indicate an *increase* in the cotton in sight to-night of 293,074 bales compared with the same date of 1870.

STOCK HELD BY THE SPINNERS OF GREAT BRITAIN.—The Liverpool Brokers Association have given the following statement of the stock held by their spinners on the 31st of December of each of the following years:

Descriptions.	December 31. 1870.	1869.	1868.	1867.	1866.
American	41,000	29,000	34,000	40,000	45,000
Brazil	9,000	8,000	15,000	10,000	8,000
Egyptian	15,000	10,000	6,000	6,000	8,000
Turkey, &c					
West India, &c	2,000	2,000	3.000	4,000	3,000
Surat	33,000	40,000	20,000	20,000	36,000
Madras					
Bengal					
China & Japan	....	....	....	....	....
Total	100,000	80,000	80,000	80,000	120,000

The exports of cotton this week from New York show a decrease since last week, the total reaching 16,825 bales, against 17,448 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 108,075 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

NEW YORK—To Liverpool, per steamers City of Limerick, 1,408 .... Algeria, 1,903.... Wisconsin, 2,660.... Calabria, 1,240 .. City of Washington, 803.... Helvetia, 3,464 . .per ships Washingto , 1,830.... J. Benton, 970 S. Hegnett, 780 15,033
To Bremen, per steamer Rhein, 1,100 1,100
To Rotterdam, per ship Sarah, 692 692
NEW ORLEANS—To Liverpool, per steamer Crescent City, 4,101 .... ships Genevieve Strickland, 4,063 ... Agenon, 4,274.... Atmosphere, 4,141 .... R. Eyands, 4,093.... Elizabeth Yeo, 3,512 ... GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 110¼ and 110⅛, and the close was 110⅛. Foreign Exchange market is strong and rates higher. The following were the last quotations: London bankers', long, 109½@109⅝; short, 110⅛@110½; Commercial, 108¾@109. Freights closed at 5-16@⅜d. by steam and 9-32d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, Jan. 19—11:30 A. M.—The market opened dull. The sales of the day are estimated at 10,000 bales. The sales of the week, ending Jan. 18, were 79,000 bales, of which 7,000 bales were taken for export and 11,000 bales on speculation. The stock in port was 545,000 bales, of which 284,000 bales are American. The stock of cotton at sea bound to this port is 300,000 bales, of which 280,000 bales are American.

Of the present stock of cotton in Liverpool, 40 per cent is American, against 25.75 per cent last year. Of Indian cotton the proportion is 40 per cent, against 55.33 per cent.

LONDON, JAN. 7.—The cotton trade is dull and prices are ⅛d. lower. The following are the particulars of imports, deliveries and stocks:

	1869.	1870.	1871
Imports, Jan. 1 to Jan. 5 ..... Bales.	11,636	2,679	3,120
Deliveries	7,773	9,253	1,897
Stocks, Jan. 5	149,096	115,071	60,077

ALEXANDRIA, Dec. 23.—The shipments of cotton from Nov. 1 to Dec. 23, were as follows:

	Great Britain. bales.	Continent. bales.	Total. bales.
1870	56,919	11,058	67,976
1869	60,205	17,155	77,360
1868	59,329	17,423	75,757
1867	46,487	12,362	59,849

BREADSTUFFS.

FRIDAY, P. M, January 20, 1871

The market for Breadstuffs has been generallly buoyant, the past week, with a speculative demand and larger shipments, but closes at a pause in flour and wheat.

The receipts of flour have considerably increased, but we had at the same time, a large export demand, and a fair business for speculation, upon which prices had advanced 10@20c. per bbl. The business has been as it was at the close of last week, largely in low grades of extra Western, from Winter wheat, but as these have become scarce or have been advanced in prices, attention has been again directed to extras from Spring wheat. City made flours have also had a free movement, millers having been enabled by the higher prices to take orders. The stock of flour in store continues large, but a large proportion of it is withdrawn from sale, at anything like current prices. Southern flours have been very sparingly offered. Rye flour has improved. Corn meal and buckwheat flour remain quiet. To-day the market was less active, and at the close shipping extras were neglected and week.

Wheat has steadily advanced. Liverpool has come in daily at higher quotations, enabling shippers to raise their bids, and there have been very limited offerings. Millers, too have latterly been more anxious to buy, and with ocean freights easy for the amount of business offering, new spring wheat has advanced day by day, with a very fair volume of transactions. Other grades of wheat have sympathized but little with spring growths, until to-day, when spring wheats were neglected, although offered at yesterday's prices, $1 50 for No. 2, delivered, and about 37,000 bush. Amber Winter sold at $1 43@$1 46.

Corn has been variable. There has been more export demand, and this has caused prices to improve to-day, but the local trade has been very dull, and, although offerings are small, the withdrawal of shipping orders causes prices to recede; shippers took prime mixed and yellow to day at 82@83c. Rye has advaneed on a speculative demand, with more inquiry for milling. A few boat loads of new Western sold at $1 03@$1 07, in store, closing at the higher figure.

Barley has ruled firm, but the demand is not pressing. Barley malt and Canada peas nominal. There has been a good business in white beans, at $2 05@$2 75.

Oats for the past two days have been in speculative request, and are higher; some ten boat loads sold closing at 62½@64c. for mixed and white Western, and Ohio, delivered.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 47@ 1 51

GROCERIES.

FRIDAY EVENING, January 20, 1871.

Business in a wholesale way has at times proved a little slow, but distributive dealers have had all they could attend to in getting off supplies as they became available, and the withdrawals from bond probably now represent more closely the actual amounts going into immediate consumption than ever before. This affords much encouragement to importers, who, with small stocks themselves, and the probability that jobbers must soon commence buying again to make good the large drain upon previous purchases, feel confident in their ability to sustain values. A few styles show an advance during the week, but this does not appear to greatly check the demand from consumers, who consider themselves gainers to a large extent in view of their ability to obtain a much superior quality, even though they pay figures nearly or quite equal to those current previous to the reduction in duties.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black....	16,208 pkgs.	Laguayra ..	1,709 bags.	Sugar, Brazil.	4,001 bags.
Green.....	11,199 pkgs.	Other.....	4,485 bags.	Manila, &c..	6,304 bags.

TEA.

The market during the week has been rather slow, at times quite dull, a few invoices of magnitude have changed hands. This is in part due to recent free purchases, but can be traced more directly to the fact that the long expected arrivals have at last come to hand, and the trade having secured a goodly portion of the cargoes previously are disposed to await their landing and sorting out in order to ascertain about how they stand in regard to purchasing further supplies. The fresh receipts are mostly Greens, giving Blacks and Japans rather the preference as to strength on values for the time being, but all grades of new are pretty well sustained and the market generally has a uniform and healthy tone. Old crops which sold quite freely last week in the absence of a better assortment are now comparatively neglected, and though there is nothing to warrant the quoting of a decline holders are quite willing to operate at previous rates. Lines are selling fairly and less difficulty is experienced in making withdrawals from bond. The invoice sales embrace 17,475 pkgs. Green; 4,100 pkgs. Oolongs; and 3,000 pkgs. Japans.

Imports this week have included 70,895 lbs. Black, 1,412,326 lbs. Green, and 12,783 lbs. Japan, per steamer "Riga," from Shanghai; 480 lbs. Black, and 31,629 lbs. Green, per "Hudson," from Whampoa; 440,409 lbs. Black, per "Eleanor," from Amoy; 338 lbs. Black, per "Lufra," from Whampoa; 822,414 lbs. Green, and 18,068 lbs. Japan, per "Mikado," from Shanghai; 1,151,168 lbs. Japan, per "Ariel," from Yokohama: and 118 pkgs.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871.....	1,470,942	855,043	1,169,251	3,495,286
1870.....	1,506,333	1,289,214	83,548	2,779,095

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 118 pkgs. since January 1, against 984 last year.

COFFEE.

The general volume of business has become somewhat reduced of late as consumers are commencing to feel the influence of the immense distribution of supplies at the opening of the year; but there is still a very fair movement, and as a whole the market has a healthy, encouraging tone. Buyers at present appear to be calling mainly for ordinary or roasting grades, or a fine, bright, choice style calculated to sell freely green, and this causes a little drag and now and then some slight concessions on medium qualities. There has been a few additions to the supplies of Brazils, but nothing of magnitude and as the bulk of the accumulation of desirable lots here is under easy control holders feel no loss of confidence and have in all cases refused negotiations not fully up to current quoted figures. The recent arrival per steamer proved quite acceptable and the bulk was distributed without much difficulty. The demand has proved very fair from the regular trade and still continues, as many jobbers have sold with sufficient freedom to break assortments and desire to restock. At other ports the movement has been moderate and recent advices indicate no new features. Java has continued to sell with much freedom in small lots through jobbers and there has been an increased movement from first hands, the superior quality of this grade and the smaller cost as compared with last year making it a much greater favorite with consumers. Brown grades attract the largest share of attention, and are higher, though all qualities show a good degree of firmness. The West India styles since the large movements noted in our last have remained comparatively quiet, owing in part to the fact that buyers did not consider the remaining offerings as worthy of close attention, but holders have not urged business very closely and full prices are in all cases insisted upon. Bids from European agents on one or two cargoes have had a tendency to strengthen the position somewhat. The sales for the week embrace 17,678 bags Rio; 500 bags Maracaibo; 2,000 bags Laguayra; 325 bags Savanilla; 27.5 bags Costa Rica; 1,600 mats, and 850 bags Java; and shipments to Europe from first hands of 678 bags Laguayra. Sales at Baltimore of 5,723 bags Rio on spot; and 10,851 to arrive.

Imports this week have included the following cargoes of Rio:—Steamer "City of Rio Janeiro," 6,060 bags; "Contest," 9,027 bags; "Seraphina," 4,487 bags; "Wavelet," 4,421 bags. Of other sorts the imports have included 3,200 bags St. Domingo, per "B. Ingenac," and 102 bags of sundries.

The stock of Rio Jan. 19, and the imports since January 1, 1871, are as follows

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.

SUGAR.

Immediately following the issue of our last report advices were received of an advance in the London market, and this being followed by a considerable purchase on speculation, the position on Raw Sugars was much strengthened, and full prices realized without difficulty. The influence was not strong enough, however, to stimulate any continued demand of magnitude, or to increase values, and the tone subsequently became rather tame, with favors shown buyers, to induce quick sales. A fair aggregate movement has taken place, the Trade buying moderately, and refiners being the principal operators, but all calls, as before, were based upon positive necessities, and a cautious spirit prevailed generally. Holders, while careful not to overdue the matter, have not allowed the market to want for stock, and the offerings were at all times ample, with now and then a slight indication of pressure, the desire to close out old lots before the new crop appears in large quantity being quite evident. In all negotiations of late there has been much close figuring on quality, and only good, dry Sugars, grading fully up to standards, have realized outside figures. The arrivals begin to increase somewhat, but are not by any means large as yet, and embrace mostly the grocery styles. Refined have met with rather a slow demand at irregular figures, Powdered at one time showing much strength, owing to its relative scarcity, but, as a rule, all calls were met, and the main advantage has been with the buyer. Most of the Refiners are now at work, but producing moderately, as there is no desire to over-stock a dull market. The sales of Raw embrace 1,827 hhds. Cuba, 386 hhds. Porto Rico, 760 hhds. Martinique, 875 hhds. Demerara, 300 hhds. New Orleans, 1,406 baskets Batavia, 7,500 bags Pernambuco, 14 hhds. Cuba tank bottom, and 13,633 boxes Havana.

Imports at New York, and stock in first hands, Jan. 19, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.

MOLASSES.

The market for foreign grades has again shown a pretty dull tone, and remains more or less nominal on values, in view of the absence of a sufficiedt movement to fix a basis of quotations. Occasionally a small lot is taken by refiners or the trade to satisfy pressing wants, but the stock now here is far from attractive, and the disposition is to await a better assortment. Some few lots, new crop, Porto Rico and Demarara have arrived, but not in sufficient quantities to have any important effect upon the position. There was a little quiet movement of distilling qualities, but the recent raid on illicit stills has closed this outlet. Domestic has come forward in antities, the de-

Digitized by Google

mand proved slow, and the presence of a large accumulation forced values down a trifle. Holders, however, prefer putting goods in store, to selling at the rates generally bid, and though not strong the market has a show of steadiness; sales of 200 hhds. foreign, in odd lots, mostly Porto Rico and Demarara; 255 hhds. very old crop Cuba; 800 hhds. Barbadoes; and 3,125 bbls. New Orleans.

The receipts at New York, and stock in first hands, Jan. 19, were as follows:

	Cuba, *hhds.	P. Rico, *hhds.	Demerara, *hhds.	Other *hhds	N. O. bbls

SPICES.

The movement of supplies from jobbers hands continues uninterrupted, and the distributive business has a quick, active tone throughout on all styles, with full prices not only asked but freely paid, and the position generally strong and encouraging. In the regular wholesale way, however, small supplies still retard operations, and the tone is somewhat dull. There has been a few movements, however, the most important of which was a concentration into the hands of one leading house of all the desirable lots of nutmegs, and an advance in the cost of 5c., gold, ₱ lb. Cassia has arrived with rather more freedom, and an increased assortment is the result, as only a portion was previously sold, but holders evince no great inclination to modify their views.

FRUITS, &c.

The market the past week for Foreign Dried has been more quiet, especially towards the close, than it has been for several preceding weeks. The activity noticed for some time past has been for goods to arrive, and as several of these cargoes have came in, most dealers have a supply which will last them for some time to come. The foregoing remarks are applicable particularly to currants and prunes.

The movement in Raisins has been quite limited also, as dealers, while buying other goods to arrive, of late, bought these at the same time on the spot, as there was no reduction in the duty on Raisins and therefore nothing to be gained by waiting for later shipments; so they have sufficient for their present wants, while an advance quoted last week in prices has been lost and the market closes tame, with holders more willing to operate than sellers. Sardines may be quoted strong and tending upward, the movement has been quite large at full prices, and at the close sales are reported at 19¼c., currency. Nuts have been without change or movement worthy to note since our last. Figs and Dates rule about as before quoted.

Foreign Green are lower, caused by the arrival of several cargoes this week from the Mediterranean, part of which should have been here some time ago, and since our last about 16,000 boxes have been thrown upon the market, and prices or Lemons have declined $4@$6 per box, Malaga now selling from store at $4 00 and Messina at $6@$6 50. Oranges sell at $2 50@$3 50 for Malaga and Palermo, and $3@$5 for St. Michaels. At auction to-day Messina Oranges sold at $2@$2 75 per box, and do. Lemons $3 50@$4 10. West India have been in full supply and easier for most kinds, Porto Rico Oranges selling at $6@6 50 per bbl., Nassau at $6, and Havana, which are of poor quality, at $2 75 per bbl. Baracoa Cocoanuts sell at $35@40 per thousand, and a lot of Baracoa Bananas at $1 per bunch. We also note a small lot of Grape fruit at $2.

Domestic Dried have generally been quiet. Some trade has been done in State Apples at 6¼c., but does not amount to much; a few small lots have been taken for export at this price. Southern have been quiet, but the stock is well concentrated and easily controlled, and no sales have been made except at full prices. Blackberries are again quiet; they have shown some movement, but prices have not been affected by it, and they are without improvement in tone or price. Pared Peaches continue scarce. Unpeeled are in small demand, but sell at full former prices. Pitted Cherries have sold to a considerable extent, and prime dry ones are firm at the close and meet with ready sale. Raspberries and Plums are quiet, and are in ample supply for all wants of the trade.

Domestic Green are firm for Apples and in active demand, and large sales have been made, principally to the city trade, at $4@$4 50 per bbl., and at the close holders of prime stock refused to sell except at the highest price. Cranberries are in small demand, but the stock of prime in holders' hands does not seem to be large, and they refuse further concessions. Canned goods sell fairly.

ADVICES FROM PRODUCING MARKETS.

Tea.—Messrs. Aug. Heard & Co.'s telegram, dated Hong Kong, Dec. 12, 1870, says: Fair to good Oolongs, 28 taels ₱ picul. Stock at Foochow and half Amoy, 90,000 half chests. Settlements for America since last advices, 40,000 chests. Total export this season of Oolongs to the United States, will probably not exceed 12,500,000 lbs. Shanghai, Dec. 21.—Total export Green Tea to United States since June 1st, about 14,500,000 lbs. Export for whole season not likely to exceed 18,500,000 lbs. Green Tea crop will probably be 4,000,000 lbs. smaller than last year.

Rio Coffee.—Messrs. Wright & Co.'s telegram dated Rio de Janeiro, Dec. 23, 1870, reports sales Coffee for United States, since Dec. 19, 44,000 bags; shipments Coffee to United States, 40,000 bags; loading Coffee, 77,000 bags; stock Coffee at date, 80,000 bags; price Coffee, 8|100. Exchange, 24r.

Cuba Sugar.—HAVANA, January 18th.—The *Weekly Report* says: The same causes which existed last week, have continued to act upon our market during the period since elapsed. With the little sugar that has come in, up to this date, there has been no opportunity for our buyers to make any selections, and with exception of a certain alacrity shown in picking a few trifling lots of desirable sugars we have only a quiet market to review, and can not look for increased activity until stocks accumulate further. We quote prices nominally at 9¾@10 rs. for No. 12.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	5,320	1,561
Philadelphia	....	100
Boston	2,689	58
Baltimore	100	....
Total export of the week to all countries	10,097	1,780

The general movement at both ports has been as follows:

THE DRY GOODS TRADE.

FRIDAY, P. M., January 20, 1871

The market continues without notable feature in any department, beyond what was reported in our last review. There is an apparent disposition on the part of jobbers to get their stocks in readiness for the Spring trade, though purchases are still limited to such fabrics as are, from present indications, most likely to experience an advance later in the season. There are more buyers in town from distant sections than during the preceding week, and the purchases of this class are of a more general character than those of our city dealers. California buyers, in addition to fair amounts of staple and colored cottons, are taking prints freely, where light and medium work is obtainable, and are also making considerable purchases of foreign linens. Dealers from the more remote districts of the South are appearing in the city in increased numbers, and are taking fair amounts. The trade from first hands opens with rather more encouraging prospects than was the case last Spring, and as the market for the next ninety days is likely to be a rising one, there is every reason for believing that the season will prove satisfactory, both to commission men and jobbers.

The city retail trade is dull, as is usual at this season of the year, and retail dealers are small purchasers in consequence. There is a fair trade doing in the interior, with considerable movements of Winter fabrics, and occasional orders are received for small assortments to replenish broken stocks. Payments are made promptly, as the rule, but some delay is said to be experienced in the collection of bills from small dealers in certain sections. The losses are not heavy, however, and the number of failures, thus far, this year, has been unusually small.

DOMESTIC COTTON GOODS.—There is an active demand for brown and bleached sheetings and shirtings in first hands, trade being stimulated by the limited production, and prospective scarcity later in the season. The current trade is fully equal to, and, in some instances, in excess of the supply of desirable goods, and the entire list tends upward. This is especially the case with fine bleached goods, the stock of which is unusually small. Colored cottons, suited to the spring trade, are improving somewhat, and the movements compare favorably with those of a corresponding period in former seasons. There is, however, less activity in the demand than is noted of staple cottons, as there is thought to be less danger of a short supply of colored cottons, and buyers are holding off in consequence. Prints are in active request, though movements are still restricted by an inadequate supply of medium and light work. Prices are very firm, though some makes are not quotable as agents are offering no goods. Agents are showing fair assortments of medium spring colors in Americans, Spragues, Merrimacs, Cocheeos, and Gloucesters, but the offerings are not general.

DOMESTIC WOOLEN GOODS.—The demand for fine woolens shows decided improvements, and the sales are considerably heavier than for the preceding week. Agents are showing more extensive assortments, though many still hold back their samples of high priced goods, until the trade shall become more spirited. The trade in medium and low grades of cassimeres continues good, with large sales to clothiers. The better class of clothing manufacturers are taking fine goods freely, as are, also, the larger jobbers. Prices open about the same as last spring, and are very firm, in consequence of the limited production.

FOREIGN GOODS.—The trade in foreign fabrics is considered good for this season of the year, though the demand is confined to linen goods and woolens. Large amounts of dress goods have been received by importers during the week, and these dealers generally hold sufficiently large stocks to begin the season with, but are indisposed to show samples until the demand becomes more spirited. Values are steady on all goods offering, without material change from the prices current last spring.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table:

	FROM NEW YORK.				FROM BOSTON
	Domestics.		Dry Goods.		Domestics.

The Railroad Gazette,

Published at 110 & 112 Madison St., Chicago, by

A. N. KELLOGG,

Is a Weekly Illustrated Journal of 24 pages, as large as those of EVERY SATURDAY.

IT CONTAINS

A Complete Record of Railroad News:

The Progress of New Roads—Elections and appointments of officers—Contracts Let and to be Let—Summaries of Annual Reports—Illustrated descriptions of Railroad Improvements—Articles both original and selected on railroad operation and civil and mechanical engineering, and discussions of the relations of Railroad Companies to the community.

This Journal is prepared especially for stockholders, directors and officers of railroads, and all railroad employees.

Price $4 per annum, in advance.

NEW PUBLICATIONS.

KIT, FAN, TOT

And the Rest of Them.

By Olive A. Wadsworth. Author of Bill Riggs, Jr., etc., etc., etc.

16mo. Tinted Paper. Seven handsome full page illustrations. Elegantly bound in the new style with black and gilt back and side dies. Price $1.50.

The many admirers of Miss Wadsworth's inimitable pictures of child life will heartily welcome this new and beautiful volume, whose fascinating pages will afford a rich treat, not only to the little folks, but also to older people, who like to read over children's shoulders.

The whole party "KIT, FAN, TOT, AND THE REST OF THEM" are lively, happy, jolly children, neither wicked nor sanctimonious, but full of innocent fun and frolic, who in their sayings and doings, display a most extraordinary share of childish wit and wisdom. TOT, in particular, is a little darling, as wise and busy, and literal, as it is possible for a three-year old to be.

This book is issued in handsome holiday form for a children's gift book, and may be heartily recommended to the attention of purchasers, not only for its elegant appearance, but also for its pure and healthful influence,

Cotton.

COTTON.

1,000 Tons Arrow Ties for baling Cotton.

For Sale by

SWENSON, PERKINS & CO., Agents,

P. O. Box 5,734. 80 Beaver street, N. Y.

These Ties have been used more extensively than any others, and last year for more than one-half of all the cotton baled in the United States, and received the premium at several State fairs.

VIBBARD, FOOTE & CO.,

AND

CHARLES G. JOHNSEN,

PROPRIETORS AND MANUFACTURERS OF

COTTON TIES,

ENGLAND, NEW YORK AND NEW ORLEANS

SELF-FASTENING BUCKLE TIE.

This is for the planter, the compress and the ship; the best and most convenient Tie manufactured. It is recommended by all of the dealers in New Orleans after a thorough investigation as to the merits of the various ties in use. They are made of the best quality of English iron, nicely painted, put up in bundles of uniform weight and are sold under a guarantee to have entire satisfaction.

WILLIAMS, BIRNIE & CO.,

To Railroad COMPANIES.

We beg to call the attention of Managers of Railways and Contractors throughout the United States and Canada to our superior facilities for executing orders at manufacturers prices, for all descriptions of both AMERICAN and FOREIGN

Railroad Iron.

We are always in a position to furnish all sizes, patterns and weight of rail for both steam and horse roads, and in any quantities desired either for IMMEDIATE OR REMOTE delivery, at any port in the United States or Canada and always at the very lowest current market prices. Contracts will be made payable in United States currency for American, and in either currency or gold (at the option of the buyer) for Foreign, and when desired, we will contract to supply roads with their monthly or yearly requirements.

Orders for Foreign Rails, will be taken for transmission by Mail or through the cable to our

LONDON HOUSE,

58 OLD BROAD STREET,

for execution at a fixed price in Sterling or on commission at the current market price abroad when the order is received in London; shipments to be made at stated periods to ports in America and at the lowest possible rates of freights. Address

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, JANUARY 28, 1871. NO. 292.

Advertisements.

Advertisements will be inserted at the following rates per line for each insertion:

If ordered less than 4 times	20	cents per line.
4 times or more	16	"
13 "	14	"
26 "	12	"
52 "	10	"
	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

NEW YORK, January 26, 1871.

The Trustees, in conformity to the Charter of the Company, submit the following statement of its affairs on the 31st December, 1870:

Premiums received on Marine Risks, from 1st January, 1870, to 31st December, 1870..	$5,270,690 09
Premiums on Policies not marked off 1st January, 1870	2,165,723 64
Total amount of Marine Premiums	$7,436,413 73
No Policies have been issued upon Life Risks; nor upon Fire Risks disconnected with Marine Risks.	
Premiums marked Off from 1st January, 1870, to 31st December, 1870	$5,362,788 55
Losses paid during the same period	$2,258,590 39
Returns of Premiums and Expenses	$1,063,263 57

The Company has the following Assets, viz.:

United States and State of New York Stock, City, Bank and other Stocks	$8,843,740 00
Loans secured by Stocks, and otherwise..	2,377,350 00
Real Estate and Bonds and Mortgages	217,500 00
Interest, and sundry notes and claims due the Company, estimated at	339,352 08
Premium Notes and Bills Receivable	2,089,915 95
Cash in Bank,	316,125 45
Total amount of Assets	$14,183,988 48

Six per cent interest on the outstanding certificates of profits will be paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next.

The outstanding certificates of the issue of 1867 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment and cancelled. Upon certificates which were issued (in red scrip) for gold; premiums, such payment of interest and redemption will be in gold.

A dividend of THIRTY-FIVE Per Cent is declared on the net earned premiums of the Company, for the year ending 31st December, 1870, for which certificates will be issued on and after Tuesday, the Fourth of April next.

By order of the Board,

J. H. CHAPMAN, Secretary.

Elizabethtown & Paducah Railroad Comp'y

OF KENTUCKY.

FIRST MORTGAGE

EIGHT PER CENT. BONDS.

By the authority granted in their charter the Elizabethport and Paducah Railroad Company have issued their first mortgage bonds to the amount of three millions of dollars. The Trustees are Ex-Norton and Philo C. Calhoun, of New York city. The bonds are of the denomination of one thousand dollars, are payable twenty years after date, and bear interest at the rate of eight per cent per annum, for which semi-annual coupons are attached, payable March 1st and September 1st, at the Bank of America, New York.

A brief statement of the condition and resources of the Company, the route of the road, its present progress and future prospects, will be sufficient for the for the formation of a correct estimate as to the substantial value of the Bonds as a remunerative and safe investment.

The length of the line is one hundred and eighty-five miles, running from Elizabethtown, forty miles south of Louisville, on the Louisville and Nashville Railroad to Paducah, at the intersection of the Ohio and Tennessee rivers, forming the outlet of the tobacco growing counties of Grayson, Butler, Davies, Hopkins, Caldwell, Crittenden, Lyon, Marshall and McCraken, and passing through, by the Chief Engineer's report, over eighty miles of rich and extensive bituminous coal fields. Also are found in the counties of Hopkins, Caldwell and Muhlenburg rich deposits of iron ore, and along the entire line is an unlimited supply of the finest lumber.

In addition to the business from the counties named, the road will also draw business from some six or seven counties reached by its connections with the Evansville, Henderson and Nashville, the Owensboro and Russellville, and Louisville and Nashville Railroad, and its Memphis branch.

The estimated cost, by the Chief-Engineer, on March 1st, 1868, for the entire road, ready for business, with equipment of motive power and rolling stock, was $5,700,000. Since that time there has been a reduction in values, and contracts have been let for about one hundred and sixty-five miles, including the bridges over Green, Cumberland and Tennessee rivers, at about ten per cent. less than the estimates, leaving about twenty miles only to be contracted for, which can be let at equally favorable rates. It will therefore be seen that the entire cost of the road and equipment will be not far from $5 250,000. Fifty-three miles have been completed, and track laying is steadily progressing. The Company are now receiving 4,000 tons iron, which will be sufficient to complete the eastern division of the road to Greenville, 98 miles. Work on the western division is well advanced, and it is confidently expected that nearly the entire line will be completed during the present year.

The immediate resources of the Company are represented by its paid-up capital stock of $3,095,000; of which $4,775,000 was subscribed in city and county bonds, and $320,000 in cash, the city of Louisville subscribing $1,000,000 in bonds, which have all been sold, netting over $920,000 cash, and a large part of the county bounds have been sold, mostly to contractors, at very favorable rates, and the stock subscription may be relied on to yield the sum of $2,700 000, which, with the proceeds of the mortgage Bonds at the present low rate, will be ample to complete and equip the road free of floating debt, without estimating any earnings before its entire completion.

These bonds will all pass through the hands of the United States Trust Company of New York, where the proceeds of sales will be deposited, to be paid over to the Company only as each mile of road is completed.

The most rigid care has been exercised to protect by every legal safeguard the interest of the bondholders.

The mortgage provides for a sinking fund from the earnings of the company, after the year 1875, to be used for ultimate payment of the bonds on their purchase and cancellation before maturity.

The bonds may be converted into stock of the company for seven years after the first through run of cars and may be registered if desired.

We are authorized to offer these bonds for the present at 87½c and accrued interest.

CITY OF BALTIMORE.

$1,200,000 SIX PER CENT BONDS

OF THE

Western Maryland Railroad Company.

ENDORSED BY THE

CITY OF BALTIMORE.

The undersigned Finance Committee of the WESTERN MARYLAND RAILROAD COMPANY offer through the American Exchange National Bank

$1,200,000

of the Bonds of the WESTERN MARYLAND RAILROAD COMPANY having 30 years to run, principal and interest guaranteed by the City of Baltimore. This endorsement having been authorized by an act of the Legislature, and by ordinance of the City Council, was submitted to and ratified by an almost unanimous vote of the people. As an additional security the city has provided a sinking Fund of $200,000 for the liquidation of this debt at maturity. An exhibit of the financial condition of the city shows that she has available and convertible assets more than sufficient to pay her entire indebtedness. To investors looking for absolute security, no loan offered in this market presents greater inducements. These Bonds are offered at 85½ and accrued interest. Coupons payable January and July.

WILLIAM KEYSER,
JOHN K. LONGWELL,
MOSES WIESENFELD,
Finance Committee

East Tennessee, Virginia & Georgia Railroad

1st MORTGAGE 7 PER CENT BONDS,

REDEEMABLE 1900,

Interest Payable 1st of January and 1st of July, in the City of New York.

THE MORTGAGE IS FOR **$3,500,000** ON A ROAD 270 miles long, which has been in successful operation for many years. The lien is about

$13,000

per mile, which makes it, with few exceptions, the smallest issued on any road in the United States. It was created for the sole purpose of paying off the debt due the State of Tennessee, amounting to

$4,117,761 10.

An examination into this security will prove it to be one of the best ever offered in this market.

For terms and further particulars, apply to

GALLATIN NATIONAL BANK
NO. 86 WALL STREET,
Agent for the sale of the Bonds.

FIRST MORTGAGE

BONDS

OF THE

Nashville & Decatur RR.

This Mortgage is for

$2,100,000,

or only $17,500 per mile on an old and completed road, showing an established business, from local traffic mainly more than sufficient to pay its interest as it becomes due, with prospects of greatly enlarged receipts from new connections which are now in progress.

The Mortgage was created for the sole purpose of paying a debt due to the state of Tennessee on terms which would reduce the liability of the road about $600,000.

Of the bonds issued under said Mortgage $200,000 are held in Escrow to abide settlement of a claim of the United States; $800,000 have been purchased by the parties in interest, and the balance of $1,600,000 are offered for sale on favorable terms—the security, in judgment of the undersigned, being such as to entitle them to perfect confidence.

Drexel, Winthrop & Co.,

18 WALL STREET,

52 BROADWAY & EXCHANGE COURT.

FOR SALE.

TOWN BONDS

Of the State of Illinois, bearing interest at 6 per cent, for sale at 85 and interest for 8 per cent, 90 and interest for 10 per cent.

For particulars inquire of

PARKER & LAWRENCE,
BANKERS,
NO. 1 WALL STREET.

Financial.

MIDLAND BONDS

IN DENOMINATIONS OF

$100, $500 & $1,000.

THESE FAVORITE

SEVEN PER CENT GOLD BONDS

are secured by a first mortgage on the great Midland Railroad of New York, and their issue is strictly limited to $20,000 per mile of finished road, costing about $40,000 per mile. Entire length of road, 345 miles, of which 220 have been completed, and much progress made in grading the remainder.

RESOURCES OF THE COMPANY.

Full-paid stock subscriptions, about - - -	**$6,500,000**
Subscriptions to convertible Bonds, - - - -	**600,000**
Mortgage Bonds, $20,000 per mile on 345 miles -	**6,900,000**
Total - - - -	**$14,000,000**

Equal to $40,000 per mile.

The road is built in the most thorough manner, and at the lowest attainable cost for cash.

The liberal subscriptions to the Convertible Bonds of the Company, added to its other resources, give the most encouraging assurance of the early completion of the road. The portion already finished, as will be seen by the following letter of the President of the Company, is doing a profitable local business

NEW YORK, Dec. 2, 1870.

Messrs. George Opdyke & Co., New York:

Gentlemen: Your favor of the 1st inst., asking for a statement of the last month's earnings of the New York and Oswego Midland Railroad, is at hand. I have not as yet received a report of the earnings for November.

The earnings for the month of October from all sources were $48,709 17, equal to $584 510 04 per annum on the 147 miles of road, viz.: Main Line from Sidney to Oswego, 125 miles; New Berlin Branch, 22 miles.

The road commenced to transport coal from Sidney, under a contract with the Delaware and Hudson Canal Company, in the latter part of November. The best informed on the subject estimate the quantity to be transported the first year at not less than 250,000 tons, while some estimate the quantity at 300,000 tons. This will yield an income of from $375,000 to $450,000 from coal alone on that part of the road.

Taking the lowest of these estimates, it gives for the 147 miles a total annual earnings of $859 510 04. The total operating expenses will not exceed fifty per cent, which leaves the net annual earnings $449,755 02, which is $214,755 02 in excess of interest of the bonds issued thereon.

I should add that the earnings from passengers and freight are steadily increasing, and that, too, without any through business to New York. Yours truly,

D. C. LITTLEJOHN, President
N. Y. and O. Midland Railroad Co.

The very favorable exhibit presented in the foregoing letter shows that this road, when finished, with its unequaled advantages for both local and through business, must prove to be one of the most profitable railroad enterprises in the United States, and that its First Mortgage Bonds constitute one of the safest and most inviting railroad securities ever offered to investors.

For sale, or exchanged for Governments and other current securities, by

GEORGE OPDYKE & Co.,

NO. 25 NASSAU STREET.

FOREIGN CAPITAL AND THE SPRING TRADE.

The peace rumors from Europe have some influence in checking the movements towards monetary ease which have been developing of late. The argument is that we have a vast amount of foreign capital which, on the return of peace in Europe, would be attracted thither; and as this capital is now in active use in our monetary transactions, its sudden withdrawal would deplete the reservoir of the loan market, and could scarcely fail to occasion temporary disturbance. There is some plausibility in this reasoning. But its chief force depends on the suddenness of the anticipated draw upon us. If peace could be established without delay, and if the immediate result were the revival of public confidence in Continental Europe, then we might find it a difficult task to replace the vast amounts of floating capital which would be liable to be drawn away from us. There are several reasons for this. First, we have been building so many railroads and other wealth-consuming works during the past three years that the process of converting our floating capital into fixed forms has been allowed to go on with perilous rapidity. The consequence has been that the supplies of foreign capital have been depleted, and the reservoir has been in danger of sinking to too low a level. Now it is one of the most interesting problems of practical finance to determine the proportion which the floating capital of a great, thriving, rich nation should keep up in relation to its fixed capital; and in all active commercial countries, but especially here and in England, the most successful financial men owe much of that perspicuous foresight which is the secret of their success to their quick discernment of the precise point of time when the safe level has been overpassed and when the tide of floating capital is rising too high or sinking too low for the burden of obligations it is required to float. Secondly, there is no doubt, and the proofs have often been expounded in our columns, that in this country, during and since the war, the conversion of floating capital into fixed capital has gone on so rapidly as to bring us at several critical conjunctures to the very verge of a great financial convulsion. Thirdly, so great has been our recuperative strength, so rapid our material growth, so active our wealth-producing forces, and so rich our sources of industrial and commercial prosperity, that, notwithstanding our defective financial system, we have always passed each crisis with less of disaster than the most sanguine observer might reasonably have looked for. Fourthly, it has often been pointed out that the disastrous European conflict which has destroyed the work of centuries and kindled among kindred nations the fires of hate and terror and fury, which may be quenched in the blood of peoples yet unborn, there has been for us a compensative advantage. Transatlantic wars have not seldom been of use to this country. And now, as heretofore, one of these benefits has been that capital has flowed this way, and has come to us seeking safe investment at the very time when floating capital was to us the most urgent demand, the most imperative want, the resistless, dominating condition of our prosperity and solvency and progress. The vast accumulation of foreign capital which has invested itself here during the last six months has of course produced some evil as well as much good. To it we owe in part that derangement of the foreign exchanges which, in combination with other forces, has tended to depress inordinately the price of gold; and to it is due the apprehension which is torturing some of the most thoughtful bankers whether with returning peace we may not be compelled to refund to Europe a part of the floating capital she has lent us, and whether the monetary drain from this cause may be too sudden or two large for us to meet it, without more or less of inconvenience and trouble in our loan market.

It is for us a coincidence of no small value that this question did not obtrude itself on the public mind until our periodic stringency was over, and until our supplies of capi-

Digitized by Google

tal and currency had begun to flow back from the interior to the financial centres. Every week for some months to come will strengthen our power to meet such a drain as is suggested; and a demand on us which a month or two ago might have precipitated a monetary spasm and heralded a financial panic, would now raise scarcely a ripple on the smooth face of the mobile current which supplies the loan market.

Moreover, if contrary to expectation peace should be established to-day all accessible evidence shows that financial confidence will be slow to return, and till this confidence is re-established capital will be very loth to seek investment among the smoking ruins of devastated fields and cities, or wherever else it may be wanted to repair the ravages of war. And let this draw come when it will, England must needs feel its first effects. In London it will spend its earliest forces, and as capital earns much higher rates of interest here than there, we may safely calculate on a sufficient interval of previous warning to enable us to meet the foreign demand for the capital now lending in our money market.

On the whole, then, we infer that the apprehension which has made itself visible here of late is premature, and that we need not look for any such monetary derangement from the cause suggested, as can seriously interfere with the development of the spring business which is opening upon us with so much of promise, activity and hope.

MR. BOUTWELL AND FISCAL REFORM.

The successful management of the Treasury depends much on a permanent policy and a due adjustment of the fiscal system to the plan of expenditures decided upon by Congress. This fundamental principle of finance is too often forgotten by the advocates of fiscal reform. On Wednesday, the Committee of Ways and Means listened to an able argument from Mr. Boutwell on this subject directed against the repeal of the Income tax, the revenue from which this year he says will be too large to be given up without destroying the adjustment of revenue to expenses and throwing the Treasury into confusion. Thirteen or fourteen millions is certainly a very heavy loss from the already reduced income of the Treasury, and if it can afford to lose so much, the question is raised whether some other fiscal burdens cannot be chosen and taken off which are more widely mischievous, press more heavily on the poor, and are more obstructive to the material growth and productive power of the country. The income tax, however, has become one of the most unpopular imposts on the internal revenue list. And not without reason, for as now assessed and collected it is the most inquisitorial of all known taxes. It has enabled a few officials all over the country to put their neighbors under oath, and under this solemn sanction to investigate all the sources of their income, the results being published in the newspapers. It is difficult to imagine a more needless affront or a more gratuitous outrage to the self-respect, the honorable independence and the personal dignity of a whole nation. Under the stupendous pressure of a civil war, the perils which threaten national existence, and the patient submission to executive power which is usually developed before great public dangers, inquisitorial taxes are gladly submitted to; but with the return of peace the time soon comes when such taxation becomes too unpopular and too galling to be endured. But it must be remembered that if the method of collection and assessment were incapable of being so modified as to accord with the genius of a people of high spirit and liberal institutions, the income tax could not have survived so long either here or in England. To throw light on some of the arguments for and against the income tax, and to show the extent and direction of the pressure from which its repeal would relieve our citizens, we have condensed in a tabular form the official statements of Internal Revenue showing the number of persons who for a series of years have paid the tax, and the aggregate amount of the revenue from this source for each year. The table is subjoined:

NUMBER OF PERSONS PAYING UNITED STATES INCOME TAX 1867 TO 1870.

Paying	1867.	1868.	1869.	1870.	Average of 4 years.
$20 or less	101,219	100,558	107,977	112,424	105,550
Over $20 and under $50	68,680	55,949	69,184	68,501	65,578
Over $50 and under $100	40,899	38,957	41,196	40,484	40,449
Over $100 and under $500	46,055	51,188	45,002	44,496	46,685

These figures are very suggestive. Besides other obvious facts they show that the income tax has been collected from less than 280,000 persons, who have borne the whole burden, the rest of the nation going free. These taxes were paid under the act of 1867, which exempts $1,000 of income. The new law of July, 1870, extends the exemption to $2,000 of income. Hence there will be a further easing of the pressure, and the number of tax payers will be reduced to less than 100,000, while the probable revenue brought into the Treasury is variously estimated at 12 to 16 millions, with a cost for collection of not more than half a million. It is further urged by Mr. Boutwell that the persons who pay this tax are the richer class, who are not only best able to pay, but who are less heavily taxed in proportion to their means than the middle classes of the community—the citizens of small capital, who are the chief organizers of labor, and the men most liable to suffer under the frequent derangements of industry and convulsions of business incident to a paper money system. Such are the chief arguments of the Secretary of the Treasury, and we must confess that they have considerable weight. On behalf of repealing the tax, General Pleasonton, the new Commissioner of Internal Revenue, has written a letter to the committee, which was laid before the House of Representatives on Thursday, on which day the Senate bill repealing the income tax was passed by a vote of 26 to 25. Mr. Pleasonton urges no new argument. The following is the essential part of his letter:

"I regard the income tax as the one of all others most obnoxious to the genius of our people, being inquisitorial in its nature, and dragging into public view an exposition of the most private pecuniary affairs of the citizen. Such an exposition can only be compulsory effected through a maintenance of the most expensive machinery, and both the nature of the tax and the means necessarily employed for its enforcement appear to be regarded by the better class of citizens with more and more disfavor from year to year. It is furthermore most difficult of exact statement, and especially in large business examinations and where long periods of time are involved in extended commercial affairs. There is some question as to its constitutionality, but as to that I express no opinion. The amount derived from that service has, under the legislation already had, been greatly diminished, and I am so well satisfied that the evils more than counterbalance the benefits derived from its longer retention, that I recommend its unconditional appeal.

The whole subject was, of course, referred back to the Committee, who will present their report to the House in a few days. It is generally supposed that this report will be in favor of repeal, though the Committee are about evenly divided, and there will almost certainly be a minority report advocating the retention of the tax, on the principle of fiscal adjustment. Seldom has it happened in the history of this country that we have had a conflict of opinion so decided and so important as in this case between the Secretary of the Treasury and the head of a subordinate bureau. On account of the paramount importance of fiscal harmony, and the brief period since General Pleasanton took office, his opposition to the policy of the Treasury is the more conspicuous. Perhaps under the circumstances the course adopted

Digitized by Google

will be for the XLIst Congress to leave the whole question to its successor. A moribund legislative assembly may shrink from the responsibility of deranging a newly adjusted fiscal system and cutting off an important source of revenue by repealing a tax which has only six months ago been modified and made so much more tolerable and easy to bear than it is in England, where the methods of assessment are so perfect that for a quarter of a century the people have paid it without any such serious discontent as was evoked here a year or two ago under the old tax law.

The chief cause of this discontent among us was rather the vexatious and inquisitorial methods of levying the tax than the large amount or the wide pressure of its burden. The oaths it administers caused frequent perjury, and the publicity given to the returns, while it oppressed and annoyed the honest citizen, gave swindlers the chance to win by false returns a consideration in society and a credit with the public, which were sometimes used to plunder the too confiding victims. If there should be no repeal of the Income tax at present, we must at least have a reform in the methods for collection. Especially let the assessors' oaths be abolished. The demoralization which these frequent adjurations have caused in the republic are too wide-spread and strike too deeply at the vitals of our national organism to be contemplated without grave apprehension. So mischievously common has the practice of swearing a witness become among us that even the Special Commissioner of Revenue, when collecting a few facts for his report, is declared to have required each man to verify his evidence by a solemn oath. By all means let us abolish all unnecessary taking of oaths, in every department of our revenue system. And we may as well begin the reform in connection with the income tax. Other similar reforms will follow when once the example is started. A second change is the prohibition of publicity. To have stopped the publication of the income lists in the newspapers is one step in the right direction. But this is not enough. The lists might be kept secret instead of being open to the public inspection of idle curiosity or meddlesome frivolity as now. It was formerly objected that this publicity is needful to secure accurate returns of income. This objection is refuted by facts. The lists have been notoriously inaccurate under our false and mischievous system, and the returns are much less satisfactory and fair than those of England, where no oath is required and no publicity is allowed. If Congress, during this session, can do nothing for the repeal of the income tax, let them at least put the brand of their disapproval on the two evils. which have been grafted on our income tax system, and have not only impaired its popularity and its productiveness to the Treasury, but have caused it to demoralize and degrade our people.

PRICES OF MERCHANDISE.

In the table which follows, a comparison is made of the prices of the principal articles of commerce in the New York market about the third of January of each of the past eight years. Where there is a range in the price we give the highest:

TREASURE MOVEMENT AT NEW YORK FOR EACH MONTH OF 1870.

The general movement of coin and bullion at New York in each month of the year 1870, and the totals for the whole year, are shown in the table below. A brief explanation of the method in which these figures are compiled, and of the precise meaning of the several column headings will enable the most casual reader to understand them thoroughly, and to see at a glance how large an amount of information in regard to the specie movement is here brought together.

The first and last columns simply show the amount of specie in New York City Banks and Sub-Treasury, on the Saturday nearest the beginning of each month. It is necessary to take this date, as the bank statements are issued once a week only, on Saturday. The second column shows the receipts of all kinds of gold and silver from California, Oregon, Nevada, &c., as nearly as they can be ascertained. It is well known that the whole bullion movement from the mining districts of California and the other western country has changed since the opening of the Pacific Railroad; previous to that event nearly the whole production was reported at San Francisco, and was shipped thence by steamer to New York and other ports, whereas now, a very large proportion of the gold and silver obtained from the mines comes direct to New York overland without going to San Francisco. As no precise record of these numerous shipments is preserved, it is necessary to make an approximate statement of them from the best information obtainable, and from the estimates of those parties connected with the specie movement, as transporters or receivers, whose opinions upon the subject are of most value. The overland shipments from San Francisco are definitely known; the total amount from all points west, during July and August, 1870, were accurately kept for us by the courtesy of the agent of Wells, Fargo & Co.'s Express, at Omaha, and with these *facts* and other information as to receipts by some prominent consignees in New York, and from the Express Companies, it may be assumed that the figures given below show very nearly the exact extent of the overland movement.

The columns of imports and exports are Custom House figures, the only authority on the subject.

Digitized by Google

The columns headed "From all other sources and hoards," on the one side, and "Returned inland and to hoards," on the other side, simply represent the result of the month's movement, showing what has been received on, or withdrawn from, our market, that cannot be accounted for by the known receipts, exports, and balances. "Aggregate accessions," "Total supply," and "Total withdrawn" are merely additions of previous columns.

With these explanations the table is presented to our readers as the most complete exhibit of the New York specie movement anywhere published, and with the accompanying totals of previous years for comparison, an invaluable record in this department of Finance:

1870.

HANNIBAL AND ST. JOSEPH RAILROAD.

The affairs of the Hannibal and St. Joseph Railroad Company are of more than usual interest at the present time, on account of the important fluctuations which have lately occurred in the price of its stock, and from the publication of a pamphlet by a stockholder criticising severely the management of the road, followed recently by the directors' report containing a history of the operations of the Company during the seven years ending with the 31st of August, 1870.

It is not necessary to inquire into the object or purpose with which pamphlets, circulars, or newspaper articles criticising the affairs of any particular corporation may be published. No doubt it is true that in many cases they are issued for the purpose of affecting the price of stocks, either favorably or unfavorably, and with that purpose the public may have no particular sympathy; but so far as these criticisms have the effect of drawing attention to the financial management of railroad, insurance, or other companies we are decidedly in their favor, and the directors themselves of every well managed company will be glad to have public attention directed to its affairs, and receive the commendation which their ability and integrity deserve. The pamphlet referred to was issued by Mr. John Bailey, who has commenced a suit against the Company to compel the payment of dividends upon his preferred stock, share and share alike with the common stock, over and above the seven per cent per annum which has already been made on the preferred.

First—The declaration of dividend was made on the 29th of June, as follows:

BOSTON, June 29, 1870.

At a meeting of the Board of Directors of the Hannibal and St. Joseph Railroad Company, held this day, on motion of M. N. Thayer, seconded by Wm. H. Neilson,

"Voted, That whereas the earnings of the Road for six months ending July 1st, 1870, are sufficient for the declaration of a dividend, all prior earnings having been applied to the improvement, maintenance and working of the road,

"That there be distributed to the holders of preferred stock of record July 31st, 1870, 7 per cent. upon the amount of said stock, payable August 15th, 1870, being the amount of preference to which they are entitled for the year 1870, as per the provisions of the indenture of April 1st, 1863; and that there be paid to the holders of the common stock of record July 31st, 1870, a divipend of 3½ per cent., payable August 15th, 1870, for the six months ending July 1st, 1870; and that the earnings of the road for the remaining six months be first applied to pay the further dividend of 3½ per cent. on said common stock, and that the books be closed from the 1st to the 16th day of August, 1870, inclusive.

"By order of the Board of Directors.

R. S. WATSON, Treasurer."

It is objected to the dividend thus declared that it is not in conformity with the terms of the indenture or deed of trust creating the preferred stock, the words of which are as follows:

And said Corporation covenants and agrees that said preferred stock shall be entitled to a dividend of seven per cent. from the net earnings of said road, in each year, whenever a dividend of said net earnings shall be made, before any dividend shall be declared upon other unpreferred shares of the said Corporation. And to an equal dividend with said other shares, in the net earnings of said Corporation, beyond said seven per cent., but shall at no time be entitled to an accumulated dividend (in case a dividend shall fail to be made in any one or more years, or, if made, be insufficient to pay said seven per cent) in any subsequent division of said net earnings, but shall be entitled only, in that event, to said seven per cent and to share in the surplus earnings as aforesaid; and furthur said Corporation covenants and agrees that dividends of said net earnings shall be made at least annually, if the profits of the Corporation will permit, after applying such sums as shall be found proper to maintain the road and provide for working the same to the best advantage.

A further objection is made that the dividends are not declared for the *fiscal year*, which has always terminated August 31st, and that as the preferred stock is first entitled to *seven per cent. per annum*, the termination of the year is important.

A third objection is made that while the dividend, amounting to $552,489, was declared out of *earnings for the six months ending July 1st*, 1870, the net earnings for the whole year ending August 31st, 1870, as shown by the annual report were only $268,398.

Second—In the second place, Mr. Bailey criticises the management of the company's affairs, and charges, substantially, that the directors have not shown integrity in their official position, but have really been working the road for the benefit of other connecting lines in which they have a greater interest. In support of this position it is alleged that five directors, constituting a controlling majority of the board, held altogether (as shown by the stock registers at the election) only 121 shares of stock out of 92,031 shares, the total capital; that the building of the Kansas City and Cameron branch and the Quincy and Palmyra railroads were bad investments for the Hannibal and St. Joseph company; that the stock and debts of the latter have been largely and unnecessarily increased between 1863 and 1870; and in short, that the road has been managed with a deliberate purpose on the part of the directors of making it subsidiary to other lines in which they are more largely interested.

In regard to the power to issue stock, the following law is quoted from the statutes of Missouri, approved March 4, 1869:

"AN ACT TO AUTHORIZE THE HANNIBAL AND ST. JOSEPH RAILROAD COMPANY TO INCREASE ITS CAPITAL STOCK."

"SECTION 1. For the purpose of providing a fund to reimburse the stock holders of said company, for such amounts as may have been or may hereafter be expended in improving the track and roadbed and in equipping the road of said company, over and above the amount of their stock, and also of enabling said company to retire its obligations to the State of Missouri and redeem and deliver to the State the bonds issued on account of said company, and also to discharge such other liabilities as it may be enabled to pay; it shall be competent and lawful for the Board of Directors of said company, from time to time, as may be found expedient, to increase the capital stock of said company to such an amount as in the aggregate shall be equal to the cost of said road and equipment and improvements: Provided that such increase, together with the existing stock, shall in no event exceed the cost of said property.

"SEC. 2. The Board of Directors of said company shall have the right to dispose of such increased stock by distributing it *pro rata*, in proportion to their stock in said company, among the stockholders of said company—to be paid for in money—at such time and in such manner as the board may direct; or, may sell the same in the market in such a manner, and at such times, and upon such terms as shall by said Board of Directors be deemed best for the interests of said company."

ANNUAL REPORT OF THE COMPANY FOR THE SEVEN YEARS ENDING AUGUST 31, 1870.

First: In regard to the declaration of dividends which is contested in the courts, it will be observed that the point is simply

Digitized by Google

one of law. On the one side it is insisted that dividends must be declared in accordance with the indenture or trust deed creating the stock. The Directors on the other hand refer to a circular containing a plan of re-organization, &c., which was circulated among stockholders and signed by a majority of them before the indenture was made, and intimate that the terms of this circular should govern the declaration of dividends, as the indenture was intended to contain the same provisions. Whether the proposals thus circulated and signed, or the trust deed subsequently executed, shall control, is a question for the courts to decide. There is, however, one curious point to be noticed here, namely, that both parties claim that the words in the *certificates of preferred stock* favor their construction. Those words are that their holders shall "receive all the net earnings of said Company which may be divided pursuant to said indenture, in each year, up to $7 per share, and to share in any surplus beyond $7 per share which may be divided upon the common stock?"

The meaning here would seem to turn almost entirely upon the punctuation, and another case may possibly be added to those already recorded in the law books, in which vast interests have hung upon the placing of a comma.

Second: In regard to the general assertions made against the management of the Company's affairs, a report of operations for seven years past is the proper answer to be made by a board of directors; and our readers, after an examination of the figures from the report which follows, will be able to draw their own conclusions as to whether the road has been well or badly managed.

FINANCIAL CONDITION AUGUST 31, 1863 AND 1870.

	1863.	1870.	Increase.	Decrease.
Number of miles of road	207	276	69	....
Common stock	$1,906,000	$4,151,700	$2,251,700

1868	491,504	.....
1869	.....	396,120
1870	366,398	.....
Total	$1,176,960	$1,074,981

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks for the week ending Jan. 27, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Kentucky— Springfield	The First Nat Bank (new bank)	The Importers' and Traders' National Bank of New York, approved.
Wisconsin— Boscobel	The First Nat. Bank (new bank)	The National Exchange Bank of Milwaukee, Wis., approved.
Tennessee— Nashville	The First National Bank	The Third National Bank of New York, approved in place of the Fourth National Bank of New York.

New National Banks.

List of National Banks organized during the week:

Official No.

1,774—The State National Bank of New Orleans, La. Authorized capital, $500,000; paid in capital, $500,000. Samuel H. Kennedy, President; Charles L. C. Dupuy, Cashier. Authorized to commence business Jan. 20, 1871.

1,775—The Gallatin National Bank of Shawneetown, Ill. Authorized capital, $250,000; paid in capital, $250,000. Orval Pool, President; H. B. Powell, Cashier. Authorized to commence business Jan. 25, 1871.

1,776—The First National Bank of Osceola, Iowa. Authorized capital, $50,000; paid in capital, $30,000. H. C. Sigler, President; William Christy, Cashier. Authorized to commence business Jan. 26, 1871.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in dry goods, but there is a decrease in general merchandise. The total imports amount to $5,590,534 this week, against $5,640,792 last week, and $3,927,254 the previous week. The exports are $5,134,499 this week, against $4,607,757 last week, and $4,774,187 the previous week. The exports of cotton the past week were 14,182 bales, against 16,825 bales last week. The following are the imports at New York for week ending (for dry goods) Jan. 20, and for the week ending (for general merchandise) Jan. 21:

Digitized by Google

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,281,490	$1,369,336	$1,571,194	$2,045,948
General merchandise	1,232,945	4,379,002	2,786,324	3,544,586
Total for the week	$2,514,435	$5,748,338	$4,357,518	$5,590,534
Previously reported	7,043,554	3,537,513	4,552,895	5,640,792
Since Jan. 1	$9,557,989	$9,285,851	$8,910,413	$11,231,326

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending January 24:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$3,269,328	$3,080,908	$2,696,806	$5,134,499
Previously reported	10,091,381	7,991,016	8,156,050	13,569,683
Since Jan. 1	$13,360,704	$11,071,919	$10,852,856	$18,704,182

The value of exports from this port to different countries (exclusive of specie) since January 1, compared with the corresponding time of last year, is shown in the following table:

To	Since Jan. 1, 1871.	Since Jan. 1, 1870.
Great Britain	$11,239,645	$5,543,563
France	1,743,425	458,103

1869	150,905	1867	123,388

NATIONAL TREASURY.—The following forms present a summary of certain weekly transactions at the National Treasury and Custom House.

1.—Securities held by the U. S. Treasurer in trust for National banks and balance in the Treasury:

Week ending	For Circulation.	For U. S. Deposits.	Total.	Bal. in Treasury.—Coin.	Bal. in Treasury.—Currency.	Coin certificates outst'd'g.
Dec. 24	345,874,600	15,819,500	361,694,100	.....	.....	.....
Dec. 31	346,288,700	15,819,500	362,649,500	.....	.....	.....
Jan. 7	346,830,000	15,819,500	362,649,500	100,574,511	25,150,028	27,606,500
Jan. 21	348,367,200	15,719,500	364,086,700	101,823,000	26,294,000	30,950,000

2.—National bank currency issued (weekly and aggregate), in return for bills destroyed and mutilated bills returned (weekly and aggregate) with the amount in circulation at date:

Week ending	Notes issued for ret'd—Current week.	Notes issued for ret'd—Aggregate.	Mutilated not burned—Current week.	Mutilated not burned—Aggregate.	Notes in Circulation.
Dec. 24	769,300	33,737,095	545,800	34,820,568	304,612,609
Dec. 31	249,520	33,686,615	241,870	35,662,438	304,956,849
Jan. 7	338,240	34,054,855	233,200	35,295,638	305,209,269
Jan. 21	391,920	34,986,115	406,100	36,194,638	306,288,567

3.—Fractional currency received from the Currency Bureau by U. S. Treasurer, and distributed weekly; also the amount destroyed, and legal tenders distributed:

Week ending	Fractional Currency.—Received.	Fractional Currency.—Distributed.	Fractional Currency.—Destroyed.	Leg. Ten. Distrib'd.
Dec. 24	678,500	557,011	560,074	6,688,848
Dec. 31	445,500	760,000	447,100	1,807,000
Jan. 7	682,500	234,897	407,600	642,424
Jan. 21	653,000	704,366	719,100	1,672,974

Treasure Movement in San Francisco.—The following account of the receipts and shipments of coin and bullion at San Francisco in the year 1870 is from the annual statement of *The Commercial Herald and Market Review:*

RECEIPTS OF TREASURE.

The following table comprises the receipts of Treasure in this city, through Wells Fargo & Co.'s Express, during the year 1870

FROM THE NORTHERN AND SOUTHERN MINES.

1870	Silver Bullion.	Gold Dust.	Coin.	Totals.
Total 1870	$14,152,984	$17,762,131	$6,487,037	$38,402,152
do. 1869	not sep'td.	not sep'td.	11,572,594	44,045,445
do. 1868	not sep'td.	not sep'td.	6,620,897	45,232,940
do. 1867	not sep'td.	not sep'td.	4,812,787	45,404,770

FROM THE NORTHERN COAST.

1870	Silver Bullion.	Gold Dust.	Coin.	Totals.
Total 1870	.....	$3,380,566	$532,901	$3,913,467
do. 1869	not sep'td.	not sep'td.	200,397	2,958,458
do. 1868	not sep'td.	not sep'td.	728,851	2,936,955
do. 1867	not sep'td.	not sep'td.	1,896,439	3,801,489

FROM THE SOUTHERN COAST.

1870.	Silver Bullion.	Gold Dust.	Coin.	Totals.
Total 1870	.....	$399,888	$844,548	$1,244,436
do. 1869	not sep'td.	not sep'td.	227,000	2,282,571
do. 1868	not sep'td.	not sep'td.	557,050	2,304,060
do. 1867	not sep'td.	not sep'td.	1,096,440	2,391,341

The receipts of Treasure from all sources, through regular public channels, during the past twelve months, as compared with the same period in 1869, have been as follows:

	1869.	1870.
From Northern and Southern Mines	$44,045,445	$38,402,152
Coastwise North and South	5,241,029	4,472,594
Imports, Foreign	6,023,677	5,466,883
Totals	$55,310,151	$48,341,629

EXPORTS.

The following table shows the value and destination of Treasure shipments from this Port during the past sixteen years, from 1855 to 1870, inclusive:

Years.	Eastern Ports.	England.	China.	Panama.	Other Ports.	Totals.
1855	$28,730,564	$5,182,156	$889,675	$231,207	$128,129	$45,161,731
1856	39,895,294	8,666,289	1,308,852	253,268	573,732	50,697,434
1857	35,531,778	9,347,743	2,993,264	410,929	692,978	48,976,692
1858	35,891,236	9,265,739	1,916,007	299,265	175,779	47,548,026
1859	40,146,437	3,910,930	3,100,756	279,949	302,390	47,640,462
1860	35,719,296	2,672,936	3,374,680	300,819	258,185	42,325,916
1861	32,628,011	4,061,779	3,541,279	349,769	95,920	40,676,758
1862	26,194,035	12,950,140	2,660,754	434,508	322,324	42,561,761
1863	10,389,330	28,467,256	4,206,370	2,503,296	505,667	46,071,920
1864	13,316,122	34,436,423	7,888,973	378,795	686,888	56,707,201
1865	20,583,390	15,432,639	6,963,522	1,224,845	1,103,832	45,308,227
1866	29,244,891	6,532,208	6,527,287	511,550	1,548,457	44,364,393
1867	23,355,903	5,841,184	9,031,504	372,552	3,075,149	41,676,792
1868	21,468,800	5,312,979	6,193,995	640,000	1,828,621	35,444,395
1869	12,459,813	11,841,812	6,487,445	658,182	5,839,865	37,287,117
1870	13,443,295	9,790,631	5,496,856	255,497	3,996,861	33,983,140
Totals	$428,998,195	$173,712,844	$72,581,219	$9,104,431	$21,034,776	$705,431,895

It will be seen that our Treasure exports to eastern ports were $983,482 more than in 1869, while those to England decreased $2,051,181; also to China and Panama, $1,393,274; to other ports, $1,843,004.

Comparative description of our exports of Treasure for 1870 and 1869:

	1870.	1869.
Gold bars	$8,345,549	$13,575,239
Silver bars	11,968,477	11,599,758
Gold coin	9,131,923	8,091,644
Mexican dollars	3,492,606	3,697,028
Gold dust	30,801	35,237
Legal tender	13,284	224,221
Silver coin	500	64,000
Totals	$32,983,140	$37,287,117

MINT STATISTICS.

The coinage at the Branch Mint in this city for the year 1870 compared with that in 1867, 1868 and 1869 as follows:

	1867.	1868.	1869.	1870.
January	$124,000	$97,000	$467,000	$1,660,000
February	1,022,000	640,000	185,000	985,000
March	978,535	575,000	743,000	2,155,000
April	1,895,000	710,000	1,579,000	1,330,000
May	2,505,000	714,000	985,000	2,083,000
June	1,420,000	922,000	1,348,000	2,106,000
July	1,152,000	2,355,000	1,040,000	120,000
August	2,380,000	1,465,000	689,500	2,370,000
September	1,989,000	2,455,000	2,550,000	2,030,000
October	2,361,000	2,415,900	1,669,300	1,875,000
November	2,260,000	2,595,000	1,648,000	1,965,000
December	1,284,000	2,442,000	1,459,750	1,676,000
Totals	$19,370,535	$17,365,000	$14,363,550	$20,355,000

The amount of coin turned out by the branch mint in this city during the year 1870 has never been exceeded but twice, viz: in 1855 and 1856. In the former of these years the coinage amounted to $21,121,752, and in 1856 to $28,516,147. The coinage for 1870 is $5,991,450 in excess of that for 1869. When the new building, now in process of erection, shall have been finished, greatly enlarged and needed facilities will be available, and the work can be prosecuted with far more dispatch, regularity and less waste. The entire coinage of our branch mint since its organization in 1854 has been $291,877,163.

Erie Railway.—The annual report of the Erie Railway Company for the year ending Sept. 30, 1870, has been made to the State Engineer at Albany. The following are the characteristics of the report:

Length of the road—Jersey City to Dunkirk...miles..	459
Length of road laid	459
Length of doble track, including sidings	389¾
Length of branches owned by the Company laid	364¼
Length of double track on same	60
Weight of rail per yard on main track	64 to 70 lbs
Number of engine-houses and shops	40
Number of engines	440

Digitized by Google

Number of first-class passenger cars, rated as eight-wheel cars	230
Number of second-class and emigrant passenger cars, rated as eight wheel cars	54
Number of baggage, mail and express cars, rated as eight-wheel cars	71
Number of freight cars, rated as eight-wheel cars	8,840

RATE OF FARE FOR PASSENGERS.

First-class through passengers	2.05 cents
do. way passengers	2.73 do.
Emigrant through passengers	1.22 do.
do. way passengers	1.47 do.

THE EXPENSES OF MAINTAINING THE ROAD.

Repair of road bed and railway, excepting cost of iron	$1,972,947
Cost of iron used in repairs	1,141,480
Repairs of buildings	247,140
Repairs of fences and gates	44,392
Taxes on real estate,	283,732
Total	$3,689,698

Of the above total $996,217 were allotted to passenger transportation, and $2,693,476 18 to freight transportation.

EXPENSES OF REPAIRS OF MACHINERY.

Total	$2,601,691

Of the above, $700,034 87 were allotted to passenger transportation, and $1,901,666 18 to freight transportation.

EXPENSES OF OPERATING THE ROAD.

Office expenses	$245,982
Agents and clerks	1,056,701
Labor—loading and unloading freight	581,575
Watchmen and switchtenders	207,372
Wood and water station attendance	39,944
Conductors, baggage and brakemen	966,049
Enginemen and firemen	945,653
Fuel, cost and labor of preparing for use	992,896
Oil and waste for engines and tenders	146,767
Oil and waste for freight cars	27,981
Oil and waste for passenger cars	5,962
Loss and damage of goods	164,189
Damage for injuries of persons	36,972
Damage to property	9,363
General superintendence	167,280
Contingencies	187,794
Total	$5,781,696

Of the above, $1,609,286 89 were allotted to passenger transportation, and $4,172,339 31 to freight transportation.

STATEMENT OF THE EARNINGS FOR THE YEAR.

From passenger trains	$3,968,899
From freight trains	11,983,574
From other sources	227,014
Total	$16,179,461

The above is without reference to the amount actually collected.

RECEIPTS FOR THE YEAR.

From passengers	$3,166,877
From freights	12,238,027
From other sources—	
Storage	6,778
Telegraph	35,951
Rents	75,953
Mails	107,805
Pavonia Ferry	85,535
Hire of cars	5,749
Operating sundry railroads	306,788
Total	$16,179,461

PAYMENTS FOR THE YEAR OTHER THAN FOR CONSTRUCTION.

Transportation expenses	$12,073,010
Hudson River Ferry	235,952
Operating telegraph	110,090
Interest on funded debt	1,646,628
Rents	1,089,351
Internal Revenue tax	83,414
Interest	264,048
Operating Twenty-third street Ferry	32,983
Operating sundry branches	250,360
Hire of cars	18,578
Sundries	238,573
Operating Atlantic and Great Western Railway	396,470
Total expenses	$16,471,483

COST OF ROAD AND EQUIPMENT.

For grading and masonry	$2,427,315
Telegraph	12,666
Superstructure, including iron	3,406,046
Passenger and freight stations, buildings and fixtures	1,342,799
Engine and car houses, machine shops, machinery and fixtures	1,827,613
Land, land damages and fences	512,104
Locomotives and fixtures, and snow plows	3,518,095
Passenger and baggage cars	914,083
Freight and other cars	4,008,468
Pavonia and Twenty-third street ferries	532,548
Engineering and agencies	55,443,905
Total	$73,945,587

STOCKS AND DEBTS OF COMPANY.

Stock subscribed	$83,536,910
Paid in, as by last report	78,356,910
Paid in of capital stock	83,536,910
Funded debt	23,398,800
Total amount	23,398,800
Funded and floating debt	23,398,800
Rate, per annum, of interest on debt	7 per cent.

Cleveland and Pittsburg.—At the annual meeting of this Company, held at Cleveland, Ohio, on the 4th inst., the following directors were elected; J. N. McCullough, Wellsville; G. W. Cass, Pittsburg; J. H. Devereux, R. F. Smith, Cleveland; Jay Gould, James Fisk, Jr., William M. Tweed, Peter B. Sweeney, L. D. Rucker, Hugh Smith, Henry Harley, New York; Thomas A. Scott, Philadelphia.

The gross receipts from the traffic of the road for year ending Nov. 30, 1870, have been—

From transportation of freight	$1,949,505
From transportation of passengers	693,144
From transportation of mails, express, &c.	100,294
Total gross earnings	$2,673,474

The operating expenses have been—

For account motive power and cars	$533,753
For account maintenance of way and structures	381,311
For account of transportation expenses	339,998
For account of general expenses	192,253
Total operating expenses	$1,536,310
Balance net earnings	$1,137,163

A comparison of these results with those of the previous year gives the following:

Increase in gross earnings	$262,797
Increase of operating expenses	79,661
Increase in net earnings	$183,136

The net income for the year is stated as follows:

Net earnings as above	$1,137,168
Surplus received from P. F. W. & C. Railway, account joint earnings (subject to future revision as per contract)	72,091
Total	$1,209,255

Deduct from this:

Mortgage, interest, &c.	$302,914
Lease of track P. F. W. & C. Railway	85,000
Sinking fund, net cost mortgage bonds, 1,900 retired	29,596
Total	417,510
Surplus	$791,74

Four dividends of 2½ per cent each have been paid during th year, $754,323.

There remains an unappropriated surplus, the credit of net earnings at the close of the fiscal year, of $221,925 19, as shown by the balance sheet hereinafter given, being a surplus of say $30,000 over the amount required to meet the next regular quarterly dividend.

The issue of capital stock, as shown in the foregoing, viz., $240,750, are accounted for as follows:

For conversion 2d mortgage bonds	$138,500
" " 3d " "	99,500
For exchange of fractional scrip, &c	2,750
Total issues	$240,750

A further reduction of indebtedness under the second and third mortgages has been made by conversion of bonds into capital stock, amounting in the aggregate to $238,000, as seen above.

Changes in the outstanding issues of bonds under the consolidated and sinking fund mortgage of 1,900, have taken place during the year as follows:

Bonds sold	$159,000
Retired in sinking fund	25,000
Increase during the year	$134,000

The total number of bonds executed under this mortgage remains the same as stated in the last annual report.

The following recapitulation illustrates the entire operations in these securities to the close of the year:

Total executed—1,350 bonds		$1,350,000
Bonds outstanding	$528,000	
Bonds retired in sinking fund and cancelled	87,000	
Bonds in hands of Farmers' Loan & Trust Co., Trustees	735,000	
		$1,350,000

The annual report says: In view of this past and prospective increase of tonnage with which the equipment is already overtaxed, and the docks at Cleveland overcrowded, your directors have authorized the construction or purchase of five hundred Gondola cars in addition to the present equipment, and the building of 1,400 feet additional dock at Cleveland. To meet the expense of these improvements, authority has been given to dispose of five hundred consolidated and sinking fund bonds at a limited figure.

The financial condition of the Company at the close of the year is set forth in the following

BALANCE SHEET.

Debit.

Construction	$8,852,688	
Equipment	2,284,466	
Machinery and tools	84,788	
Personal property	40,083	
Telegraph line	16,913	
Total construction and equipment		$11,278,687
Assets.		
As per foregoing statement, net amount		220,019
Total debt		$11,498,857
Credit.		
Capital stock	$7,482,225	
Scrip issues	12,363	
Total capital stock		$7,494,588
Second mortgage bonds	$790,500	
Third mortgage bonds	1,358,000	
Fourth mortgage bonds	1,096,000	
Scrip issues	8,843	
Mortgage bonds of 1900	528,000	
Total funded debt		3,781,343
Bills payable		1,000
Net earnings		221,925
Total credit		$11,498,857

NEW LOANS OFFERED IN NEW YORK.

The following statement shows the character, terms and circumstances of every loan now offered in the New York market:

State of Arkansas Bonds.—Seven per cent. bonds, endorsed by the Memphis & Little Rock Railroad Company. The State of Arkansas issues its bonds in aid of Railroads—ten thousand dollars per mile, for the payment thereof a special tax is collected annually for interest and sinking fund. The Memphis and Little Rock Railroad 138 miles long, is completed and in running order 120 miles. The unfinished section completed in December For sale at 70 and accrued interest, by Swenson, Perkins & Co., 80 Beaver street. For further particulars see advertisement.

Digitized by Google

East Tennessee, Virginia and Georgia Railroad.—This is a first mortgage seven per cent. bond, redeemable in 1900. The interest is payable Jan. 1 and July 1, in New York. The East Tennessee, Virginia and Georgia Railroad is 270 miles long; it commences at Bristol, on the boundary of Virginia, and runs to Chattanooga, with a branch from Cleveland to Dalton, Georgia, thirty miles long. The mortgage is for $3,500,000, being only $13,000 a mile, and has been created for the sole purpose of paying off the debt due to the State of Tennessee, amounting to $4,117,761 10. The proceeds of $2,500,000 of the bonds, together with the money the Company had on hand, will have paid the entire State debt, amounting to $4,117,761 10, and leave the Company without any floating liability, its debt diminished by $617,761 10, and with one million of bonds on hand. R. T. Wilson, Esq., is the President of the Company. These bonds are for sale by the Gallatin National Bank, 36 Wall street, New York, at 90 and interest. For other details see advertisement.

Elizabethtown and Paducah Railroad of Kentucky.—First mortgage eight per cent bonds, to the amount of $3,000,000, upon 185 miles of railroad from Elizabethtown to Paducah, Kentucky. Subscriptions to capital stock by cities, counties and individuals in bonds and cash amount to $3,095,000. Bonds are for $1,000. Coupon or registered, convertible for seven years; interest eight per cent, payable March 1 and September 1 in New York. Principal due in 1890. President, W. H. Dulaney; Secretary, A. A. Gordon, of Louisville. Loan offered at 87½ by Norton, Slaughter & Co., No. 41 Broad street; Wm. Alexander Smith & Co., No. 40 Wall street; Hallgarten & Co., No. 28 Broad street. For further particulars see advertisement.

Nashville and Decatur Railroad.—A mortgage for $2,100,000, or $17,500 per mile on an old and completed road. The mortgage is created for the purpose of paying a debt due to the State of Tennessee on terms which will reduce the liability of the road about $600,000. Messrs. Drexel, Winthrop & Co., 18 Wall street, are the Financial Agents. For other particulars see advertisement.

New York and Oswego Midland Railroad.—A first mortgage limited to $20,000 per mile on 345 miles of railroad between New York City and Oswego, forming with its connecting line in New Jersey, the Montclair Railroad a through route between the cities above named of 400 miles. The road traverses the interior counties of Oswego, Oneida, Madison, Cayuga, Onondaga, Cortland, Chenango, Otsego, Delaware, Sullivan, Ulster and Orange, in the State of New York, from which a large local business is expected. The citizens of the Midland counties have made subscriptions to its capital stock to the amount of about *six and a half millions dollars* The larger share of these subscriptions have been made by towns and cities in their corporate capacity, and for which they paid in town and city bonds bearing sever per cent. interest. These bonds are made by law exempt from local and municipal taxation, when held in any county through which the road passes, the Company have sold them at par and interest whenever they had occasion to use the proceeds, thus rendering the subscriptions for which they were given in payment equivalent to cash. The Company, therefore, commenced its undertaking with a paid up capital of about $6,500,000; 225 miles of road are now completed. The bonds are $100, $500 and $1,000, coupon or registered, bear 7 per cent. gold interest payable January and July in New York free of government tax, and run till 1894. Price, par. Messrs. Geo. Opdyke & Co, Financial Agents, 25 Nassau street. For further particulars see advertisement on another page.

Western Maryland Railroad Company.—An issue of $1,200,000 six per cent endorsed by the City of Baltimore. The bonds have 30 years to run, coupons payable, and as an additional security the city has provided a Sinking Fund of $200,000 for the liquidation of this debt at maturity. Price 87½ and accrued interest. The American Exchange Bank, New York, Financial Agents. For further particulars see advertisement.

Burlington, Cedar Rapids and Minnesota Railway Company.—This is a first mortgage of $6,600,000 upon 330 miles of railroad, between Burlington on the Mississippi River and Mankato in the State of Minnesota, at the rate of $20,000 to the mile, the mortgage covering also the Depot grounds, rolling stock, equipment and franchises of the Company. The road is arranged in three divisions—the first extending from Burlington to Cedar Rapids, a distance of 100 miles; the second, from Cedar Rapids to the State line, being 170 miles, and the third from the State line to Mankato, 60 miles. This road will therefore form, with the Minnesota Valley Road, and the Rockford, Rock Island and St. Louis Road, a direct and nearly straight line from St. Paul to St. Louis, a total distance of about 580 miles. The contracts for building are at the price of $15,000 per mile in bonds and $15,000 in stock; the Company reserves $5,000 per mile in bonds and $5,000 in stock for rolling stock, equipment, shops, station houses, &c. The mortgage is made to J. Edgar Thomson of Philadelphia and Charles L. Frost of New York. The bonds run fifty years from 1869; *are payable in gold coin*—are *convertible* at any time into the Capital Stock of the Company—and have the benefit of a sinking fund. They bear interest at the rate of seven per cent., payable on the first of May and November, *in gold coin*, free from Government tax, at the Agency of the Company, in New York, or in London. The bonds are offered by Messrs. Henry Clews & Co., 32 Wall street, at the price of 90.

Chesapeake and Ohio Railroad.—A first mortgage of $15,000,000 on a trunk line of railroad between the Atlantic coast in Virginia and the navigable waters of the Ohio River. The road is completed and in operation from Richmond to the celebrated White Sulphur Springs of West Virginia, 227 miles, and there remain but 200 miles (now partially constructed) to be completed, to carry it to the proposed terminus on the Ohio River, at, or near, the mouth of the Big Sandy River, 150 miles above Cincinnati and 350 miles below Pittsburg. A large number of laborers are employed and the work is expected to be completed by July, 1872. The bonds are coupon or registered, in denominations of $100, $500 and $1,000, interest payable January and July in New York and have 30 years to run. Price 90 and interest. Messrs. Fisk & Hatch are the Financial Agents, No. 5 Nassau street.

The Central Railroad of Iowa.—Mortgage of $3,280,000 upon a railroad 205 miles in length. The mortgage is made to the Farmers' Loan and Trust Company of New York. The bonds are for the respective amounts of $500 and $1,000 each. They bear seven per cent. interest, payable on the 15th of January and July in New York, have thirty years to run, and both principal and interest are payable in gold. The bonds have semi-annual coupons attached, Messrs. Jay Cooke & Co., New York, Philadelphia and Washington, are the Bankers and Financial Agents.

Evansville, Terre Haute and Chicago Railroad.—A first mortgage of $775,000 on 55 miles of railroad, extending from Terre Haute northerly to Danville, Illinois, forming part of a through route from Chicago to Terre Haute, Evansville, Nashville, and the South. Thirty-one miles are now in use for business. The local subscriptions to the capital stock of the Company are $450,000, payable in cash at par. Of this $300,000 has been paid in. The road is being built by Chauncey Rose, Esq., of Terre Haute, and his associates, who are the chief subscribers to the capital stock. The bonds are of $1,000, bear seven per cent in gold, payable May and November in New York, and run thirty years. They are offered at 90 by Messrs. Winslow, Lanier & Co., No. 27 Pine street, New York, the financial agents of the Company.

Lake Shore and Michigan Southern Railroad.—Consolidated mortgage sinking fund bonds, covering the whole line of road from Buffalo to Chicago. The purpose of the Company is to retire its present funded debt upon maturity into these bonds, leaving them eventually the only mortgage upon its valuable property. These bonds, payable July 1, 1900, are in two classes, viz: seven per cent coupon bonds of $1,000 each, interest in January and July; and registered bonds, interest payable quarterly, in January, April, July and October, both being payable at the Union Trust Company of New York. Price 97½ and accrued interest. Messrs. Robinson, Chase & Co., No. 18 Broad street, financial agents.

Louisville and Nashville Railroad—Consolidated seven per cent. bonds, interest payable April and October in New York. To obtain the funds for purchasing new lines, and to retire the present indebtedness of $1,747,000 at maturity, the Company has executed a mortgage to secure the payment of its bonds for $8,000,000. These bonds are for $1,000 each, payable 1898, and bear seven per cent. interest, and may be registered. Price 90 and accrued interest. Messrs. J. B. Alexander & Co., 19 Nassau street, and Messrs. John J. Cisco & Son, 59 Wall street, Financial Agents.

Memphis City Bonds.—An issue of $500,000, thirty years gold bonds of the City of Memphis, known as "funding bonds of 1870," for the purpose of funding a like amount of the due debt of the city, in exchange at par. Interest at six per cent, payable in gold, in New York, on the first of May and November. P. M. Meyers & Co., No. 24 Pine street, New York, and Messrs. McKim & Co., Baltimore, Md., are the financial agents.

Montclair Railway.—A first mortgage, at the rate of $30,000 per mile on 40 miles of road between Jersey City and Greenwood Lake. This road is a continuation of the New York and Oswego Midland and makes with that the through route from New York to Oswego. The road is leased by the New York and Oswego Midland Co., and the bonds also guaranteed by that Co. The bonds are coupon and bear 7 per cent., gold interest, payable semi-annually. Price par. Messrs. Leonard, Sheldon & Foster, 10 Wall street, Financial Agents.

Monticello and Port Jervis Railway.—A first mortgage of $500 000 on 25 miles of road from Port Jervis on the Erie railway to Monticello, Sullivan Co., New York. The capital stock paid up is $500,000. The bonds run 20 years and bear 7 per cent., in gold, coupons being payable quarterly in New York. Price 87 and accrued interest. Messrs. Davidson & Jones, 59 & 61 Wall street, Financial Agents.

Northern Pacific Railroad.—New 7.30 gold loan, secured by first mortgage on railroad and land grant. The road when completed will extend from Lake Superior to Puget's Sound. The road is now building from Lake Superior, across Minnesota, to the Red River of the North, 238 miles. The land consists of alternate sections reaching 20 to 40 miles on each side of the track, and extending from Wisconsin through portions of Minnesota, Dakota, Montana, Idaho, Oregon and Washington to Puget's Sound. By the terms of the mortgage the 7.30 bonds of the Company are receivable at par and accrued interest in payment for the Company's lands at their lowest graded prices; and in all cash purchases of land from the railroad 10 per cent discount will be made from the purchase price whenever the Company's first mortgage bonds are offered in payment. The registered bonds can be exchanged at any time for coupons, the coupons for registered, and both these can be exchanged for others, payable, principal and interest, at the London and American banking houses of Jay Cooke & Co., or at any of the principal financial centres of Europe. They are free of United States tax, and are issued of the following denominations: Coupons, $100, $500, and $1,000; registered, $100, $500, $1,000, $5,000 and $10,000. Both principal and interest are payable in gold at the office of Jay Cooke & Co., New York City—the principal at the end of 30 years and the interest, at the rate of seven and three-tenths per cent per annum, half yearly, first of January and July. Price, par. Messrs. Jay Cooke & Co. are the fiscal agents, New York, Philadelphia, Penn., and Washington, D. C.

New Haven, Middletown and Willimantic Railroad.—A first mortgage upon 52 miles of road between New Haven and Middletown, Conn.

The bonds are $500 and $1,000 each; have twenty years to run; bear interest at the rate of seven per cent. free of all taxes, with coupons payable in New York on the first of May and first of November, *and may be registered at the option of the holders.*

Price par, Messrs. Hatch & Foote Financial Agents, No. 12 Wall street, New York

ST. JOSEPH AND DENVER CITY RAILROAD.—An issue of $1,500,000 first mortgage eight per cent. gold bonds on a Railroad, commencing at St. Joseph, Mo., and extending west to Marysville, Kansas, a distance of 111 miles. This road is entirely completed and open to the public and the mortgage is at the rate of $13,500 per mile. The Company possesses the franchises and right of way from Marysville to the City of Fort Kearney, granted by the United States and the States of Kansas and Nebraska, together with a grant of land within twenty miles on each side of the road. The Company have commenced the construction of this line of Railway, and the whole is under contract. The bonds are $500 and $1,000—and run till 1899—interest being payable Feb. 15 and Aug. 15 at New York, London and Frankfort. Price, 97½. Messrs. W. P. Converse & Co., 54 Pine street, and Messrs. Tanner & Co., 11 Wall street, Financial Agents.

ST. LOUIS AND SOUTHEASTERN RAILROAD.—A first mortgage of $2,250,000, or $16,000 per mile, on 139 miles of road between St. Louis and Shawneetown, on the Ohio River, connecting there with a line to Madisonville, The road is 200 miles in length, including the Evansville division, all under construction. Ninety-one miles are completed and equipped. The bonds are convertible sinking fund, run till 1894, are payable in gold, and bear seven per cent interest, payable in New York, on the first of May and November, free from Government tax. Messrs. Geo. Opdyke & Co., Financial Agents, 25 Nassau street.

SOUTH AND NORTH ALABAMA RAILROAD.—A first mortgage of $22,000 per mile on a railroad between Montgomery, Ala., and Decatur, Ala., on the Tennessee River, 183 miles long. The bonds are endorsed by the State of Alabama, which has a first lien upon the road as security. They bear eight per cent., gold interest, payable in New York in January and July, and mature in 1890. Price 95. V. K. Stevenson & Son, No. 11 Pine street, financial agents.

WEST WISCONSIN RAILWAY.—A first mortgage of $4,000,000 on 154 miles of railroad, of which 120 are built, northwesterly from the Milwaukee and St. Paul Railroad. The mortgage covers road, &c., and 1,000,000 acres of land granted by Government. Bonds are coupons of $500 and $1,000. Land grant, sinking fund, bear seven per cent gold, payable January and July in New York, and mature in 1885. Price 90 and accrued interest. Messrs. Gwynne, Johnson & Day, No. 16 Wall street, and White, Morris & Co., No. 29 Wall street, New York, bankers and financial agents for the Company.

The Finances of Kentucky.—The following in regard to the finances of the State of Kentucky is taken from the Governor's message recently submitted: "During the fiscal year ending the 10th of October, 1870, the Commissioners of the Sinking Fund have redeemed and cancelled bonds of the Commonwealth amounting to $234,465. The entire State debt, exclusive of the school bonds, amounted upon the 10th of October, 1870, to $1,424,394. That portion of the debt not due is represented by the following bonds:

Bonds maturing in 1871	$340,000 00
Bonds maturing in 1872	230,000 00
Bonds maturing in 1873	319,000 00
Bonds maturing in 1874	136,000 00
Bonds maturing in 1875	20,000 00
Bonds maturing in 1876	2,000 00
Military bonds, bearing 6 per cent interest, due in 1895	309,300 00
Total	$1,425,394 00

"Our Sinking Fund resources to meet this indebtedness are:

Balance in the Treasury, the 10th of October, 1870	$403,805 31
Add amount belonging to the Sinking Fund, but not transferred	32,558 81
Add amount loaned by Sinking Fund to Kentucky River Navigation Company	10,000 00
Add 7,789 shares Bank of Kentucky stock at par	778,890 00
Add 400 shares Bank of Louisville stock at par	40,000 00
Add 260 shares of preferred stock of Louisville, Cincinnati and Lexington Railroad	26,000 00
Add 2,178 shares stock of Lexington and Frankfort Railroad, estimated at 50 cents	108,900 00
Add bonds of Louisville and Frankfort Railroad	74,519 50
Add turnpike road stock held by State in various turnpikes in Kentucky, amounting to $2,544,359 65—estimated at cost value	254,433 96
Add amount loaned by Commissioners of Sinking Fund under several acts of the Legislature to Revenue Department proper	815,159 98
	$2,539,297 46
From which amount deduct State debt outstanding the 10th of October, 1870	1,424,984 00
Total	$2,539,297 46
Leaves an excess of resources of Sinking Fund over State debt of	$1,114,903 46

"I have not included in this estimate the balance still due by the Government of the United States on advances made by Kentucky during the war, which, by the report of the Quartermaster General, is stated at $1,193,761 86. The revenue from all sources amounted to $924,662; add to which balance in Treasury Oct. 10, 1869, makes a total of cash resources of $996,750, or $85,888 less than the expenditures. This deficit was caused by extraordinary appropriations made by the Legislature, for which no provision was made at the time, and which, to the amount of $172,243 66, had been paid out of the revenue proper."

—We invite attention to the advertisement in another column of the Elizabeth and Paducah Railroad first mortgage convertible eight per cent bonds. This road connects by rail the important cities of Louisville and Paducah; 57 miles are completed and in successful operation. The Company have 4,000 tons of iron on hand, enough to complete the Eastern division to Greenville, a distance of 93 miles. Work on the Western Division is rapidly progressing, and the Company confidently expect to have nearly the entire road to Paducah finished during the present year. The capital stock of the Company amounts to $3,095,000, of which $320,000 are individual cash subscriptions, and $2,775,000 city and county twenty years seven per cent bonds. Of this latter amount the Company have sold for cash the $1,000,000 bonds subscribed by the City of Louisville, netting over $920,000. Over $1,000,000 of the county bonds have been sold and used with contractors at good prices. Under the Constitution of Kentucky the Legislature is prohibited from granting State aid to any work of internal improvement; and it is owing to this fact that the State finances are in such healthy condition, as shown by the following extract from the Governor's Message of the 5th of January, 1871: "It will be seen that the bonded debt of the State on the 10th of October, 1870, amounted to only $1,425,394. The amount of her sinking fund was $2,539,297 66. After deducting the State debt leaves the excess of resources of $1,114,903 46, to which amount must be added the amount due by the United States Government for advances made by Kentucky during the war of $1,193,761 86, showing a total excess of resources over debt of $2,308,665 32." There are but four completed lines of railway in the State, all of which are in successful operation and meeting promptly their obligations—namely, the Kentucky Central, the Louisville, Cincinnati and Lexington, the Louisville and Nashville and branches, and the Paducah and Gulf. These have all been chiefly built by Kentucky capital. A large amount of the first mortgage bonds of the Elizabethtown and Paducah Railroad Company have been sold to investors in Kentucky. At the low price at which these securities are at present offered we think they merit the consideration and attention of investors.

—The annual statement of the Mercantile Mutual Insurance Company of No. 35 Wall street will be found on another page. The principal facts shown in the statement for 1870 are as follows: Premiums outstanding December 31st, 1869, $289,484 38; premiums received during the year 1870, $1,042,025 11. Total premiums, $1,331,509 47. Premiums marked off as earned from January 1st to December 31st, 1870, $1,091,511 52; less return premiums, $61,736 97. Net earned premiums, $1,029,774 55. Paid during same period: Losses, expenses, commissions, and reinsurance, less salvages, $661,354 11. Cash paid to stockholders for interest, $81,844 00. Cash paid to dealers as an equivalent for the scrip dividends of Mutual Companies, $126,753 29. The assets of the company on the 31st of December, 1870, were $1,515,736 55. An interest dividend of three and one-half (3½) per cent., free of Government tax, will be paid. The officers are Messrs. Ellwood Walter, President; Archb. G. Montgomery, Jr., Vice-President; Alanson W. Hegeman, Second Vice-President; C. J. Despard, Secretary.

Atlantic Mutual Insurance Company.—The statement of the Atlantic Mutual Insurance Company for the year ending Dec. 31, 1870, has just been issued, and will be found at length in our advertising columns. The figures show that this remarkable company continues its course of prosperity. The premiums received on marine risks for the year were $5,270,190 09, and premiums on policies not marked off January 1, 1870, $2,155,723 64, making the amount of marine premiums $7,426,413 73. The premiums marked off for the year were $5,392,738 55; the losses paid during the same period were $2,253,590 39, and the returns of premiums and expenses $1,063,263 57. The assets of the company now reach the enormous total of $14,183,963 43. Six per cent interest on the outstanding certificates of profits will be paid to the holders thereof, or their legal representatives, on and after Tuesday, the 7th of February next. The outstanding certificates of the issue of 1867 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the 7th of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment, and canceled. Upon certificates which were issued (in red scrip) for gold premiums, such payment of interest and redemption will be in gold. A dividend of thirty-five per cent is declared on the net earned premiums of the company, for the year ending 31st December, 1870, for which certificates will be issued on and after Tuesday, the 4th of April next. The annual statement is always the best notice to the public of the position which this company occupies, and is a recommendation to shippers to seek their own interests in placing risks with the Atlantic Mutual. John D. Jones, Esq., whose name will always be identified with the history of most successful marine insurance in this country, continues at the head of the company, and the other officers also remain unchanged. Mr. Charles Dennis as first vice-president, Mr. William H. H. Moore as second vice-president, Mr. J. D. Hewlett as third vice-president, and Mr. J. H. Chapman as secretary.

The Grand Charity Ball—For the benefit of the *Nursery and Child's Hospital*, will take place at the Academy of Music on Thursday evening, February 2d. This ball, which has now been given annually for the past fifteen years, has become known as *par excellance*, the most select and fashionable ball given in New York. To those who have previously attended the charity balls, it is unnecessary to speak of them, but to those who have not we can say from personal knowledge that the spectacle alone is worth the price of a ticket, apart from the music, dancing and other entertainments, and the consideration of lending assistance to one of the best and noblest charities of this city. Tickets may be had of the managers, whose names appear in an advertisement in the daily papers; the price is five dollars.

—Attention is directed to the card of Mr. William C. Gilman, dealer insurance scrip and fire and marine insurance stocks. Marine insurance scrip is a very popular security with many investors and merchants, and Mr. Gilman being a prominent broker in this line, can buy or sell to advantage, or give any information in regard to them.

—The Farmers' National Bank of Virginia, Illinois, has a capital of $150,000; its redemption agencies are Ninth National Bank, New York, and Union National Bank, Chicago. John Robertson, Esq., is President, and John H. Wood, Cashier.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank, } London.
Messrs. Clews, Habicht & Co., }
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

Bankers and Dealers in Government Securities, }
No. 5 Nassau street, }
New York, Jan. 14, 1871. }

United States Five-twenty Bonds, if allowed to run until 1875, will pay but Four Per Cent. Gold on the investment at present market rates, while they are likely to be funded at a lower rate of interest than they now bear before that time.

The First Mortgage Bonds of the Central Pacific Railroad Company, at present market price, will pay nearly Seven Per Cent. in Gold on the investment, and cannot be called in or the interest reduced under twenty-five years.

A difference of from Fifteen to Twenty Per Cent. may be realized in exchanging Government Bonds for Central Pacifics, or saved in making new investments.

The safety and value of the First Mortgage Bonds of the Central Pacific Railroad Company are thoroughly established and universally recognized.

The value of the property, the immense and increasing revenues of the Company, and its able and honorable management, assure the security of the principal and prompt and regular payment of interest beyond question.

We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold and Coupons, execute orders in miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general Banking business.

FRIDAY EVENING, January 28, 1871.

The Money Market.—At the date of our last report on Friday 20th inst., the money market had just recovered from another speculative attempt to make money scarce and rates of interest exorbitant, and since that time the supply of loanable funds has been abundant at 6@7 per cent., with frequent exceptions at 5 on government collaterals. It is said that the funds locked up the previous week have not yet been returned to the regular channels of business through the same banks used in their withdrawal, but it is believed that they have been gradually returned in other ways, as there would seem to be no further object in withholding so large an amount and losing interest upon it. There seems at the present moment to be every prospect of an easy market for some months to come, as the flow of currency is now from the country, and no considerable return movement can be expected towards the North and West before the opening of navigation.

A conspicuous feature in the movements o fmoney at this centre, is the super abundance of national bank notes which occurs periodically, and occasions much annoyance and some loss to the banks. These notes are selling at ¼@½ per cent. discount as they cannot be used at the Clearing House, and in the absence of any practicable system of redemption the banks have more than they can dispose of. It seems futile to spend so much time in discussing the question of resumption of specie payments by the national banks, while we have as yet no arrangement for the redemption of their notes in legal tenders.

The lack of a system of redemption at some leading financial centre is now generally acknowledged to be the most notable defect of the National banking law, and it is difficult to account for the fact that Congress does not take some steps towards supplying this important deficiency by amendments to the law.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Jan. 21, 1871.	Jan. 22, 1870.	Jan. 28, 1869.
Loans and discounts	$270,853,791	$253,592,756	$264,954,619
Specie	28,520,495	39,154,003	28,864,197
Circulation	31,988,274	38,906,721	35,265,946
Net deposits	211,690,080	207,479,823	197,101,168
Legal Tenders	49,774,557	54,619,433	54,022,119

Commercial paper has been in good request at rather better rates, the abundant supply of loanable funds creating a good demand for the best names at 7@7½ and 8 per cent., while lower names sell from 8@12. The improving rates for commercial paper show a growing confidence in the soundness of financial affairs on the part of banks and other purchasers.

United States Bonds.—The tone of the market for Government securities has been very firm although the amount of business done can not be considered large. There has been a good demand from investors in this vicinity and in the country, and at times also some purchasing from the stock houses of the street. The fact seems to be that Government securities are gradually recovering to prices at which they formerly sold, and the feeling is gaining ground that the low prices at which they ruled during the latter part of 1870 were the result of temporary causes, so that a more settled feeling in regard to the funding law and the steadiniess of gold brings a return of confidence in these securities and renewed orders from investors. On Wednesday the Government purchased $1,000,000 of 5-20s, the total offerings amounting to only $2,197,500. The advance of the week is about 2 per cent. on 1881s, 1 per cent. on 5-20s of 1862, and ¼@⅜ on 5-20s of 1867.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Jan. 21.	Monday, Jan. 23.	Tuesday, Jan. 24.	Wednesd'y Jan. 25.	Thursday, Jan. 26.	Friday, Jan. 27.

State and Railroad Bonds.—State Bonds have been tolerably firm on most of the issues, with some heaviness at times on North and South Carolinas. There has been no important intelligence from the Southern States, at least none which seemed to have much effect upon the market, although we notice a law passed by the Tennessee legislature increasing the rate of taxation in that State, a step which is not less important as an indication of the

Digitized by Google

tone of feeling in regard to the debt, than in its actual results of raising the revenue.

In Railroad bonds the attention of the street has still been monopolized by the Pacific Railroad securities. Central Pacifics have been very firm at 90½@90¾, and Union Pacifics, after much fluctuation, close at 77½@77⅝ for firsts, 70@70½ for land grants, and 66@66½ for incomes. No statement was made of the proposed change in the management of the company which has produced such a remarkable advance in the prices of its securities, until today, when it was announced that Messrs. J. Edgar Thompson and Thomas A. Scott, of the Pennsylvania Central Road, together with two other prominent capitalists, would become directors of the road at the next election. This report is substantially the same that was made a few days ago, and is apparently well founded, though there may be further details yet to be made public.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Jan. 21.	Monday, Jan. 23.	Tuesday, Jan. 24.	Wednesd'y, Jan. 25.	Thursday, Jan. 26.	Friday, Jan. 27.

Railroad and Miscellaneous Stocks.—The Stock market was disturbed on Saturday the 21st inst. by a flurry in Reading occasioned by large orders to buy from a party who had been well known as an operator in this stock, but who failed to take the stock purchased, and this being thrown back upon the brokers caused several small failures and had the effect of temporarily depressing the whole market. The orders to buy in this city and Philadelphia were reported to be for upwards of 80,000 shares, and the decline in the stock was from 100⅜ to 97.

Since the slight depression above noticed the market has generally been strong and buoyant, assisted by an increasing rate in the money market and by a feeling of confidence in future prices. There has, indeed, been no period during the past six months when the prospect of an upward movement in the market seemed more probable—though the fulfillment of this prospect is liable to be defeated by numerous circumstances. The Union Pacific stock closes at 22½ against 23½ last week, after fluctuating between 20⅞ and 24 in the mean time. On the active list of speculative favorites, with a few exceptions, there has been an advance of from 1@3 per cent. as shown in the table below. Rock Island was very active to-day on considerable orders to buy, and sold up to 108½. Panama after selling down to 63½@63¾, reacted to 67@67½. A report of the Erie Railway for the year ending Sept. 30, 1870, shows the gross earnings to be $16,179,461, operating expenses, $12,073,010; total expenses other than construction, $16,471,483; capital stock, $83,586,910; funded debt, $23,398,800.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The Gold Market.—There has not been, in months, a more stagnant market, so far as the volume of business is concerned, than during the past week; the tone, however, is quite firm, and some transactions have been made with the anticipation of a rise in the price on the surrender of Paris, in consequence of a demand for export. On Tuesday there was but one price made during the day—110¾—an event which it is said has only occurred once before since the formation of the Board. At the Treasury sale of $1,000,000 on Thursday, bids were made to the large amount of $8,120,500, which is accounted for by the desire of the banks to buy the gold, paying for it in National bank currency, and then to sell the gold and obtain legal-tenders in payment. The Sub-Treasury has received $4,130,666 during the week, and paid out $4,073,136. The movement of gold and bullion for the year 1870, which is given on another page, will be found of much interest.

The following table will show the course of the gold premium each day of the past week:

	Quotations. Opening	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, Jan. 21	110¾	110¾	110¾	110¾	$21,765,000	$1,418,872	$1,575,352

Patriot doubloons	15 50 @ 15 65	Mexican dollars	1 02½@ 1 03¼
American silver (old coinage)	1@2 p. c. premium.	Spanish dollars	2@3 p. c. premium.
		South American dollars	...par.

Foreign Exchange.—The market has shown remarkable firmness on moderate demand, and closes to-day at about the same rates as last Friday, 109½@109⅝ for the best bankers 60 day sterling. There seems to be very little exchange making, notwithstanding the large cotton movement, and first-class commercial bills are readily sold at rates very little below the best bankers.

The exports of cotton for the week amount to 105,823 bales, producing $7,016,730 in gold, against 84,666 bales in the same week last year, producing them $8,800,400 in gold, with middling at 26c. and gold at 122.

	60 Days.	3 Days
London bankers	109¼@ 109⅝	110¼@ 110¾

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks: on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

New Loans.—An account of every new loan now offered in the New York market will be found on a previous page, giving the terms, circumstances and security of each, the price asked, and the financial agents.

State Bonds.—The usual table of State bonds which is regularly published on the last Saturday of each month, as stated in the note above, will be omitted this week and appear in the next issue of the CHRONICLE, on Saturday, February 4th.

Union Pacific Railroad.—The following are the earnings and expenses of the Union Pacific Railroad from July to December, 1870, compared with 1869:

	1870.			1869.		
	Earnings.	Expenses.	Net inc.	Earnings.	Expenses.	Net inc.
July	$643,458	$388,350	$255,108	$623,559	$508,421	$115,138
August	664,050	349,329	314,720	617,585	465,443	152,142
September	728,520	286,158	442,362	758,866	425,946	332,520
October	719,697	346,604	373,093	999,665	517,185	482,479
November	570,168	272,730	297,438	837,388	499,608	337,779
December	505,052	293,769	211,283	716,828	492,494	224,333
	$3,830,949	$1,936,942	$1,894,006	$4,553,494	$2,909,101	$1,644,393
1870 increase over 1869						$249,613
1870 decrease on 1869					$972,158	
1870 decrease on 1869				$722,545	$972,158	

Portsmouth, Saco and Portland Railroad.—The lease of this road, to the Eastern and the Boston and Maine roads, which has been running 23 years, was terminated last week by the payment of $200,000 by the first named road to the two others—the forfeiting of that sum being the terms upon which either party, according to the contract, could end the lease. The lessees have paid 6 per cent. in gold for the property, and at that rate have netted a half million dollars from the property leased. They desire a new lease, but the Portland, Saco & Portsmouth Company will demand as rental 10 or 12 per cent. on their capital of $1,500,000. Ex Gov. Goodwin, of Portsmouth, has been the President of the P., S. & P. Co. for 22 years.

Indianapolis, Cincinnati and Lafayette Railroad.—CINCINNATI, Ohio, Jan. 20.—The Stockholders of the Cincinnati, Indiana and Lafayette Railroad held an adjourned meeting at Morris, Ind., to-day, with Mr. W. S. Groesbeck in the chair. Over 80,000 shares were represented. The report of the Committee upon the history and management of the road, says the books of the Company had been loosely kept, but the condition for four years is about as follows: Receipts from the main line, from $1,500,000 to $1,600,000 per annum; expenses, $1,000,000; the lease lines cause a loss of $100,000 a year. Total liabilities, $15,200,000. The Committee made a comparison with the condition four years ago, unfavorable to the late management. The leased lines are found to be quite unfortunate ventures, as they require much of the equipment that was required on the main line, and some of them were built on the credit of the company. The Directors recommend cancelling of these leases by negotiation or by legal means. The report was ordered to be printed and sent to the stockholders. A resolution was adopted instructing the directors to refuse payment of the interest on the Hagerstown certificates; also, instructing the directors to carry out an arrangement, agreed upon by the creditors, for funding the debt in bonds to be secured by a new mortgage.—*N. Y. Times.*

North Missouri.—The Secretary of this company gives the following list of lines operated by it on the 1st inst.:

	Miles.
From St. Louis to Kansas City	272
From Moberly to Ottumwa	130
Columbia Branch—Centralia to Columbia	22
St. Louis & St. Joseph Railroad	72
Brunswick & Chilicothe Railroad	34
Total	530

One hundred and twenty-six miles of which has been constructed during the past year. It is constructing the St. Louis, Council Bluffs & Omaha Railroad from Chilicothe to Council Bluffs, 174 miles, and expects to complete it this year.

—In accordance with the law, President Grant has directed Secretary Delano to issue the necessary patent for the lands of the Southern Pacific Railroad on account of the completion of the first section of thirty miles of that road, which has been favorably reported on by the Government Commissioners.

Taxation in Tennessee.—NASHVILLE, Tenn., Jan. 20.—A bill has been passed, by both branches of the Legislature, increasing the State taxes to sixty cents on the $100. Last year the tax was forty cents on the $100. This increase even falls short of the amount necessary to meet the obligations of the State.

☞ For other Railroad Items, see COMMERCIAL AND MISCELLANEOUS NEWS, on a previous page.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, January 27, 1871.

The markets for the past week have not been active, except spasmodically, and in a few staples. The expected early surrender of Paris has unsettled views respecting not only many acticles of merchandise, but the future course of general trade, and there is a disposition to await developments. Money has been very easy, and the wants of the country appear to be great, while the exports of produce and manufactures are unusually large, and yet there is much complaint of dull times. It is generally admitted, however, that the prospects are good for a steady improvement with the opening of Spring.

Petroleum has been more active, especially for future delivery. In the latter line, very large contracts for refined have been made at Philadelphia, for the next four or five months, at 24⅜@25½ for early and late delivery, closing firm in this market at 25½c., with crude held at 15c. Oils have been without important feature, except more inquiry for Linseed Oil for future delivery. Naval Stores have been firm, with a large business in Rosins for export, strained closing at $2 30.

Fruits have been generally active, but mainly Raisins, at higher prices, 30,000 boxes having changed hands at $2 62½@ 2 65, now held at $2 70. Southern Dried Apples, in a large line, sold at $4. Fish generally firmer, and George's Cod advanced to $7 75. Hops met with a brisk brewing demand early in the week, and closed firm. Hay dull, but firm.

Whiskey has arrived more freely, and closed dull at 95c. tax gold. It is again proposed in influential quarters to advance the excise to $1 per gallon.

Of Provisions, Pork and Lard have experienced wide speculative fluctuations, but on the whole show a decided advance. The export of hog products this season is more than doubled, as compared with last year, while the house consumption is considerably increased, it is believed, therefore by operators for a rise, that prices must return to about those of last season, which averaged 30 per cent. above those now current. Mess Pork advanced to $23 25@23 38 for the Spring months, but closed to-day quite flat. Lard, which sold yesterday at 13½c. for prime heavy on the spot, was quiet to-day at 13¼c. Bacon has been more active, at improving prices, but closes unsettled. Beef is dull and drooping, but Beef Hams have brought full prices. Butter and cheese quiet and unchanged.

Wool has been much more active, especially in low fleece and California. Receipts are smaller than last year, and stocks are somewhat reduced.

Freights have been fairly active at the reduced rates previously noticed, and the tendency at the close is slightly upward. Our harbor is now badly obstructed with ice, which delays vessels unloading and getting ready to receive cargoes. The Liverpool steamers are now getting 5-16d@ 3-8d for Cotton and 6½d for Wheat. We notice two grain charters, the last at 7s. to Cork for orders to the Continent. Charters for Petroleum and Staves have been more active.

Tobacco is without essential change. In Kentucky Leaf the poor assortments check business, the new crops being still kept back by the cold weather, which prevents its being prepared for market. The sales for the week have been scarely 500 hhds., of which 103 hhds. for export and the remainder to dealers, cutters, &c. Prices are about as last quoted—low to fine leaf, 8@12c., with lugs quoted at 7 @8c. Seed Leaf remains quiet for want of stock to operate with; the sales have been 201 cases Pennsylvania at 20c., and 140 cases low to fine Connecticut and Massachusetts wrappers at 32@70c. Spanish Tobacco in better demand and firm; sales 500 bales Havana at 85@$1 05 currency, duty paid, and 33 bales New Yara, on private terms. Manufactured tabacco in good demand and firm.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York since January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1

COTTON.

FRIDAY, P. M., Jan. 27, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening January 27. From the figures thus obtained it appears that the total receipts for the seven days have reached 150,800 bales against 146,887 bales last week, 132,585 bales the previous week, and 139,631 bales three weeks since, making the total receipts since the first of September, 1870, 2,198,213 bales against 1,730,509 bales for the same period of 1869, showing an increase since September 1 this year of 467,704 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	53,019	43,759	Florida bales.	544	859
Mobile	13,109	12,628	North Carolina	2,231	1,614
Charleston	13,417	5,818	Virginia	11,129	6,722
Savannah	29,383	16,528			
Texas	10,951	10,397	Total receipts	150,800	104,272
Tennessee, &c	1,187	6,511	Increase this year	46,528	....

The exports for the week ending this evening reach a total of 105,823 bales, of which 83,127 were to Great Britain, and 22,696 to the Continent, while the stocks at all the ports, as made up this evening, are now 560,612 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending Jan. 27.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	31,389	13,147	44,536	37,625	195,016	132,443
Mobile	9,642	1,758	11,400	8,576	68,631	71,240
Charleston	2 325	554	2,880	4,999	40,422	24,053
Savannah	15,0.9	5,760	20,839	9,273	89,626	71,324
Texas	7,578	1,091	8,664	10,920	58,917	41,558
New York	17,118	386	17,501	12,138	75,000	66,131
Other ports	....	....	....	1,135	33,000	30,246
Total	83,127	22,696	105,823	84,666	560,612	439,995
Total since Sept. 1	1,111,450	218,359	1,335,309	922,807	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 21,157 bales, while the stocks to-night are 70,617 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Jan. 20, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Forign	Total.	Northern Ports.	Stock.

The market the past week has been quite active and at higher prices. The course of the war in France has of late indicated a speedy end. At the close of our last report the general feeling among holders was, as we then stated, one of confidence, and no large purchases could have been made at the rates then ruling. This was mainly due to a belief that as the war could not last long cotton was low. The next day, Saturday, the market remained steady under the same influences. Monday there was an advance of ⅛c. with a much better business doing, sales reaching 8,420 bales. Tuesday was more quiet with offerings sufficient to meet the demand, but no pressure to sell. Wednesday prices continued without any change, but there was more activity especially in the earlier part of the day with rather a quiet close. Thursday, however, the Liverpool advices being still more favorable, and reports of the capitulation of Paris being received there was an advance of ¼c., but towards the close buyers became more cautious in consequence of the large receipts at the ports, and rather less favorable private European accounts. And to-day with continued large receipts at the Southern ports and a quiet market at Liverpool prices here after a quiet day, have been reduced ⅛c., and the close is weak. We think the continued free receipts have within the past two days served to decrease slightly the confidence among holders. For future delivery prices have followed very nearly the prices for spot cotton. To-day, the close was, for January, 15⅛; February, 15 3 16; March, 15 7-16; April, 15⅝; May, 15⅞. The total sales of this description for the week (including 4,775 bales free on board, but not including bales "Exchanged") have been 49,725 bales. For immediate delivery the total sales foot up this week 28,755bales, including 3,881 bales to arrive, of which 6,105 bales were taken by spinners, 425 bales on speculation, 20,540 bales for export, and 1,685 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	13¾@....	13¾@....	13⅛@....	14½@....
Good Ordinary	14¾@....	14¾@....	15⅛@....	15¼@....
Low Middling	15⅛@....	15⅜@....	15⅝@....	15⅝@....
Middling	15⅝@....	15⅞@....	16⅛@....	16⅜@....
Good Middling	16⅜@....	16⅝@....	16¾@....	17⅛@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling.
Saturday	5,100	13¾@....	14⅜@....	14¾@....	15⅜@....
Monday	8,420	13⅝@....	14⅝@....	15 @....	15⅝@....
Tuesday	3,6?0	13⅝@....	14⅝@....	15 @....	15⅜@....
Wednesday	5,875	13⅝@....	14⅝@....	15 @....	15⅜@....
Thursday	4,828	13⅝@....	14⅜@....	15⅛@....	15⅜@....
Friday	3,983	13⅜@....	14⅜@....	15⅛@....	15⅜@....

For forward delivery the sales (including 4,775 free on board,) have reached during the week 49,725 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For January. bales.	cts.	bales.	cts.	bales	cts.	bales.	cts.
100	14¾	800	15 1-16	800	15 5-16	100	15 9-16
100	14¾	3,800	15⅛	3,400	15⅜	2,000	15⅜

1,100	14¾	3,000	15¼	6,500	15⅜	500	15⅜
1,000	15	1,500	15 5-16	1,750	15 9 16		
3,100	15 1-16	500	15⅜	1,300	15⅜	4,500 total April.	
1,700	15⅛						
1,800	15 3-16	11,600 total Feb'y.		16 150 total March.		For May.	
1,200	15¼					800	15⅜
		For March.		For April.		2,100	15⅝
10,800 total January		400	15 3-16	500	15 7-16		
For February.		1,800	15¼	1,200	15⅜	2,400 total May.	
1,800	15						

The sales during the week of free on board have reached 4.775 bales. The particulars of these sales are as below:

100 f. o. b. Charleston	14½	1,600 f. o. b. Galveston	p. t.
100 " av. strict	....	100 " Mobile	14⅜
Low M. N. Y. class, ⅜ freight	14⅜	500 " "	14½
1,900 f. o. b. Charleston	p. t.	1,00 " "	p. t.
125 " New Orleans	p. t.		
250 " Baltimore	p. t.	4,775	

The following exchanges have been made during the week:

7-16 paid to ex'ge 100 Jan. for 100 March.		1-6 paid to ex'ge 700 Jan. for 500 Feb.	
⅜ " 500 Jan. for 500 April		⅜ " 100 Jan. for 100 March.	
¼ " 100 Feb. for 100 March.			

WEATHER REPORTS BY TESEGRAPH.—Our telegrams show that at Charleston and Savannah it has been pleasant during the week, with cold nights and warm days, the thermometer at Charleston averaging 52. At Columbus, Macon and Montgomery it has rained one day, with the balance of the week warm and pleasant, the thermometer averaging 53 at Columbus, 52 at Macon, and 50 at Montgomery. At Mobile and Augusta it was pleasant early in the week, but rainy subsequently. At Nashville it rained during three days, and at Memphis it rained one day, the thermometer at the latter place averaging 46.

Digitized by Google

RECEIPTS AND CROP.—The receipts continue to come in so freely, both at the out ports and the interior ports, that the smaller estimates of the crop have been pretty generally abandoned, and very few now could be found who would put the total below 2,700,000 bales.

GREAT BRITAIN'S SPINNING CAPACITY.—We gave, two weeks since, returns showing the number of spinning spindles in the cotton factories of Great Britain for the years 1856, 1861 and 1868. It appears at the latter date that the total reached 32,000,000 spindles. We have no later returns at present and our only object now in referring to the subject is to show simply how great is the difference in aggregate consumption when the average yarn spun is of a low or high grade. To illustrate the point let us suppose that at present the spindles reach 32,500,000. Now, with that spinning capacity, and with each spindle producing 36 skeins of average No. 36 yarn per day and working full, say 300 days, the production would be 35,100,000,000 skeins, equal to 975,000,000 pounds yarn; and if we add 14 per cent. for waste, we shall have the requirements of the mills 1,111,500,000 pounds of raw cotton. But if instead of No. 36 yarn the average is enlarged to No. 34 with the same number of spindles, each producing 34½ skeins per day for 300 full days, the production would be 36,562,500,000 skeins, equal, with 14 per cent. for waste added, to 1,225,919,000 pounds of raw cotton, or 3,064,797 bales of 400 pounds each. To put the point in a clearer light we place the comparative figures side by side:

	No. 36 Yarn.	No. 34 Yarn.
300 days would produce, skeins....	35,100,000,000	36,562,500,000
Above skeins equal to, lbs.....	975,000,000	1,075,368,000
Add 14 per cent. waste, lbs.....	136,500,000	150,551,000
Requiring of raw cotton, lbs.....	1,111,500,000	1,225,919,000
Equal in bales of 400 lbs. to,.....	2,778,750	3,064,800
Av'ge consumption per week, bales.	53,437	58,938

We have estimated the weight of bales at 400 pounds against 386 pounds, the average during 1870, because of the larger proportion of American to be used this year. In the above then, we have an increased consumption during the year of 286,050 bales, arising simply from changing the average size of yarn spun from No. 36 to No. 34. These figures are of no little interest as illustrating one point in the problem of Great Britain's capacity of consumption when prices are low enough to make a demand for the clothes spun. Of course the lower the price of cotton the coarser the average cloth produced, as the new demand comes from the poorer classes.

GUNNY BAGS, BAGGING, &c.—Every article coming under this heading has been quiet since the date of our last, and prices, though nominally as formerly quoted, rule generally in favor of buyers, any business there is done, is in a small way to supply the more pressing wants of dealers. We quote cloth nominally at 19@20c. for native, and 20@21c. for domestic rolls. Bags 17@18c., both currency duty paid. Hemp is quoted 9½@10c., gold, for Manila. Jute Butts steady at 4c., currency, and Jute 6@6½c., gold. The only sales reported since the date of our last are 1,000 bales, to arrive, at 6½c., gold, and 500 bales inferior do., on spot, at 5⅞c.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Jan. 27, 1871.			Week ending Jan. 27, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta.....	8,547	6,197	21,553	3,554	3,613	21,316
Columbus.....	2,653	1,941	14,535	1,909	3,119	14,185
Macon.....	4,021	3,469	16,216	1,496	2,044	17,170
Montgomery...	3,523	3,831	10,980	1,187	2,530	14,048
Selma*.....	4,800	4,078	11,300	1,334	1,716	7,893
Memphis.....	20,604	14,141	47,035	9,427	8,724	19,845
Nashville.....	5,384	4,811	6,674	2,414	2,580	3,583
	49,532	38,468	128,243	21,321	24,326	98,040

* Our telegram from Selma again states that the warehouses are overcrowded, and the receipts, stocks and exports have not been made up to-night, and the figures we give, therefore, for that port are only an approximation.

These totals show that the interior stocks have increased during the week 11,064 bales (being now 30,203 bales more than for the same period of last year), while the aggregate receipts are 28,211 bales more, and the shipments 14,142 bales more than for the corresponding period of 1869.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons. On account of the irregularity in the cable despatches, we are again without our figures for stock at and afloat for Liverpool, and we therefore for those items give the figures of last week:

	1871.	1870.
Stock in Liverpool.....bales.	572,000	300,000
Stock in London.....	73,940	113,576
Stock in Glasgow.....	450	250
Stock in Havre.....	86,800	105,580
Stock in Marseilles.....	7,950	5,700
Stock in Bremen.....	11,250	2,300
Stock rest of Continent.....	25,000	33,000
Afloat for Great Britain (American).....	285,000	163,600
Afloat for France (American and Brazil)...	....	71,000
Total Indian Cotton afloat for Europe.....	89,427	101,856
Stock in United States ports.....	560,612	489,995
Stock in inland towns.....	128,248	98,040
Total.....	1,840,672	1,484,297

These figures indicate an *increase* in the cotton in sight to-night of 356,375 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 16,825 bales, against 17,443 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING				Total to date.	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 114,070 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers Abyssinia, 1,767....Nebraska, 2,790....Erin, 2,594....Liberia, 1,500....City of Paris, 803....Denmark, 2,287....Alexandria, 2,053	12,794
To Antwerp, per schooner C. S. Bushnell, 388	388
NEW ORLEANS—To Liverpool, per ships Margaret Pollock, 2,550....Belgravia, 3,938....Royal Charter, 3,711....Cathedral, 3,250....China, 3,666....F. P. Sage, 3,560....Ironsides, 4,215....May Queen, 3,260....Julia, 2,931....Montebello, 3,350....per barks Pericles, 3,240...Fleetwing, 1,400	39,071
To Queenstown, per bark Hilda, 1,337	1,337
To Cork, per ship S. Vaughan, 2,851	2,851
To Bremen, per ships Forest Eagle, 3,601....Cresent City, 2,984...per bark Vesuvius, 2,332	8,917
To Barcelona, per ship Neuva Aurelia, 1,433....per bark Aretusa, 1,112	2,545
To Antwerp, per ship Oakland, 3,543....per bark Emma C. Litchfield, 1,416	4,958
To Genoa, per bark Navesink, 1,912	1,912
To Trieste, per bark Mesonic, 1,490	1,490
To Malaga, per bark Rosario, 993	993
MOBILE—To Liverpool, per ship Wellington, 2,858	2,858
To Barcelona, per brig Francisqueta, 361	306
To Amsterdam, per bark Hector, 1,900	1,901
CHARLESTON—To Liverpool, per ships John Sidney, 2,812 Upland and 380 Sea Island...County of Pictou, 2,149 Upland and 9 Sea Island....per brig Cecilia, 423 Upland and 88 Sea Island	5,861

Total	79,507	5,246	1,337	2,851	8,987	4,204	6,152	114,070

Included in the above totals are 1,912 bales from New Orleans to Genoa, 1,490 to Trieste and 993 to Malaga; 1,286 bales from Charleston to Fleetwood, Eng., and 5 bales from Boston to British Provinces.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 110¼ and 110⅝, and the close was 110⅜. Foreign Exchange market continues dull but firm. The following were the last quotations: London bankers', long, 109¼@109⅜; short, 110¼@110½; Commercial, 108⅝@109. Freights closed at 5-16@⅜d. by steam and ¼@5-16d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, Jan. 25—5 P. M.—The market has ruled active to-day, with sales footing up 25,000 bales, including 5,000 bales on speculation. The sales of the week, ending Jan. 20, were 88,000 bales, of which 13,000 bales were taken for export and 6,000 bales on speculation. The stock in port was 572,000 bales, of which 264,000 bales are American. The stock of cotton at sea bound to this port is 374,000 bales, of which 285,000 bales are American.

Of the present stock of cotton in Liverpool, 42.75 per cent is American, against 31 per cent last year. Of Indian cotton the proportion is 37 per cent, against 50 per cent.

LONDON, Jan. 14.—The cotton trade is dull and prices are rather lower. The following are the particulars of imports, deliveries and stocks:

	1869.	1870.	1871
Imports, Jan. 1 to Jan. 12 ..... Bales.	11,861	9,159	9,216
Deliveries	21,272	18,127	3,100
Stocks, Jan. 12	135,818	113,576	73,940

HAVRE, January 12.—The stock of cotton amounts to 45,580 bales, of which 23,790 bales are American, and 17,760 bales East India. Only 1,516 bales of Indian cotton are afloat to this port.

ALEXANDRIA, Dec. 30.—The shipments of cotton from Nov. 1 to Dec. 30, were as follows:

	Great Britain. bales.	Continent. bales.	Total bales.
1870	63,214	12,842	76,056
1869	64,455	19,378	83,833
1868	65,293	19,258	84,551
1867	52,129	16,156	68,285

BREADSTUFFS.

FRIDAY, P. M., January 27, 1871.

The market the past week has been excited by speculation, in conjunction with a good demand for export. Flour has arrived less freely, and favored by an advance to 28s. in Liverpool, prices show a decided improvement. The demand has been good for export, and the trade operated fairly till checked by the severe snow storm of yesterday, but the chief strength of the market has been the firmness of holders, who refused to offer straight lines except at prices considerably above the views of buyers—generally naming, in the past three days, $6 90@$7 for prime shipping extras from spring wheat, with few buyers over $6 75@$6 85. Inferior and irregular brands of extras sold at $6 50@$6 60. Good trade and West India brands have been salable at $7 25@$7 75. Southern flour has sold more freely. Rye flour shows a small advance. Corn meal has been in better demand and closes 10@15c. higher. To-day the flour market was dull, and some lines of good shipping extras sold at $6 75.

Wheat has been affected much the same as flour. With favorable advices from Europe, a considerable reduction of stocks on hand, and strong speculative combinations operating, new Spring advanced on Wednesday to $1 55@$1 56, and amber Winter to $1 58@$1 60. Yesterday the market was very unsettled under the dull accounts from Liverpool. To-day there was a partial recovery of tone, and some 90,000 bushels new No. 2 Spring were taken on speculation for Western account at $1 54@$1 55 in store and afloat. The West has been excited, and No. 2 Spring at Chicago has touched $1 30, receding yesterday to $1 24, and recovering to-day to $1 28, but closing weak. There are some operators who buy here and sell there, because Chicago is so far above us.

Corn has advanced. There has been a fair amount of export orders, but they have been mostly filled with Southern white, here and to arrive, at 92@93c. Receipts of Western continue small, but the obstructions to transportation caused by snow in the streets and ice in the harbor, limits the demand for home use. Oats have been in speculative request, but with no export demand, and the local trade reduced to smallest quantities; the close is dull. Rye, barley and barley malt, though firm, have ruled comparatively quiet.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 58@ 1 56
Superfine	$ bbl. $6 00@ 6 40	Red Winter	1 50@ 1 54

GROCERIES.

FRIDAY EVENING, January 27, 1871.

Taken altogether the grocery market cannot be called very active at this moment, and business is recovering to a great extent from the flurry and excitement so noticeable at the opening of the year. Delayed mails and the very difficult carting through our streets consequent upon the late snow storm, have contributed to some extent to check the movement of goods, but aside from this it is quite evident that the demand is in many instances falling off somewhat, and buyers less anxious. The reduced inquiry, however, arises less from a want of confidence than from the fact that the recent liberal distribution is now reaching consumers with greater freedom, as it is noticeable that buyers operate quickly at full figures when they really require goods, or very desirable qualities are offered. The stocks on hand are comparatively small and few of the new crops due have made their appearance in any quantity.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	10,812 pkgs.	Laguayra	829 bags.
Green	9,540 pkgs.	Other	4,071 bags.
Japan	6,027 pkgs.	Sugar, Cuba	6,228 hxes.
Various	3,880 pkgs.	Cuba	1,303*hhds.
Coffee, Rio	16,531 bags.	Porto Rico	287*hhds.
Java	5,339 mats.	Other	1,410 hhds.
Maracaibo	1,490 bags.	Sugar, Brazil	8,703 bags.
		Manila, &c.	13,502 bags.
		M'las'es, Cuba	675 hhds.
		Port Rico	308*hhds.
		Demerara	2?*hhds.
		Other	435*hhds.

*Hhds. include bbls. and tcs reduced.

Imports this week have included 16,033 bags Rio, and 2,837 bags of other kinds of coffee; receipts of sugar and molasses have been small.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870	1871.	1870.
Tea, lbs.	....	....	4,990,590	2,793,795

Molasses, hhds.	6,020	21,082	1,952	5,212

TEA.

There has been no increase of the demand, a falling off if anything, and during the greater portion of the week the market presented quite a dull appearance. The line business has not apparently met the expectations of the trade, and as most of the leading jobbers now hold a fair and pretty well assorted stock they feel little inclination to anticipate their wants, and have fallen back into the old system of purchasing merely to the extent of positive necessities. Values remain nominally steady, in fact it would probably be almost an impossibility to gain any conceptions, and yet the position is such that an attempt to urge the sale of invoices would be almost sure to result in some reduction of prices. At the close a few indications of an improving demand prevail, but the movement is not very heavy. We notice sales of 2,000 pkgs. Green, 300 Souchong, 11,200 Oolongs, and 1,800 Japans.

Imports this week have included only 641 pkgs.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total:
1871	1,541,837	2,267,369	1,181,384	4,990,590
1870	1,320,333	1,239,214	33,548	2,793,095

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 759 pkgs. since January 1, against 1,465 last year.

COFFEE.

The market does not show any important increase of activity, but continues fairly active, with values well sustained, and in some instances an advance asked. On Brazils buyers have moved rather cautiously, the anticipated increase of arrivals and probable improved assortment inducing the postponement of purchases whenever such a course could be adopted. Necessity, however, compelled the handling of some invoices, and, in addition to this, jobbers have been tempted into operating somewhat in excess of actual wants, in order to secure parcels received per regular steamer, which, as usual, proved to be of generally desirable quality. Importers, as a rule, have accepted all full bids willingly, but failed to make any abatement in their pretensions, and former quotations remain current, with a firm uniform tone noticeable up to the close. Ordinary and choice qualities are still the favorites, but medium grades are held with full confidence that they will ultimately be wanted. At the other leading coffee ports of entry, business has been good, and this has had rather a stimulating effect here. For Java the demand has again proved good, and the desirable supply is gradually becoming concentrated with holders rather indifferent operators. There can not be said to be any further positive advance on previous extreme figures, but the tone is most decidedly strong, and buyers meet with no great attention unless prepared to operate at full market values. West India descriptions are somewhat slow, and show no very striking features for the week. For St. Domingo there has been a steady call from European exporters, and choice styles of Maracaibo are receiving rather more attention lowing to the increased cost of Java, and on all grades prices are at least steady, with best qualities very firm. The jobbing movement has been fair and quite general. The invoice sales include 11,908 bags Rio, 2,200 bags Maracaibo, 200 bags Laguayra, 5,400 bags Ceylon, 815 bags Mexican, 200 bags Costa Rico, 4,200 bags St. Domingo, to arrive (3,200 shipped direct), and 14,500 mats Java. At Baltimore 6,392 bags Rio, and at New Orleans 28,500 do.

Imports of Rio this week have included the following cargoes: Steamer "South America," 9,556 bags; "Kosmopolite," 3,352 bags; "Carl," 3,125 bags. Of other sorts the imports have included 1,652 Laguayra, per "Thomas Dallet," and 1,185 bags of other kinds of coffee.

The stock of Rio Jan. 26, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.

* Includes mats, &c., reduced to bags. † Also, —— mats.

SUGAR.

There has been a slow but none the less sure gain of strength to the market for raws during the past six days. Prices have advanced somewhat on all grades, and the position just now shows a really healthier feeling than at any time since the opening of the year. European advices of rather a stimulating character have been received. The Havana market has ruled pretty steady, with the shipments hither of the new crop much slower than anticipated. Our stocks are falling off with some rapidity, and holders of the remaining supplies are less inclined to realize than heretofore, all of which have contributed to impose a feeling of confidence among the trade generally. The demand has not been remarkably brisk at any time, but the aggregate business for the week foots up well and shows that buyers are really at work. Grocers have taken fair amounts of clarified goods, but the call has in the main been from refiners, nearly all of whom are now at work, and some having used up their supplies in bond are compelled to purchase in order to keep machinery in motion. Among the offerings during the week were some clarified goods from Glasgow of very fair quality, but they did not command sufficiently high figures to give importers a margin for profit, and there is not likely to be many additional receipts. With the approach of the new crop any flinty sugars become more desirable, and since the upward turn of the market some of the best samples have been withdrawn. Refined have shown considerable irregularity, but the sales about balancing the rather moderate production the gain was in favor of the selling interest in most cases, and at the close the feeling is quite steady. The sales of raw include 1,275 hhds. Cuba, 60 hhds. Porto Rico, 37 hhds. Martinique, 452 hhds. Demerara, 300 hhds. British clarified yellow, 9,125 boxes Havana, 8,700 bags Pernambuco, 18,361 do Manilla, and 1,911 do China.

Imports at New York, and stock in first hands, Jan. 26, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c. bags.	Melado hhds.

MOLASSES.

The prevailing demand for foreign goods has been moderate throughout the period under review, and a flat, dragging tone has been a ruling characteristic

Digitized by Google

the market. The stock on hand is not large, but owners want to get rid of t, and as a rule are offering their supplies at very low figures. Indeed this act has been the only incentive to business, as some cargoes were so unmistakably cheap that buyers could not resist the temptation, and a few purchases were made to hold and work up at some furure day or re-sell as margins for profit might happen to be presented. The arrivals of new crop amount to but little as yet, and advices from the producing districts are considered as fairly encouraging for the selling interest. Ths supply of domestic holds out fairly but the arrivals commence to drop off somewhat and amounts carried in store are smaller. The inferior and common grades have shown irregularity, though without decline, while prime stock has sold higher and the market generally closes with a firmer and more encouraging tone. Sales of 440 hhds. Cuba, 250 hhds. Porto Rico, 75 hhds. English Island, &c., and 2,758 bbls. New Orleans.

* Including tierces and barrels reduced to hhds.

SPICES.

We hear of no changes in the general position of the market. Invoices sell slowly, not because there is an absence of demand, but in view of the fact that everything deliverable here or to arrive has already found a market, or is held so high as to exceed all present limits, and owners assert the utmost confidence in the future ignoring all bids failing to approximate within a slight fraction of their views. The distributive dealers are not quite so busy, but still find trade pretty sharp and buyers willing to pay full prices, though the good qualities are in all cases called for. The increased supply of Cassia noted last week modified extreme figures somewhat, but brought about no positive decline, and this is about the only case where buyers may be said to have gained the slightest advantage. At Boston business is very good at full prices. We learn of recent sales there of 1,500 to 2,000 piculs of Pepper.

FRUITS, &c.

The market for Foreign Dried has been slow since the date of our last, which has been largely due to the severe storms we have had most of the week. The city dealers, most of them, are pretty well stocked up for the present, and only buy small lots of a fancy article or a round lot when offered cheap. Layer Raisins have again reacted, and at the close sell in jobbing lots at $2 65 per box. Currants have been quiet but are held very steadily, and at the close we note sales of full lots at 8¼c., gold, on the spot. Turkish and French Prunes have perhaps sold more freely than any other article, and rule steady; there are a good many of the old crop held in this market and some dealers, to get rid of them, are mixing them with new. Sardines have been held with confidence, especially quarters, and a fair trade has been done in them; at the close 20c. currency is asked. Nuts are rather slow at the present, and no change or sales are reported.

Trade in Foreign Green has been limited to small lots from store as the weather has been so cold that cargoes could not be moved. We quote Malaga Lemons $4, Palermo $4@$4 50, and Messina $4 50@$5; Messina Oranges $3 25 Palermo $3, St. Michaels $3 50@$4, and Valencia per case $7 75@$8. We quote Porto Rico Oranges at $5 50@$6 per bbl. Baracoa Cocoanuts sell at $35 per thousand for half husked, and $40 for clean do. Bananas have sold at 50c. per bunch for frozen.

Domestic Dried have ruled rather quiet for apples the past week, and it is difficult to obtain 6½c. for best State quarters. In Philadelphia there has been considerable movement in common Tennessee, and large lots sold at 4c. Pared Peaches continue in demand the best for city use, and the medium qualities for the West and prices rule pretty strong; unpared halves are wanted, the bulk of the stock in Philadelphia and Baltimore has lately been bought up by a Chicago house, and for these very full prices rule. Quarters are also scarce and sales have been made at 7½c. which is an advance. Blackberries have been dull, but at the close there is a large movement reported, both in this market and in Philadelphia, at 9c., which is an advance. Pitted Cherries are steady, though quiet.

ADVICES FROM PRODUCING MARKETS.

Tea.—The market reports from all China Ports are at hand as follows:

Shanghae Dec. 13.—The months business has been somewhat smaller than the preceeding one, amounting to about 58.000 half-chests with a preference shown for Teenkai and Fychow Teas. The total receipts for the season will be materially less than last year. Unsold stock on hand 62,200 half-chests. Export to England also about 2,000,000 lbs short of same date last year.

Yokohama, Dec. 3.—A good business had been done within the week for New York market, about 12,0 0 pkgs. having been settled, and the market firm at the close.

Foochow, Dec. 5.—No business of moment in Congous. In Oolongs large transactions had taken place for the American market 40,000 half-chests comprised total settlements and had tended to strengthen the market, an advance being now demanded by holders. Fine Teas were virtually withdrawn from the market.

Amoy, Dec. 7.—No Oolongs of account on the market, and but a small quantity were expected. The fortnights business amounted to 7,000 half-chests.

The following shows the quantity of Tea afloat for the United States at lates dates (not including San Francisco), and which has not yet arrived:

Total known to be afloat	3,951,044	5,677,258	3,866,989	13,495,291
Total exports to U. S. ports, June 1 to Dec. 12	8,871,089	12,508,780	5,651,512	26,520,911
Total exports to U. S. ports, same time 1869	9,959,621	9,053,081	3,520,947	22,233,259

* For Boston.

Rio Coffee.—Messrs. Boje & Co.'s circular reports a large business for the month and prices have steadily advanced, with the exception of a few days, owing to a rumor of difficulty between England and Russia, exporters withdrew from the market - confidence was soon restored, exchange advanced and prices tended upward. the daily arrivals show a marked decrease—have fallen from 10 000 to 7.500 bags per diem. Sales for United States for month aggregate the large figure of 219 500 bags. Stock at date 65,000 bags of poor selections.

Vessels sailed for U. S., Nov. 24 to Dec. 24	176,309 bags
Vessels cleared and ready for sea Dec. 24	27,100 "
Vessels loading or about to load	77,000 "

THE DRY GOODS TRADE.

FRIDAY, P. M., January 27, 1871

The inclement weather which has prevailed during the week has prevented the few buyers who are in the city from canvassing the market to any extent, and transactions have been limited in consequence. The market is becoming more active, however, in a general way, and as the supply of all classes of goods has been greatly increased an increase in the movements during the ensuing week is likely, should the weather prove more favorable. The number of out-of-town buyers in the market is still small, but reports from various localities in the interior are to the effect that dealers are preparing to stock up for the ensuing season's trade and many are already en route to this and other Eastern markets As these dealers are doubtless representatives of the jobbing trade

Digitized by Google

it is probable that the general trade from first hands will improve greatly after the 1st prox., and jobbers will, it is thought, be doing a fair business by the middle of the month. The prospects for an active demand from retailers before the latter part of February are not considered very encouraging, and a majority of our dealers seem to be of the opinion that this trade will begin this season two or three weeks later than usual.

The retail trade in the city and elsewhere is said to be fair for this season of the year, but is, of course, not very active. The financial condition of the trade generally remains very satisfactory and collections are coming forward promptly. No noteworthy failures are reported in any section.

DOMESTIC COTTON GOODS.—The market for all classes of cotton fabrics is buoyant, though the movements during the past week have not been very heavy. The excitement in brown and bleached goods, consequent upon the rumors of an inadequate supply has stimulated the inquiry for these goods, and many buyers, who are not ready to visit the market for their spring stocks have sent in orders for staple goods, in anticipation of their future wants. Prices seem rather more settled, except in a few makes of fine 4-4 bleached goods, and there are fewer rumors of an advance. There is, however, much firmness, and prices on the entire list are without quotable change with the exception of Allendale wide goods, which are off about 1c. Agents have stiffened their rates of medium grads of both brown and bleached goods but the jobbers prices remain as heretofore. Colored cottons are without especial animation, though denims are moving rather more freely, and the general trade is fully equal to that usual at this period. Prints are in good request, with larger sales as the assortments of medium and light work are increased. The advancing tendency of standards generally has been checked by the action of the agents for Dunnell's prints, who, after opening their light work at 11¼c. reduced the price to 11c. to effect sales, and have found the market active at the latter figure, while at ¼c. above there was comparatively little inquiry. Nearly all of the mills which will produce light work during the coming season, are already represented in the market by an assortment of this class of work, but the offerings are still meagre.

DOMESTIC WOOLEN GOODS.—The low water in the manufacturing streams still restricts the production of woolen goods, and many of the principal mills are still behind on their production of fine goods, the assortment of styles offering being limited. The offerings are increasing, however, and the stock is fair, though not nearly so heavy as at a corresponding period of last season. The supply of medium and low grades is good, but the demand is heavy, and in view of the limited production no accumulation of surplus stock is likely to occur at present. The cassimeres produced this season are chiefly in stripes, hair lines, checks and plain effects, no plaids being made in fine goods. The manufacturers of medium and low priced goods are producing some medium-sized plaids for the clothing trade, but the majority of the goods made are in the styles above noted. Prices open about the same as at the beginning of the spring season last year, though some makes are sold a trifle lower.

FOREIGN GOODS.—Importers of dress goods have not generally opened their stocks as yet, but one or two dealers are showing good assortments, and by the first of February the offerings will doubtless be very general. The stock of this class of foreign fabrics in the market is large, and considerable amounts are to arrive by steamers now due. The class of goods offering this season are much the same as last spring, though very many new styles and colors are in the markes. In linen goods the trade improves steadily, and the movements from first hands are considerably in advance of those of a corresponding period of last year. Woolens of light weights are in liberal request, and fair sales are effected. Millinery goods remain quiet, and without feature of interest.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table:

	FROM NEW YORK.				FROM BOSTON
	Domestics.		Dry Goods		Domestics

Publication.

THE NEW YORK

DAILY BULLETIN,

A First-Class Daily Commercial and Financial Journal.

The BULLETIN furnishes—

1st. The most complete FINANCIAL REPORT published in any daily paper, embracing:

The daily sales and quotations of every Security dealt in at the Stock Exchange and the Mining Board.

The quotations of Securities not on the Stock Exchange list, including Southern Stocks and Bonds.

A transcript of the official register of the Gold Room, showing every quotation from the formal opening to the formal closing of the Room—published in no other paper.

A summary of the daily transactions at the SUB-TREASURY, the GOLD EXCHANGE BANK, and the CLEARING-HOUSE.

A full table of quotations of STERLING and CONTINENTAL EXCHANGE.

THE CHANGES IN THE REDEEMING AGENTS OF THE NATIONAL BANKS, AND THE OFFICIAL PERIODICAL STATEMENTS OF THE NATIONAL BANKS IN EACH STATE, as furnished by the Comptroller of the Currency—published by no other daily paper.

2d. The most accurate and the ONLY DAILY report of the DRY GOODS MARKET, including a full PRICE CURRENT of staple and domestic fabrics, which is corrected daily.

3d. A carefully prepared report on the PRODUCE MARKETS, much fuller in its details than that of any other daily journal, embracing a full Price Current semi-weekly.

4th. A daily statement of the RECEIPTS OF PRODUCE, the IMPORTS FROM FOREIGN PORTS, and the MANIFESTS OF VESSELS CLEARED AT THE CUSTOM HOUSE.

5th. Its CITY COMMERCIAL and FINANCIAL NEWS is fuller than that of any other journal.

6th. In its EDITORIAL DEPARTMENT the BULLETIN gives a fuller discussion of current commercial and financial topics than any other journal in the United States; and in this especially its influence ranks second to that of no other paper in the country.

7th. Its PRICE IS ONLY ABOUT ONE-HALF that of other leading commercial papers, and yet its information is fuller and in all respects as valuable.

IN ANTICIPATION OF

The Re-opening of Paris

19 William Street, New York,

JANUARY 1, 1871.

All persons who have left baggage, personal effects or interrupted business in Paris, are hereby informed that if they will at once address our English house,

Bowles Bros. & Co.,

No. 449 Strand, Charing Cross,

LONDON,

with particulars and instructions, the same shall be forwarded or fulfilled immediately upon the re-establishment of communications.

The public is also notified that we are now prepared to again draw bills upon our Paris house, payable at 75 days from date, in case of delayed presentation, and discountable at bank rates by our house there or in London, at the option of the holders.

We will also charge ourselves with the receipt of money or letters to be conveyed to friends, either in or outside of Paris, in any part of France, which shall be as promptly delivered as circumstances may permit. These services are free to all, and not restricted to the clients of our own house.

As our house in Paris never has been closed during the siege, it is therefore in full practical operation for the recommencement of outside business without loss of time.

BOWLES BROTHERS & CO.,
19 William-st., New York; 27 State-st., Boston.

N.B.—Our Triple Currency Credits for the use of Travelers will be found preferable and available in any part of the world.

Cotton.

COTTON.

1,000 Tons Arrow Ties for baling Cotton.

For Sale by

SWENSON, PERKINS & CO., AGENTS,

P O. Box 5,724. 80 Beaver street, N. Y.

These Ties have been used more extensively than any others, and last year for more than one-half of all the cotton baled in the United States, and received the premium at several State fairs.

VIBBARD, FOOTE & CO.,

AND

CHARLES G. JOHNSEN,

PROPRIETORS AND MANUFACTURERS OF

COTTON TIES,

ENGLAND, NEW YORK AND NEW ORLEANS

SELF-FASTENING BUCKLE TIE.

This is for the planter, the compress and the ship; the best and most convenient Tie manufactured. It is recommended by all of the dealers in New Orleans after a thorough investigation as to the merits of the various ties in use. They are made of the best quality of English iron, nicely painted, put up in bundles of uniform weight and are sold under a guaranty to have entire satisfaction.

WILLIAMS, BIRNIE & CO.,

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, FEBRUARY 4, 1871. NO. 293

Advertisements.

Advertisements will be inserted at the following rates per line for each insertion:

If ordered less than 4 times	20	cents per line.
4 times or more	16	"
8 "	14	"
13 "	12	"
26 "	10	"
52 "	8	"

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

WM. B. DANA & CO.,
PUBLISHERS,
79 & 81 William St., N. Y.

CITY OF BALTIMORE.

$1,200,000 SIX PER CENT BONDS

OF THE

Western Maryland Railroad Company,

ENDORSED BY THE

CITY OF BALTIMORE.

The undersigned Finance Committee of the WESTERN MARYLAND RAILROAD COMPANY offer through the American Exchange National Bank

$1,200,000

of the Bonds of the WESTERN MARYLAND RAILROAD COMPANY having 30 years to run, principal and interest guaranteed by the City of Baltimore. This endorsement having been authorized by an act of the Legislature, and by ordinance of the City Council, was submitted to and ratified by an almost unanimous vote of the people. As an additional security the city has provided a sinking Fund of $200,000 for the liquidation of this debt at maturity. An exhibit of the financial condition of the city shows that she has available and convertible assets more than sufficient to pay her entire indebtedness. To investors looking for absolute security, no loan offered in this market presents greater inducements. These Bonds are offered at 87½ and accrued interest. Coupons payable January and July.

WILLIAM KEYSER,
JOHN K. LONGWELL,
MOSES WIESENFELD,
Finance Committee

East Tennessee, Virginia & Georgia Railroad

1st MORTGAGE 7 PER CENT BONDS,

REDEEMABLE 1900,

Interest Payable 1st of January and 1st of July, in the City of New York.

THE MORTGAGE IS FOR **$8,500,000** ON A ROAD 270 miles long, which has been in successful operation for many years. The lien is about

$13,000

per mile, which makes it, with few exceptions, the smallest issued on any road in the United States. It was created for the sole purpose of paying off the debt due the State of Tennessee, amounting to

$4,117,761 10.

An examination into this security will prove it to be one of the best ever offered in the market
For terms and further particulars, apply to

GALLATIN NATIONAL BANK
NO. 36 WALL STREET,
Agent for the sale of the Bonds.

FIRST MORTGAGE

BONDS

OF THE

Nashville & Decatur RR.

This Mortgage is for

$2,100,000,

or only $17,500 per mile on an old and completed road, showing an established business, from local traffic mainly, more than sufficient to pay its interest as it becomes due, with prospects of greatly enlarged receipts from new connections which are now in progress.

The Mortgage was created for the sole purpose of paying a debt due to the state of Tennessee on terms which would reduce the liability of the road about $600,000.

Of the bonds issued under said Mortgage $200,000 are held in Escrow to abide settlement of a claim of the United States; $800,000 have been purchased by the parties in interest, and the balance of $1,600,000 are offered for sale on favorable terms—the security, in judgment of the undersigned, being such as to entitle them to perfect confidence.

PARKER & LAWRENCE,
BANKERS,
NO. 1 WALL STREET.

Financial.

MIDLAND BONDS

IN DENOMINATIONS OF

$100, $500 & $1,000.

THE FAVORITE

SEVEN PER CENT GOLD BONDS

are secured by a first mortgage on the great Midland Railroad of New York, and their issue is strictly limited to $20,000 per mile of finished road, costing about $40,000 per mile. Entire length of road, 345 miles, of which 220 have been completed, and much progress made in grading the remainder.

RESOURCES OF THE COMPANY.

Full-paid stock subscriptions, about - - -	**$6,500,000**
Subscriptions to convertible Bonds, - - - -	**600,000**
Mortgage Bonds, $20,000 per mile on 345 miles -	**6,900,000**
Total - - - -	**$14,000,000**

Equal to $40,000 per mile.

The road is built in the most thorough manner, and at the lowest attainable cost for cash.

The liberal subscriptions to the Convertible Bonds of the Company, added to its other resources, give the most encouraging assurance of the early completion of the road. The portion already finished, as will be seen by the following letter of the President of the Company, is doing a profitable local business

NEW YORK, Dec. 2, 1870.

Messrs. George Opdyke & Co., New York:

Gentlemen: Your favor of the 1st inst., asking for a statement of the last month's earnings of the New York and Oswego Midland Railroad, is at hand. I have not as yet received a report of the earnings for November.

The earnings for the month of October from all sources were $48,709 17, equal to $524,510 04 per annum on the 147 miles of road, viz.: Main Line from Sidney to Oswego, 125 miles; New Berlin Branch, 22 miles.

The road commenced to transport coal from Sidney, under a contract with the Delaware and Hudson Canal Company, in the latter part of November. The best informed on the subject estimate the quantity to be transported the first year at not less than 250,000 tons, while some estimate the quantity at 300,000 tons. This will yield an income of from $375,000 to $450,000 from coal alone on that part of the road.

Taking the lowest of these estimates, it gives for the 147 miles a total annual earnings of $899,510 04. The total operating expenses will not exceed fifty per cent., which leaves the net annual earnings $449,755 02, which is $214,755 02 in excess of interest of the bonds issued thereon.

I should add that the earnings from passengers and freight are steadily increasing, and that, too, without any through business to New York. Yours truly,

D. C. LITTLEJOHN, President
N. Y. and O. Midland Railroad Co.

The very favorable exhibit presented in the foregoing letter shows that this road, when finished, with its unequaled advantages for both local and through business, must prove to be one of the most profitable railroad enterprises in the United States, and that its First Mortgage Bonds constitute one of the safest and most inviting railroad securities ever offered to investors.

For sale, or exchanged for Governments and other current securities, by

GEORGE OPDYKE & Co.,
NO. 25 NASSAU STREET.

STATE OF ARKANSAS

7 PER CENT BONDS, ENDORSED BY THE

MEMPHIS & LITTLE ROCK RR. CO

For Sale at 70 and accrued interest, by

Swenson, Perkins & Co.,

80 BEAVER STREET.

THE STATE OF ARKANSAS issues its Bonds in aid of Railroads—ten thousand dollars per mile, for the payment thereof a special tax is collected annually for interest and sinking fund.
THE MEMPHIS AND LITTLE ROCK RAILROAD 188 miles long, is completed and in running order 120 miles. The unfinished section will be completed in December next.

R. C. BRINKLEY, Pres't.
Memphis and Little Rock RR

THE DEBT STATEMENT AND THE CABINET.

Several weeks ago we discussed certain rumored changes in the financial policy of the administration. These rumors have just been revived. Mr. Boutwell, it is said, with Mr. Fish and several other members of the Cabinet, are to retire on the 4th of March. Such are the reports; and conflicting versions of them are every day repeated and contradicted in the newspapers. When we last referred to these rumors they were very operative in Wall street, and were put in circulation almost wholly by persons who wished, for speculative ends, to derange the movements of the money market and the Stock Exchange. Losing much of their financial importance, however, these stories are now chiefly political, and have less claim on our attention. Still, they are producing incertitude in the financial circles; for the influence of the Secretary of the Treasury is so vast in our monetary system that it is impossible for a change to seem impending without some perturbation of the public confidence. The debt statement for 1st February is chiefly interesting as showing that Mr. Boutwell has somewhat modified his policy of locking up greenbacks. The currency balance has fallen to 24 millions, against 30 millions a month ago. The needless and mischievous hoarding of greenbacks was one of the chief faults of Mr. Boutwell's interior management of his department. For the other things complained of—the heavy taxation and the paying off of the debt—Congress were chiefly responsible, as they made the laws which Mr. Boutwell was bound faithfully to administer. In regard to these matters, however, he would perhaps have incurred less unpopularity if he had listened with less of approval to the over-sanguine schemes of some of our ingenious foreign bankers. As to the hoarding of currency and the locking up of large amounts of greenbacks in the vaults of the Treasury he is more directly responsible, and during the months of November and December last, some stringency might have been prevented, and the monetary machinery might have been made to work more easily if some such remedial expedients as we then suggested had been adopted for depleting the Treasury of its superfluous hoard of greenbacks, and for placing this currency, for a season at least, where it would meet the pressing needs of commerce and trade. Much unpopularity would have been averted from Mr. Boutwell's administration had his present change of policy occurred at the critical time when there was a popular wish for it, and when the opening of his floodgates would have filled the depleted channels of our circulating money to the great relief of commercial and industrial distress.

The coin balance has sunk from 107 millions to 99 millions, and as six millions of certificates have been issued the gold belonging to the Government is reduced by 14 millions. This sum, together with the receipts from customs, has been expended in the payment of the January interest, and for the usual sales of gold. We have also paid off three millions of the bonds of 1871, and only $885,000 of these bonds are now outstanding. There is much satisfaction with Mr. Boutwell's policy in managing his gold balance. He has shown a judicious foresight by gathering in a considerable coin reserve. The Treasury holds, we must remember, the only available reserve in this country of coin and currency, and in view of the possible complications in the finances of Europe we might, with advantage to our commercial and monetary equilibrium, add 20 or 25 millions of coin to the 67 millions now owned by the Government.

The debt statement reports a decrease of the public debt during the month of Four millions. This monthly liquidation of the debt is now very little regarded, though a few months ago it was the theme of general laudation throughout the newspaper press. At that time the suggestion that the steam was at too high a pressure was disregarded, and it is well that no further harm has resulted from the excessive pressure of taxation amid the general contraction and

Digitized by Google

impoverishment and shrinkage of values incident to our toilsome progress towards the specie basis. The general impression now is that we have been attempting too much, and that as posterity will receive part of the advantages won by the war, so posterity must be content to bear part of its cost. These obvious facts were urged in the CHRONICLE when they were extremely unpopular; and as on these and ten thousand other points of practical statesmanship we have seen the sure instincts of our people lead them swiftly to detect and throw aside errors worshipped in the past, so we have hope for the future; and we believe that with like security and promptitude in each succeeding crisis of our national life we shall always throw aside political errors and financial phantasies which will have had their day, and are not to bear longer rule without danger to the State.

We must not forget, moreover, that the efforts we have made to pay off our debt have been attended with wonderful success. No other nation in the world has ever paid off three hundred millions of debt during the first six years after a war of such magnitude as ours. If the debt statement reminds us that the project of paying off our public debt too rapidly has been abandoned under the pressure of necessity, it still proves that we have made a noble struggle to diminish its burden, that we have accomplished this as far as was possible, and that what remains of the war debt will exercise a pressure which will be lighter on the individual every year, because it will fall upon a more numerous citizenship, and will be distributed over a rapidly widening area of population and growing wealth and productive forces. As to the immediate future we cannot in any event have much change of a repressive character in the financial policy of the Treasury. Whether the rumored Cabinet changes take place or not is a matter of subordinate financial concern. Except some monetary convulsion should break out in Europe, the duties of our Secretary of the Treasury in regard to the delicate financial mechanism of the country will be very light. Not until our next periodic drain of currency will his firmness and skill and discernment be put to any severe test.

OUR SECURITIES ABROAD.

The appointment of General Schenck as Minister to England, and the consequent prospect of an early settlement of the Alabama claims on terms satisfactory to the parties to the dispute, has caused a number of financial men on both sides of the Atlantic to anticipate the opening of a larger demand in London for all good descriptions of United States securities. The discussion hence arising has directed attention to several matters touching British finance which would not otherwise have been much regarded here. Among them are one or two which merit special attention. First, there is the new stamp tax on United States bonds and other foreign securities which went into operation last month. "A liberal Government," it has been said, "claims a sort of privilege to adopt sometimes an illiberal policy." An illustration of this adage has certainly been given by the Liberal Administration of Mr. Gladstone, in imposing a tax discriminating against foreign securities, such as no Tory Government has ever ventured upon. For the first time in the annals of British finance is the obnoxious principle put forth and adopted as fundamental by the political party which claims to represent commercial freedom and fiscal progress, that foreign investments are to be repelled instead of welcomed in the money market of the country whose commercial prestige and rapid growth in wealth are so largely due to her position as "banker of the nations." This new stamp tax is, however, so small that except as to the vexatious restriction and offensive discrimination which it involves, it would not have challenged much comment. The revenues from it will be so trifling that one is at a loss to harmonize it with a farseeing policy or a thoughtful administration. When we remember, too, that the same tax-law imposes on British finance, stamp duties equally troublesome and vexatious, we may be, perhaps, less inclined to resent it, or to quarrel with its discrimination against foreign investments in general and against our own securities in particular.

This new law went into operation on the ninth of last month. It imposes a fine of £20 sterling on every person in England who sells or pays interest on or transfers any unstamped security of a foreign or colonial Government or company. The stamp amounts to one-eighth per cent of the face of the bond, and no foreign securities are exempt but such as were issued before the 4th of June, 1862. This tax is so unequal in its operation and so unprecedented in the fiscal legislation of England that we copy the important sections of the law, which are as follows:

The term "foreign security" means and includes every security for money by or on behalf of any foreign or colonial State, Government, municipal body, corporation or company, bearing date or signed after the 3d day of June, 1862, (except an instrument chargeable with duty as a bill of exchange or promissory note):

1. Which is made or issued in the United Kingdom;
2. Upon which any interest is payable in the United Kingdom;
3. Which is assigned, transferred, or in any manner negotiated in the United Kingdom.

Every person who, in the United Kingdom, makes, issues, assigns, transfers, negotiates, or pays any interest upon any foreign security not being duly stamped, shall forfeit the sum of £20.

The Commissioners may at any time, without reference to the date thereof, allow any foreign security to be stamped without the payment of any penalty upon being satisfied, in any manner that they may think proper, that it was not made or issued, and has not been transferred, assigned, or negotiated within the United Kingdom, and that no interest has been paid thereon within the United Kingdom.

It is scarcely probable that in a country so alive to its national interests such an anomalous tax can remain on the statute book; but so long as it is in operation it will of course affect equally the securities now in England and those which are to be imported. Low priced shares and bonds will suffer more than those which sell at par or above. The tax appears, also, to be levied once for all, and a bond when it has received the stamp passes unchallenged afterwards. One effect of the new arrangement will be that our United States bonds, when stamped in England, will be defaced; and may be refused elsewhere. Here and everywhere bonds are less negotiable if they bear any marks or stamps of defacement. Now, as the London Stock Exchange have adopted a resolution that "no foreign securities bearing date after June 3d, 1862, if unstamped, shall be a good delivery," it follows that bonds once in England will have to stay there or must be exported at a small sacrifice. A part of this inconvenience will of course be obviated if the stamp should be attached, instead of being either impressed or gummed so as to obliterate part of the face of the bond. These little impediments, however, will not prove very formidable, nor will they hinder the flow of English capital into our Government bonds and into the securities of our finished railroads of good repute. Five hundred millions of British capital from small investors would flow into these securities in a few months if the owners of this capital could only be got to understand how safe and lucrative these securities are, and how much better than any other foreign securities they can buy in England.

Leaving this matter, however, we may advert to a second point in the new stamp duties which indirectly affects ourselves. The tax on cheques payable to order is raised and made *ad valorem*, instead of being a fixed nominal stamp as it is here. Among us the cheque stamp had better be abolished, but in England the cast-iron rigidity of the banking system renders any such tax specially mischievous. A low

Digitized by Google

fixed tax on cheques tends to discourage their use, and thus precludes the advantages they confer in economising the currency; but an *ad valorem* tax does this much more. It tends to make the currency less expansive and cuts off from the monetary machinery a very important contrivance for diminishing its friction, and preventing those spasms and jerks in its movements which project so much suffering and disaster into business, commerce and industrial enterprise. The banking system of England has no such superfluous elasticity as to be able to dispense with any of the old safeguards. It needs all practicable expedients for preserving equilibrium and easy movement in the great central money market to which all the money markets of the world are tributary. The stern immobility of the English system, its rigid obstinacy and inflexible habitudes, make it reluctant to adapt itself to monetary hurricanes, such as in 1866 so disastrously exposed its faults. If there should be immediate peace between Germany and France, and if the conquered people acquiesce in the inevitable and submit gracefully to the fortune of war, still it is easy to foresee new tidal movements of capital to and from the great money centres of Europe. These movements, consequent on the restoration of peace, will be erratic and may be disastrous. On the other hand should the war be prolonged, or should the fires of civil strife kindle themselves in France, the prospects will be even worse. If in any of these contingencies the Bank of England should have to meet a drain of gold, how will that venerable institution get its supply? In 1866 the supply was largely got through France, and by France in part from us. With the experience of Black Friday before her we presume the Bank of England will pause before attempting to attract gold from abroad by the antiquated roundabout device of attacking the business of England and raising the rate of discount on her own people. It is probable that this crabbed system of self defence would be useless, now that the auxiliary arm of the sister Bank of France is paralyzed.

The Bank of France imported almost $40,000,000 more gold during the four months following the panic of 1866 than did the Bank of England, and yet in Paris the rate of discount never rose beyond 4 per cent. while the London rate was resolutely held for thirteen weeks at the ruinous altitude of 10 per cent. The Bank of England in 1839 saved her credit by borrowing gold from the French Bank. She could in all probability at her own expense have imported gold as easily and as cheaply as could the bank at Paris. Since then the excellent system established under the Bank of England charter of 1844 was established, but the machinery has been so spasmodically and clumsily operated that the stock of bullion had to be similarly replenished in 1847 and 1857. And yet on this precious reserve, which is carelessly guarded, the equilbrium of the whole financial mechanism of Great Britain depends. This great central "governor" of the delicate monetary machine has too much been left to chance. It is drained or supplied, kept up or impaired, by the changing, capricious streams of internal and international trade. Hence it has happened that when from any cause the reservoir of the precious metals is depleted, the consequent disorder has usually been exaggerated and augmented into a panic. For the bank gives noisily the alarm, and spreads terror and disorganization to the remotest part of the commercial and industrial system by a rise in the rate of discount. This cruel wasteful method of attracting gold to the vaults of the bank is now more dangerous than ever. The Bank of England must hereafter replenish its bullion reserves without raising its minimum of discount to panic rates. It cannot now protect itself by spreading disaster throughout the nation whose monetary quietude it exists to promote. The Bank of France on which the pressure of this curious device of financial mechanics was indirectly to act can now no longer be relied on; and it will be well if the method which the Paris institution found out to supply her gold reserve without raising the rate of interest can be discovered and modified and applied by her British neighbor in time to give security against any coming disaster or pressure Such at least are the opinions prevalent here, and we have no small anxiety about these matters for this country is now more than usually in debt to Europe. Great Britain is of course our largest creditor, and our facilities for payment, ample as they are, will be enlarged according as our securities are in foreign demand, and as a wise or narrow policy governs the movements of the Bank of England.

THE OUT-LOOK FOR BREADSTUFFS.

The speculative advance which has taken place in Breadstuffs, in anticipation of the immediate increased demand that was expected to attend the fall of Paris, and the more remote demand to arise after the return of peace, was perhaps natural enough, for it has been a long time evident that the needs of a city of two millions of people would be great and urgent whenever they should be restored to communication with the sources of supply, while the close of the war would bring to light over the whole of France the waste and consequent want the war has produced. But the first event upon which the speculation was based, having taken place, it is wise to pause and examine the position in which the market is at present, and what are the prospects respecting supply and demand for the balance of the crop year.

The course of prices since Monday affords evidence that the effect of the fall of Paris had been freely "discounted;" that is, the advance which it was expected would be caused by that event, took place in anticipation thereof; and the circumstance which was confidently relied upon to cause a further advance, merely found speculative holders anxious to realize profits, and many of them were precipitated into a semi-panic by the weakness, in the place of the buoyancy, which the market exhibited. This is so uniformly the course which such speculations take, that the wonder is, any body should have expected any thing different.

Making a fair allowance, based upon the course of receipts and deliveries, the visible supply of wheat in the principal markets of the United States and Great Britain on the first of February was about twenty million bushels, against about twenty-five million bushels one year ago. This would indicate a decrease in the supply of five million bushels, or twenty per cent, in one year. Here is certainly a large decrease, and, unexplained, would seem to be ominous of a deficiency. But the fact is, stocks one year ago were exceptionally large—the largest ever recorded for that period of the season; and the stocks, though smaller now than then, are much above the average. The partial figures which are available, justify the estimate that two years ago, or February 1, 1869, the visible supply of wheat in the the principal markets of the United States and Great Britain was not more than fifteen million bushels, or twenty-five per cent less than now.

The disparity in prices is another important consideration. The *gold* price of No. 2 Spring Wheat in this market February 1, 1870, was $1 00; it was on Wednesday of this week $1 42—an increase of 42 cents, or 42 per cent. That this advance in price has its effect, in the face of a demand unusually pressing (and which must continue so), is evident from the fact that in this market, with a stock 1st of January, 1871, 122,000 bbls. larger than the previous year, and with receipts for the month of January 52,000 bbls. larger than last January, the exports have only

Digitized by Google

increased 6,500 bbls., leaving an apparent discrepancy in stocks on hand on the first of February of 167,500 bbls. against us, as compared with last year. Then, in wheat there is a falling off in the export for January of 162,000 bushels.

Again, if the visible supply of wheat is now smaller than last year, it is apparent that the higher prices now current will lead to a stronger desire to reduce stocks on hand, especially if it should appear that prices were not likely to go much if any higher. At the commencement of the present crop year stocks were kept up by speculation. On the first of September last the visible supply of wheat in the United States and Great Britain was not far from fifteen million bushels, and it must be a very peculiar chain of circumstances that will induce holders to carry ten million bushels into the next crop: and the reduction of present stocks ten millions in the interval will be very difficult.

There is another obstacle to the maintenance of high prices of flour and wheat. We refer to our large and excellent crop of corn at relatively much lower prices. It will not only take the place of wheat at the South and in the British Provinces, but its transportation will probably increase inland and ocean freights to the extent of ten or twelve cents per bushel, and this will come out of the salable value of wheat, part here and part at the West.

Speculation is based to a great extent, as we have stated above, upon the supposed wants of the Continent, following the peace which it is thought will be established. Whether this supposed want is exaggerated or not, it is not necessary for us to inquire. It will suffice to say that the period immediately following a war is usually one of mercantile depression, not favorable to speculation. The demand from the Continent, whatever its extent may be, will not, for the present at least, be a speculative one, but to meet absolute needs; and such a demand suggests the steady but slow process of realizing, rather than the activity upon which speculation thrives.

In view of these facts we think it behooves dealers in breadstuffs to use great caution.

REVIEW OF THE MONTH.

The opening month of the New Year was characterized by the usual derangement in monetary affairs consequent upon the shifting of loans, incident to the payment of interest, dividends, etc., falling due on the first of January. The market was also further disturbed by the irregularities of December, to which allusion was made in our last months paper. The scheme was brought to a ridiculous conclusion early in the month, and from the returns of the Clearing House since it is presumed that the locked up greenbacks have been restored to general circulation. The bank statements have continued unfavorable however, though perhaps their true condition is not reflected in the returns. According to the exhibit of the 28th, the banks hold but a trifle over $16,000,000 in excess of legal reserve, the specie standing at $25,500,000. Some apprehensions were excited toward the close, but taking advantage of the comparatively limited resources of the city banks, another attempt would be made to interfere with the natural course of money and advance rates by the expedients hitherto made use of. The proposed movement is based upon the expectation that the conclusion of the war would require specie from this side in large amounts which would so draw down the reserves of the banks which are composed of specie and legal tenders—as to render the obstacles to be surmounted less difficult than usual. On the other hand the policy of the Treasury for February in purchasing eight millions of bonds as against six millions in January, would mitigate against the eventual success of the scheme, the more especially as it is to be hoped that the Secretary of the Treasury would be aroused to the necessity of crushing the scheme in its infancy. The receipts of currency from all parts of the West have been and continue large, the course of exchange being in favor of this centre, the flurry in the Chicago market about the middle of the month having subsided. To a large and uncomfortable extent these remittances have been in the form of National bank bills, which have been in such superabundant supply as to be exchangeable for legal tenders only at a discount of ¼@½ of one per cent. This created the usual discussion with regard to the establishment of some plan for the redemption of these notes, but no positive steps were taken with reference to it. More attention was directed to the discount market at the close, and some large orders were received to buy prime business paper, especially from New England institutions. Prime acceptances have ranged at 7@8 per cent. The domestic produce markets have been fairly active, and in some cases a marked advance has been made in prices. In the matter of breadstuffs and provisions, great excitement has prevailed at intervals, in consequence of a heavy demand for export and speculation. In other products the markets have been generally free from excitement, though an improved tone has been generally remarked in almost every direction. In regard to the future, the disposition is quite prevalent to anticipate a still better state of affairs. The settlement of the Franco Prussian war is destined to have its influence on values in the produce market, and, therefore, the final adjustment is awaited with intense interest. There was a more active business noted in the United States securities, more especially at the close of the month, when under liberal purchases of investors, as well as by prominent stock houses for speculative purposes, prices steadily advanced, and closed at the highest quotations reached. The London market for American Funds was strong, and also advanced, and some heavy purchases of Sixty-two's were made by a prominent house here, apparently upon the advice of its London correspondents. Of the Five-Twenties the more prominent dealings were in 1867's. Ten-Forties were in demand, stimulated by the closer approach of the payment of the coupon. Sixes of 1881 were much sought for, as well as Currency 6's, as in view of the funding project these bonds are desirable, and cannot be affected by Congressional legislation.

The stock speculation has been active, and at times much excitement and violent fluctuations were observed in many of the more prominent shares. During the early part of the month the interference with the course of money tended to keep the market unsettled and generally heavy, but the closing days have recorded an upward movement in all directions. It was not a difficut matter to sustain prices, when money to carry stocks was so readily attainable, and whether present values are or are not cheap or dear, is a matter of simple opinion. There are those who persistently presage lower quotations, and a general break in all the

Digitized by Google

prominent stocks of the list, but as this has been the import of their views for several weeks, it remains to be seen what importance is to be attached to them when the average prices as compared with last month are taken into consideration.

The following table will show the opening, highest, lowest and closing prices of all the railway and miscellaneous securities sold at the New York Stock Exchange during the months of December and January, 1871:

The gold speculation was decidedly tame during the greater portion of the month, and the market was characterized by unusual dullness and stagnation, the basis of transactions being 110¼ @110¾, though the extreme quotations were 110¼@111¼. The higher price was made at the close, and occasioned by the reported surrender of Paris, the opinions in regard to the future course of the premium being about equally divided. Up to that time, however, no noteworthy feature was recorded, and no interest, apparently, manifested in the course of the price. With the close of the war, however, more animation will doubtless be observed in the readjustment of affairs deranged by the war.

Foreign exchange closes strong, with a good demand for bills especially from the Canada banks. The indefinite news from the seat of war, however, was not encouraging to drawers, who consequently held their sterling firmly. A large amount of bills was however, drawn by a prominent banking firm, and the bills sold, against a sterling loan of £500,000 negotiated in London by the Camden and Amboy Railway Company. There was a scarcity of commercial bills, which sold in close proximity to sterling.

The following have been the quotations of Foreign Exchange:

COURSE OF FOREIGN EXCHANGE (60 DAYS) AT NEW YORK.

Days.	London. cents for 54 pence.	Paris. centimes for dollar.	Amsterdam. cents for florin.	Bremen. cents for rix daler.	Hamburg. cents for M. banco.	Berlin cents for thalers.
			(Holiday)

COMMERCIAL AND MISCELLANEOUS NEWS

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a large increase in both dry goods and general merchandise. The total imports amount to $9,705,704 this week, against $5,590,534 last week, and $5,640,792 the previous week. The exports are $2,636,581 this week, against $5,134,499 last week, and $4,607,757 the previous week. The exports of cotton the past week were 14,027 bales, against 14,182 bales last week. The following are the imports at New York for week ending (for dry goods) Jan. 27, and for the week ending (for general merchandise) Jan. 28:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,331,855	$2,520,959	$1,917,159	$3,109,101
General merchandise	3,695,769	3,550,077	3,129,945	6,596,603
Total for the week	$3,947,624	$6,070,336	$5,046,404	$9,705,704
Previously reported	9,557,989	9,285,851	8,910,413	11,231,396
Since Jan. 1	$13,505,613	$15,356,187	$13,956,817	$20,937,080

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie from the port of New York to foreign ports, for the week ending January 31:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$3,318,009	$3,705,374	$3,822,470	$2,636,581
Previously reported	13,360,704	11,071,919	10,852,856	18,704,183
Since Jan. 1	$16,678,713	$14,777,193	$14,675,326	$21,340,768

The following will show the exports of specie from the port of New York for the week ending January 28, 1871:

Jan. 23—Str. Merrimack, St. Thomas—American gold	$15,000	British gold	$2,800
Jan. 23—Br. Morning Light, Arroyo—American silver	15,000	Jan. 24—Str. Cuba, Liverpool—Silver bars	63,580
Jan. 23—Sch. Lettie Wells, Santa Martha—		Jan 25—Str, Aleppo, Liverpool—Gold bars	93,709
Total for the week			$197,089
Previously reported			1,784,733
Total since Jan. 1, 1871			$1,981,822

Same time in 1870	$2,683,339	Same time in 1867	2,505,211
1869	2,251,473	1866	2,535,236
1868	6,980,231	1865	2,967,573

The imports of specie at this port during the past week have been as follows:

Jan. 23.—Str. South America, Para—Silver	$1,694	Laguayra—Gold	$35
Jan. 23—Str. Tybee, St. Domingo—Silver	3,450	Jan. 26—Str. Missouri, Nassau—Gold	4,180
Gold	993	Jan. 26—Str. Ocean Queen, Aspinwall—Silver	741
Jan. 24—Bark Thos. Dallett,			
Total for the week			$11,143
Previously reported			159,416
Total since January 1, 1871			$170,558

Same time in 1870	$1,521,906	Same time in 1868	$377,738
1869	141,733	1867	142,339

Railroad Management.—In another column will be found a circular of Mr. Rufus Hatch, of No. 17 Broad street, this city, upon the subject of railroad management—particularly of the Chicago and Northwestern road. It has become a custom to censure the issuing of circulars or pamphlets directed against the financial management of railroads or other corporations whose securities are sold at the Exchange; but we think that such censure should be limited to those cases in which some misrepresentation of facts is made or some false impression designedly given. Wherever these publications have the effect of directing public attention to corporate management and of stimulating inquiry and investigation in regard to affairs which would otherwise remain unnoticed, they are to that extent, decidedly beneficial, and far from damaging the officers or directors of a well-managed company, they merely throw credit upon a strong administration.

The avowed purpose of the author of this circular and the two which preceded it, is to ventilate thoroughly the important subjects of railroad transportation and land grants to railroads, to show from the large increase which has been made in the capital of leading companies by "watering" their stock, that they are earning immense profits upon the actual cost of the roads, and that a fair profit upon that cost, could be paid now at much lower rates for freight transportation; and in regard to land grants, that they have often failed to accomplish the objects for which they were made. Whether the conclusions drawn are warranted by the facts our readers must judge for themselves; as to the figures we presume that they are correctly quoted, as it would seem to be worse than useless to publish statements which could be immediately refuted by reference to the well known history of the companies.

Digitized by Google

Alabama and Chattanooga Railroad Interest.—The special Message of the new Governor of Alabama to the Legislature on the default of State interest, on the 1st of January, contains the following:

From information not at all definite in its character, I surmise that the indorsed bonds of this Company amount to between four or five millions, which, added to the two million State bonds, make an aggregate liability of the State for at least six millions of dollars and upward. The interest on the indorsed bonds is payable by the State in currency, the interest on the two million bonds in gold. Five hundred thousand dollars must, therefore, be annually provided for by the State to pay this interest, if she recognizes the validity of the debt and assumes its payment. This is the State's liability for one railroad company alone. I have been urged to pay the interest due on the Alabama and Chattanooga Railroad Company, and positively refused, and shall continue to refuse, unless empowered and required by your legislation, to do so. The Treasury of the State is not in a condition to furnish the means, and I cannot and do not recommend an increase of our already oppressive taxation to supply the faithlessness of this railroad corporation. It is true the State might issue bonds *ad libitum* to cover up the delinquences and spoliations of speculators and financial gamblers; but would that be fair, would it be honest, or consonant with the fair dealings of the State? Will it not be better to meet the issue at once, and ignore every party that has wantoned with and sought to humiliate her credit and name? I have said that there is no record of the State's liabilities in behalf of this Company. Neither can be found any of the securities required by law to be given to the State by that Company. What has become of them, or whether they were executed, delivered and placed on file in any of the offices of the Government, I am unable to inform you. I therefore recommend that a joint committee of the two Houses of the General Assembly be raised, with proper and necessary powers to inquire into this whole matter before any final action is taken thereon.

Illinois Pays Gold.—The State of Illinois will pay off the $3,000,000 principal and the accrued interest thereon, under the following recent order of the Legislature, in gold—leaving outstanding against the State only $2,000,000 of debt, mostly due in 1877:

A BILL for an act to authorize the State Treasurer and Auditor to purchase coin for the purpose of paying the State indebtedness.

Whereas, Certain State bonds, payable in gold, have been, by proclamation of the Governor, declared due and payable on the 15th day of February next; and, whereas, the funds in the Treasury provided for the payment of the same are in currency, whereby an emergency has arisen rendering it necessary that this act should take effect immediately; therefore,

SECTION 1.—*Be it enacted by the People of the State of Illinois represented in the General Assembly*: That the Governor is hereby authorized to direct the State Treasurer and Auditor to purchase, at the lowest market price, the necessary coin and exchange required to pay the principal and interest of said bonds, with the funds provided by law for that purpose.

Rufus Hatch's Circular No. 3.

FRAUDS IN RAILROAD MANAGEMENT—CHICAGO AND NORTHWESTERN RAILROAD.—The waterings in this great concern have been equally excessive, though of a different character from those described in the previous circulars. A direct one, however, of $6,030,500 was made at the time of its consolidation with the Galena and Chicago, the holders of stock in the latter being allowed two shares for one previously held, "to equalize values"—a phrase greatly in vogue with the self-constituted tax-gatherers who now control and levy their contributions upon all our great avenues of trade. The natural and equitable mode would have been, to equalize *down* instead of *up*, as the shares of the Northwestern, at the time, were comparatively worthless, while those of the Galena and Chicago commanded only *par*. But a *square* consolidation would have left no plunder, the sole inducement thereto, in the hands of the parties manipulating it.

The great waterings in this road have been effected through leases of other lines. The most important of these was that of the road from the Missippi to the Missouri River, through Iowa, a distance of 353 miles, and owned by two corporations—the Chicago, Iowa, and Nebraska owning the link of 81 miles from the Mississippi River to Cedar Rapids; and the Cedar Rapids and Missouri River Company owning that from Cedar Rapids to the Missouri, a distance of 272 miles. This line had a land-grant of 1,422,109 acres. A party of shrewd operators got hold of this line, and set themselves to work to get this magnificent domain into their own hands, and, at *at the same time, to get rid of the road that had to be built to secure it*. This interesting problem was solved in the following manner: The managers of the Chicago and Northwestern agreed to take a lease of the two roads, *without* the land, paying 47½ per cent. of the gross earnings afterwards reduced to 37½ per cent. of the Chicago, Iowa and Nebraska Road, and $1,750 per mile upon the Cedar Rapids and Missouri River Road, up to the 1st of January, 1871, and thereafter at the following rate: to pay $700 per mile of the $1,500 per mile first earned, 33⅓ per cent. of the $3,000 next earned, and 20 per cent. upon all earnings in excess of $4,500 per mile. The rental of the first-named road the past year was $537,450, the proportion of gross earnings paid being 42⅓ per cent., the reduction from 47½ to 37½ per cent. taking effect for six months of the fiscal year only. At the same rate of gross earnings, the rental (37½ per cent.) the present year will be $492,870, the gross earnings of the past year being $1,312,710. The gross earnings of the Cedar Rapids and Missouri River Road, for the past year, were $2,106,476. The total for both lines were $3,419,186. The earnings per mile of the Cedar Rapids and Missouri River Road, the past year, were $7,744. At this rate, the rental for the present year will be $2,348 per mile, or a gross sum of $638,656. The total rental of the two lines, consequently, will be $1,130,926. The capital of this rental, at 7 per cent., is $16,157,375. This transaction is known as the Blair & Ames *grab*.

Now, the cost of this line to the parties holding the same could not have exceeded $20,000 per mile, or a gross sum of $7,060,000. The rails were laid, and bridges built—this is about all. There were no equipments, and no accommodations for business, except those supplied by the lessees. The rails laid on the greater portion of it were only 45 pounds to the yard, and had to be replaced soon after the lessees had come into possession of it. The profit paid to the parties constructing it, consequently, was $9,097,375. The cost of this road to the lessees—that is, the capitalized rental—is $45,771 per mile. It would require an expenditure of $20,000 per mile, in addition, upon it, in construction and equipment, since they came into possession of it, to bring the road to its present condition. This sum brings up the cost to $65,771 per mile, or up to a total of $28,115,163. The interest on this sum, at 7 per cent., is $1,618,061.

The capital account for the leased roads, as stated by the respective companies, amount to $20,346,500—that of the Chicago, Iowa and Nebraska being $4,726,200—made up of $3,916,300 of Stock, and $810,000 of Bonds; that of the Cedar Rapids and Missouri River being $15,620,000, and made up of $8,000,000 of Stock, and $7,620,000 of Bonds.

The Land grant to the Iowa lines was 1,422,109 acres. Of this quantity, certificates for 1,200,000 acres had been issued more than a year ago. These lands, at the low valuation of $7 per acre, are worth $8,400,000. The value of these lands, added to the unquestioned profit from the construction of the road, make a total of $17,097,375. This sum measures the profit that one party made out of this affair in the course of a very few years.

Another example, of the same kind, was that of the Winona and St. Peter's Railroad, of Minnesota. A party got hold of this line, built the road, took the land, and then turned over the road, *without the lands*, to the Chicago and Northwestern, at about $35,000 per mile, or nearly twice its cost. The road had no connection whatever with the Chicago and Northwestern. It did not, in fact, come within 100 miles of any portion of the road of the latter Company. A lease might just as well have been taken of a road upon the Pacific Coast. The Winona and St. Peter's line ran through an unsettled country, and could not, for years, be expected to pay a remunerative return on its cost. In addition to the rental paid, the Northwestern had to complete and equip it, carrying the cost of the line to this Company up, probably to $40,000 per mile. The land-grant to the Winona and St. Peter's Company was 1,410,000 acres. Of this vast grant, 342 376 acres had been confirmed to it on the first day of July, 1869. The value of the lands acquired equals $2,396,632. Assuming the profits of construction to have been $15,000 per mile for 126 miles, the aggregate was $1,890,000. The total profit, both from lands and construction, was $4,286,632. This affair is known as the Barney *grab*.

Another example in kind was that of the Peninsula Railroad in Michigan; a land grant road, entitled to 346,880 acres, of which 218,880 acres had been certified to the Company on the first day of July, 1869. This road was built and consolidated with the Northwestern, *without the Lands*, at a rate of about $40,000 per mile. The lenth of this road is 73 miles. Its cost to its projectors was about $20,000 per mile. The profit on construction was about $1,460,000. The value of its land-grant, at $7 per acre, was $1,532,160. The profits of the transaction, consequently, were $2,992,160. The Peninsula Road had no connection whatever with the Northwestern, nor did it come within 50 miles of any portion of the line of the letter. This is known as the Ogden & Tilden *grab*.

The total amount of lands already ceded to the three companies whose roads are leased to the Northwestern, amounted on the first day of July, 1869, to 1,763,256 acres. Their value, at $7 per acre, is $12,328,792. Large additions are to be made to the present cessions. The profits arising from the construction of the roads could not have been less than $12,447,375. The profits, so far, to outsiders, on the three lines, have been $24,776,163. The *inside* profits have been $8,840,650, to wit: the waterings in favor of the Galena and Chicago of $6,030,500 at the time of the consolidation, and $2,810,110 of scrip dividends paid in 1868. The total profits have been $33,616,777, as shown in the following tabular statement:

Roads.	Waterings.	Profits of Construction	Profits on Land Grants.
Chicago and Northwestern.....	$8,840,510		
Chicago, Iowa, and Nebraska.. } Cedar Rapids and Missouri.... }		$9,097,375	$8,400,000
Winona and St. Peter's.....		1,890,000	2,396,632
Peninsula.....		1,460,000	1,532,160
	$8,840,510	$12,447,375	$12,328,792

What was the motive that induced the Chicago and Northwestern Company to make contracts so destructive to its own interests, and without gaining any advantage from the land-grants to leased lines? The leases were the product of gross corruption or folly, it hardly matters now which. Suffice it to say, it was a gross perversion of a most sacred trust, for which perversion the public are paying bitterly. They, paying on the roads at double cost, have derived no advantage whatever from the grants so munificently made. These grants should in all cases have been made the basis of the securities issued by each company. The proceeds of their sale should have retired these securities, reducing in an equal degree the cost of the roads, with a corresponding reduction in the charges for transportation. By the time the lands were sold, the reduction in the amount of the securities issued would have equalled such proceeds, or the sum of $12,242,792. The annual interest on this sum is $856,995. This sum would have been the annual gain to the commerce of the country, had these lands been applied, as they should have been, to the construction of the road.

These lands are now wholly held—*Irish fashion—by absentees*, or speculators, greatly to the injury of the railroads and to the interests of the people, who demand cheap lands and speedy settlement. But, from the extravagant prices asked, these land-grants are still vast wastes, and are likely for years to remain so. They cost their owners nothing; on the other hand, their owners made vast sums by the construction of the roads by which the lands were acquired. They consequently can hold them till they realize the extravagant price demanded for them. When sold, they are to be paid for by the labor of the pioneer, and not by the capital of the rich.

The total amount of the capital and debts of the two companies, on the first day of June, 1864, when the consolidation went into effect, was $30,514,000. The length of line then in operation was 609 miles. Its cost per mile was $50,098. The capital account of the company on the first day of June, 1870, the date of the last annual report, was $51,108,591. The capitalised rental of the leased roads was $16,157,375. The total capital account of the company, consequently, was $67,265,966. The present length of line owned and leased by the company is 1,156 miles. The cost per mile is $58,200. The increase of the capital account, in six years, has been $36,751,966, or at the rate of $6,125,327 annually. The increase of milcage has been 507 miles. The cost per mile has increased from $50,098 to $58,200.

The above statement does not include the Winona and St. Peter's road, whose 7 per cent. bonds are guaranteed by the Chicago and Northwestern, nor the several lines which the Company are now building such as the Trempeleau, whose bonds pay 10 per cent. interest; the Iowa Midland, whose 8 per cent. bonds have recently been *privately* negotiated; and the line from Madison to La Crosse.

[The directors in the Chicago and Northwestern Railroad, as in the Erie, are elected for one, two and three years. It is due to some of the present board to state that they were not parties to these original land-grant swindles.]

The examples that have been cited in this and previous circulars, show how universal have been the corruptions in the management of our railroads. These all result in an excessive cost of the works, and fall, in the end, wholly upon the people. Upon such costs, dividends and interest are sought to be paid by excessive rates of charges. The people, consequently, suffer just in ratio, as those preying upon them grow rich.

Since writing the above circular, I have been favored with a communication, signed by Samuel Barton, and addrersed to "the holders of the capital stock and *consolidation* certificates of the New York Central and Hudson River Railroad." Mr. Barton is a near relative of Commodore Vanderbilt, and unquestionably speaks by authority. By him I am charged with wilful falsification, from pecuniary motives. I disclaim, utterly, having any interest whatever, directly or indirectly, in New York Central Stock or Scrip; nor have I had, for a long time. Mr. Barton's role is that of the lawyer who said "he had no evidence to offer in defence, but should proceed to abuse the plaintiff to the best of his ability." I stated that of all the waterings not a dollar went into the road. This is denied. Commodore Vanderbilt might as well have denied the issue of the certificates themselves. The public have a right to ask you how much money you paid for the millions of certificates issued to yourself. If you paid nothing, did the recipients of your bounty, and who were in your secret, pay anything? If nothing was paid, then these certificates were a *Stock Dividend*, and, such being the case, have you paid the five per cent. Government tax on them? Is anything received on these certificates by way of dividends? If so, how much, and who pays? By what authority did you and your board, summoned by your warrant to a midnight session, place a perpetual mortgage of $44,428,330 upon the commerce of the country, without the equivalent to the public of a dollar? All this, Commodore, was done at your behest.

In your defence, you cite your management of the Harlem, *another most oppressive monopoly*. I did not refer to it; reserving it for another circular. But as you have brought it in, will you answer a few questions here? Did you not, while a Trustee, issue to yourself a large amount of its bonds at fifty per cent. on the dollar? Have you not, since assuming control of this property, advanced the tariff on *milk* from a half to one and a half cents per quart—a three hundred per cent. additional freight tariff on one item alone? Is this the way you have stamped your *individuality*, *economy*, and *genius* upon the Harlem Road?

Mr. Vanderbilt has had charge of the New York Central Road for three years. According to Mr. Barton, and the sworn statement of the officers of the road in 1867, he has, in that time, added only three locomotives to the number in use prior to '67. In a future circular, I propose to show the exact value of the improvements he has made on this line since obtaining control of it, and the amount of additional stock he has issued and received the money for.

Mr. Barton insists upon Mr. Vanderbilt's *wonderful abilities* as a railroad man. No one denies this. But with his *untold millions before he had anything to do with the New York Central*, would it not have been more graceful and meritorious in him to have turned his transcendent abilities to the *reduction* of the cost of transportation, and to alleviate the burdens that now press so heavily upon the commerce of the country, and upon labor? That the *stockholders* have no cause to complain of Mr. Vanderbilt's management is too evident to have needed the proof Mr. Barton deduces, but it is the *people*, and not their servants, who should reap the benefits resulting from such good management. *They* create the trade of these great highways, and as that trade increases it is not a *corresponding increase of scrip capital but a corresponding reduction in freight charges* that they, whom the roads are built and run to serve, have a right to expect.

—A telegram from Montgomery (the capital of Alabama) to a private party, to-day states that the Committee on the Alabama and Chattanooga Interest, now in default, will report in favor of paying interest on all bonds not held by the Company at the present time. The excepted amount is said to be $420,000 bonds only in the hands of Mr. Stanton, the President.—*New York Times*, Feb. 2.

—Messrs. Thomas Denny & Co., Bankers and Brokers, of No. 39 Wall street, have favored us with a copy of their annual circular containing the prices of the stocks, bonds, &c., during 1870. Messrs. Denny & Co. make railroand bonds a specialty, but also attend to all the usual commission business in buying and selling stocks, bonds, gold, governments, &c.

—Attention is directed to the card of Mr. A. C. Kaufman, of Charleston, S. C., among Southern Bankers on another page. Mr. Kaufman is a gentleman of character and high associations in his city, and refers to several prominent gentlemen well-known in banking and commercial circles. As he has devoted special attention for some years to the purchase and sale of Southern securities, and to the business of collections in his State, we presume that any business in this line entrusted to his care will be quite satisfactorily attended to.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank,
Messrs. Clews, Habicht & Co., } London.
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

BANKING AND FINANCIAL.

NEW 7-30 GOLD LOAN.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Jan. 14, 1871.

United States Five-twenty Bonds, if allowed to run until 1875, will pay but Four Per Cent. Gold on the investment at present market rates, while they are likely to be funded at a lower rate of interest than they now bear before that time.

The First Mortgage Bonds of the Central Pacific Railroad Company, at present market price, will pay nearly Seven Per Cent. in Gold on the investment, and cannot be called in or the interest reduced under twenty-five years.

A difference of from Fifteen to Twenty Per Cent. may be realized in exchanging Government Bonds for Central Pacifics, or saved in making new investments.

The safety and value of the First Mortgage Bonds of the Central Pacific Railroad Company are thoroughly established and universally recognized.

The value of the property, the immense and increasing revenues of the Company, and its able and honorable management, assure the security of the principal and prompt and regular payment of interest beyond question.

We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold and Coupons, execute orders in miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general Banking business.

FISK & HATCH.

The Bankers' Gazette.

FRIDAY EVENING, February 3, 1871.

The Money Market.—The tendency towards ease in the money market has steadily increased, until the rates on call loans have become 4 to 6 per cent, the bulk of transactions being done at 5 per cent. The last bank statement was not particularly favorable, showing a decrease of $1,100,050 in specie, a decrease of $283,518 in legal tenders, and a decrease of $724,297 in deposits and circulation, the result of which was to leave the net amount of excess over legal reserve $1,202,493 less than the previous week—the whole excess over legal reserve being $16,172,983. The bank statement, however, had no important effect, and there is a general confidence in easy rates for money during the next month at least. One cause of the larger supply of funds loanable on call this week is said to have been the release of the money locked up some ten days ago to create a stringent market. The demand from brokers is not now large for the purpose of carrying stocks, and this fact, in connection with the large amount offering, accounts for the unusually low rate of 4 per cent, at which money is easily obtainable on government bond collaterals.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Jan. 28, 1871.	Jan. 29, 1870.	Jan. 30, 1869.
Loans and discounts	$270,283,870	$260,324,271	$265,171,109
Specie	27,420,445	40,475,714	27,134,928
Circulation	31,818,342	33,711,382	34,231,156
Net deposits	211,105,665	210,150,913	196,925,402
Legal Tenders	49,491,089	56,782,263	54,747,569

The demand for first class commercial paper has improved with the lower rates of interest on call loans, and the price at which prime 60-day paper can now be readily negotiated —6½ per cent.—is the best rate that has been known in our market for some time past. It is undoubtedly true that the demand for paper is largely stimulated by the large accumulation of loanable funds at this centre, but it also appears that there is considerable confidence on the part of banks and other conservative lenders in the soundness of the mercantile community. Second class names pass more readily than heretofore, though as usual at a wide range of prices according to quality.

United States Bonds.—With only a moderate amount of business prices have been strong, and have advanced in the week about ¼ per cent., 1867s being quoted to-day at 109½ against 108½ last Friday; the other issues generally showing a similar improvement. The fall of Paris, and the consequent improvement, or rather prospective improvement, in financial affairs at London and on the continent, has given rise to some small purchases on foreign account, but these have as yet been very limited, and as the war is not yet definitively terminated, it can h rdly be expected that any real activity will be imparted to financial affairs for some time to come. The settlement of European difficulties may have a more important effect upon our bonds by causing the question of funding the Five Twenties to be again brought up, as it is well known that Secretary Boutwell considered the Franco-Prussian war as the chief impediment in the way of negotiating a five per cent. loan last year, and has been looking forward to the termination of that war as a period when the placing of such a loan might be attempted with success. The purchases recently seem to have been more on speculative account than for investment, and some of these have probably been on orders previously given to buy on the surrender of Paris at prices then current. The Treasury programme of purchasing $2,000,000 every week this month has also strengthened the market; the bids at the purchase of $2,000,000 on Wednesday were $5,230,000, not an excessive amount.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Jan. 28.	Monday, Jan. 30.	Tuesday, Jan. 31.	Wednesd'y Feb. 1.	Thursday, Feb. 2.	Friday, Feb. 3.

State and City Bonds.—State bonds have been generally dull, with prices tolerably steady. Dispatches from Alabama state that the Committee of the Legislature appointed to consider the subject of paying interest on the Alabama and Chattanooga railroad endorsed bonds and on the State bonds issued to that company, will probably report in favor of paying such interest. It is certainly to be hoped that everything will be done to maintain the financial honor of the State, apart from all feeling of political animosity. Illinois is about to pay off $3,000,000 more of her debt, part of it sterling, and has adopted the honorable course of paying it all in gold, both the domestic and foreign loans. In railroad bonds the Pacifics have been the chief feature, Centrals having risen to 92 on a demand for foreign account, and Union Pacifics, after considerable fluctuations, closing at 78½@79 for First Mortgages, 60½@70 for Land Grants, and 64@67 for Incomes. Nothing further has transpired in regard to the expected change in the management of Union Pacific, but much of the selling during the week is reported to have been on Boston orders. The subject of the payment of interest by the companies to Government is still agitated, and the Congressional Committee has not yet made a report, but the prevailing opinion is still on the side of the companies, and many parties feel confident that the report will be in their favor.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Jan. 28.	Monday, Jan. 30.	Tuesday, Jan. 31.	Wednesd'y, Feb. 1.	Thursday, Feb. 2.	Friday, Feb. 3.

Railroad and Miscellaneous Stocks.—The market has been somewhat irregular, with the larger transactions limited to specialties. For a few days after our last report the tone was generally firm and buoyant, but subsequently there was considerable selling to realize the advance, and prices fell off on Thursday materially. To-day there was a partial recovery, with a strong feeling at the close. The extreme ease in money is very favorable to stock speculation, and a comparison of prices shows that a gain of from 3 to 5 per cent. has been made on all the leading favorites over the lowest prices of January. There is not, however, that strong and confident outside support which has been felt in former years, and every advance of 2 or 3 per cent. is apt to be followed by a movement to realize. Lake Shore has been particularly strong and active on reported purchases to control the next election; Rock Island has been largely dealt in on Philadelphia account, supposed by some to be connected with the control of the Union Pacific by the Pennsylvania Central Company; Hannibal and St. Joseph has been weak; Panama recovered to 69; Union Pacific has again declined, closing at 19¼; Ohio and Mississippi has been active during the week upon the strength of the proposed change in track to narrow gauge to form close connection with the Baltimore and Ohio and Marietta and Cincinnati lines, but to-day it was reported that the Erie Railway had obtained an injunction to prevent the change in gauge, on the ground that it would conflict with existing contracts with the Erie Company, and on this the stock fell off 1 per cent; Harlem has declined to 125½, on the rumors of a further issue of stock for completing the depot in this city.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

	Saturday, Jan. 28.	Monday, Jan. 30.	Tuesday, Jan. 31.	Wednesd'y Feb. 1.	Thursday, Feb. 2.	Friday, Feb. 3.

The Gold Market.—The long expected event which has been waited for in this market—the surrender of Paris—was made known on Monday, and has been followed by considerable activity at higher prices. The advance is nominally based upon the idea that an export demand for specie will soon come which can be made the foundation for a rise of 1 or 2 per cent. in the premium. An important element in this plan was to be the withdrawal of funds from England and a rise in the Bank of England rate, but telegrams of yesterday report no rise and on the contrary an increase of £90,500 in the specie line. Much importance has been given to the circumstance of a shipment of $500,000 by the *Russia* on Wednesday, but we learn that this was merely a transaction of convenience in the absence of any demand for gold here, and no general significance can be attached to it. The rates for carrying gold have ranged all the way from 6 to 8 per cent. On Thursday the Treasury sold $1,000,000, receiving bids for $6,005,000.

The following table will show the course of the gold premium each day of the past week:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.

Foreign Exchange.—The market has shown a very firm tone throughout, and prime bankers' sterling is quoted to day at 109¼, the highest price made in some weeks. There is not much exchange offering, and bankers are themselves buyers at a small fraction below their own rates. Commercial bills continue to be scarce, and the exports of cotton for the week show a material decline, being only 78,528 bales from all ports. An important amount of exchange was made this week by the bills of a leading banking house in this city, drawn against a loan of £500,000, negotiated in London for the Camden and Amboy Railroad Company. If the settlement of European affairs now leads to an increase in cotton exports, the amount of bills on the market will be more abundant.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks; on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

Ohio and Mississippi Railroad.—The Ohio and Mississippi Railway Company have recently decided to change their guage—now 6 feet—to a 4 feet 8½ inch guage, the ordinary narrow guage, and have also completed arrangements for a closer alliance with the Baltimore and Ohio, which route, with the Marietta and Cincinnati under the control of the Baltimore and Ohio, forms the shortest route from the Mississippi river to the Atlantic coast. The recent opening of the bridge of the Baltimore and Ohio Company, over the Ohio river at Parkersburg, will make a complete connection, after the Ohio and Mississippi guage is changed, without breaking bulk from St. Louis and Louisville to Baltimore. The Ohio and Mississippi will gain the privilege of connecting with all the narrow guage roads; whereas, hitherto it could only connect with the Atlantic and Great Western and Erie. The friends of the Baltimore and Ohio Company will accept the bonds of the Ohio and Mississippi to provide the means for making the proposed alterations.—*Daily Bulletin.*

[Since the above was written it is stated that the Erie Railway has obtained an injunction to prevent the change in gauge.]

—ALBANY, January 27.—A resolution was adopted in the Assembly to-day, after a long debate, directing the Attorney-General to prosecute all railroad companies that have not filed their annual reports, as required by law at the time of the passage of the resolution.

The Springfield and Cincinnati Lease.—The stockholders of the Cleveland, Columbus, Cincinnati and Indianapolis Road have unanimously ratified the contract with the Springfield and Cincinnati Railway, known as the Dayton Short Line, by which the former and the Lake Shore and Michigan Southern are to indorse and guarantee bonds not exceeding one million dollars each for the construction of the Short Line from Dayton to Cincinnati, with an object to form an unbroken connection between Buffalo and Cincinnati via Cleveland, Delaware, Springfield, and Dayton. The contract provides that the short line shall be leased perpetually to the Cleveland, Columbus, Cincinnati and Indianapolis unless a consolidation takes place, which is possible after ten years. The road is to be run by the officers of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad, under the direction of a committee of one from each of the three roads in the interest, and rolling stock is to be furnished by the former to the amount of $500,000, for which they are to receive seven per cent second mortgage bonds from the Cincinnatia nd Springfield Road. Though the capital is not to exceed two million dollars, the contract provides in detail for the running expenses of the division, profits, etc. The combination will have by contract the running and business arrangements over so much of the Cincinnati, Sandusky and Cleveland Railroad as lies between Springfield and Dayton. The road is to be constructed from London to Columbus in the Sandusky Road interests. It is to form part of another route from Cincinnati to Columbus over the new line via Dayton and Springfield, and is a part of the general plan. The contract remains to be ratified by the Lake Shore, but it is generally conceded that this will be done, and that the new road will be expeditiously constructed.—*Daily Bulletin.*

Leasing the Camden and Amboy.—The question of leasing the above named road to the Pennsylvania Railroad Company is now being considered, and has been referred by the President of the last named Company to a committee composed of the following named gentlemen: John Rice, Josiah Bacon, Washington Butcher, Wistar Morris, and Lewis Elkin. A committee composed of the directors of the Camden and Amboy Railroad Company has been appointed to meet the committee of the other company.—*Philadelphia Ledger.*

—Capt. Swift and his co-trustees to the Hannibal and St Joseph Land Grant Mortgage, advertise that they will buy $50,000 of the bonds, under sealed proposals, to be left by Friday of next week, February 10, at the office of Messrs. Ward, Campbell & Co., No. 56 Wall street.

Boston Stock Market—Seventy-three Years' History.—Mr. Joseph G. Martin, of Boston, has published a handsome little volume under the above title, which contains a complete record of financial transactions in that city during the past seventy-three years. This book, which is a history of one of the oldest financial centres of this country, can not fail to be of great interest both to business men and to parties generally interested in the business history of the country. We believe that the price is moderate and below the actual value of the book.

☞ For other Railroad Items, see COMMERCIAL AND MISCELLANEOUS NEWS, on a previous page.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, February 3, 1871.

The fall of Paris has somewhat unsettled values. A speculative advance in prices which was made in anticipation thereof, has not been sustained; in fact, a movement to realize in Breadstuffs, and Provisions has led to some decline. The reduction in the stocks of some articles of importation will attract attention, resulting from the fact that a reduced tariff went into effect on the first of January. The streets down town have been all the week and still are in an almost impassable condition from the accumulations of snow; but the harbor has become comparatively free of ice.

The following is a statement of the stocks of leading articles of foreign and domestic merchandise at dates given:

	1870.	1871	
	Feb. 1.	Feb. 1.	Jan. 1
Beef, tierces and barrels	21,210	26,851	38,995
Pork, barrels	37,755	56,672	30 242
Tobacco, foreign, bales	16,940	20,726	18,851
Tobacco, domestic, hogsheads	13,161	14,513	16,488
Coffee, Rio, bags	52,639	17,580	24,347
Coffee, other, bags	13,364	29,307	72,371
Coffee, Java, mats	18,857	----	----
Sugar, hogsheads	54,252	24,277	27,531
Sugar, boxes	87 480	38,103	6,790
Sugar, bags	213,698	354,826	307,200
Melado, hhds	647	1,670	744
Molasses, hogsheads	19,828	6,528	8,068
Molasses, bbls	2,600	3,000	1,500
Hides, No	29,200	57,400	76,000
Cotton, bales	70 000	81,700	79,500
Rosin, barrels	46,200	26,961	31,961
Spirits turpentine, barrels	5,130	6,740	6 809
Tar, barrels	10,100	11,096	11,825
Rice, E. I., bags	7,506	6,555	9,200
Rice, Carolina, casks	3.114	----	875
Gunny Cloth, bales	8,000	12,100	12,100
Gunny Bags, bales	8 700	11,800	12,000
Linseed, bags	127,217	89,700	104,000
Saltpetre, bags	5,047	15,077	12 400
Jute and Jute Butts, bales	9,880	21,400	23,150
Manila Hemp, bales	24,440	32,854	33,300

The market for Hog products opened strong, and closed weak. The decline in Mess Pork has been about one dollar per bbl. With the greatly increased stock there was a pressure to sell, and Mess closed at $22@22 25 for immediate and future delivery; Prime Mess has met with a free export inquiry at $21 50@22, but the close is less active. Bacon has lost the activity and buoyancy noted in our last, and Cutmeats have become dull. Lard though less depressed than Pork has shared its weakness. There has been a movement in Mess Beef amounting here and at the West to about twenty thousand barrels, said to be for account of the French Government, but no particulars have transpired, and it has had little effect upon prices. Butter and Cheese have been without important movement except in low medium qualities for export to Great Britain.

In Tobacco the demand has somewhat improved, and prices are veay strong, owing to the very poor assortments offering. Kentucky Leaf has been in request, both for export and home use, and the sales of the week have been about 700 hhds., of which about one-half for shipment, and the business would have been much larger had suitable assortments been available; low grades for export seem to be much wanted. Prices have been 7@7½c for Lugs, and 7½@12c for low to fine Leaf. Seed Leaf has also met with a fair demand, but in this, as in Kentucky Leaf, the business has been restricted for the want of stock; the sales embrace about 400 cases at 20@25c for Ohio and Wisconsin running lots, and 32@70c for Connecticut and Massachusetts wrappers. Spanish Tobacco steady, with sales of 500 bales Havana at 85c@$1 05c. Manufactured Tobacco in good demand.

East India Goods have been dull, but late prices have been well supported. Metals have been quiet, with a decline in Copper and Tin; and Tin Plates having been more freely offered, have had large sales. Whiskey has declined, unless some temporary influences. Clover Seed has advanced to 11⅞@12c. In Fruits, we notice an advance in Layer Raisins to $2 80, and in Prunes to 9⅜c with a better feeling generally, especially in Dried Fruits. Fish firm. Hops and Hay dull.

Naval Stores have been more active and firmer. Oils continue dull. Petroleum has advanced, but closes with some reaction, and a quiet market.

Freights have been more active. The armistice in Europe caused several German vessels to be placed on the berth, but the shipments were increased and rates have advanced; the Liverpool steamers got 8d. for grain, and the shipments of cotton by steam have been large at 11-32@7-16d

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York *since* January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1

COTTON.

FRIDAY, P. M., Feb. 3, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening February 3. From the figures thus obtained it appears that the total receipts for the seven days have reached 154,482 bales against 150,800 bales last week, 146,887 bales the previous week, and 132,585 bales three weeks since, making the total receipts since the first of September, 1870, 2,352,297 bales against 1,835,290 bales for the same period of 1869, showing an increase since September 1 this year of 517,005 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	54,781	47,868	Florida bales.	697	1,097
Mobile	18 669	9.416	North Carolina	8,998	1,400
Charleston	11,554	7,890	Virginia	13,701	5,329
Savannah	29,870	16,503			
Texas	11,038	9,321	Total receipts	154,482	104,601
Tennessee, &c	11,2 9	6,196	Increase this year	49,981	....

The exports for the week ending this evening reach a total of 73,528 bales, of which 62,606 were to Great Britain, and 10,922 to the Continent, while the stocks at all the ports, as made up this evening, are now 617,177 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night.

Week ending Feb. 3..	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	9,196	4,504	13,700	17,435	230,159	213,650
Mobile	10,215	1,360	11,565	4,886	78,034	78 524
Charleston	6 297	2,237	8,534	7,251	89,767	20,821
Savannah	18,792	....	18,792	11,890	94,-01	64 080
Texas	3,670	....	3,670	3,3:0	62,416	47,162
New York	13,191	1,363	14,564	10,999	84,000	78,541
Other ports	1,365	1,438	2,078	1,979	33,000	30,500
Total	62,606	10,922	73,528	57,260	617,177	539,248
Total since Sept. 1	1,172,264	280.132	1,402,746	979,381	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 15,268 bales, while the stocks to-night are 87,929 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Jan. 27, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Foreign	Total.	Northern Ports.	Stock.

The market the past week has lost the activity and buoyant tone observable during the previous week. This has been due to the dull and unfavorable reports from Liverpool, the result probably of our continued large receipts, and to the doubt which still hangs around the war question. There appears also to be somewhat less confidence among holders here, and yet the offerings though sufficient to meet the demand are not very liberal notwithstanding the increased estimates of the crop which the extremely free arrivals at the ports are making popular. The better grades are especially firm, middling closing at only ¼c decline from last Friday while ordinary and good ordinary are ¼c lower, and low middlings are ⅛c lower. Last Saturday with a dull market low middling and the grades below were reduced ¼c. Monday and Tuesday there were no changes in the quotations. Wednesday low middling declined ¼c, and the lower grades ¼c. Thursday there was a further reduction of ¼c on all grades, and to-day there has been no change, but the market has been dull and so closes to-night. For forward delivery the transactions have ben large, but the decline has not been so great for the later month. To-day, the close was, for June 15 9-16; February, 14⅛; March, 14⅞; April, 15⅛; May, 15⅜. The total sales of this description for the week (including 2,100 bales free on board, but not including bales "Exchanged") have been 67,000 bales. For immediate delivery the total sales foot up this week 17,079 bales, including 1,921 bales to arrive, of which 6,529 bales were taken by spinners, 1,088 bales on speculation, 8,427 bales for export, and 1,085 bales in transit. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	12¾@....	13¼@....	13⅝@....	13⅝@....
Good Ordinary	14¼@....	14⅝@....	14¾@....	14⅝@....
Low Middling	14¾@....	15 @....	15⅛@....	15⅛@....
Middling	15⅛@....	15⅜@....	15 @....	15⅜@....
Good Middling	15⅜@....	15⅝@....	15⅝@....	17 @....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling.
Saturday	1,198	13⅛@....	14⅛@....	15 @....	15⅜@....
Monday	3,299	13⅛@....	14⅛@....	15 @....	15⅜@....
Tuesday	2,994	13¼@....	14⅜@....	15 @....	15⅜@....
Wednesday	2,504	13 @....	14⅛@....	14⅞@....	15⅛@....
Thursday	3,952	13⅛@....	14⅜@....	14⅜@....	15⅛@....
Friday	2 497	17⅛@....	14⅜@....	14⅜@....	15⅛@....

For forward delivery the sales (including 2,100 free on board,) have reached during the week 67,000 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For January. bales.	cts.	bales.	cts.	bales.	cts.	For May. bales.	cts.
1,200	15	2,700	15¼	200	15 7-16	800	15¼
300	15 1-32	800	15 3-16	600	15¼	1 000	15⅜

1,200	14 15-16	2,100	15¼	2,800	15¼	600 total June.	
1,500	15	600	15 5-16	400	15 9-16		
1,800	15 1-16	2,700	15⅜	600	15⅜		
		800	15 11-32	10,000 total April.			

The sales during the week of free on board have reached 2,100 bales. The particulars of these sales are as below:

1,100 f. o. b. Mobile.....p. t. | 200 f. o. b. Galveston.....p. t.
800 " Charleston.....p. t.

The following exchanges have been made during the week:

9-16c paid to ex'ge 100 Jan. for 00 April. | ⅛ paid to ex'ge 600 Feb. for 600 April.
⅛ " 100 Jan. for 100 March. | 3-16 " 100 eb. for 100 March.
100 Jan. ex'd for 100 eb. on equal terms.

WEATHER REPORTS BY TELEGRAPH.—Our reports to-night show that there has been considerable rain throughout the South the early part of the past week, but as the week closes it is pleasant again. At Charleston, Columbus and Augusta, Georgia, and at Mobile, Selma and Montgomery, Alabama, it has rained two days; at Macon it rained every day but one; at Nashville three days and at Memphis one day. At Memphis the thermometer has averaged 42; at Montgomery, 58; at Macon, 54; at Selma, 58.

Digitized by Google

THE FUTURE OF COTTON.—There appears to be a disappointment among some that prices have not improved more on the fall Paris. This is due to the two facts—first, that the effect of such an event is always in very great part anticipated and discounted; and second, the continued very large receipts are necessarily weighing down the market. With our own crop reaching over 3,700,000 bales, we certainly do not see any fair prospect of getting prices up permanently. Either one of two circumstances might, however, help the market—a decrease in the shipments rom India or a decreased planting this spring here. As to India, t does not appear probable, in view of the stock this year held over, and the present improved condition of the crop, that the movement hence will show any falling off. And yet, as the season advances, if prices should decline further, no one could know positively the effect of the diminished drawing power of the lower quotation on the ryot. It is matter of history that in 1861 a rise to 6½d. (the average for fair surats during the year) increased the India shipments, without any additional planting, to 986,600 bales, from 563,200 bales the previous year, showing that the previous price had not been a sufficient inducement to lead them to market the crop.

As to the extent of the planting in the South for the next season, it is of course too early at present to say anything about it. The planter knows best at what price he can afford to raise cotton. One thing, however, is very certain, that if we have the prospect next spring of another crop equal to this one, low prices will have to be accepted; and it becomes the Southern merchant in making advances and the planter in signing contracts for labor to bear this fact in mind. To obtain an idea of the ruling rates when there is a full supply of cotton, we have only to remember that the *average* price of middling uplands at Liverpool for a series of years before the war was each year as follows:

1845.....4⅛d.	1849.....5⅛d.	1853.....5⅝d.	1857.....7⅛d.
1846.....4⅛d.	1850.....7⅛d.	1854.....5⅝d.	1858.....6⅛d.
1847.....6⅛d.	1851.....5⅛d.	1855.....5⅛d.	1859.....6⅛d.
1848.....4⅛d.	1852.....5⅝d.	1856.....6d.	1860.....5⅛d.

Of course the planter must be prepared to accept these figures when the world is oversupplied.

CORRECTIONS.—In our last report, in the item "Great Britain's Spinning Capacity," through an error in proof reading, we were made to say, in the tenth line of the item, "and with each spindle producing 36 skeins." We wrote—"and with each spindle producing 3.6 skeins;" or, we might have expressed it "3⅗ skeins."

In the same report, in the item "Receipts and Crop," it was printed "very few now could be found who would put the total below 2,700,000 bales." The figures should of course have been "3,700,000 bales."

GUNNY BAGS, BAGGING, &c.—There has been some revival in the activity of cloth this week. Sales have been made at 12c. gold in bond to arrive, and although there are holders willing to sell at this price, most are demanding ¼c. higher. The sales are 300 bales, to arrive per *Seinda*, and 250 bales per *Fortune*, both at 12c. gold in bond, and some 400 bales on spot here and in Boston on private terms. There has also been more inquiry for Domestic Rolls, and rumors prevail of several large transactions. Domestic quoted 19@19¼, and native 18@19 currency duty paid. It is supposed by many that quite a portion of the cotton crop still remains uncovered, and this fact strengthens holders, and imparts confidence to buyers. Bags have been very quiet, and prices remain nominally 11c. gold, in bond to arrive, and 17@17½c. currency, d. p. Hemp is quiet, and the only sale reported is 400 bales Manila on spot at 9c. gold, in bond. Jute has been in more demand, and steady; sales 1,000 bales to arrive per Eagle at 4c. gold, and 1,000 low grades in Boston on private terms. Jute butts have been active, and close very strong; sales are 175 bales ex Riversdal, 400 to arrive per Timoue, 400 on spot in Boston, 225 to arrive there per Anahuac, and 250 bales per Tennyson, all at 4c. currency, duty paid The following is from the monthly circular of Messrs. J. C. Rogers & Co.:

Foreign Imports.	Stock Feb. 1, 1871. Bls. Cloth	Bls. Bags	Bls. Butts	On the way from Calcutta. Bls. Cloth	Bls. Bags	Bls. Butts	Loading at Calcutta, Dec. 14, '70. Bls. Cloth	Bls. Bags	Bls. Butts

Total, Feb. 1, 1869	24,800	22,500	....	4,138	200	....	500	100	....

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending Feb. 3, 1871. Receipts.	Shipments.	Stock.	Week ending Feb. 3, 1870. Receipts.	Shipments.	Stock.
Augusta	6,495	7,510	20,538	4,633	3,959	21,990
Columbus	2,457	3,403	13,589	1,878	1,363	14,700
Macon	3,219	3,204	16,231	2,128	1,953	17,339
Montgomery	3,000	3,325	10,605	1,903	2,882	13,069
Selma	3,232	4,110	10,422	1,070	1,159	7,804
Memphis	18,226	18,849	46412	9,145	4,574	24,416
Nashville	447	608	6,513	2,661	1,939	4,305
	37,076	41,009	124,310	23,418	17,829	103.623

These totals show that the interior stocks have decreased during the week 3,933 bales (being now 20,687 bales more than for the same period of last year), while the aggregate receipts are 13,658 bales more, and the shipments 23,180 bales more than for the corresponding period of 1869.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons. On account of the irregularity in the cable despatches, we are again without our figures for stock at and afloat for Liverpool, and we therefore for those items give the figures of last week:

	1871.	1870.
Stock in Liverpool.....bales.	565,000	348,000
Stock in London	77,908	106,593
Stock in Glasgow	300	300
Stock in Havre	45,600	92,600
Stock in Marseilles	6,850	6,100
Stock in Bremen	4,650	3,300
Stock rest of Continent	25,000	35,000
Afloat for Great Britain (American)	326,000	163,000
Afloat for France (American and Brazil)	1,318	63,000
Total Indian Cotton afloat for Europe	93,685	103,340
Stock in United States ports	617,177	529,248
Stock in inland towns	124,310	103,623
Total	1,887,798	1,554,104

These figures indicate an *increase* in the cotton in sight to-night of 333,694 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 14,027 bales, against 16,825 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870, and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 105,913 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in the CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers City of Baltimore, 751....Cuba, 1,348....Wyoming, 3,075....Aleppo, 1,166....City of Rio Janeiro, 970....France, 2,400....per ships British Queen, 2,292....Great Western, 1,639	13,641
To Hamburg, per ship H. Pelham, 161	161
To Bremen, per ship Deutchland, 225	225
NEW ORLEANS—To Liverpool per steamer Alhambra, 2,118....per ships Ellen Southerd, 2,663....New Wabeno, 2,699....Ocean Pearl, 2,487....Richard McManus, 2,439....C. H. Southard, 3,253....Kooria Mooria, 2,970....per barks Moss Rose, 2,311....Belle Vue, 1,822...Maggie Chapman, 2,478....Countess, 1,034....Glenrallock, 1,735....Kate Agnes, 1419	29,428
To Cork, per bark Bina, 1,961	1,961
To Bremen, per ship Guardian, 3,405	3,405
To Antwerp, per bark P. J. Carlton, 2,919	2,919
To Barcelona, per steamer Maria, 2,000....per barks Cuidadelane, 562....Rosa Y. Carmen, 650....Sunrise, 1,400	4,612
To Santander, per bark Politina, 626	626
To Genoa, per bark C. Colombo, 1,060	1,060
To Vera Cruz, per schooner John H. French, 525	525
MOBILE—To Liverpool, per ships Southampton, 3,936....Andrew Jackson 3,006....Chancellor, 2,700	9,642
To Barcelona, per brigs Florentina, 428....Ignactia, 375....Corina, 330	1,133
To Malmoe, per bar Lizzie Cummins, 625	625

Total.....	75,576	161	6,620	4,201	5,702	7,794	1,091	105,913

Included in the above totals are 626 bales from New Orleans to Santander, 1,060 to Genoa and 525 to Vera Cruz; 625 bales from Mobile to Malmoe; 1,932 bales from Savannah to Genoa.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 110¼ and 111⅞, and the close was 111⅜. Foreign Exchange market continues firm. The following were the last quotations: London bankers', long, 109½; short, 110⅝; Commercial, 109@109½. Freights closed at ⅛@7-16d. by steam and 5-16@⅜d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, Feb. 2—5 P. M.—The market has ruled dull to-day with a downward tendency, with sales footing up 8,000 bales, including 1,000 bales on speculation and export. The sales of the week, ending Jan. 27, were 95,000 bales, of which 19,000 bales were taken for export and 8,000 bales on speculation. The stock in port was 566,000 bales, of which 247,000 bales are American. The stock of cotton at sea bound to this port is 480,000 bales, of which 326,000 bales are American.

BREADSTUFFS.

FRIDAY P. M., February 3, 1871.

The market for flour and wheat has for some days been dull, and closes lower; while coarse stuffs have been variable.

The receipts of flour have been quite moderate all the week. At the opening there was a good shipping demand at advancing prices, but holders kept constantly ahead of buyers, and but little was done. On Monday, the announcement of the surrender of Paris, and the conclusion of an armistice between Prussia and France, precipitated a great excitement—$7 was paid for large lines of extra State, and many holders did not name less than $7 15, but the market weakened towards the close, and showed continual depression, until yesterday, when shippers took about 10,000 bbls. at $5 25@6 50, No. 2, supefine and inferior extras, and $6 80@6 85 for good extras, and to-day there was very much the same sort of demand, but less active, and prices were 5c. lower; common to good extra State selling at $6 75@6 85. The higher grades were very dull, and nearly nominal. Southern flour is dull and unsettled. Rye flour and Cornmeal scarce and firm.

In Wheat, the speculative feeling has been very strong, and during the excitement of the Monday following the surrender of Paris, new spring advanced to $1 58@1 61, and amber winter to $1 64@1 68, but from this price steadily declined to $1 54@1 57 for new spring, and $1 57½@1 60 for amber winter, when speculative orders were executed, mainly at $1 55 for prime No. 2 in store. Considerable lines of old spring have been closed out at $1 44@1 48. Millers have been well represented in market, but have bought little. White wheats have remained quiet. To-day, the decline in Liverpool, and the extreme firmness of ocean freights, caused by corn seeking room, caused a very dull market, and the only transaction of moment was a boat load of No. 1 spring at $1 54 in store.

Corn has arrived but moderately, and has been taken to a fair extent for export, but holders show no confidence, and prices have been weak, closing at 85c@87c. for new western mixed and yellow. White corn is dull and unsettled.

Rye has materially advanced on a demand for home consumption. Barley has had an active sale. Some 120,000 bushels having been taken by brewers, mainly at $1 09@1 15 for Canada West and Bay Quinte. Barley malt firm. Oats have been fairly active, but close dull and weak; a load of prime western in store sold to-day at 62c. Canada peas are scarce and firm.

The following are the closing quotations:

Flour—		Wheat, Spring, bush.....	$1 44@ 1 56

GROCERIES.

FRIDAY EVENING, February 3, 1871.

The at times almost impassable condition of our streets has again had a tendency to somewhat retard the sale of heavy goods, but the volume of business has been very fair, taken altogether, and the market shows a pretty healthy tone throughout. Stocks have received no important additions, and the official figures on the first of the month revealed a generally small accumulation, while some of the most desirable parcels are concentrated under thorough control, and have been withdrawn for the present. Good to prime grades are still the favorites with most buyers, the cost being about the same as on common qualities before the reduction of import duties. The strong probabilities of an early peace abroad has been accepted as an additional stimulating influence by holders of Coffee and Sugars, as a good European demand for these styles is looked for at an early day, to make up for the forced abstinence of consumers during the continuation of the war, though the cramped finances of the late contending powers may postpone for a time the indulgence in luxuries of this kind.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	6,305 pkgs.	Laguayra	300 bags.	Sugar, Brazil	bags.
Green	9,518 pkgs.	Other	1,196 bags.	Manila, &c.	14,261 bags.
Japan	3,908 pkgs.	Sugar, Cuba	9,218 bxes.	M'las'es, Cuba	hhds.
Various	2,110 pkgs.	Cuba	1,662*hhds.	Port Rico	*hhds.
Coffee, Rio	12,150 bags.	Porto Rico	291*hhds.	Demerara	119*hhds.
Java	600 mats.	Other	1,627 hhds.	Other	68*hhds.
Maracaibo	400 bags.		*Hhds. include bbls. and tcs. reduced.		

Imports of tea this week have included six cargoes. Receipts of sugar and molasses have been fair, including 3,965 bags of Brazil sugar.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

TEA.

The indications of an improving demand noted at the close of our last report have been fully realized, and we record a very liberal business for the week. The call has been largely for Oolongs which seem to have become a favorite since the opening of the year, but greens have not by any means been neglected, and it is probable that a considerable quantity of Japans would have found an outlet had desirable parcels been available. Previous values as a rule seemed acceptable to both buyers and sellers, and the range of prices shows no important variation, though the tone is on the whole firm. The assortment was somewhat broken by the free sales of goods, but the openings are now better owing to fresh arrivals with comparatively small lots sold before receipt. The transactions embrace 12,217 pkgs Greens; 41,500 pkgs Oolong; 3,250 pkgs Japans; and 430 pkgs Souchong.

Imports this week have included 853,717 lbs. Japan, per "Black Prince," from Yokohama; 21,110 lbs. Black and 4,080 lbs. Green, per "Game Cock," from Whampoa; 422,468 lbs. Black, per "Excelsior," from Amoy; 667,544 lbs. Japan, per "Lajn," from Yokohama; 88,696 lbs. Black and 601,882 lbs. Green, per "Amie," from Shanghai; and 1,762 pkgs.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	1,985,415	2,271,149	2,702,644	6,959,508
1870	1,520,333	1,239,214	33,548	2,793,095

The indirect importations, including receipts by P. M. Steamers via Aspinwall, have been 2521 pkgs. since January 1, against 1,665 last year.

COFFEE.

The general tone of this market continues very firm, though the amount of business doing has been rather small during the past week. The confidence of holders is based largely upon the reduced stocks in first hands, the moderate additions thereto, and prospective increased call from jobbers to replace assortments considerably broken by a good distributive trade since the first of the year, though an additional stimulating influence has arisen in the indications of peace abroad, as it is supposed that a large amount of coffee will be wanted to supply European consumers who have so long been deprived of the luxury. The confidence in the opening of this outlet, however, is not strong enough to induce any increase of operations, the disposition being to await the development of something more positive in the foreign markets. Of Brazils the supplies have kept down to a very low figure, the moderate demand being sufficient to balance the few arrivals, and the market remains quite uniform for all grades, even medium lots ruling steady, as the amount here is too small to warrant any concessions. Still it is noticeable that while still insisting upon previous figures, holders never refuse a full bid, and there can hardly be said to prevail any great amount of buoyancy. Java is still extremely firm, with the supply entirely in second hands, and jobbers distributing very fairly. West India styles have been comparatively quiet, but lose no strength, the late advance being in all cases positively insisted upon, particularly on Maracaibo of choice quality, St. Domingo, &c., the latter selling principally on European account, and now likely to meet with a quicker demand than ever. From other ports on the seaboard the markets generally are reported as quiet but pretty firm, with small stocks available. The jobbing trade here has been a little slow for the week but not discouraging by any means. The invoice sales embrace 13,790 bags Rio; 4,600 bags Ceylon; 2,500 bags Laguayra; 500 bags Jamaica; 100 St. Domingo on spot, and 3,000 bags do. to arrive. Sales at Baltimore of 1,179 bags Rio.

Imports this week have included only 541 bags of sundries.

The stock of Rio Feb. 2, and the imports since January 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.

SUGAR.

The horrible condition of our streets during the past week, has contributed greatly to reduce the movement of all heavy goods, and undoubtedly the market for raw sugars has suffered to some extent from this cause. Still the demand in the aggregate may be called fair, and the tone has been reasonably steady throughout, with most of the sales effected on a basis of full former quotations, and in some cases a trifle higher. Holders appear to be fully as confident in their views as at the date of our last, the Cuban and English markets both remaining in an encouraging position, the arrivals here still small, and stocks slowly but surely falling away. In addition to these influences, there is also the belief that, with peace now very probable, and the failure of the beet root crop abroad, for want of attention during the war, there is likely to spring up at any moment a sharp European call, though much will of course depend upon the ability of countries just through the ordeal of a destructive and impoverishing war, to indulge in luxuries at once. The majority of the goods recently sold were refining qualities, and we again notice the usual close grading always insisted upon by buyers when the market is a little slow. Some few parcels of domestic have changed hands, and the first of new crop Cuba arrived. The refiners have been selling their production nearly as fast as ready for delivery, but the market was not by any means quick, and, with the stock rather showing a tendency to accumulate, values weakened somewhat, especially on the soft grades. The sales of raw foot up 1,075 hhds. Cuba, 250 hhds. Porto Rico, 940 hhds. Martinique, 266 hhds. Demerara, 796 hhds. New Orleans, 14,853 boxes Havana, and 65 hhds. Melado.

Imports at New York, and stock in first hands, Feb. 2, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.
Imports this week	835	923	.....	736	3,965	....	562

" " 1869	12,666		19,426		91,367		268

MOLASSES.

There is nothing new to note on the market for the foreign goods remaining in first hands. The stocks are not very large and holders assert that they have placed values down to the lowest point to which they can reasonably be expected to go, and though anxious to sell out they refuse to name further concessions. Buyers, however, are not to be tempted into free operations, and except the picking up of small odd lots for refining or trade use, and some little negotiations on parcels in bond the demand has amounted to nothing worthy of record. There are evidences that some very fine and choice grocery stock could be sold to advantage, but there is none here and the market cannot be tested. Domestic was very dull early in the week, and with some increase of the opening, prices receded especially on the common grades. A portion of the troublesome supplies on pier, however, having been disposed of and the deliveries a little more easy, holders again begin to show something of a steady tone on all qualities and refrain entirely from pressure to realise. Sales of 200 hhds. Porto Rico; 150 hhds. various grades foreign in lots; and 2,463 bbls. New Orleans.

The receipts at New York, and stock in first hands, Feb. 2, were as follows:

	Cuba, *hhds.	P. Rico, *hhds.	Demerara, *hhds.	Other *hhds	N. O. bbls

SPICES.

The increased supply of Cassia referred to of late has shaken the faith of sellers somewhat, and values are lower. This, however, appears to be about the only case where buyers can claim to have gained any positive advantage. Pepper still showing buoyancy and all the cheap lots of Nutmegs disappearing with holders now positively insisting upon outside figures. Indeed, the entire stock is evidently well concentrated and controlled, and owners find no reason to give up any of the advantages of their position. The movement has been a little less active of late, but still is not dull, and the distribution of jobbing parcels (no invoices available) will make a very fair aggregate for the week.

FRUITS, &c.

There has again been an active demand for Foreign Dried fruits, and the tendency, especially of Raisins, has been decidedly upward, and the close was fairly active, and the advance is well sustained. The cause of the advance in Raisins has been large purchases, which have been stimulated by the low prices current of late, and the fact that the war between Germany and France is about at a close, and that a good portion of the remaining crop would be taken by the Germans, as so far they have taken almost nothing, while usually they take about one-quarter of the whole crop. Turkish Prunes have also sold freely, the above causes having bearing on these also. Currants have been in active demand to arrive, but the offerings seem sufficient for the demand, and prices are only steady as formerly quoted. Sardines have moved moderately, but are firmly held, especially quarter boxes. Other kinds have been quiet, except Ivica Almonds and Walnuts, which have sold to a considerable extent.

Foreign Green have been more steady for box fruit, with smaller offerings at auction. West India have sold freely at $6@$8 per bbl. for Porto Rico Oranges $35@40 per thousand for Baracoa Cocoanuts, and $2 12 50 per bunch for Bananas. Box Lemons sell at $5 50@6 50 per box, and Oranges $3 50@4 50. Valencia, in cases, sell at $6 75@7 50.

Domestic Dried have been in active demand for Apples, but with freer arrivals prices are easier. Peaches are scarce, and all kinds rule firm, and tend upward; Old are attracting considerable attention, and they are held with confidence. Blackberries are firmer; all of the lots here have been taken up to 12c., in bbls.; the highest sale we hear of was at 11½c. Plums and Cherries are in fair demand. Raspberries are a trifle easier. Peanuts are in good demand, part speculative, and Virginias are held at higher prices; Wilmingtons are scare at present.

In Domestic Green, Apples sell fairly at firm prices, and holders generally demand for small lots a further advance. Cranberries continue slow of sale, and prices show no improvement. We quote Apples, best selected, $5@5 50 per bbl.; mixed lots, $4 50 per bbl.; and Cranberries, $3 50 per crate.

ADVICES FROM PRODUCING MARKETS.

Sugar.—From the *London Produce Market Review* of a late date we extract the following upon the state of the sugar market in England: We can remember no period during the last twenty years when the position of the sugar market was more interesting than at the present moment, not excepting the time of the Crimean war. The greatly increased British consumption, the reduction of duties in the United States, the moderate supplies expected from the next cane crops, and the low average market values formed altogether a cheering prospect for the growers and holders of sugars at the beginning of a new year. The halving of the duties has been the chief event of the year (1870.) Instead of the production gaining ground upon the consumption, as it did a year or so ago, the contrary has been the case for the last year or two. The consumption of Europe and North America for the twelve months ending October 31st, 1870, was 179,000 tons greater than in 1869. 229 000 tons greater than in 1868. and 279,000 tons greater than in 1867. The alterations in the duties place the sugar market in a better position than ever before attained. The weather in Java, the West Indies, and Brazil, has, by last accounts, been boisterous, and a delay in shipment of the crops is foretold. In Brazil a falling off of 10,000 tons is expected. The prospects of supply are not, therefore, very good, and taken in conjunction with moderate stocks, and present low rates, prices are, in our opinion, more likely to be strengthened than weakened during the next month or so.

Cuba Sugar.—HAVANA, January 27th.—The *Weekly Report* says: A continued firmness of prices and a good desire to operate on the part of buyers have been the prevalent features of the market since the date of our last issue; but notwithstanding the latter, the amount of sales reported has been comparatively small, owing to the very same causes alluded to previously—say, moderate receipts from the country and extravagant prices exacted by some holders, who are much encouraged by the steadiness of foreign markets and the crop reports, which appear to confirm that the juice of the cane is poor and that the yield will accordingly be small. Our last quotation of 10 rs. for No. 12, as a basis, has advanced during the week to 10¾@10¾c., and these figures close firm. The receipts and stock, and consequently the deliveries, show a heavy decrease when compared with those of the past two years, and the statements at foot are worthy of notice.

Shipments this week from Havana and Matanzas have been as follows:

To	Boxes.	Hhds.
New York	6,544	1,918
Philadelphia	168	418

New Orleans Molasses.—From *The Price Current* of Jan. 28 we extract the following: Good descriptions have continued in fair request, but poor qualities were still very dull and difficult of sale. Really prime is very scarce and the market is bare of choice. Prices for all descriptions are irregular and lower. The supplies now are all poor in quality and condition, being nearly all frosted or fermenting, and descriptions that would not class better than common to fair, earlier in the season, are now called prime.

THE DRY GOODS TRADE.

FRIDAY, P. M., February 3, 1871

There has been no important change in the Dry Goods trade during the current week, and trade remains without especial animation. There are a considerable number of buyers in the city from the South and West, but we note very little disposition to purchase, either among these or city dealers. The large jobbers who were purchasing some weeks ago, seem to have obtained sufficient supplies of staple domestic goods for all immediate requirements, and in the absence of any demand from retailers, are not taking any amount of foreign goods, or of the domestic fabrics suited especially to the spring trade. The class of dealers now arriving in the market appear to be in no haste in making their purchases, and at present are only canvassing the market for desirable assortments. There is an universal complaint among dealers here and in the West of the high freights charged on the various railroad lines, between here and the western cities, and it is stated that these exorbitant rates are not only delaying the trade, but are throwing a vast amount of it from this market into Boston, Philadelphia and Baltimore, from either of which points the rates are lower than from here. It is hoped by dealers that lower rates may be established before the spring trade opens briskley, and it would certainly seem due to the merchants here, that the transportation companies adjust their rates more equitably, but the claims of the former do not appear to be recognised by the freight agents, since we have heard the same complaint at the beginning of every spring season for several years past, there is no doubt that our merchants have been serious losers by the arrangement.

The retail trade remains quiet, but is said to be satisfactory for this season of the year. Collections are generally free, with some complaints, from the exclusively cotton growing sections, of a scarcity of money. Some of the river towns in the West are also a little backward in the matter of settlements, but payments are made, as the rule, with about the usual promptness.

DOMESTIC COTTON GOODS.—There has been no marked activity in any line of cotton fabrics during the past week, though brown and bleached goods have sold moderately. The stock of these fabrics continues light, and, with the current limited production, accumulates slowly. The demand at present is chiefly for medium and fine grades, and is confined almost exclusively to the home trade. Exporters take small amounts of medium grades, but the demand lacks spirit. Prices continue firm, with an upward tendency, but are without noteworthy change. Colored cottons are steady, and some improvement is reported in the general trade, though the demand is not yet very spirited. Prints sell less freely than dealers had anticipated, and the movements are but little if any greater than at the time of our last review. The assortments are more liberal, however, and holders look for a better trade before the middle of the month.

DOMESTIC WOOLEN GOODS.—The demand for all classes of woolen fabrics suited to the spring trade shows some improvement, and the sales are fair for this period of the season. The agents for all of the mills are showing samples of fine cassimeres, but the limited production, consequent upon the low stage of the water in the manufacturing streams, prevents manufacturers from turning out many new styles, and the assortment of cassimeres are still meagre. In cloths the trade is not very heavy, but is sufficient to prevent any important accumulation of stock, and prices are maintained with a good degree of firmness. Flannels in winter weights are without demand, but the sales of spring weights from first hands are said to be very satisfactory.

FOREIGN GOODS.—There has been a little more inquiry for dress goods during the week, but the offerings are still limited, and transactions are restricted in consequence. The market is apparently well supplied, but importers do not care to exhibit their stocks until the demand becomes more spirited. Linens are in fair request, with especially heavy movements of goods suited to the requirements of the clothing trade. Housekeeping goods are moderately active, but it is still early for any spirited movement in this class of fabrics. Foreign woolens in light weights are moving well, and the trade is fair for the season. The prospects for an early peace in Europe strengthen prices in all imported fabrics, but we do not learn of any prospective advance.

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years, are shown in the following table:

	FROM NEW YORK.			FROM BOSTON
	Domestics.	Dry Goods.		Domestics.
	pkgs.	Val	pkgs.	Val.	pkgs.
Total for the week....	186	$18,230	90	$13,161	24
Since January 1, 1871.	2,282	202,608	293	64,908	86

Publication.

THE NEW YORK DAILY BULLETIN,

A First-Class Daily Commercial and Financial Journal.

The BULLETIN furnishes—

1st. The most complete FINANCIAL REPORT published in any daily paper, embracing:

The daily sales and quotations of every Security dealt in at the Stock Exchange and the Mining Board.

The quotations of Securities not on the Stock Exchange list, including Southern Stocks and Bonds.

A transcript of the official register of the Gold Room, showing every quotation from the formal opening to the formal closing of the Room—published in no other paper.

A summary of the daily transactions at the SUB-TREASURY, the GOLD EXCHANGE BANK, and the CLEARING-HOUSE.

A full table of quotations of STERLING and CONTINENTAL EXCHANGE.

THE CHANGES IN THE REDEEMING AGENTS OF THE NATIONAL BANKS, AND THE OFFICIAL PERIODICAL STATEMENTS OF THE NATIONAL BANKS IN EACH STATE, as furnished by the Comptroller of the Currency—published by no other daily paper.

2d. The most accurate and the ONLY DAILY report of the DRY GOODS MARKET, including a full PRICE CURRENT of staple and domestic fabrics, which is corrected daily.

3d. A carefully prepared report on the PRODUCE MARKETS, much fuller in its details than that of any other daily journal, embracing a full Price Current semi-weekly.

4th. A daily statement of the RECEIPTS OF PRODUCE, the IMPORTS FROM FOREIGN PORTS, and the MANIFESTS OF VESSELS CLEARED AT THE CUSTOM HOUSE.

5th. Its CITY COMMERCIAL and FINANCIAL NEWS is fuller than that of any other journal.

6th. In its EDITORIAL DEPARTMENT the BULLETIN gives a fuller discussion of current commercial and financial topics than any other journal in the United States; and in this especially its influence ranks second to that of no other paper in the country.

7th. Its PRICE IS ONLY ABOUT ONE-HALF that of other leading commercial papers, and yet its information is fuller and in all respects as valuable.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, FEBRUARY 11, 1871. NO. 294.

Advertisements.

Advertisements will be inserted at the following rices per line for each insertion:

If ordered less than 4 times			20 cents per line.
4	times or more		16 "
13	"		14 "
26	"		12 "
52	"		10 "
	"		8 "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when rst put in, but no promise of continuous insertion in he best place can be given, as all advertisers must have equal opportunities.

Advantages.

1. The CHRONICLE has much the largest circulation of any financial publication issued.

2. Its circulation extends to business men in BOTH the FINANCIAL and COMMERCIAL branches, and also to a very numerous class of retired merchants, moneyed men and investors, who are not engaged in regular business.

3. It is preserved on file by subscribers, and thus possesses a great advantage for advertisers, over those publications which are habitually thrown aside after perusal.

FIRST MORTGAGE
BONDS
OF THE
Nashville & Decatur RR.

This Mortgage is for

$2,100,000,

or only $17,500 per mile on an old and completed road, showing an established business, from local traffic mainly, more than sufficient to pay its interest as it becomes due, with prospects of greatly enlarged receipts from new connections which are now in progress.

The Mortgage was created for the sole purpose of paying a debt due to the state of Tennessee on terms which would reduce the liability of the road about $600,000.

Of the bonds issued under said Mortgage $200,000 are held in Escrow to abide settlement of a claim of the United States; $300,000 have been purchased by the parties in interest, and the balance of $1,600,000 are offered for sale on favorable terms—the security, in judgment of the undersigned, being such as to entitle them to perfect confidence.

COMPLETION
OF THE
Burlington, Cedar Rapids & Minnesota Railway.

To Capitalists and Investors:

NEW YORK, February 4, 1871.

The past month has witnessed the completion of an enterprise with which, for more than a year, our firm has been intimately associated. The BURLINGTON, CEDAR RAPIDS AND MINNESOTA RAILROAD is now finished, and shortens the distance from St. Paul to St. Louis ninety miles and to Chicago forty-five miles, forming the best route of transportation from the great grain fields of Southern Minnesota and Northern Iowa to the great centres for the distribution of their products. We did not lend our names to this enterprise without the most careful investigation; and, having convinced ourselves as to its sterling character and prospects, we have assisted in pushing the enterprise to completion through times more or less unfavorable. Our anticipations formed at the beginning have been more than realized by the result. The road has entered upon a career of prosperity which, already great, will undoubtedly increase under the stimulus of increasing population and production—which railway construction always brings with it.

The resources with which the road has been constructed have consisted of subscriptions to stock to the extent of $20,000 per mile, made by parties interested and by towns and counties along the line, which have adopted the method of cash subscriptions to stock for giving their aid rather than by issuing town and county bonds. The resources thus obtained have been augmented by the sale of the first mortgage bonds of the company, issued to the extent of $20,000 per mile, secured by deed of trust covering all the property of the company, which aggregates double the amount of the lien thus established upon it. The first mortgage bonds thus afford a tempting investment, being secured by a property of twice their value, and which, in its inception, has shown steadily increasing earnings, attaining already twelve per cent net upon the amount of the mortgage, that is, leaving four per cent dividends on stock after paying operating expenses and interest on the bonds.

A glance at the map will explain the influences under which this result has been attained. The railroad extends from Burlington, Iowa, northwesterly via Cedar Rapids and Cedar Falls to the Minnesota line, and thence over the Minnesota Central Railroad direct to St. Paul, thus affording an air line from St. Paul to St. Louis, and at the same time shortening the distance materially from all points in Southern Minnesota to Chicago. The nature of the country through which the road passes affords, in addition to through traffic, a guarantee of lucrative way traffic, from which source, in fact, the bulk of the earnings up to the present writing have been obtained. The counties which it traverses have an aggregate population of over 200,000 souls, and the rate of increase, as shown by the census of the past two years, has been 10 per cent per annum in population, and more than 60 per cent per annum in agricultural products.

Of the first mortgage bonds above referred to, secured as described, by lien on double their value, we now offer on behalf of the Company bonds to the amount of $400,000 for sale at 90 and accrued interest in currency. Sales have been made very freely at the price named during the construction of the road, and new stimulus has been added to the demand by the completion of the enterprise. This small balance, therefore, will no doubt be shortly absorbed.

As an instance of the prospects of the road and its intimate relation with the Chicago, Burlington and Quincy Railroad, which is the leading enterprise of the West and the outlet to Chicago of the Burlington, Cedar Rapids and Minnesota, we may remark that, in addition to an extremely favorable arrangement for freight and passenger traffic over the Chicago, Burlington, and Quincy in its favor, the contract further specifies that the Chicago, Burlington and Quincy Railroad is to set aside 50 per cent of its gross earnings realized from business with the Burlington, Cedar Rapids and Minnesota Railroad for investment in the bonds of the latter Company. This arrangement secures a practical consolidation of the two companies and makes the Chicago, Burlington and Quincy permanently interested in the Burlington, Cedar Rapids and Minnesota Roads by its traffic arrangements with and investment in the First Mortgage Bonds of the Company. No better guarantee of the value of the security could be given than this practical endorsement by the action of the most prosperous and far-sighted enterprise in the West.

We invite subscriptions to the First Mortgage Bonds offered for sale at 90 and accrued interest in currency, by application either to ourselves or our agents established throughout the United States for their sale.

THE CLEARING HOUSE CERTIFICATES AND THE MONEY MARKET.

The withdrawal of 2½ millions of Clearing House Certificates has just been announced, and there are several related topics of interest which are attracting attention in Wall street in connection with the money market. For some days an interruption has been observed in the influx of National Bank notes to this centre, and the tidal flow of currency from the interior is evidently checked for the moment. This is in some respects a favorable indication; as it shows that currency is wanted in the interior, and that the business movements there are developing a new and less languid activity. The change is not sufficiently pronounced to form, as yet, the basis of any extended inferences. But these tidal movements of money attract anxious observation, especially at certain periods of the year. For example, the grain trade of the West causes an outward current of deposits and notes from the banks of this city in October, the currency being released and returning hither about the close of the year. Next comes the pork crop, which makes its demand for currency in December, the return current setting in this way about the beginning of February. Thirdly, there is the cotton crop, which causes an outward flow of currency in November, December and January, the return current making itself felt here in April or May. Fourthly, there is always an active drain about the 1st of April, caused by the temporary settlements at that date in the country. All these tidal movements of currency are invested with special interest, and help those persons who would intelligently forecast the future of the loan market. There is an especial force in the drain of October and April, when the money market hereusually suffers no small interruption of its equilibrium and ease. Had our monetary system its proper elasticity, the severe stringency of the spring and fall might be averted. Such, at least, is the prevailing belief. And many expedients have been suggested to impart the needful elasticity to our currency machinery. The Chamber of Commerce has under consideration a proposition to accomplish this object by an issue of Treasury notes bearing 3·65 per cent. interest. These notes are to be given out from the Treasury at par, and again cashed there at par on demand. They are also to be made bank reserve money, which would necessitate their being a legal tender. A few millions of these notes, it is said, would give an amazing access of elasticity to the monetary circulation of the country, inasmuch as on a moderately tight money market the notes would go into the Treasury for cash, and on an easy money market they would spontaneously flow out. That this method of conferring elasticity on the currency has some obvious merits is not to be denied, but the experiment in its full details is too radical, and involves too much risk to be likely to command much public favor. There is, besides this fatal objection to this scheme, that it contemplates an increase in the aggregate of legal tenders afloat, and Congress is pledged against any such enlargement. We suppose, however, that the object in view could be accomplished by an issue of Clearing House certificates, which there is authority for without any new legislation. This issue might be made to a sufficient extent to cover those certificates which have just been called in. The amount of these is 2½ millions, extending to No. 860 of those for $5,000, and to No. 758 of those for $10,000. These certificates will cease to bear interest on the 31st of March, just before the tidal movement of April 1 to which we have just referred.

Of course there would be no need for the issue of these new certificates except the monetary machinery should show signs of danger and undue activity. But it is no small protection against financial perturbation if such a remedy is at hand ready for use whenever it may be called for by the exigencies of the money market. For the rest, however, there is no immediate apprehension. The loan market is easy, and in the absence of any exterior and unexpected

Digitized by Google

causes of trouble it will grow more and more abundantly supplied with capital, until the April drain sets in. Mr. Boutwell has begun to pour out his hoarded currency from the Treasury vaults, as was urged upon him some months ago. The severest drain of currency from the country to the interior is over and the tidal flow is reversed. Money is now coming this way. Our banks hold currency enough and to spare. Soon we shall hear the question of a Clearing House for the redemption of bank notes eagerly debated, as always happens when the rise of the stream of currency is, so to speak, in its spring tide. While then one is glad to see that the Secretary of the Treasury has yielded to the force of public opinion in regard to the hoarding of greenbacks, it cannot but be expected that the same enlightened policy of giving ease to the money market will control his movements if, as sometimes happens, the season of spring activity in business should develop next April some degree of monetary stringency. The accumulation of currency in the Treasury during the inactive intervening season of business will enable Mr. Boutwell to let out his hoard when it will replenish the depleted channels of the circulation, and if any further supply is needed it will be easy for him to issue Clearing House Certificates in place of those he is now retiring.

MR. BOUTWELL AND THE PEOPLE.

The honesty, executive industry, and unimpeachable fidelity of Mr. Boutwell fit him so well for the high functions of Secretary of the Treasury that the people generally have but little sympathy with the efforts which are on foot for his removal from office. It is true that his policy is in several of its parts unpopular, and that the resolute pertinacity with which he has urged injudicious propositions does more credit to his conscious rectitude than to his abilities as a financial statesman. Still his office is purely ministerial. As the Head of a Department and a servant of the people, he is bound to administer the laws, to obey Congress, and to carry out the policy prescribed to him, whether he approves it or not. The Treasury of this country has no longer the vast discretionary powers which it wielded during the war, and for a year or two afterwards. With the exception of the hoarded balance in the vaults of the Treasury, and the important functions which this balance exerts in giving elasticity to the currency, and preventing alternate stringency and inflation of credits at certain critical periods of the year, there is but little remaining of the stupendous fabric of power which was formerly so much dreaded, because occasionally it caused trouble during the administion of one or two of his predecessors. Mr. Boutwell has shown indications of a desire to accommodate his manipulations of the Treasury to the rules which ought to regulate them, although it had been better if his change of policy were less tardy.

It is not certain whether Mr. Boutwell's movement for refunding the debt will lessen or augment his popularity, but he has considerable faith in the scheme; and on the 6th of March he proposes to open books of subscription for the new bonds, both here and abroad. A commission of one-half per cent is allowed by law for the conducting of the business; and if it were possible to negotiate the whole of the 1,500 millions of bonds, the aggregate commissions would cost the country 7½ millions of dollars. How much prospect there really is for the success of Mr. Boutwell's new loan may be inferred from the fact that he is not allowed to offer the bonds below par in gold, although they bear interest at 4, 4½ and 5 per cent, while anybody can buy our outstanding six per cent five-twenties for a lower price in the open market. As an extra inducement and compensation to attract purchasers, Mr. Boutwell offers these privileges: First, The bonds are by law made payable, principal and interest, in gold coin *at the present standard*. This precaution against currency-depreciation is given in the case of no other securities which have ever been issued by the United States Government, or by any prominent corporation in this country. Secondly, the interest is payable quarterly instead of half yearly; and thirdly the bonds are absolutely exempt from taxation by State, municipal or federal authority. This last privilege has not, we believe, been conceded before to any species of property by our government or by any first class foreign power. Whether the exemption from all taxes is allowed by the Constitution of the United States has been doubted, but in any case it violates a fundamental principle of finance, and the spirit of our institutions forbids that a precedent should be established for freeing any set of capitalists or any species of property from the inalienable, paramount and universal obligation to support the government. As such a perilous experiment was never by us resorted to during the darkest days of the civil war, or in the severest pressure to defend the government from destruction, the question is asked whether it should be conceded now; whether if conceded it can be or should be sustained in law, and whether the saving of a few millions for four or five years in interest could compensate for the risk of adding to our unwieldy fiscal fabric a new element of disintegration, discontent and danger.

Mr. Boutwell announces that he will receive proposals for the following aggregates of bonds, of which the issue was authorized by the act of last July: Four per cents, redeemable after 30 years, 700 millions; four and a half per cents, 300 millions; five per cents, after 10 years, 500 millions. Subscriptions will be opened at each of the Sub-Treasuries in this country, and at suitable agencies in London and Frankfort. The subscribers must deposit two per cent on enrollment and the rest of the purchase money on the delivery of the bonds. Preference will be given in the following order: First, to subscribers for equal amounts of 4, 4½ and 5 per cents.; secondly, to subscribers for equal amounts of 4½ and 5 per cents; thirdly, to subscribers for 5 per cents. Mr. Boutwell does not reserve to the Treasury as usual the right to reject any and all bids. This important privilege he will, of course, take care to secure. The bonds are all to be sold at par in coin, and payment may be made in any description of five-twenties at par. These new bonds have been so long offered without takers in this market that we know not what reason Mr. Boutwell conceives himself to possess for supposing that they will find a better market here now. He is said to be relying on the National Banks; but our banks throughout the country are all less prosperous than they were, and such is the competition for business that multitudes of these institutions have great difficulty to earn dividends. Without a compulsion-law passed by Congress obliging them to take the new bonds does Mr. Boutwell suppose that the banks in the face of dwindling profits, will give up 8 or 10 millions of dollars a year of their interest? Whether the banks have hitherto escaped their fair share of fiscal burdens, and whether they ought to pay as much as this in the shape of annual taxation is another question. To set right such a wrong another remedy could be chosen.

But Mr. Boutwell we believe is also depending on a foreign market for the new bonds. He has been persuaded that foreigners are willing to buy them, and if so it will no doubt offer a fair opening for new business to such of our enterprising foreign bankers as may be appointed agents for disposing of the securities and receiving subscriptions. But

Digitized by Google

why do not these financial gentlemen recommend their clients abroad to buy our Five-Twenty six per cent. bonds below par, instead of buying at par the new 4, 4½ and 5 per cents? and why do they think that the new loan can be a success with the embers of war still smoking in Europe? These questions, we presume, Mr. Boutwell has asked and has had answered. We can understand and we heartily share his anxiety to fund the debt at a lower rate of interest. It is a patriotic project to save, if possible 15 or 20 millions of dollars a year in interest alone. But he should remember two or three things. First, we have but lately funded the debt in its present form, at a vast expense. Secondly, experience shows that such funding operations derange and disturb business and inflict enormous losses on the people by disorganizing the money market. Inexperienced or designing men may tell him that because there is only an exchange of bonds and no new debt made that no monetary perturbation can result. But he must not believe them. Thirdly, the loss of prestige, if the scheme should fail, will embarrass, if not prevent, any new effort at a better time and in a more auspicious form. Fourthly, the crude system of issuing time-bonds, like our outstanding five-twenties and ten-forties, should be thrown aside as too antiquated and expensive and too prejudicial to the borrower. Our credit is now so well established, that if we manage our finances well, we shall raise any sum we want at 4 per cent within five years from this time. But our bonds on the market, at home and abroad, are now so numerous that for the present we cannot probably borrow any large amount below six per cent. In this state of things we can afford to wait four or five years if such a delay should be necessary for doing well what Mr. Boutwell is so anxious to do imperfectly and at once.

THE HUDSON RIVER RAILWAY ACCIDENT.

The press and people are ever ready with their suggestions on the occurrance of a railway accident. It is not surprising that these suggestions should be peculiarly abundant in view of the painful experience of the past week. But how important is it that our views may be practical in order that they may have effect or be useful. It certainly is not feasible to drive the oil business off our railroads; nor to compel the cars to stop every few miles; nor, in a word, to require anything of the company which will to any great extent fetter commerce or travel.

In this case the real cause of the accident and also of its most aggravating features are not far to seek. They were one and the same thing—a defect in the construction of our railroads, which can be very easily remedied. Suppose the bridge where the accident happened had been made of iron and covered with an iron floor, could the broken axle of the freight train or the broken truck have caught in the cross beams of the bridge and thrown the cars over on the other track? or would the bridge have taken fire if thus constructed? Then again if sufficient strength had been given to this iron bridge to support any weight, would not many of the passengers have been saved? As it happened, the worst feature was the fact that the bridge gave way and the cars were precipitated into the water. Many could have been rescued from the fire if the cars could have been reached; and probably the entire accident would have been avoided had there been a smooth flooring over the bridge of sufficient strength to carry over the broken freight car, in the same manner as it had been carried for many hundred feet before it reached the bridge.

Now it is no answer to this suggestion to say that it would cost something to have such bridges made. The railroad in question is not a weak road of sickly finances. It finds no difficulty in paying the interest on its bonds, or a cash eight per cent. dividend to its stockholders. More than that, it has, within a brief period, given its stockholders an immense bonus and now returns them a high interest on this new stock. These facts are of much interest in this connection, and suggest the inquiry whether so rich a road is to be allowed to transport its passengers over any chasm it chooses on a simple rail propped up on a few crumbling sticks of timber. These words are not exaggerations. Let any one who thinks they are examine for himself, and he will find that where there should be solid masonry there are instead timber props, and where there should be iron there is wood.

The time was when cheaply built railways were a necessity in this country. We had not and could not command the capital to build better, and had not the travel or traffic to support them if built. Corduroy roads are frequently required as a first step in progress, and for the same reason and as a temporary measure a new country may submit to a slightly built railway. But has not that period passed in New York State, or at least with a road that can make its stockholders such returns as the Hudson has been able to make of late years? It would of course call for a large outlay to replace all these bridges; but are there not the best reasons for the legislature saying that it shall be done? that some of these extra dividends shall be turned in to secure the safety of passengers? There may not be sufficient virtue in any Assembly and Senate to give the people such laws—we are not prepared to hazard an opinion on that question, as we know the purchasing power of these railroad corporations—but as to its justice and necessity there can be no doubt in any reasonable man's mind.

In this connection we wish to speak upon another point which requires notice, and which this accident suggests. With several railroads it is a common practice to have kerosene lamps in the cars, to be lighted evenings or in passing tunnels, and each of these lamps contains at least enough of the oil to burn passengers horribly, if it should be scattered in the car, if not suddenly to fire the whole train. The accidents constantly occurring in households from the use of these oils is a warning of what may be expected to happen at any time on trains. When the same article is used in large amounts and on cars in rapid motion, a lamp requires comparatively a small shock to break or overturn it, and that which might and ought to be but a trifling incident of travel could easily be turned into a painful or even fatal calamity by the presence of this deceitful fluid.

The problem of lighting railway cars is not one of such difficulty as to excuse this practice. It may be true that the reservoir of illuminating gas now carried on some trains and on many steamboats is hardly safer than the oil itself. But there are railways, and among them some of our best lines, on which large candles are used for lights, and nothing else. These answer all the purposes for which such lights are needed, and they are entirely safe. The difference of expense is but trifling, and is not to be set up as an excuse for endangering lives. We, therefore, claim that burning-oils should be banished from our railroad cars; and let the community be assured that the horrors of death by fire shall not be brought upon them, as it may now be, by the slightest defect in railway materials, or the slightest carelessness in railway officials.

COTTON, 1870 AND 1871—THE RETROSPECT AND THE PROSPECT.

[COMMUNICATED.]

At the beginning of 1870, and for some months thereafter, the supply of raw cotton to Europe, particularly the American portion, as subsequently developed, was widely under estimated. This error sustained high prices in the early

Digitized by Google

months, and perhaps contributed to the good demand for both cotton and goods which prevailed. Hence the year opened with middling upland cotton (Am.) at 11½d. in Liverpool, and No. 40 mule twist at 16¼d. in Manchester. Cotton declined but slowly as the extent of the supply gradually became apparent, holding an average price of about 11d. for middling upland through the spring months, 10⅝d. in May, and 9⅝d. in June. Upon the declaration of war by France, late in July, there was a rush to sell, and under it cotton fell to 7½d. for middling uplands and other qualities in proportion, causing immense losses to holders and many failures. From this extreme depression there was a quick reaction to 9½d. in August and September, followed by a decline to 8½d. in October. In November, under the scarcity of American cotton, middling uplands advanced to 9¼d., after which came larger supplies and highly favorable reports of the incoming American crop, causing a decline to 8¼d., at which price the year closed.

The previous year (1869) closed with small profits to spinners, which were continued and increased in the first seven months of 1870. The average difference between the prices of middling upland cotton and No. 40 mule twist through the whole of 1869 was but 4d. per pound, affording a profit only in the later months. In the first seven months of 1870 that difference was 5½d., and for the whole year its average was 5d., which though affording but a small enough profit, showed a wide margin of improvement upon any previous year since 1861, in remarkable contrast, says one writer, with the "nine weary years" during which "the spinners saw their capital melting away under an almost constantly losing businesss; so that at the close of 1869 the position of this great industry was deplorable." These profits, with the present prospective increase under the influence of cheapening cotton and a demand for the utmost production of the cotton mills, give promise of a highly prosperous business in 1871, and have put in active operation nearly every available spindle. With cheaper cotton, better and more substantial fabrics are produced, suited to the home and continental demand, requiring the consumption of more cotton to the spindle and in the aggregate. No new cotton mills are building, and it was earnestly hoped that none would be built during the coming year to impair by excessive competition the good trade and prosperity now in prospect.

The statistics of cotton in Great Britain for the year are:

Stock on hand Jan. 1, 1870		460,180 bales.
Imports from America (U. S.)	1,664,010	
" India	1,063,540	
" Brazil	402,760	
" Egypt	192,790	
" other countries	139,230	3,462,330 bales.
Total supply		3,922,510 bales.
Taken for consumption in Great Britain	2,797,090	
Taken for export from Great Britain	658,430	3,455,520 bales.
Leaving stock on hand Dec. 31, 1870		446,990 bales.
The average weight of bales imported in 1870 was 380 pounds, making an aggregate weight of		1,315,397,780 lb
The average weight of bales imported in 1869 was 354 pounds, making an aggregate weight of		1,198,354,550 lb
Increase in 1870		117,043,180 lb

equal to 330,630 bales of the average weight in 1869, or 9.77 per cent.

The average weight of bales consumed in Great Britain during 1870 was 396 pounds, an aggregate of	1,078,204,510 lb
That of 1869 was 358 pounds, an aggregate of	941,585,520 lb
Increase in 1870*	136,618,990 lb

equal to 381,617 bales, of 358 pounds each (as in 1869), or 14½ per cent, though it was but 8¼ per cent larger than the consumption of 1868. The export fell, below that of 1869, 133,420 bales, or 17 per cent.

* The British consumption of 1870—1,078,204,510 pounds—was almost exactly the same as in 1860—1,079,321,000 pounds—the largest ever known, which, with that of 1861, almost as large, supplied the markets of the world at that date with cotton goods to an excess threatening great losses, which were averted by the occurrance of our war and the cotton famine.

Of the whole production of cotton goods and yarns in Great Britain, taking the average for the last five years, 81½ per cent. of the weight and 78 per cent of the value has been exported, and only 18½ per cent of weight, and 22 per cent of value has been consumed at home.

The actual figures for 1869 were:

Exported	700,098,000 pounds—value,	£272,111,000
Consumed at home	180,000,000 pounds—value,	15,460,000

—and for 1868:

Exported	723,166,000 pounds—value,	£272,052,000
Consumed at home	160,000,000 pounds—value,	19,665,000

(The figures for 1870 have not been received.)

Of the exports of cotton cloth the average has been about 72 per cent to warm countries, and consisted chiefly of light fabrics. In the last five years 27 per cent of the entire export was to the East Indies alone. These proportions are worthy of note in considering the character of the English cotton trade and its prospects for the current year.

The exports of plain and colored cotton goods to China in 1870 exceed those of 1869 by 32 per cent, and the average of the five years 1865–69 by 72 per cent, while those to India in 1870 exceed those of 1869 by 21 per cent, and the average of the five years by 39 per cent. These exports of 1870 exceed those of 1861 (the largest in any one year before our war) by 68 per cent to China and 44 per cent to India. In 1861 the eastern markets were much overstocked; ruinous losses were impending when our war occurred to cut off cotton supply and impart high value to goods on hand. Then there had been a rapid increase in the consumption of cotton and production of goods. The cotton consumed in Great Britain was

In 1850	588,200,000 lbs.	In 1858	905,600,000 lbs.
In 1855	839,100,000 lbs.	In 1859	976,600,000 lbs.
In 1856	891,400,000 lbs.	In 1860	1,079,321,000 lbs.
In 1857	896,000,000 lbs.	In 1861	1,007,400,000 lbs.

—the increase in ten years, 1850 to 1860, being 83½ per cent.

Leaving out of view the years 1862 to 1865 inclusive, note the increase in consumption since 1865:

In 1866	890,700,000 lbs.	In 1869	941,585,520 lbs.
In 1867	954,500,000 lbs.	In 1870	1,078,204,510 lbs.
In 1868	985,475,700 lbs.		

The eastern markets are reported to be again glutted with cotton goods. It is believed that the lower prices now expected will cause their active distribution to consumers, and the demand in England for export is unabated. Large profits are an incentive to an extension of business. It has been suggested that although no new mills are building, the existing machinery may be run on extra hours, even day and night, employing double sets of operatives, if the market shall make demand for the production. While not impossible, such a policy is not likely to be followed. Past experience has often taught the lesson through impressive losses that over production of cotton manufactures soon destroys profit, crowding the distributing markets and bearing down prices of goods while enhancing the price of raw material by its larger consumption, and giving good reason for the demand for higher wages and cause for discontent and strikes. The excess of the demand above the production secures the profit, and it has been found wiser to reap the benefits of such a position rather than destroy it. Besides, the ample stocks of English cotton goods in all markets caution the exporting trade not to allow further large accumulations, especially when they see reason to expect still lower prices in the ensuing months. Extra spinning time is therefore doubtful.

The cotton statement for 1870 in all Europe stands as follows:

Stocks on hand in ports, January 1, 1870		567,000 bales.
Imports to Great Britain	3,462,330 bales	
Imports to continent	*1,100,000 bales	4,562,330 bales.
Total supply to Europe		5,149,330 bales.
Taken for consumption: Great Britain	2,797,090 bales	
" " Continent	*1,510,000 bales	4,307,090 bales.
Stocks on hand, December 31, 1870		*842,240 bales.
Consumption in 1869	1,617,900,000 pounds (354 lbs. per bale.)	
Consumption in 1870	1,658,000,000 pounds (384 lbs. per bale.)	

*Not actual figures, but from Liverpool estimates and partial statistics.

SUPPLY.

There is some difference in the various estimates made of the supply of cotton for 1871. The American crop is conceded to be much larger than the preceeding one, and its out-turn is set down at 3,500,000 to 4,000,000 bales. Seeing the heavy weekly receipts, sustained and increasing since the first of December, few persons in this country now estimate our crop below four millions bales. The consumption in this country is over-estimated in England, and it is assumed there that our planters will retain more cotton on the plantation than usual. The resulting estimate of our export to Europe from this crop is 2½ millions to 2¾ millions bales. The larger quantity is generally regarded here as the minimum, if there shall be demand for it. The movement of the India crop is hastened or retarded so much by high or low prices, that the time and the extent of the import from India are both quite uncertain. That it will be small and tardy during the early part of the year, because of the decline in prices, is generally admitted. But the crop in India is reported as a good one, yielding more cotton from a smaller area than was produced last year, while the cotton held over, in the Bombay Presidency, Madras, &c., from the last crop is estimated at 400,000 bales or more. The supply obtainable by Europe in 1871 *under the power of adequate prices, can be* 300,000 to 500,000 bales larger than the imports of 1870. What it will be, is, of course, uncertain, and it is proper to say that cotton existing, and ready for market, within call and obtainable by steam transportation within sixty days, whether in American or Indian ports, is practically a portion of the visible supply in its bearing upon prices.

The Egyptian crop entering into the supply for 1871 is a large and good one, estimated to exceed the preceeding one by 50,000 bales or more. From other countries there is no reliable information. Their contribution to the whole supply is, however, so inconsiderable that an error of 25 per cent. either way would not materially change the result.

The average weights of cotton bales in the European supply of 1869 was 354 pounds (net). In 1870, by reason of the larger proportion of American bales, it increased to 384 pounds. In 1871, assuming our present crop to be 3,800,000 bales, and 2,750,000 bales to be exported, with an export near the close of the year, from the next crop, equal to that for the same period in the last two years, the proportion of American in the import to Europe for 1871 will be still larger than in 1870, and will raise the average weight to 415 pounds per bale, or to 410 pounds for the whole supply for 1871, including the stocks on hand January 1, 1871.

EUROPEAN CONSUMPTION FOR 1871.

If we suppose every cotton spindle in Great Britain to be employed at full working time throughout the year, and that the production is of heavier and coarser fabrics, to the extent of two numbers of yarn (say 6 per cent.) in the average of all, the consumption of cotton in Great Britain may be increased over that of 1870 by 12 to 13 per cent. Let us assume then that it shall be 12½ per cent. or one-eighth more than last year. The consumption on the Continent defies accuracy of computation, because of the uncertainties caused by the war.

Suppose peace to be made within this month, then there will be at first the consequent condition more or less of stagnation. The waste or diversion of capital and skilled labor cannot at once be made good to cotton manufacturing or any other business. Commercial capital and credit are necessary to life and activity in manufacturing enterprise, and these have suffered seriously. Bankruptcies must be settled, credits re-established, and capital brought back to its old channels before the restoration can be complete. All this requires time. It is, therefore, probable that even with peace restored this month, the consumption of cotton on the Continent during the first five months of 1871 will not exceed that of the last five months of 1870, and that the aggregate of the whole year can but little exceed if it equal that of 1870; for it must be remembered that the consumption of cotton in France and Germany together has been 55 to 60 per cent. of the whole consumption in continental Europe during the last few years. But suppose the increase for the Continet shall be five per cent. Then from these premises we have for 1871 the following statement of what can be:

Stocks of cotton on hand in European ports January 1, 1871....			*842,240 bales.
Import (available) from America.....	2,750,000 bales.		
India.....	1,650,000 "		
Egypt.....	300,000 "		
Other countries—25 per cent less than in 1870...	700,000 "		
		5,400,000 "	
Supply available.....			6,242,240 bales.

—which, at an average of 410 lbs. each, will be 2,559,318,450 pounds.

Consumption (maximum):	lbs.		
In Great Britain—12½ p. c. more than in 1870.....	1,212,980,074		
Continent—5 per cent more than in 1870.....	*608,832,000	lbs.	
		1,821,812,074	
Leaving on hand, December 31, 1871.....			737,506,376

equal to 1,800,000 bales of 410 pounds each.

* The consumption on the Continent for 1870, and the stocks on the Continent at the end of the year, are not the actual figures, as they have not been received, but are computed from partial data and Liverpool estimates.

If from low prices, or other reason, 600,000 bales of the above accessible supply remains back in the producing countries, the stock in Europe at the end of the year will still be 1,200,000 bales, to be further increased by whatever the consumption shall fall short of the large quantities assumed for it above.

REDUCED PLANTING.

It has been assumed here and in England that low prices will materially reduce the area of cotton planting for the next crop in this country. If so, it will be contrary to the experience of past years. The crop of 1850–51 was 2,454,442 bales, the largest ever produced up to that date except the crop of 1848–49. In 1851–52 it was 3,126,310 bales; in 1852–53, 3,416,214 bales. Under the sudden increase of supply from these two large crops in succession; prices broke down to 5⅜d. for Middling Uplands in Liverpool, and for four years the average price in any one year did not rise above 5¾d., although the four crops next following 1852–53 were 3,075,000, 2,983,000, 3,665,000 and 3,094,000. The extent of the crops in old times was determined mainly by the character of the seasons, and very little if at all by the prices. The lower the price, the more must be produced. Then there was no other employment for labor readily available. To a great extent it is so now among the laboring people of the cotton growing States. Low prices should and will lead to a larger planting of subsistance crops for economy and independence, not as a general thing at the sacrifice of cotton, but rather by greater industry and better management. Labor will be cheaper and seeking employment instead of being sought, and all experience teaches that labor seeking hire in "hard times" at low wages, is better and more effectively productive than when overpaid under great demand. Already the large plantation system has given place largely to the small farm system, and this tendency will continue. Tempted by the high prices at which the crops of 1868 and 1869 were sold, planters made the crop of 1870 too costly by high wages, and by expensive and too often worthless commercial fertilizers and other outlay. The autumn, favorable beyond all precedent for the maturing and saving the crop, has added 20 or 25 per cent. in its out-turn to the reasonable expectations of the spring and summer; by the abundance of its success

Digitized by Google

greatly reducing its value. The season of 1869 was highly favorable; that of 1870 has suspassed it. In all the history of American cotton growing the third progressively favorable season has never occurred. The next may be unfavorable. A planting equal in area to that of 1870 may turn out less than 3,000,000 bales, and the production in other countries may be simultaneously discouraged by the prevailing low prices. It was a necessity of the case that a period of very low prices must occur, low enough to discourage cotton production on a large scale in less favored countries, and turn them back to the productions common to them prior to 1861, before the old monopoly of the world's cotton supply could be restored and re-established in this country, where the production is so favored by natural conditions that the monopoly, once fully restored, can be held, against all competition, and thenceforward command in the average of years fairly remunerative prices.

Any considerable abandonment of cotton culture just now, when the victory is so nearly won, would be unwise. Happily there is no danger of it. The general plan should be to secure first large food crops, and then to make all the cotton possible, whatever the present price. Low prices extend consumption very rapidly, and one bad season would restore good paying prices, while another abundant crop, if it should come this year, would settle the question of cotton growing elsewhere.

PLANTERS HOLDING COTTON.

The opinion has been expressed, and much advice has been given that planters shall keep back a portion of the present crop, in order that the portion marketed shall have a better price. The question arises, who will be benefited by such a policy if followed—the planters to whom the advice is given, or the speculator who has bought the larger part of his crop? If planters should, by general consent, withhold until next season, say one million bales, and the fact becomes known, doubtless the cotton going forward would command better prices; yet not much, for the existence of the million bales being known, it matters little to the European spinners whether the cotton be in their ports or on the plantation, except as the latter would relieve the markets of the additional pressure which would be felt if all went forward. The owners of the two millions of bales of American cotton which planters have sold, and the owners of the cotton of all other countries would get some advantage. But the American planters who are invited to give others that advantage, should see some benefit to themselves before consenting to the sacrifice. To store up one million bales of cotton, to be added to the weight of another crop, in the season of 1871–72, even though that be a small one, would be to doom the whole to low prices most effectually. If the withholding sustained prices, it would in so far check the increase of consumption which is promoted by low prices, thus adding to the eventual accumulation, and would, for the present, encourage planting in other countries. No, if the supply for 1871 is excessive, the quickest remedy is in the low prices which attend it. These drive consumption to the utmost, and under it the surplus melts rapidly away, while they reduce the world's production, and these again lead to better prices. Planters need not assume speculative risks. Following the rule of selling their cotton when ready for market (except in times of panic or other temporary depression), they may rely upon it that consumers and speculators will make demand for the cotton at prices quite high enough for the relation of supply and consumption, and when, as now, the production has suddenly outrun, in large measure, the consuming power, the sooner the surplus is taken up and distributed the better, though prices be distressingly low. The large weekly deliveries at the ports indicate that planters disregard all efforts to persuade them to self sacrifice.

HOME CONSUMPTION.

Consumption of cotton in the United States for the trade year ending August 31, 1871, will not meet the expectations generally held last summer. They were reasonably based upon lower prices of cotton and consequent increase in the production of heavier goods. But changes in the character of cotton-mill products are made only to meet the demands of trade, actual or expected. So far the light and medium goods continue to pay best, and there has been no considerable change to coarser fabrics. Spinning machinery has received but little addition since last year. The extraordinary drought of last summer and autumn reduced cotton spinning in New England materially; (it was estimated equal to one-third of the full rate for two months, or one-fourth for three months.) The fall rains partly filled the streams, furnishing a temporary restoration of full mill power, but did not fill the springs and bogs, which are the feeders of those streams, nor the lakes and ponds, which are their reservoirs; consequently the effects of the drought recurred during the winter, and are still felt in many places, in the reduction of the spinning power. Doubtless the spring rains and melting snows will restore full power for the remainder of the year from April to September 1. But the lost cannot be regained. Instead, therefore, of a consumption of cotton in this country during the present year larger than in the year ending August 31, 1870, as was anticipated, there is a strong probability that it will be less. Last year's consumption, North and South, was less than 900,000 bales. In computing the supply of our cotton to Europe out of this crop, the export was taken at 2,750,000 bales, which would reserve for home use and for addition to stock August 31, 1,250,000 bales if the crop turns out 4,000,000 bales, and 1,000,000 bales if the crop is only 3,750,000 bales, in either case a considerable excess upon home requirement.

B. F. N.

PHILADELPHIA AND READING RAILROAD.

The length of equivalent single track operated by this company in 1869–'70 was 1,168 miles, distributed as follows:

Name of Road.	Single Track.	Double Track.	Sidings and Laterals.
Philadelphia & Reading RR—Main Line	98.4	98.4	137.5
Northern Liberties & Penn. Township RR.	1.4	1.4	0.6

Mahanoy & Shamokin RR*	63.7	8.9	63.6
Pickering Valley RR.	1.0	....	....
Total	575.3	182.8	409.9

* The Mahanoy and Shamokin Railroad is a merger of the several roads heretofore known as the Mahanoy and Broad Mountain, the Mahanoy Valley, the Enterprise, the Shamokin and Trevorton, and the Zerbe Valley Railroads, the company's investments in which are now consolidated in the general account.

—and there are now under contract 42.1 miles, viz.: Perkiomen Railroad, 7.0; Mount Hope Branch of Reading and Columbia Railroad, 2.4; Allentown Railroad, 16.6; Mine Hill, 4.2; Mahanoy and Shamokin Railroad, 1.5; and Pickering Valley Railroad, 10.4 miles.

The total length of equivalent single track operated by the company at the close of each of the last six fiscal years is shown in the following statement:

	1864–5.	1865–6.	1866–7.	1867–8.	1868–9.	1869–70.
Main Line	289.0	306.7	315.8	320.2	326.0	334.3
Other Railroads	428.5	441.9	454.8	486.5	815.9	833.7
Total (miles)	717.5	748.6	770.6	806.7	1,141.9	1,168.0

Digitized by Google

The company have also leased the Schuylkill Navigation (Port Carbon to Philadelphia, 108.33 miles,) and the Philadelphia, Germantown and Norristown Railroad, 20.22 miles, and the roads leased and operated in connection therewith, 10.13 miles. The lease of the railroad is perpetual (or for 999 years,) and pays to the owners $269,623 34, payable in quarterly instalments, March, June, September and December 1, annually, and $8,000 annually in like instalments for the maintenance of the corporation. The lease of the canal is also perpetual, and calls for the fixed sum of $655,000, payable in quarterly instalments, January, April, July and October 1, annually, and $10,392 53 annually in like instalments for the maintenance of the corporation. The lease of the canal is from July 11, 1870, and that of the railroad from Dec. 1, 1870. There was a loss on the canal to November 30, 1870, of $11,973 88. The gross receipts thereon were (July 11 to November 30) $443,438 91, and the expenses $187,003 88. Net earnings, $256,485 03. Lease-rent (June 1 to November 30) $268,458 91. One hundred additional boats are being built and with these the capacity of the canal will be increased to 40,000 tons per week.

LOCOMOTIVE POWER AND ROLLING STOCK.

The following is a summary of the locomotives and cars in use Dec. 1, 1865, and at the close of the next following five fiscal years:

		1865.	1866.	1867.	1868.	1869.	1870.
Locomotive engines		254	267	268	269	297	309
Cars, Four-wheel.	Coal	11,499	13,193	13,116	13,306	15,030	19,220
	Freight	2,140	2,323	2,468	2,512	2,967	3,156
	Passenger	174	210	220	237	281	289
	Transpor'n Dep't	200	183	181	214	223	116
	Roadway Dep't	378	402	370	375	413	446
	Total cars	14,391	16,311	16,355	16,664	18,974	23,337

This table shows an increase in five years of locomotives 55, or 21.6 per cent, and of cars 8,946, or 62.6 per cent.

EARNINGS AND EXPENSES.

The gross earnings were: From freight and tolls on coal, $6,498,871 18, and on merchandise, $1,690,444 33; on passenger travel, $1,205,539 07, and on mails, $34,241 51; expenses, &c., $142,271 26—making a total of $9,571,367 35.

The total expenses of working and repairing roads and machinery was $4,769,174 88, or including drawbacks and allowances, including rents and ground rents, $628,883 86; dumpage, &c., $151,282 38; taxes and insurance, $255,215 33, and profit and loss, $120,910 12—a total of $5,931,466 51.

Deducting the expenses from gross earnings leaves $3,639,900 78, subject to the following charges: Renewal fund (5 cents per 100 tons on 1,154,638,155 tons transported one mile), $577,319 08; interest on bonds, $517,747, and on bonds and mortgages, $65,426,63; sinking funds, $68,600; new tracks and other new work, $225,281 47, and July dividend, 5 per cent and tax, $1,643,259 57—amounting altogether to $3,154,338 42; showing an excess of income to the extent of $485,562 36.

The total of the reserved fund at the close of 1869–'70 was $1,851,023 58, from which the dividend of 5 per cent paid January, 1871, was declared. The following statement shows full accounts for five years:

7 p. c. $ bonds, 1870–90	.....	.....	.....	.....	2,625,000
Total	$6,084,300	$5,902,300	$6,379,800	$6,951,300	$9,657,700

The three last named classes of bonds were issued for the construction of new roads, and other works, completed and brought into operation during the last two or three years.

The Schuylkill Navigation loan is due—in 1895, $1,200,000; in 1913, $750,650; and in 1915, $621,600—total, $2,578,250; used in the purchase of the franchise and works, real estate, engines and cars, and coal barges of the company. These bonds must not be confounded with the proper issues of the Navigation Company.

The East Pennsylvania Railroad loan, $495,900, is due in 1888 This is an assumed debt issued by the owners of said work.

NEW YORK MARKET PRICES OF STOCK.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 2d of February, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Missouri—Palmyra	The First National Bank	The Ocean National Bank of New York.
Ohio—Toledo	The First National Bank	The First National Bank of Boston, approved in addition to the Fourth National Bank of New York.
West Virginia—Weston	The Nat'l Exchange Bank	The Western National Bank of Baltimore, approved in addition to the Ninth National Bank of New York.
Iowa—Ottumwa	The Iowa National Bank	The National Park Bank of New York, approved in addition to the Union National Bank of Chicago.
Louisiana—New Orleans	The State National Bank	The Tenth National Bank of New York.
Kansas—Fort Scott	The First National Bank	The St. Louis National Bank, St. Louis, approved.
Pennsylvania—Philadelphia	The Nat'l Security Bank	The First National Bank of New York, approved.

New National Banks.

List of National Banks organized since the 2d February, 1871:

Official No.

1782—The Winona Deposit National Bank, Winona, Minn. Authorized capital, $100,000; paid in capital, $100,000. Henry L. Lamberton, President; Izaak J. Cummings, Cashier. Authorized to commence business February 3, 1871.

1783—The Lumbermen's National Bank of Stillwater, Minn. Authorized capital, $50,000; paid in capital, $50,000. Isaac Staples, President; Henry W. Cannon, Cashier. Authorized to commence business February 3, 1871.

1784—The Bellefontaine National Bank, Bellefontaine, Ohio. Authorized capital, $100,000; paid in capital, $54,450. William Lawrence, President; James Deister, Cashier. Authorized to commence business February 3, 1871.

1785—The First National Bank of Kewanee, Ill. Authorized capital, $75,000; paid in capital, $37,500. Elias Lyman, President; Truman B. Hicks, Cashier. Authorized to commence business February 6, 1871.

1786—The First National Bank of Sigourney, Iowa. Authorized capital, $50,000; paid in capital, $30,000. Joseph Keck, President; R. R. Bowland, Cashier. Authorized to commence business February 6, 1871.

1787—The Union National Bank of Oshkosh, Wis. Authorized capital, $100,000; paid in capital, $55,750. D. L. Libbey, President; R. C. Russell, Cashier. Authorized to commence business February 9, 1871.

[On account of the irregularity of the mails we have not received our foreign letter, for some weeks, in time for our paper. We hope its publication will not be interrupted hereafter.—ED. CHRONICLE.]

[From our own correspondent.]

LONDON, Saturday, January 28.

Business has been in a state of suspense during the whole of the week, owing to the critical position of affairs at Paris. To-day the welcome intelligence has been received that the terms of an armistice have been arranged, which are to apply not only to the armies at Paris but are to extend to the whole of France. This would indicate that both sides are now anxious to bring about a termination of hostilities, and evinces a desire that the combatants are desirous of returning to the remunerative labors of peace. Intelligence has also been received from Berlin stating that Count Bismarck is desirous of making peace with France on the basis of a cession to Germany of Alsace and a portion of Lorraine. This to non-combatants, is very satisfactory, as it was feared from the tone of the German press, that the German authorities would insist upon a much larger acquisition. Indeed, only this week, the line of the Meuse was spoken of as to form the future boundary between France and Germany, so that all the strong fortresses commenced by Vauban, and strengthened by modern skill, would be transferred intact from French to German hands. If the Germans are content with Alsace and a portion of Lorraine, and the razing of the fortresses which have been a threat to Germany, public opinion will, if I mistake not, support the demands of the German Empire, in the event of France not acceding to them. To France, however, peace is becoming a necessity, and it is but too evident that it is to the interests of Germany to bring the struggle to a close. If such can be obtained it will not be too late to plant a considerable area of land with spring crops, and in the early summer some relief may be obtained. But the losses in live stock and in agricultural produce to France during the war have been so enormous that to repair them in the course of a few months would be impossible. It is desirable, therefore, that before the last opportunity for sowing for this year's harvest is lost, the warriors of 1870 will have returned to their peaceful avocations.

The horrors of the French Revolution are still uppermost in the minds of many, and consequently the future of France is still regarded with anxiety and distrust. The riots, however, which have taken place in Paris during the investment, few as they have been, have, it is satisfactory to notice, been put down by the National Guards, and it is hoped, therefore, that when foreign matters cease to occupy these kinds of Frenchmen, and home affairs demand their most serious attention and consideration, the party of order and of peace will be sufficiently supported to prevent all attempts at senseless popular outbreaks. The extreme party at Belleville, headed by Flourens and other Red Republicans, will, no doubt, attempt to disturb the public mind by urging on the people the necessity of the Communes which are to overawe the National Assembly, and which might again lead to the horrors of 1792. But the Parisians have of late shown more good sense; the extreme Republicans are not popular; and any attempt at disturbance by them will, in all probability, be frustrated by the energy and determination of the middle class. It is, however, but natural that much anxiety should be felt regarding the future of France, and the success which will attend the establishment of another Republic.

A fair amount of trade has been carried on in this country during the week, and a continued absence of speculation has been apparent. The dealings, therefore, have been of a strictly legitimate character, and may be considered to have been attended with a fair average profit. The effect of the probable termination of the war has been to give a healthier tone to business, but not to lead to any natural increase in the volume of trade. The following commercial report relates to Manchester:

Prices remain very firm in this market, but rather a quieter tone has prevailed to-day, and buyers have made fewer inquiries than they made on Wednesday. Quotations are now rather higher than they were last Friday, but buyers pay an advance with great reluctance, and have apparently no faith in a rise. The reported capitulation of Paris on Wednesday gave an impetus to prices for the time, and, although the surrender has not been confirmed, it is now looked upon as all but accomplished, and probably the announcement of the actual fact would not stimulate prices much higher. Consumers of cotton continue to supply themselves freely, and have paid full prices this week, but there seems to be no speculative excitement whatever at present about the Liverpool market, which is entirely under the control of spinners. The receipts at the ports continue large, and the weekly shipments are ample. The imports are freely offered for sale as soon as they arrive, and, indeed, are often sold before arrival, so that consumers need not have the slightest fear of any scarcity of cotton for many months to come. Both spinners and manufacturers are so well engaged that they can dispense with further business for a few days without making any reduction in their prices. Since last week there has been less pressing for early deliveries, and manufacturers who have sold shirtings for future delivery until the end of February have covered their immediate necessities, and have secured enough of yarns to last them for a few weeks.

The demand for export yarns has not been brisk to-day, and spinners have found some difficulty in obtaining the prices which they asked.

Severe weather has again visited us, and the condition of the Wheat has greatly improved. Millers, consequently, have shown more disposition to operate, and as there is every probability of France becoming a large customer, both here and in the larger producing markets, the quotations are somewhat firmer. An advance of about one shilling per quarter in prices has been established, and a greater improvement is expected during the next few weeks. Regarding the growing crop the accounts so far are not very encouraging. In many places the plant looks yellow and somewhat unhealthy, but if a seasonable Spring succeeds so seasonable a winter as we are now enjoying the check the growth of the plant is now experiencing will prove of great benefit. An agricultural report from Yorkshire states that the present is a very trying season for the farmer. Since the end of November, what with heavy rains, floods, and the long frost, all agricultural work has been at a stand. The scarcity of food from last year's drought caused farmers to graze their seed fields late into the autumn, and but a small breadth of wheat was sown, and which, where now exposed, looks very yellow and sickly, and where in the low country it has been flooded has perished altogether. The turnip lands have been husbanded by recourse to corn cake and linseed cake during the storm, but more spring wheat will have to be sown than for many years.

The following statement shows the imports and exports of cereal produce into and from the United Kingdom for last week, and since the commencement of the season, compared with the corresponding periods in 1869–'70:

	1870. Imports.	1870. Exports.	1869. Imports.	1869. Exports.
Wheat.....cwt.	560 317	16,428	1,388,774	2,034
Barley	10,383	4,219	270,229	11
Oats	46,308	4,067	357,441	240
Peas	...	139	84,383	213
Beans	7,157	275	57,583	. .
Indian corn	72,659	60	409,072	....
Flour	36,111	29,363	227,434	807
SINCE THE COMMENCEMENT OF THE SEASON (AUG. 28).				
Wheat.....cwt.	14,353,215	1168,122	20,788,446	110,230
Barley	3,639,415	19,534	3,334,853	6,170
Oats	3,993,746	373,095	5,074,129	24,384
Peas	388,288	28,664	681,557	6,588
Beans	626,489	4,875	861,278	942
Indian corn	7,665,310	31,563	9,076,076	5,656
Flour	1,980,617	445,232	3,061,154	7,844

There has been a slight tendency to firmness in the money market. Considerable quantities of gold continue to be sent away to Germany, and should a peace be arranged, there is no doubt but that the export movement will assume important proportions. France, unquestionably, will ask for a large loan, of which a large proportion will be reserved for this country, and Germany may require additional aid. The prospect is, therefore, that money will become dear.

The course of political events, and not trade, will, however, determine the rates during the next few weeks. The quotations are as follows:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	2½@..	4 months' ba'k bills	3½@3¾	2½@3
Open-market rates:			6 months' ba'k bills	3½@3¾	2½@3
30 and 60 days' bills	3 @...	2½@..	4 and 6 trade bills..	3½@4	3 @3½
3 months bills	3 @3½	2½@..			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2½	1½
Discount houses with 14 days' notice	2½	1½

The condition of the continental money markets is naturally uncertain. According to the latest advices, the following were the quotations at the leading cities;

Digitized by Google

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2½	—

Madrid	5	5	5	5
Hamburg	—	—	4	4
St. Peters burg	5	8	5½	7

There has been a good demand for gold for export, but silver is rather quieter, the continental inquiry having been satisfied. In the rates of foreign exchange the variations are not important. The following prices of bullion are from the circular of Messrs. Pixley & Co.:

GOLD

	s.	d.	s.	d.
Bar Gold ..... per oz. standard.	77	9	@—	—
do fine ..... do	77	9	@—	—
do Refinable ..... do	77	11½	@—	—

Five franc pieces ..... per oz.	—	—	none here.	

Quicksilver, £11 to £12 per bottle; discount 3 per cent.

In the Stock Exchange, speculators have refrained from operating largely, owing to the crisis in political affairs, but as the crisis is likely to lead to a peaceful result, the markets have been decidedly firmer in tone. Prices have improved during the week, but not to any great extent. The following were the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'sday.	Thu'sday	Friday.	Sat'day
Consols	92¾-92¾	92¾-92¾	92¾-92¾	92¾-92¾	92¾-92¾	92¾-92¾

Messrs. Morgan have issued to-day the prospectus of a loan of £500,000 in 6 per cent. bonds for the United Canal and Railroad Companies of New Jersey. The bonds are issued at 92 per cent. The prospectus states that it may be mentioned as an evidence of the value attached in the United States to this property, that the Pennsylvania Central Railroad Company has recently offered to lease it in perpetuity, paying, in addition to the interest on the debt, a dividend of 10 per cent. per annum to the holders of the common stock of the Companies. This proposal is now under consideration.

The principal secured by the bonds is made payable at par in 1894, and the coupons for interest, at the rate of £6 per cent. per annum, will be made payable half-yearly, on the 1st of September and 1st of March in each year; the first half-yearly payment will fall due 1st September next. All payments will be made in London, in sterling money, clear of all taxation in the United States.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a large decrease in both dry goods and general merchandise. The total imports amount to $4,651,876 this week, against $9,705,704 last week, and $5,590,534 the previous week. The exports are $4,651,876 this week, against $2,636,581 last week, and $5,134,499 the previous week. The exports of cotton the past week were 18,909 bales, against 14,027 bales last week. The following are the imports at New York for week ending (for dry goods) Feb. 3, and for the week ending (for general merchandise) Feb. 4:

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$2,598,298	$2,734,227	$2,843,545	$1,475,634
General merchandise	2,448,706	2,496,120	3,494,973	3,176,242
Total for the week	$5,047,004	$5,230,347	$6,338,518	$4,651,876
Previously reported	13,505,613	15,356,187	13,956,817	20,937,030
Since Jan. 1	$18,552,617	$20,586,534	$20,295,335	$25,588,906

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie from the port of New York to foreign ports, for the week ending February 7:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,678,180	$2,660,313	$3,461,230	$4,727,384
Previously reported	16,578,713	14,777,193	14,675,326	21,340,763
Since Jan. 1	$19,256,893	$17,437,506	$18,136,556	$26,068,147

The following will show the exports of specie from the port of New York for the week ending February 4, 1871:

Jan. 30—Str. City of London, Liverpool—		American silver	$38,991
French gold	$7,800	Feb. 1—Str. Tybee, Porto Plata—	
British gold	14,640	American silver	10,223
British silver	2,900	Feb. 4—Str. Rising Star, Aspinwall—	
Gold bars	3,700	American silver	10,600
Silver bars	138,348		
Feb. 1—Str. Russia, Liverpool—		Feb. 4—Bark Thos. Dallett, Porto Cabello—	
Silver bars	251,259	American gold	30,000
Gold bars	33,696	Feb. 4—Str. City of Antwerp, Liverpool—	
Mexican silver	93,000	Foreign gold	38,875
British gold	1,500	Foreign silver	12,500
American gold	515,000	Gold bars	37,600
Feb. 1—Schr. S. C. Evans, Arroyo, P. R.—		Silver bars	193,565
Total for the week			$1,423,699
Previously reported			1,981,822
Total since Jan. 1, 1871			$3,405,521
Same time in 1870	$2,932,693	Same time in 1867	3,190,309
1869	3,214,379	1866	2,827,804
1868	7,149,331	1865	3,253,070

The imports of specie at this port during the past week have been as follows:

Jan. 30—Str. Ocean Queen, Aspinwall—		basco—	
Silver	$8,120	Silver	$3,900
Gold dust	8,196	Feb. 3—Str. Cleopatra, Havana—	
Feb. 2—Str. Morro Castle, Havana—		Gold	500
Silver bars	3,000	Feb. 4—Schr. S. S. Bickmore, Turk's Island—	
Feb. 3—Schr. Retorno, To-		Silver	500
Total for the week			$24,216
Previously reported			170,558
Total since January 1, 1871			$194,774
Same time in 1870	$2,030,238	Same time in 1868	$132,616
1869	600,794	1867	155,514

Railroad Management and Broad Street Circulars.—In the last number of the CHRONICLE, under miscellaneous items, was published a circular of Mr. Rufus Hatch, of 17 Broad street (not the firm of Fisk & Hatch, as some newspapers have erroneously stated), in regard to railroad management, land grants, &c., and directed especially against the Chicago and Northwestern Railroad. This circular was by accident not inserted under the heading "Banking and Financial," where it would have appeared to all our readers in its true character, as an advertisement regularly ordered and paid for. As a consequence of this omission we find that our position in regard to this circular, and others which had been issued by the same party, has been entirely misunderstood, and that we have been supposed to endorse their conclusions, or at least to approve of the matter contained in them, an inference which is far from the truth. The most that we have said at any time in regard to various circulars and pamphlets issued from time to time in Wall street for speculative purposes, simply amounted to this—that it seemed hardly fair to consider the publication of a speculative circular *per se* a dishonorable transaction, and that only when there was *misrepresentation or concealment of facts* were these publications calculated to do harm and unjustly depreciate the value of property. It appears, however, that the hostility of leading bankers to these circulars is based upon the very exception which we have made—namely, that they do contain false or garbled statements which are calculated to greatly deceive parties not familiar with the true facts. It would be almost impossible for us to go through every pamphlet, circular or hand-bill issued on the street, and sift out minutely the truth from the error, but we most heartily concur with all respectable men in condemning every false or garbled statement made in print, in writing or verbally, for the purpose of damaging the true value of stocks, bonds or other property, and shall not knowingly give publicity to any such matters in these columns.

On the other hand, when a person can show up by true statements some gross abuse in corporate management, direct attention to some violation of the rights of stockholders by officers and directors, or can show where the general public is being taxed enormously to support a monopoly, we think that much liberality should be shown toward the efforts made to accomplish purposes which can hardly be considered other than useful, whatever may be the immediate object of the party doing it.

The Burlington, Cedar Rapids and Minnesota Railroad.—The completion of this road was accomplished on Jan. 26, the construction having been carried out with great energy. The completion of this link shortens the distance of all rail between St. Louis and St. Paul fully 100 miles, as follows: St. Louis to Burlington via Rockford, Rock Island and St. Louis Railroad to Monmouth, and Chicago, Burlington and Quincy Railroad from Monmouth to Burlington, 200 miles; Burlington to Cedar Falls, 170; Cedar Falls or Waterloo to Austin, 80; Austin to St. Paul, 100 miles—Total, 550 miles. We learn that the Company has made favorable arrangements for freight and passenger traffic with the Chicago, Burlington and Quincy Railroad Company, which arrangements will add largely to the profits of the Burlington, Cedar Rapids and Minnesota Railroad, as well as increasing its traffic receipts. The Chicago, Burlington and Quincy Railroad Company has further agreed to set aside 40 per cent of the gross earnings realized from the business with the Burlington, Cedar Rapids and Minnesota Company for investment at par in the bonds of the Burlington, Cedar Rapids and Minnesota Railroad Company. Much credit is due to the financial agents of the Company, Henry Clews & Co. of this city, who, spite of all the monetary difficulties of the past six months, have continued to successfully dispose of the bonds of the Company so well that, it is now stated, only $400,000 in all remain unsold. These bonds are 7 per cent gold first mortgage bonds on a completed road, amounting to only $20,000 per mile (which has cost $40,000 per mile), and are for the present offered at the original subscription price of 90 and accrued interest in currency.

The New York Life Insurance Company.—The annual statement of this large and popular company will be found in our columns to-day. The immense assets of the company, $15,878,517,

Digitized by Google

its receipts during the year 1870 amounting to $6,569,716, and the total amount now insured, as shown by its books January 1, 1871, to be upwards of $111,000,000, all speak of the remarkable growth of the company and of the great favor which it has met with among that prudent class of the community who insure their lives. It will be observed that this is the twenty-sixth annual statement, and from the length of time that the company has been in operation it may be concluded that its average proportion of losses from the death of parties insured, is as great now as it will be at any future time, an important fact which does not apply to companies which have been in operation but a few years. The list of directors includes a number of the most esteemed business men of New York, and its officers, Messrs. Morris Franklin and William H. Beers, are well known among the leading insurance men of the day.

The Orient Mutual Insurance Company (Marine.)—The statement of this well known company will be found in our advertising colums, to which the attention of shippers is particularly directed. The total amount of premiums received during the year 1870 was $1,056,851; losses and expenses were $492,594; total assets Dec. 31, 1870, $1,827,418. The Orient includes among its trustees many prominent shipping men, Bankers and Merchants, and continues under the management of its esteemed officers, Mr. Eugence Dutilh, President; Mr. Alfred Ogden, Vice-President; and Mr. Charles Irving, Secretary.

BANKING AND FINANCIAL.

—BANKING HOUSE OF HENRY CLEWS & Co., 32 WALL ST., N.Y.—Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed upon all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfees of money to any distant point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upwards on

The Imperial Bank,
Messrs. Clews, Habicht & Co., } London.
The Provincial Bank of Ireland, Dublin and branches.
The National Bank of Scotland, Edinburgh and branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Governments and other investment securities; also Gold and Exchange.

Advances made to our dealers at all times on approved collaterals at market rates of interest.

Collections made in any part of the world.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

Bankers and Dealers in Government Securities,
No. 5 Nassau street,
New York, Feb. 3, 1871.

The Six Per Cent. Gold Bonds, of the Central Pacific Railroad Company have an established character which renders them especially desirable for investments.

They are based on one of the most important and valuable railroad lines in the world, fully completed, amply equipped, and already earning large revenues, which must increase enormously with the growth of the country it traverses and the development of trade with Japan, China and Australia, a large portion of which must find its way across the American continent.

Holders of Five-twenty Bonds (which are liable to be funded at a low rate of interest within a short time) may exchange them for Central Pacific Bonds, bearing the same rate of interest, and save from 15 to 18 per cent. for reinvestment, while their security remains as reliable as before.

They are dealt in at the New York Stock Exchange, and at several of the more important Bourses of Europe. We have introduced them into our regular business upon the same basis as Government Bonds, and buy and sell them as freely at current market rates, and are prepared to furnish them to investors or others at daily quotations.

We buy and sell Government Bonds, Gold and Coupons, execute orders in miscellaneous Securities at the New York Stock Exchange, make collections, receive deposits subject to check at sight, allow interest on balances, and do a general Banking business.

FISK & HATCH.

Adams Express Co	2	Mar. 1.	Feb. 17 to Mar. 2.

FRIDAY EVENING, February 10, 1871.

The Money Market.—The extreme ease in money previously noticed has still continued, until loans have been made as low as 3 per cent. on government collaterals. The bank statement of Saturday, 4th inst., was favorable, particularly in the gain of legal tenders, and indicated the release of the funds "locked up" some ten days before. The returns showed an increase of $509,407 in loans, a decrease of $1,186,872 in specie, a decrease of $84,213 in circulation, an increase of $4,282,930 in deposits and an increase of $4,696,354 in legal tenders; the net result of these changes making the banks $2,459,802 stronger in their excess over legal reserve—the whole amount of excess over 25 per cent. of their liabilities being $18,632,785.

The comparative dullness in stock speculation is one cause of the extremely low rates for money, as there is an unusually small demand for call loans from that class of operators who have generally seized upon the periods of easy money to engage in speculative transactions of greater or less extent.

The larger amount of business during the week has been done at 4 and 5 per cent., with exceptions yesterday and to-day as low as 3 per cent., while on some old contracts 6 and 7 is still paid. There seems to be every prospect of continued ease in the market for some time to come, as there are not at the present moment any indications of a largely increased demand for money, and any turn in the position of foreign affairs can hardly be expected to influence our market materially.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	Feb. 4, 1871.	Feb. 5, 1870.	Feb. 6, 1969.
Loans and discounts	$270,789,777	$264,514,119	$266,541,732
Specie	26,283,573	89,997,246	27,989,404
Circulation	31,764,129	33,746,481	34,246,436
Net deposits	215,888,595	214,739,179	196,602,899
Legal Tenders	54,187,393	58,348,884	53,424,183

For commercial paper the demand has been good, with very little paper offering. Brokers report that they could easily negotiate a great deal more of first-class paper than they can now obtain, and under these circumstances and the low rates for money on call, the fair quotable rate for first-class names is lower, and may be given at 6@7 per cent. The rates on second-class paper are also lower, with comparatively little offering. The small demand for money to use in business enterprises is shown by the unusually small amount of commercial paper offered for sale. At this time last year, when money was quoted at 6@7 per cent., prime paper was quoted at 7@8.

		per cent

United States Bonds.—During the early part of the week the market was strong on a moderate business, but yesterday and to-day, with increased purchases, prices have sharply advanced, and five-twenties of 1867 are quoted at the close 110⅛@110¼, against 109½ last week. Several influences have combined to produce this advance in Government bonds. In the first place the aspect of European affairs is considered favorable to a permanent peace, and this, in connection with the amicable negotiations now progressing between England and the United States for the settlement of all questions in dispute between the two countries, including the Alabama claims, has produced a more hopeful and settled feeling in the financial markets at home and abroad than has been seen for a long time previously. A second and more immediate cause for the advance is found in the action of Secretary Boutwell in advertising that subscription books for the new 5, 4½ and 4 per cent. funding loan will be opened on the 6th of March proximo; the effect of this announcement having been to strengthen prices under the general impression that Mr Boutwell's efforts will be directed towards bringing the price of five-twenties up to par in gold. As to the success of the new loan, the more general opinion seems to be that it has been placed upon the market prematurely, and that the wiser course would have been to wait until our securities had so improved with the growing credit of our Government that a five per cent. loan could be negotiated without difficulty at par in gold. Whatever the result in the open market may be, it is to be hoped above all things that no compulsory measures will be used to force the new bonds upon the banks or other holders of five-twenties, as no legislation could be more ill-advised than that which disregards the rights of parties who have entered into engagements and assumed obligations relying upon the good faith of the Government. The demand has apparently been well distributed, and sales have not generally been in large blocks; the German bankers have purchased to some extent on small orders from abroad. At the Treasury purchase of $2,000,000 on Wednesday, bids were made exceeding $7,000,000, but without causing any subsequent weakness. A sharp demand for currency sixes, of which the supply is quite small, has put the price up to 112½.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, Feb. 4.		Monday, Feb. 6.		Tuesday, Feb. 7.		Wednesd'y Feb. 8.		Thursday, Feb. 9.		Friday, Feb. 10.

* This is the price bid and asked, no *sale* was made at the Board.

State and Railroad Bonds.—The list of Southern State Bonds has been comparatively dull, Tennessees, Virginias, North and South Carolinas having been the principal features. North Carolinas, old and new, have advanced 2@3 per cent. under reported speculative manipulations. The latest reports from Alabama are very encouraging as to the prospect of payment of interest on the endorsed bonds of the Alabama and Chattanooga Railroad. The Legislature appears to be decidedly in favor of action, which will maintain the financial honor of the State, and those best informed upon the subject anticipate that a resolution will be passed within a few days directing the immediate payment of the defaulted interest. The Pacific railroad securities have been very strong on Centrals, which have advanced to 93¼@93¾ on an investment demand and purchases also by foreign bankers. Union Pacifics have generally been firm, with Incomes as the chief feature, prices closed as follows: First Mortgages, 79½@79¾; Land Grants, 69¾@70¼; Incomes, 68@69, and Stock, 19⅛@19¼.

No further action is reported at Washington in regard to the payment of interest, but it is expected that the committee will report favorably to the roads.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, Feb. 4.		Monday, Feb. 6.		Tuesday, Feb. 7.		Wednesd'y, Feb. 8.		Thursday, Feb. 9.		Friday, Feb. 10.

* This is the price bid and asked, no *sale* was made at the Board.

Railroad and Miscellaneous Stocks.—There has been but little activity in the stock market, notwithstanding the extreme ease in money, and it seems evident that the strong speculative spirit which has characterized the dealings in stocks in times past, is now wanting. Either the confidence of outside buyers has been severely shaken, or else the cliques of prominent brokers and speculators in the street fail to have the same power to combine and put up prices, which they formerly had. Prices have been firm and steady, showing a slight advance on most of the leading favorites, and a larger advance on Ohio and Mississippi, and Hannibal and St. Joseph. Union Pacific closes at 19½ against 19 last week, having sold in the meantime up to 20¼. Lake Shore was affected favorably by a report that the earnings for the months of December and January were $370,000 larger than in the same months last year, though it does not appear that this report was official. The earnings of leading roads so far as reported for the month of January are given below and compare very favorably with the same month of last year, showing an increase in every case.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The Gold Market.—There has been some speculative activity in gold based chiefly upon the theory which we have previously noticed that the adjustment of European difficulties would lead to an important demand for export—a theory by no means encouraged from events which have thus far transpired—and that a rise in the premium would naturally follow. Upon this idea it is said that a clique recently operating for lower prices in stocks are now expecting a rise in gold. On the other hand the weight of opinion with the foreign bankers seems to favor a lower premium, and it is supposed also that Secretary Boutwell's efforts will all be shaped so as to keep down the premium for the purpose of equalizing the prices of gold and bonds. Exports of the week have not been large. At the Treasury sale on Thursday bids were made to the amount of $3,139,900, and nearly the entire $1,000,000 was awarded to a leading stock brokerage house. Rates for carrying have ranged all the way from 6 per cent. to "flat," the rates to-day having been 2, 3, 3½, 4 per cent. and flat.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, Feb. 4	111¼	111¼	111¾	111¾	$56,859,000	$2,637,356	$2,319,245

Patriot doubloons	15 50	@	15 65	Mexican dollars	1 03 @ 1 03¼
American silver (old coinage)	1@2 p. c. premium.			Spanish dollars	2@3 p. c. premium.
				South American dollars	par.

Foreign Exchange.—Rates have been very firm all the week and hardly varied from 109⅝@109¼ for bankers' 60 day sterling. To-day a leading drawer was offering short sight bills at a fractional decline from previous rates, but this was regarded as quite exceptional and not as an indication of any weakness in the market. Commercial bills are scarce and are selling very close to best bankers. Cotton bills have not been very abundant, and indeed these bills except as they come through the Southern banks, are not now seen here in any large amounts. Our own bankers also purchase them largely in the Southern cities. Cotton exports of the week have been 95,982 bales, producing $5,966,000 in gold, against 63,188 bales in the same week last year, producing $6,055,000 in gold. The total exports of cotton from Sept. 1 to date have been 1,504.993 bales, which, at 15c. per pound and with gold at 110, would amount to $94,404,700 in gold; in the same time last season the exports were 1,037,914 bales, which produced $99,450,000 in gold, taking cotton at 25c. per lb. and gold at 120 From the nature of the case, these results are only approximate

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3 The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of United States and State Securities will b published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

The Financial Reports of Railroad and other Companies are published in the CHRONICLE as soon as issued, and indexed in the table of stocks on the next page, as stated above in Note 3. A complete record of these reports is thus obtained in a file of this paper.

[Pages 1 and 2 of Railroad Bonds have been crowded out this week by a press of editorial matter.]

Rutland Railroad.—The annual meeting of the Rutland Railroad Company was held at Rutland, Vt., on the 26th ult. The report of the President makes the following showing: During the year the Directors had leased a section of the Vermont and Massachusetts road for fifty years at the rate of $42,000 per annum for the first five years, $48,000 for the next five, and $54,000 for the last five. They had also leased the Vermont Valley road of E. R. Birchard and John B. Page, who had been operating under a private lease at the rate of $65,000 per annum for four and one-half years and $72,000 per annum thereafter. They had also concluded negotiations for the lease of the Addison railroad as soon as it shall be completed. They further proposed to purchase the individual stock of the Burlington Steamboat Company. The other leases by the Company are of the Montreal and Plattsburgh railroad, at $42,000 per annum and taxes, and the Whitehall and Plattsburgh railroad, at $20,000 per annum and taxes. The aggregate annual rentals amount to $169,000. The operations of the road for the year ending October 31, 1870, show the following result:

Receipts	$1,941,509 92
Expenses	755,918 25
Net earnings	$285,641 67

Among the miscellaneous items of expense are $336,800 for new rolling stock, and $194,110 for repairs on account of the great freshets last year. The President also stated that in accordance with a stipulation with Messrs. Cheever and Hart, representing the holders of the first mortgage bonds, the entire amount of those bonds had been paid, the last payment having been made during the present month. The terms of the twenty years' lease of the roads operated by the Rutland Company to the Vermont Central and Vermont and Canada Railroads, were explained by Governor Page. In the first place the lessees guarantee the payment of the interest at seven per cent. of the entire amount of preferred stock of $4,300,000; on $500,000 of the seven per cent. bonds of 1870, and on a like amount to be issued at eight per cent, making a total from this source of $376,000 per annum. The lessees also guarantee the payment of interest on $2,700,000 common stock at the following rates; For the first year, nothing; for 1872, one and one-half per cent; for 1873 two per cent; for 1874 three per cent; for 1875 five per cent; for 1876, 1877 and 1878 six per cent; for 1879 seven per cent, and at the rate of seven per cent for the remaining eleven years. The steamer Oakes Ames is leased at the rate of $10,000 per annum, and the lessees also pay $8,000 per annum for supervision and organization.

The average yearly proceeds from these several sources is about $171,000. This added to the proceeds from the preferred stock makes the yearly rental due the Rutland Company about $547,000. It is calculated that this sum, with the rental from the real estate exempted, is equivalent to an average for the twenty years of six per cent on the common stock, with a balance of about $12,000 as security for this rent.

The Vermont Central issues to the Cheshire and Connecticut River Railroads monthly orders, making the collections by them on northern freight payable directly to the Rutland Company. These orders are equal to $30,000 monthly on the Connecticut River and to $10,000 monthly for the first two years on the Cheshire, and $20,000 thereafter. This security is regarded as ample in every respect for the prompt payment of the rent.—*Daily Bulletin.*

Indianapolis, Cincinnati and Lafayette.—The receivers of this road have reported terms of compromise entered into between themselves and the Whitewater Valley Co., looking to a cancellation of the lease of the latter road now held by the former. The agreement in substance is that the I., C. & L. Co. shall convey all its rights, title and interest in the Whitewater Valley Road to the same, agreeing to operate it, however, until May 1st, 1871, at which time the road and all equipments will be turned over to the Whitewater Valley Company, as well as the net profits that may accrue.

The Vermont Central Railroad—Has not yet taken possession of the Rutland, the representatives of the contracting parties not as yet having come to a full agreement on some of the minor points involved.

—It is stated in the Richmond *Dispatch* that orders have been given to let the whole line of the Chesapeake and Ohio Railroad, not already under contract, on the 1st of April. And it is further ordered by the board that the road shall be in operation from the terminus at the junction of the Big Sandy river with the Ohio, to the Falls of the Kanawha, in July next.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, February 10, 1871.

The Trade during the past week has not shown general activity. The condition of the streets has not improved, and the ice in the harbor is again very heavy and troublesome, greatly delaying shipping operations. It will illustrate, however, the capacity of New York, as a great market, to state that since the fall of Paris, there have been purchased here ostensibly or really for export, about a hundred thousand barrels of flour, twenty thousand barrels and tierces of beef, and eight thousand barrels of pork, sufficient to feed Paris for three months; and that this large movement has scarcely done more than stiffen prices.

Cotton has declined and Middling Uplands close at 15¼c., with Low Middlings, March to June delivery, at 14⅛@15c. Breadstuffs have been active and close somewhat firmer, in some cases. Extra State Flour, $6 90@7 10; New Spring Wheat, $1,54@1 57; Mixed Corn, 83@84c.; prime Western Oats, 67c.

Groceries at a slight decline in Coffees, Sugars and Molasses have been more active; Rice firmer; an important auction sale of teas went off at low prices. Fruits without further improvement. Fish firm. Whiskey dull. Hops firmer, on an export movement. Hay declining.

Leaf Tobacco has become dull. Buyers are not disposed to increase stocks at present prices; but rather wait for the new crop to come forward, when better assortments will at least be offered, if no lower prices accepted. The sales for the week have been only about 400 hhds. of which one-half for export, prices ranging from 7 to 7½c. for lugs and 7⅞@11c. for low to fine leaf. Seed Leaf, on the contrary, has been more active; the new crop, (1870), begins to come forward, and the better assortments have attracted the attention of buyers. The sales embrace 230 cases Pennsylvania crop of 1870 at 22½@25c.; 170 cases Ohio, crop of 1869, on private terms, and about 120 cases wrappers in various lots, at 35@65c. Spanish Tobacco in good demand; sales 90 bales at 85c. gold in bond, and 500 bales at 85@$1 02½ currency, duty paid. Manufactured Tobacco is quie.. In Provisions a good export demand, leading to some speculation, has prevailed, but the close is rather quiet, with the prices realized early in the week not fully supported. Mess Pork closed at $22 75@23 for New and Prime Mess; $22 50@22 75 an advance in the latter description. Lard in good export demand at 13½c. for Prime Steam. Bacon doing better in sympathy, but not active; Western long and short clear, 11⅞@12c. Beef held for an advance, but quiet. Butter and Cheese, though nominally unchanged, are really quite unsettled. Tallow has been active and firm.

In Oils the chief feature of the market has been a large movement in Crude Sperm, early in the week, with the price advancing to $1 35, but the Oil market is generally firm. Naval Stores show a decided advance—Strained Rosin at $2 65, and Spirits Turpentine 51@52c—mainly the result of operations in Wilmington. Petroleum has become dull and prices have receded to 25c. for Refined and 15c. in bulk for Crude.

Hides are slightly lower for gold, owing mainly to the recent advance in the premium; dry Montevideo, 22½@23¾c., gold, and dry Buenos Ayres, 24½@25c., gold, with more doing. Leather is dull. Skins quiet.

East India Goods have been quiet and unchanged. Metals irregular, with more activity reported in Pig Iron.

Wool meets with a brisk demand at full prices. Receipts and stocks are comparatively small.

Freights have been dull, and rates for weight have declined; Wheat to Liverpool was taken to-day at 6d. by sail and 7d. by steam, with Cotton rates weak at 5-16@⅜d. by sail, and ⅜@7-16d. by steam. A notable transaction to-day was the charter of a vessel with Wheat to Lisbon, 18c.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles of commerce from the port of New York *since* January 1, 1871, to all the principal foreign countries, and also the *total* export of the same articles for the last week and since January 1
